PREPARE FOR THE HOLIDAYS

☞ **Second Consignment**—75 cases of **Holiday Azaleas for Christmas, Kentias Palms, Latania Borbonica,** and, to make the importation complete, a **Third Consignment** of our well known specialty, the **Araucarias, Robusta Compacta, Excelsa Glauca** and **Excelsa,** have just arrived, per steamer Menominee, on Oct. 23rd, from Antwerp, Belgium. Now, with or in connection with our already immense stock of Holiday Plants, the so well known firm of Godfrey Aschmann will take first rank in importing, growing and shipping of Holiday Plants,

CHEAP, GOOD AND RELIABLE.

Therefore, don't be deceived. Be on the look out. Save money. Buy only from the man who is well known to be in the position to give you both bargains and good stock besides.

Araucaria Excelsa Our [illegible]

Warning—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias. For decorative purposes, in connection with palms, they will make a fine display.

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old 5, 6 and 7 tiers 25, 28, 30, 35, 40-in. in height, $1.00 $1 25, $1.50, $2.00 to $2.50 each

Araucaria Excelsa Glauca and Robusta compacta, 6-7 in. pots, fine bushy plants ..... $1.00, $1.25, $1.50 $2.00 each

Araucaria Excelsa, out of 5, 5½, and 6-in. pots, 2 to 3 years old, 3, 4 and 5 tiers, 14, 16, 18, 20 to 30 inches high. ..... 50c, 75c and $1.00 each

To make room for Azaleas, Palms, etc., just arrived from Belgium, ☞ Just look! We can sell you an **Araucaria Excelsa,** 5¼-in. pots, 3 to 4 tiers 12, 14 to 16 in. high, at only 30c to 35c. Be quick about it.

Kentia Belmoreana, 4 year old, 40 to 50 inches high, $1.00 $1.25 and $1.50.

Kentia Forsteriana, 4 year old, 30 to 35 inches high, $1.00, $1.25, $1.50 and $2.00.

Kentia Forsteriana, 4 year old, 24 to 26 inches high, 50c to 75c.

Kentia Belmoreana, 4 year old, combination or made up of 3 plants, 26 to 28 inches high, 75c, $1.00 and $1.25

Kentia Belmoreana, 4 year old, single, 26, 28 to 30 inches high, 75c, $1.00 and $1.25.

Cocos Weddelliana Palms, made up of 3 plants, 4 to 5-in. pots, 30c and 40c; 3-in., 15c, 18c and 20c; 4-in., 25c.

Asparagus Plumosus Nanus, 2½-in., $3.00 per 100: $25.00 per 1000; 3-in., $5.00 per 100; 4-in., $10.00 per 100.

Asparagus Sprengeri, large size, 4-in., 15c; medium size, 4 in., 10c; 2½-in., $3 00 per 100.

Ficus Elastica (Rubbers) 5¼ to 5½-in. pots, very fine stock, 25c; 5½ to 6 in. pots 25 to 28 in high, 35c, 40c and 50c; 7 in. pots, 30 in. high and up, 75c to $1.00

Cineraria Hybrida Grandiflora, Aschmann's well-known strain, 2¼-in. pots, $3.00 per 100; 3-in. pots, $6.00 per 100; 4-in., 10c.

Primula Obconica Grandiflora, assorted colors, in bloom medium large, 5½-in., 25c bushy.

Poinsettias, in bloom 3-in., 15c; large 4-in., 25c; 5½ to 6 in. single or branched, 35c 40c to 50c.

Cyclamen Grandiflora, 4-in., 25c; 5¼-in., 35c.

Primula Chinensis, John F. Rupp's so well known strain, assorted colors, 4-in., 10c; 5¼-in. pots, $2.50 per doz.

Begonia Gloire de Lorraine.

This is another great specialty of ours. We have grown them very extensively for the past ten years. Our special treatment makes the flowers very bright. We have the bright red and the pink Lonsdale. Have a houseful. Now ready, in bloom for Thanksgiving Day and Christmas, 6-in. pots, 50c, 60c 75c to $1.00; 3-in. pots, 12c to $1.00.

Begonias New Improved Erfordi, Aschmann's Beauty, the finest Christmas and winter blooming Begonia in existence. Their beautiful pink and bright red large flowers are a puzzle to anyone who sees them in bloom; in flower now and all the winter through; large 4-in. pots, 20c; large 5¼-in. pots, 35c. Bear in mind this is an immense bloomer which has no equal.

Begonia Gloire de Cincinnati, 5½-in. pots, 50c to 75c; 6-in., $1.00 to $1.50.

Just Arrived with the Azaleas.

A fine consignment of **Latania Borbonica,** in first-class condition, perfect foliage, large stock, 8 good leaves, height given in consular invoice at 35 to 40 in., fit for 7 to 8 in pots, $1.00 to $1.50.

Combination Latania Borbonica (3 plants) in a 6-in. pot, which gives them a fine appearance, bushy about 13 to 14 leaves to a pot, 6-in. pots, 60c, 75c to $1.00.

AZALEAS.

Another specialty of ours are now in. **Azalea Indica,** New stock. They are all in fine condition, full of buds.

Christmas Blooming Azaleas.—Forced by ourselves are showing color, and are gradually cooled off for transportation. Just in prime state for Christmas. We have the so well adapted standard varieties—Deutsche Perle, double white; Simon Mardner and Mme. Petrick double pink; Vervæneana, double rose variegated; Pharolide Mathilde a fine new variety double white, red striped, resembles the Vervæneana. Prices of Christmas varieties are: 75c $1.00 $1 25 $1.50 to $2 00

Easter Varieties—Schryveriana, Vervæneana, Simon Mardner 50c 75c, $1 00 $1.25 $1.50 to $2 00; Mme. Van der Cruyssen Niobe, Empress of India, Apollo, Prof. Wolters, and others, in bud.

Areca Lutescens, 4-in. pots made up, 18 to 20 in. high 20c to 25c; 5-in., 20 to 25 in. high, 30c to 35c.

Solanum or Jerusalem Cherries, 6 in., full of ripe berries, 25c, 35c and 50c.

Three Houses in Ferns

Pot, Not Bench Grown.

Neph. Scottii, Scholzeli and Whitmani, 4-in. pots, 15c to 20c; 5½ to 6-in. pots, 25c 35c, 40c and 50c; 7-in. 75c to $1.00.

Boston Ferns, 5½-in., 35c to 40c; 6-in., 50c; 7-in., 75c to $1.00; as large as a bushel basket.

Neph Cordata Compacta, 4-in., 10c.

Ferns for Dishes, a good assortment, 2½-in. pots $5.00 per 100 large plants.

Pteris Wilsoni Ferns, 6 in. pans, 3 plants in a pan 25c to 35c per pan; very bushy.

Fern Balls, imported direct from Japan, already started 50c

Adiantum Hybridum, the new Maidenhair Fern, large 4-in., 15c; medium size 4 in., 10c.

What Mr. F. J. Michell, of the Well Known Seed House, Henry F. Michell Company, Philadelphia, Said:

"Oct. 28. 1911.

"Have just visited the greenhouses of Godfrey Aschmann and must say it was indeed a great surprise to me. I have never seen a better lot of Araucarias. Azaleas, Ferns and other plants in all sizes and prices as are at Mr Aschmann's."

25 at 100 rates. **Cash with order, please. All plants must travel at purchaser's risk.**

PANSIES.

Think of the strain of pansies containing light, dark, lavender, violet, blue, bronze, royal purple, red, cerise, salmon, mahogany, yellow and red and gold shades—a dozen or more varieties in each shade—of immense size, with great form and substance. These are MASTODON PANSIES. It has cost us hundreds of dollars and eighteen years' time to upbuild this strain, and it is worth all it cost. 1 oz., $9; 1-12 oz., $1. Plants, 100, 50c; 1,000, $3; 5,000, $12.50, prepaid. STEELE'S MASTODON PANSY GARDENS, Portlad, Oregon.

Pansies. Our giant pansies are unsurpassed. We guarantee our strain. Also Masterpiece, Giant Prize Trimardeau, Mme. Perret, Black Blood Red, Golden Queen, etc., all at $2.50 per 1,000; 5,000 for $10, liberal count. Elmer Rawlings, Wholesale Grower, Olean, N. Y.

Pansies, frame-grown, Giant Trimardeau, 50c per 100, $3 per 1,000. Mosbæk Greenhouse Co., Onarga, Ill.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120 page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, $1.25

VAUGHAN'S SEED STORE. Chicago New York.

Albany, N. Y.

November is notable for the number of fashionable weddings in the city. The first was that of George Cabot Ward Low of Brooklyn and Miss Dorothea Douglas, niece of Governor and Mrs. John A. Dix. The ceremony took place in St. Peter's Episcopal church on November 11. The decorations were by Eyres. On November 18 in the State Street Presbyterian church occurred the wedding of Moncure C. Carpender and Miss Elizabeth McClure Williams, daughter of Major General and Mrs. Chauncey Pratt Williams. F. A. Danker had the church and house decorations which were mainly pink and green. R. D.

GREENFIELD, MASS.—Frank J. Yetter has commenced the construction of a large greenhouse on Davis street.

STROUDSBURG, PA.—The business of J. Howard Stone is now operated under the name of The Sylvania Floral Co. The members of the new firm are H. D. Stone, J. Howard Stone, J. C. Wood and Samuel Stone. J. C. Wood was formerly connected with David Clark's Sons, New York, and with Mrs. Wood will have charge of the store, 505 Main street, J. H. Stone superintending the greenhouses on Scott street.

A Thankful Thot

THEY do say that a contented frame of mind is about the most thankful thing to be thankful for. And it sounds reasonable. Take for instance, the man with one of our iron frame houses—he isn't fussing a lot this year, even if roses have been selling at four cents. He knows that with such a house he is growing just as good stock as it is possible to grow and he's getting as much for them as any one. He also knows that this spring he wont have to face a big repair bill to knock to flinders the profits of the year. So altogether he is feeling contented and rather thankful.

You growers who have been kind of up against it with your old time houses, haven't you just about come to the conclusion that there is a lot more in this Iron Frame talk of ours than you first thot? Having come to such a conclusion the next best thing is to send right away for us and let's talk over the plans for that new house. A house ordered now can be bought a good bit cheaper than later on, because we can work at it at odd times in the factories during the winter when the men haven't so much to do.

For just this reason several of our old customers, who have our Iron Frame houses, have already given their orders for the new year. Better follow their lead.

Where There Is Condensation

——there is need for a **Morehead Steam Trap**
Condensation in steam lines is akin to matter out of place—means wasted energy.

If your lines are sluggish—if your houses are not of uniform temperature, write us. We guarantee to drain your lines perfectly—return the pure, hot condensation to your boiler without pump or injector or make no charge for the trial. Obey that impulse—write now.

Send for "Book on Condensation."

MASTICA

MASTICA is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass, as occurs with putty. **Lasts longer than putty.** Easy to apply.

Mention the American Florist when writing

Nassau County Horticultural Society.

The regular meeting of the Nassau County Horticultural Society was held at Pembroke Hall, President Trepess presiding, Thursday evening, November 9. W. H. Robinson of Castle Gould, Port Washington, and Walter Robinson, of Eastover Farm, Centre Island, were elected to active membership and there were three applications. Mrs. C. D. Smithers and Mrs. H. I. Pratt of Glen Cove, became honorary members of this society.

A very hearty vote of thanks was accorded to Geo. Barton, manager of the fall show, and all those who helped him in his arduous duties.

Felix Mense offered a gold medal for the best 100 single violets to be competed for at the December meeting. Mr. Mense was accorded a very hearty vote of thanks.

President Trepess took occasion to present to Henry Gaut the Stumpp & Walter cup which he won at the fall show for the best group of chrysanthemums and the Mrs. F. S. Smithers cup for the best collection of hardy chrysanthemums. Henry Cliffe was presented with the Rickard Bros.' cup which was won for the best six varieties of chrysanthemums, three of each.

The result of the competition for the society's prizes was as follows: Three chrysanthemums, pink, Henry Gaut, first; three chrysanthemums, white, Henry Cliffe, first; three chrysanthemums, yellow, Paul Reul, first. Two vases of seedling chrysanthemums, John F. Johnston, certificate of merit. Tomatoes, Stirling Castle, F. Petroccia, honorable mention; lettuce, F. Petroccia, cultural certificate. The judges were James Duthie, Geo. Barton and W. Carter. The society's prize for December will be for carnations, 12 white, 12 pink, 12 red. The December meeting will be held in the afternoon at 2 p. m. when the election of officers will occur.

Edward Brockmann, Irondequoit, N. Y., Builds L. & B. Houses Twice in One Year.

"The greenhouse material you shipped to me last spring is very satisfactory. The galvanized iron ice clearing eave plate and sash bar clasps make an everlasting job. The 1¼-inch columns set in concrete in combination with the cross ties give great strength to the giant arch. The entire construction has a neat appearance in which we take much pride.
"I like your materials because they are so easy to erect, and that's why I gave you an order for that last house this fall."
Yours very truly,

Edward Brockmann.

CHICAGO HOUSE WRECKING CO.
35th and Iron Sts., CHICAGO

Wichita, Kans.

Retail trade conditions are fair, the volume of business running about the same as last season for corresponding dates. Chrysanthemums of course predominate, and some very good stock is selling at quite reasonable prices. Other stock such as roses, carnations and violets, are about equal to demand. Carnations seem to be off crop with all the florists and they are counting on a full crop for Christmas in consequence.

NOTES.

W. H. Culp & Co. are cutting some fine chrysanthemums this season. At present they are showing Dr. Enguehard, W. H. Chadwick and Golden Wedding in especially good form. This firm has equipped their heating plant with fuel oil burners and are well pleased with the result. It so happened that the cold snap November 12 was the trial trip for the oil burners, and the way they handled the situation settled all question as to their efficiency in emergency requirements.

November 12 was "blizzard day," the temperature falling 60 degrees in less than 24 hours, showing 10 degrees for low point, breaking the record for November. The fall in temperature was accompanied by a high wind and it surely was interesting for the florist.

W. H. Culp & Co. handled the decoration for the 32d degree Scottish Rite Masonic banquet. The tables were laid for 1,000, and considerable stock was used. F. Kuechenmeister followed the next day with a decoration for 600 Shriners in the same dining-room.

Chas. P. Mueller arranged several wedding decorations last week, one of which was quite an elaborate church wedding.

—— Brackenberry of Kansas City is again with Chas. P. Mueller in the capacity of storeman.

Norval Kline, with Schurr Greenhouses, Hutchinson, Kansas, was a week-end visitor.

A. Goldenberg, bulb merchant of New York, called upon the trade Saturday, November 18.

W. I. CHITA.

TORONTO, ONT.—The Ontario Horticultural Association at its sixth annual convention held November 15 elected the following officers: Rev. A. H. Scott, Perth, president; J. P. Jaffray, Galt, first vice-president; W. Jeffers Diamond, Belleville, second vice-president; H. B. Cowan, Peterboro, treasurer; J. Lockie Wilson, Toronto, secretary.

THE GUARANTEED GREENHOUSE

What sort of a guarantee does your local planing mill g ve you on greenhouse material? What sort of a guarantee does the interior finish manufacturer give you on greenhouse material? What sort of a gua antee can any firm give that is obliged to go out and buy most of the material after they get your order?

Now we are serious about this guarantee proposition. For many years we have tried to devise a method of identification for our material so that we could unconditionally guarantee it. We think we have at last hit on a plan, We have not worked it out in detail but you will hear more about it very shortly. We want you to know now that every piece of material that we sell is sold with an absolute guarantee. We want you to know that we are interested as a firm, also personally, in each and every customer and we intend that each of these customers shall have the fullest measure of satisfaction. This guarantee will be made very binding. Before you build another greenhouse get figures from a firm that makes nothing else but greenhouses. The first step is to get our catalogues.

ADVANCE CO., Richmond, Ind.

Northampton, Mass.

The chrysanthemums at the Bridge Street Greenhouses, A. B. Graves, proprietor, have been the best in years, but the demand is light. Bedding plants are grown extensively and a large stock of geraniums is being propagated. There is a fine lot of Primula obconica and Chinensis and cinerarias which will soon be in salable condition, and a house of Asparagus Sprengeri is grown for greens.

H. W. Field, Main street, was compelled to seek a milder climate and is spending the winter in California. The employes report an excellent cut of roses, carnations, violets and chrysanthemums with good demand, the higher priced chrysanthemums selling the most readily. A full line of potted plants are also grown and they look well.

F. D. Keyes, Florence, has his new King construction house completed. The walls are made of three feet of cement and four feet of glass. One end is reserved for forcing and the other is planted to carnations. He reports the sales as good.

The Montgomery Rose Co., East Hadley, report good growth and cut with steady demand. They will add another house this season to the two now erected which are of King construction.

Chas. Feiker, the Bay State florist, recently held a chrysanthemum exhibition at his houses. The carnations and general stock are looking fine.

Chas. Sanderson has completed planting in his violet plants. He makes these his specialty, growing 3,000 plants for wholesale trade. G.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Christmas Plants.

The advance in almost everything in the florist business has been really wonderful, but perhaps in no particular has this been more marked than in the production of blooming plants for the Christmas trade, and this has created such a demand that the improvement in quality and variety in the last decade is almost phenomenal. Our does not have to look back many years when there was but a limited selection of plants at this season and the specimens grown were very inferior to those that are placed before the customer today. Primula sinensis was the stand-by, with a strain of cyclamen that would have only two or three flowers at the most, Begonia incarnata, and geraniums bearing flowers enough to give a bright color to the plant. Later the forcing of Duc von Thol tulips became quite an art to have presentable plants for the holidays. In looking over the beautiful collection of flowering plants now produced at this time of the year, one can but think with what difficulties the grower of a generation ago contended, and how limited the retailer was in his offerings to the trade.

Poinsettias.

The largest demand at Christmas for all decorative materials is, of course, in the bright red and the poinsettia with its scarlet bracts, often wrongfully called flowers, is particularly the plant grown for the holiday trade. It blooms at just this season and there is but little sale for it at any other time of the year, so it can practically be called the Christmas plant. When well grown either singly or with from four to six plants in a pot or pan, it is strikingly decorative and produces an effect which is equalled by no other plant. It, however, does not adapt itself to house culture, and lasts but a short time in the dwellings, the leaves dropping off leaving the stem bare. So it is far better for the salesman to fully impress upon the customers that they are getting full value in having a plant of this color and size for the few days of the holiday season and hold out no inducements for future growth or long lasting qualities. These plants frequently lose many of their lower leaves with growers and where this happens if the pot is filled with small nephrolepis or other ferns the bare stem can be concealed and a very decorative plant produced. The decorating of these plants should be in red and of a shade that will harmonize with the color of the bracts, the Porto Rican matting or the waterproof crepe paper make fine pot coverings, and ribbon of proper shade passed through the foliage and tied with a handsome bow are nice decorative features.

Azaleas.

There are few plants which the florist handles that make so much showing for the price demanded or give so much satisfaction to the customer as the azaleas. The plants this year are a little smaller than have been offered in previous seasons at the same price, but they are well set with buds and make a most beautiful appearance. The varieties most grown for the holiday trade are Simon Mardner, dark pink, invariably a nicely formed plant, full of flowers with plenty of foliage. This variety is probably the best for the holiday trade. Vervæneana is a bright rose with a white margin, the flower being frequently blotched and striped. The blooms are much larger than Simon Mardner and not so double, but the plant is not so shapely. Deutsche Perle is the white grown for early flowering, and is very popular, but the demand for white at this season is not so good as for those colors that are brighter. This variety is often ungainly in form, not being so shapely as many of the later varieties. White Vervæneana is also grown for a white. Mme. Petrick, pink, a shade lighter than Simon Mardner and just as shapely in growth, is growing rapidly in favor and is meeting with much approval by the customers.

In selling azaleas the customer should be informed that they require frequent waterings and a good soaking at least every day when placed in the dry atmosphere of the dwelling. It is

well to have a card printed advising the customer of this and attach it to the plant before delivery. Azaleas need but few accessories to make them salable or decorative in the dwelling, a suitable pot cover tied with a ribbon to match the flowers or to contrast harmoniously with them is all that is necessary. Large bows tied on this plant frequently make them look overdressed. The matting makes one of the best pot covers, the coarser woven seeming to set off the beautiful shape of the plant. In the delivery of azaleas it should not be lost sight of that these early blooming varieties are subjected to much forcing and they should be securely covered when leaving the store or greenhouse.

Begonias.

Of all the plants that are grown for pot culture and bloomed for the holidays none attract the attention of the purchaser more quickly than the Begonia Gloire de Lorraine and its kindred sorts when they are well done. These plants, covered with their beautiful pink flowers, are sure to find ready sale and produce an effect in a store or office that can be done by no other. Unfortunately they do not do well in all dwellings, being very quickly affected by gas or too dry an atmosphere. No guarantee of their adaptability to surroundings can be advocated. We have seen two plants from the same lot go into dwellings; one remained in bloom through the winter and the other began to drop its flowers in three days. We have always thought that where this plant failed it was the result of neglect or environment.

Gloire de Lorraine is still the favorite variety with many growers. Lonsdale is a little too light in color to please many, and Glory of Cincinnati although the flowers and leaves are much larger and the plant of much stronger growth, yet to many it lacks the gracefulness of the older variety. We, however, like the luxuriant growth of Glory of Cincinnati. When these plants are shipped they are of necessity tied in closely and when unwrapped the branches should be carefully spread apart, to give them the graceful appearance which they naturally possess. In the preparation for delivery a sheet of cotton batting should be first wrapped around the flowers to prevent them from being bruised and then covered with enough paper to guard against their being injured by frost. Pot covers of pink, white or green set the plants off and bows of gauzy ribbon if not overdone can be used in finishing them.

Cyclamens.

If any plant that the florist grows can be given a guarantee to continue to bloom after being placed in the dwelling it is the cyclamen, for in almost any light location and with good care these plants will continue to produce flowers throughout the winter. In very warm rooms, however, the blooms come out quickly and rapidly grow smaller. They will grow right beside the windows and not be affected by the cool draughts, and continue to push up their peculiarly shaped flowers for some weeks. These plants are particularly well adapted for plant baskets that are to be placed in the windows of residences. The single specimens find ready sale and with the exception of pot covers need no accessories to set them off, the sturdy little plants in fact look much better without any furbelows. The foliage of many of the varieties is beautifully marbled and is itself an attractive plant even if it had no flowers.

Decorative Plants.

Among the decorative plants for Christmas one of the best is Dracaena terminalis, its young highly colored leaves being very attractive at this season, and well grown plants will always be in demand. The other dracænas, especially Massangeana, meet with a good sale at this time. Boston ferns are always more or less in demand at this season for they make a very acceptable gift and large plants are more readily sold now than they have been during the fall. Crotons are grown extensively for the holiday trade and their highly colored foliage adds greatly to the display and they make fine decorative plants for the table. While they do not retain their beauty for any great length of time yet they make a splendid showing while they last, and as one of the largest growers of these plants says, "They last longer than cut flowers and are just as beautiful." A nice stock of the popular sizes of palms will be called for and it is good business to have them displayed. During the holiday trade there will be many people looking over the stock who do not often visit the stores and greenhouses and the dealer should grasp this opportunity to display not only his Christmas offerings but also fine samples of the stock which he always has on hand.

The Grand Christmas Number Next Week

New subscribers for 1912 can secure copy of this issue by requesting it when sending in their subscriptions.

Fruited Plants.

Among the berried or fruited plants the imported holly and aucuba are the largest specimens and when well fruited are beautiful and decorative, but the sale of these large plants is limited. The two most prominent plants for Christmas are the ardisias and Otaheite oranges. The former is a very decorative plant when well grown and the berries highly colored, and is very satisfactory as a house plant. Tied with a handsome bow of red ribbon and the pot encased in a red matting this plant appeals very quickly to the buyer. It can never be made a cheap plant for the growth is slow and it takes a long time to produce a finished plant. The Othaheite when well fruited and colored is also attractive and these plants draped with golden ribbon can be made decorative. The solanums are also much in demand, the Christmas peppers appealing to many buyers and the old Jerusalem cherry is a favorite with many looking for a berried plant at a moderate cost.

Primulas.

Primula sinensis, the variety known as the Chinese primrose, is still the old favorite with many at this season, for its adaptability for house culture is known and appreciated, but in comparison with some of the later plants it has not the finished or refined appearance, and has been forced into the background, yet there are many customers that desire this plant for their windows and if well grown they will find good sale. It is a little cheaper in price than the finer and larger plants and therefore appeals to a certain class of trade. With the pot covered with green waterproof crepe paper tied with a bow to either match the paper or the color of the flowers, it makes an attractive plant and one that is almost sure of giving satisfaction. At this season of the year the reds, although not quite bright enough to be called Christmas red, find good sale, and the pinks and whites are always in demand. Primula obconica makes a beautiful plant for making up baskets and also a satisfactory house plant, but this variety is to many poisonous to the touch and should be handled carefully.

Mignonette Not Blooming.

ED. AMERICAN FLORIST:

We are growing mignonette in a well-lighted house with the temperature at 50° at night and 60° during the day, but it comes blind. Can you inform us what is the cause of this?

E. L.

The temperatures stated by "E. L." are much too high for mignonette. The best spikes of this flower are grown at least 10° cooler—40° at night and full ventilation at 50° during the day time. If mignonette is grown too warm when the bud forms, the side shoots at the base of the flower immediately start into growth and quickly blast the flower bud. If "E. L." means by "going blind" that the shoots do not form any bud at the top of the growth it is difficult to state what is the cause, but we should believe from the long experience that we have had in growing this flower that if the plants are set in good rich soil and make a strong growth that the high temperature in which they are grown is the cause of the trouble, for we have never seen the shoots grow without setting a flower except in late spring or early summer when the temperatures in the houses were very high. W.

NASHVILLE, TENN.—Charles H. Tritschler and W. D. Buchanan, local florists of note, have published a book entitled "A Practical Treatise on How to Grow Flowers."

A STORK DESIGN.

Arranged by Randolph & McClements, Pittsburg, Pa., and Sent to Mrs. E. J. McCallum When the Twin Boys Were Born.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Thanksgiving in Chicago.

While Thanksgiving is not the day with the florists that Christmas and Easter are, yet it is the first holiday of the new year in the business whereby the dealers can to a certain extent feel the pulse of the buying public and obtain an insight into the trade of the season. The dealers all report a very satisfactory business and in many cases a large advance in the trade of previous years. The supply of flowers was exceptionally good, there being no scarcity or shortage, the only flowers at all in small supply being orchids and American Beauty roses, which were advanced in price. There were plenty of chrysanthemums and a large quantity of yellow, which is always in demand at this time, a bountiful supply of roses and carnations, and a fine assortment of all other kinds of stock, including lily of the valley, sweet peas, bouvardia and smaller flowers of the season. A visit to the stores on Thanksgiving morning found all the dealers so full of business that they had little time to talk much of the trade, but all were wearing a smiling face, although plainly showing the effects of a rushing trade.

John Mangel reported the best trade for the two days that he had ever had. The transient trade on this busy corner was very large and he also had many dinner parties, both at residences and hotels, to decorate. The windows the day before Thanksgiving were very attractive, being full of elegant plants and flowers and a basket of orchids for the center of one window was very beautiful.

The Fleischman Floral Co. had an exceptionally fine trade and on Thanksgiving morning the large refrigerators which are generally full of high grade stock were nearly depleted and Manager Weinboeber was standing in the midst of a score of large boxes of flowers directing the delivery. The beautiful corsages of lily of the valley, orchids and violets which this firm arranges had a large call and the force was very busy arranging the many orders for dinners and presents.

H. C. Rowe enjoyed a splendid trade in his finely furnished store in the Palmer House, and on Thanksgiving morning looked particularly well pleased as the high quality stock was being delivered.

The Alpha Floral Co. stated that their trade had been very large and but a small showing was left on Thursday morning of the large stock which was displayed the day before. All hands looked as though they had had a busy time and were well satisfied with the business done.

The trade at A. Lange's was extremely large, and the great amount of stock which was shown on Wednesday was nearly cleaned up. Everybody was as busy as could be on Thanksgiving morning getting the orders boxed up and delivered. The call for flowers for family dinners had taxed the large force and Mr. Lange was superintending the work with his customary ability.

Canger & Gormley had a very satisfactory trade, they having many fine dinners to provide for, and the stock was being forwarded as fast as possible. The fine assortment of flowers in the store on Wednesday was nearly all disposed of early Thursday morning.

A splendid Thanksgiving was reported at Muirs, the demand for flowers for the family dinners being very large and also a good demand for blooming plants, of which there was a grand supply in the greenhouses. On top of the large Thanksgiving trade, large orders for funeral flowers were arranged for early delivery the next day.

A much larger business than the previous year was transacted by W. J. Smyth and the force of able floral workers had all they could do to supply the splendid family trade which this finely located store on Michigan avenue always has, not only at holiday times, but throughout the season.

A most satisfactory Thanksgiving trade was the statement of C. A. Samuelson and the usual amount of family trade which this store has enjoyed and built up in its many years of successful business. The large stock of highest grade flowers was splendidly displayed and on Thursday morning there was but little that had not found a purchaser.

On the north side the new store of Adams-Robertson Co. on the corner of Rush street and Bellevue place did a rushing business, far exceeding the hopes of the proprietors. The newly fitted quarters of the firm make a fine appearance and the high-grade stock is so nicely displayed that it at once attracts not only the transient but the society trade of this aristocratic section.

The George Wittbold Co. on Buckingham place had a very busy day. The teams were kept going clear up to noon

of Thanksgiving delivering the family dinner orders and the large plant shipments of this firm.

THE CARNATION.

Carnation Rainbow.

The winner of the bronze medal for 25 blooms of a seedling carnation at the Second National Flower Show, held in Boston, March, 1911, was Rainbow, which we illustrate, exhibited by the Wanoka Greenhouses, Barneveld, N. Y., and is being disseminated by that firm. It is delicately shaded from deep to light pink and is described as a glorified Prosperity. A seedling of Mrs. Lawson through two generations, being the result of cross of a white seedling, which was overlaid with pink, and Mrs. Lawson, the former having Morning Glory and Mrs. Lawson for its parentage. The flowers are large and of perfect form, with a non-splitting calyx, and borne on long heavy, stiff stems. It is a free and continuous bloomer and a good keeper. The Wanoka Greenhouses are sponsors for this variety, which they claim to be a good seller and money maker.

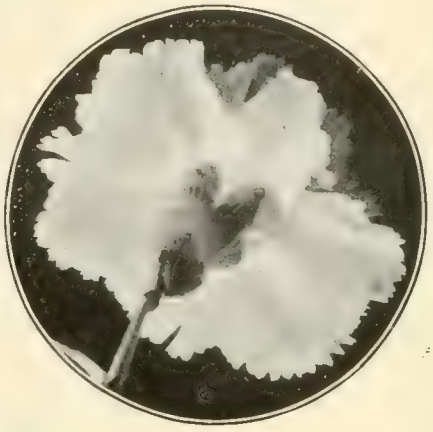
Syringing and Feeding.

The rapid approach of winter warns us that opportunities for syringing in the carnation houses will be few and far between during the next three months, and that if there are any colonies of red spider about the plants there should be no delay in getting after them, otherwise the insects will be likely to get the upper hand before spring.

It is not only the fact that the plants do not require much moisture about the foliage, but also the liability to injury to the flowers from forcible syringing that should deter the careful grower from doing unnecessary syringing at any season, and especially during the winter. There are so many days in November and December that promise well in the morning, but later on in the day the sun is obscured by clouds, the houses become comparatively cold, the foliage does not dry off, the flowers fail to open, and what is worse, the most favorable conditions are provided for the spread of fungoid diseases, especially "spot" and "rust," both of which appear in greater degree when the plants have had too much water, either overhead or at the root. In dark weather particularly the foliage should be kept dry, and as a help toward this it is advisable to do the watering just as early in the day as possible, after the regular morning cut has been made.

Extremes of temperature should always be avoided, remembering that although a carnation will make a short-jointed and sturdy growth at a night temperature of 45 degrees, yet it will open its flowers very slowly in such a temperature, and that a steady night temperature of 50 will give much better results in the matter of flowers, both in regard to quantity and in the case of many varieties in quality also. It is not a paying proposition in the long run to force flowers for a special occasion by giving unusual heat, for some time is lost afterwards in getting the plants back to condition again, and more or less injury has been done to the plants from which the next season's stock is to be taken. Of course there is some temptation every year to try to get in some additional flowers for Thanksgiving or for Christmas, or for both, but the falling off in both quantity and quality for two or three weeks after these special efforts sometimes goes a good way towards offsetting the returns that have been realized at the holiday.

Special feeding helps to produce some fine exhibition stock, provided that the original soil in which the plants are growing is of fair quality



Carnation Rainbow.
Showing Non-Splitting Calyx.

to begin with, and also that the plants have sufficient growth to take up and utilize the extra nourishment that is offered them, but too much feed is not the best method for the average commercial grower to follow, from the fact that the flowers stretched to the limit by this means are seldom in condition for the retailer to handle to advantage. It is understood that the retailer does not want to keep his flowers any longer than he can help, but at the same time he cannot alwaye gauge his stock exactly, and it does not help the grower to any great extent when his extra large carnations go to sleep after a few hours in the store. The satisfaction of the ultimate consumer is one of the things the grower has to keep in mind, and this satisfaction is best secured by supplying him with goods that stand the test of time.

A Well Grown Cyclamen.

With this in view it is safe practice not to do much feeding with strong fertilizers while the days are growing shorter, but to help the plants along as the soil becomes more exhausted after the holidays, for by proper attention as the days get longer the grade of flowers may be kept up or improved.

The cutting of carnation flowers is one of the things that cannot readily be explained in print, for to do it at just the right time requires some experience and judgment. All varieties do not mature in the same period, nor do they mature as quickly in winter as in spring, and there are therefore these two factors to be considered, namely, the difference in varieties and the difference in season, and the chief things required to keep these two factors working to advantage are experience and observation.

Thrips are among the insect pests to be reckoned with at practically all seasons of the year, and the most effective way to deal with them is by regular spraying with nicotine solution, this being less injurious to the flowers than fumigating with nicotine paper or other preparations. W. H. TAPLIN.

Average Yield of Carnations.

ED. AMERICAN FLORIST:

Will you inform us what is the average number of flowers cut from 1,000 square feet of bench of Enchantress carnations G. A. M.
California.

It is the better way to average the number of flowers cut per plant to get right down to the question of the dollars and cents that the plants are producing. It must also be taken into consideration whether the carnation plants occupy the bench during the entire season. The variety Enchantress to be able to say that it is paying its way should produce twenty saleable blooms per plant from October 1 to May 1, this is taking into consideration that the plants are not stripped of cuttings. If the plants are expected to furnish cuttings during December, January and February, then the cut will fall below this. The plants being planted the usual distance of 10x10 inches or 10x12 inches apart, the average number of flowers to the 1,000 square feet can soon be arrived at. It must be borne in mind that the difference between the climatic conditions of California and the other sections of the country may change the period of the carnations most profitable yield.

C. W. JOHNSON.

Freesia Foliage Turning Brown.

ED. AMERICAN FLORIST:

I enclose leaves of Freesia refracta alba which have turned brown at ends, sometimes extending for some length on the leaf. Can you inform me what is the cause? Will it affect the flowers? R. S.

This is a trouble that many growers experience and it may be due to lack of silica in the soil. We have the same trouble and notice that it is more prevalent near the open ventilators, where the drafts strike the plants. It will not affect the flowers any more than detract from the general appearance and a good deal of trimming will have to be done to make them presentable.

C. W. JOHNSON.

NEW CARNATION RAINBOW.

Grown by Wanoka Greenhouses, Barneveld, N. Y.

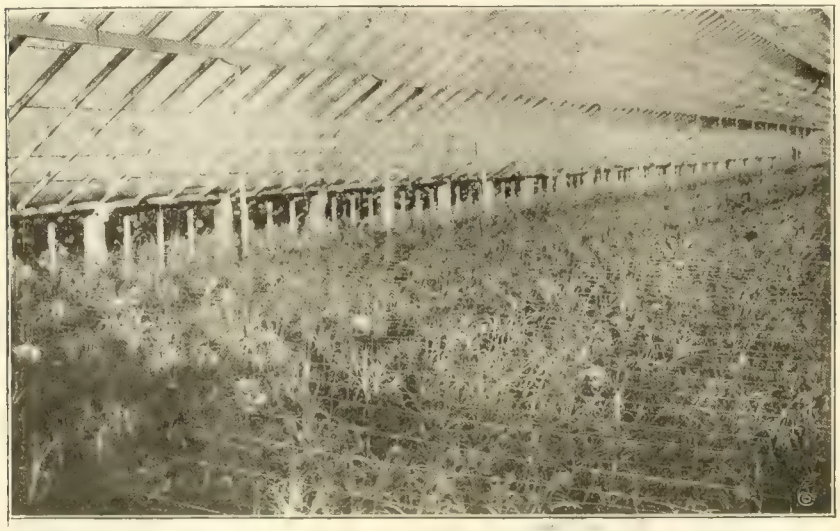
Freesias.

The buds on the early planted freesias should now be showing above the foliage if they are to be in bloom by Christmas. But it is not advised to attempt to force them to get them in flower for the blooms will lack substance if grown in too warm a temperature. The freesia succeeds far better in a temperature of 50° at night or cooler, than it does in one that is warmer, the stems being much stiffer and the flowers having more substance. The plants should be kept tied up to have good straight stems. Four or five small stakes on the outside of the pot with a string fastened around them and cross strings through the center will keep them straight. Where they grow to good height a second tier will be necessary. Constant fumigation or spraying with nicotine will be necessary to keep down the aphis which quickly infest these plants; if smoking is resorted to do not smoke too heavily; frequent light fumigations are to be preferred.

WITH THE GROWERS

Thompson Carnation Co., Joliet, Ill.

The annual cleaning out of soil and plants in carnation culture is a large expense of the business, and growers have considered for some time means to overcome this outlay in the growing of the "divine flower," so it was with great interest that we looked upon a bench of Rose Pink Enchantress which we illustrate, at the houses of Thompson Carnation Co., at Joliet, Ill., that had been in continuous bloom for 16 months and was now producing flowers both in quantity and quality the equal of those upon plants which had been transplanted into fresh soil this season. The stems were much longer and the blooms of the highest quality. On inquiring of P. W. Peterson, the able superintendent, as to his method of culture, he stated that the plants were partially rested during the last of June and early July, but yet not fully dried off nor severely cut back. They were then started into growth and a good mulch placed on the bench. None of the old soil was removed, the mulch being placed around the plants and at the present time the soil is two inches above the original setting of the plants. Upon inquiry as to whether stem rot would not be the result of such treatment, it was said that it had not troubled them at all. Certainly if carnations the equal of those being cut from these plants can be grown in this manner much of the hard labor in the heat of the summer and the expense of the same are unnecessary.



ROSE PINK ENCHANTRESS AT THOMPSON CARNATION CO.'S, JOLIET, ILL.

These Plants Have Bloomed Continuously for Sixteen Months.

This company has 10 houses 30x300 feet at Joliet, devoted almost entirely to the cultivation of carnations, the only other flowers grown being chrysanthemums and sweet peas. The Enchantress family is grown in the largest quantities as is the case with nearly all commercial growers at the present time. There being large blocks of Enchantress, White Enchantress and Rose Pink Enchantress, and they are producing flowers that are the equal of any that are shipped to the Chicago market. The flowers are of the largest size and of good substance, borne on strong stems that for these varieties are unusually stiff and strong. Beacon is producing wonderfully the beds being covered with blooms and buds, and a very large cut is promised for the holidays. The flowers are of extra large size and an inspection of the bench failed to find any split calyces on the plants. The variety is certainly a sight as growing at this place and the typical red for Christmas if it can always be done in this manner. White Wonder is living up to its name as may be seen by the illustration in this issue. The beds were almost white and the blooms were of very large size. Gloriosa and Dorothy Gordon are both doing well but not up to the standard set by the older varieties.

The chrysanthemums were nearly all cut but what remained showed that a fine grade of commercial flowers had been grown. The houses of sweet peas were just coming in bloom and the flowers were exceptionally good on stems 12 to 14 inches long. Christmas White, Christmas Pink and Mrs. Wallace were the varieties grown and a good cut of high quality is the outlook.

The propagation of carnations and the sale of rooted cuttings is a prominent part of this firm's business and the propagating houses are rapidly filling with the cuttings, more than 100,000 being already in the sand some of which are now nicely rooted and ready for delivery. Cuttings propagated from such healthy and strong stock should certainly give a good report of themselves, for the cuttings are in the best of health and root readily.

The cut from this place is sold direct to the retail houses, it not appearing upon the wholesale market, but by producing a high grade bloom a select line of customers is acquired who take all the flowers that are grown. The appearance of the houses and the quality of the blooms are a high testimonial of the ability of Superintendent Peterson, and his method of culture.

Godfrey Aschmann, Philadelphia.

Godfrey Aschmann is a genius among plant growers. He is an economist of high degree. Intensive culture is a hobby with him and succession of crops is second nature. It is not that every foot of greenhouse space should be filled and working all the time, but the inches in between, down below, along the edges, up above next the roof and in the middle where things must be suspended, all must be occupied with something seasonable and salable or in the various stages leading up to this condition so that it may be made to repay the proprietor for his careful attention.

Plants are not grown into large sizes here; it is all medium or quick selling stock that is handled in large quantities by the average storekeeper or grower who retails his own product. At holiday seasons there is always quantities of finished plants of all the popular favorites, as at present is seen, house after house full of choice Boston, Scotti, Scholzeli, Whitmani, ferns in 4-inch to 7-inch pots. Nephrolepis Giatrasii is a favorite here and fine plants in from 4-inch to 6-inch pots are seen. Mr. Aschmann has been called the Araucaria King and he certainly rules over a very large list of these popu-

CARNATION WHITE WONDER AT THOMPSON CARNATION CO.'S, JOLIET, ILL.

lar plants, which look in perfect condition. So many azaleas were imported that another house had to be erected to grow them; they are a splendid lot of well budded plants. One house is filled with the early forcing varieties, being brought on for the Christmas sales. Begonias of the Gloire de Lorraine type are seen in quantity. Gloire de Lorraine, Glory of Cincinnati and the Lonsdale, light pink, are all coming into fine bloom right for the holidays. Begonias of the Vernon type, to see that it is properly packed and labeled so that the express companies cannot fail to know just what they are handling and that the boxes should be kept from frost. Then having done my duty, I feel that I cannot afford to take any risks as to loss of money or plants through no fault of mine, so I have made it an invariable rule to have my money first and that my customers must fight it out with the express companies for any negligence on their part.

BEGONIA GLORY OF CINCINNATI AT VAUGHAN'S GREENHOUSES.

are seen everywhere in all stages of growth, Mr. Aschmann saying we never have enough of them and they are in season all the year around. A house of Chinese primroses are a sight and good sellers as are also cyclamen of which benches of well grown 4-inch to 6-inch pot plants make a fine showing. Asparagus plumosus in two and three inch pots and ferns in assortment for fern dishes are seen everywhere, filling up inches of space stolen from the walks or edges of tables. The very air is also full of all kinds of variations of the Boston fern, being suspended by wires to the rafters where they finish off into perfect specimens. And so we could go on telling of the hundred and one kinds of plants that are grown in this wonderful place. The kentias and other palms, the Ficus elastica, the hydrangeas, that will be brought forth later, the cinerarias and Easter lilies that will keep them company, the thousands of bulbs that are potted and bedded outside, all of which together with many other plants that for lack of space cannot be included, go to make a truly remarkable collection.

Mr. Aschmann's bid for trade is largely through well written advertisements, all prepared by himself, and they are models of perfection full of facts and figures always to the point and with a touch of originality that compels attention. His "cash with order please" and "all plants travel at the risk of the purchaser," is strictly adhered to. He says I do my best to produce good stock and offer it at the lowest prices. I am very careful

Save when he goes to Europe, as is his custom every summer, to select his stock of araucarias, azaleas and palms, Mr. Aschmann is always on the job. He is always glad to see any customers who may call. Business, he says, has been good this fall and last week large orders were shipped to Texas, Minnesota and California. Mr. Aschmann is very proud of the fact that he has satisfied customers in every state in the union. K.

Vaughan's Greenhouses, Western Springs.

In all the large centres of population in the country the advance of horticulture owes much to one or two concerns that have been in marked advance of the rank and file of greenhousemen, and have acquired not only a local reputation for the distribution of new varieties of plants but have become known all over the horticultural world. The names of Hovey of Boston, Henderson of New York, Buist and later Dreer, Harris and Craig of Philadelphia have become well-known in horticultural history and in Chicago and vicinity the name of Vaughan occupies a similar position, so it was with considerable interest that a visit was made to the Vaughan Greenhouses at Western Springs, fifteen miles west of Chicago, to see from whence so many good and meritorious plants had been distributed to the growers, not only in the vicinity of the city, but throughout the western country.

Being just before Christmas, the plants grown for the holiday season first attracted the attention. A house of poinsettias was in grand shape, the plants being of salable sizes, not too tall, with extra large heads of brilliant color, and with foliage clear to the pot. It is seldom that it is the privilege to see a finer grown lot of these Christmas specialties than was standing on the benches in this house. The azaleas are coming on nicely, the buds just showing color at the tips with the promise of being in the best of condition for the proper time. Begonia Gloire de Lorraine and Glory of Cincinnati are in splendid condition and will be in the pink of perfection for the holiday trade, and the plants are well grown and make promise of a great showing.

A house of cyclamen contained nice salables sizes that were just commencing to bloom. The strain was exceptionally good, the plants having that mottled foliage so attractive and decorative and the flowers were of good size and brilliant colors. Solanums are well done the Christmas peppers being well fruited and Solanum capsicum or Jerusalem cherry was well grown, the plants being of nice form and well covered with the scarlet fruit.

CYCLAMENS AT VAUGHAN'S GREENHOUSES, WESTERN SPRINGS, ILL.

The stock of decorative plants is large and varied and of the highest quality, an exceptionally fine assortment of palms of the popular varieties and the most desired sizes. Kentias, both Belmoreana and Forsteriana, are in splendid shape and some fine large plants were noted as well as the smaller sizes down to 4-inch stock all in splendid condition, and also specimens of made-up plants. Phoenix Canariensis and reclinata were seen in noble plants in 8-inch sizes which were fine for decorative work and a large assortment of that beautiful palm, Phoenix Roebeleni, in the best possible condition there being some large specimens that were particularly handsome. A fine lot of Pandanus utilis and P. Veitchii finely colored are splendid specimens. An immense stock of nephrolepis in the various varieties and especially fine plants of the old Boston are on hand. The large plants are well grown, full of strong fronds and the 6-inch and 7-inch plants were fine stock for decoration or home culture. The new variety, Roosevelt, looked well and some splendid plants were to be seen. These plants are all fully established and in fine growing condition and cannot help but prove satisfactory to the purchaser. Draeaenas of many varieties were in fine condition, a bunch of D. terminalis being especially well colored and of fine growth and also beautiful plants of that favorite, D. Massangeana. A large variety of beautiful crotons are grown and some strikingly highly colored plants are to be seen. Tens of thousands of small ferns are now ready to fill the demand for fern dishes and to decorate the baskets of Christmas plants. These are of the popular varieties that are employed for this purpose and include all that give the most satisfaction for these trying conditions. In the cool house were stored noble specimens of bay trees and fine aucubas.

The propagation of young stock is one of the great features of this range for the large catalogue trade which the firm possesses and the propagating benches are full of young stock in preparation for the early winter and spring business. Thousands of roses are now potted, rooted and in the sand and of great variety. All the novelties in greenhouse roses were to be seen, including Double Killarney, Mrs. Aaron Ward, Radiance, and others among the newer roses were some of fine color, especially noticeable being Leuchtfeuer, a brilliant dark crimson, and Othello, a dark red. The ramblers and Baby ramblers are propagated in great quantities and Jessie, Baby Dorothy and White Baby Rambler were newer varieties showing great merit.

Everything desired in the plant line it seemed to the writer, was housed in this establishment, and all in fine condition, and Foreman Albert Erickson is to be congratulated upon the appearance of the plants and the quantity of splendid stock produced, as well as the courteous manner in which he escorts visitors and customers through the large range of houses, every ready to explain and instruct with all the knowledge at his command.

California Association of Nurserymen.

FIRST FALL MEETING AT LOS ANGELES.

Held at the Chamber of Commerce rooms, Los Angeles, November 23-24, the first fall meeting of the California Association of Nurserymen, in affiliation with the Pacific Coast Association of Nurserymen, was a distinct and encouraging success. There was a large and representative gathering of the trade not only from the state, but from points as far east as Nebraska, and the discussions on the various live topics covered by the speakers were keen and full of good points. In the absence of President Eberly the chair was ably filled by Vice-President Wilson of Fresno. Thos. Chisholm of the Pasadena Nurseries gave the address of welcome heartily and with spirit and this was responded to by Geo. C. Roeding of the Fancher Creek Nurseries, Fresno, in a very happy vein. Mr. Roeding spoke of the pioneers in the nursery business here, of such men as J. W. Wolfskill, father of the orange industry, "Tim" Carroll who introduced many palms and eucalypti, and told the local nurserymen present that it was up to them to not only follow such leaders but to improve on their methods.

Secretary Kruckeberg read the minutes of the meeting in San Jose on June 23, 1911, and committees on by-laws, constitution and resolutions were named. P. A. Dix of Utah was unable to be present, but his interesting paper on "Organization and Fellowship" was read in his absence by the secretary. C. B. Messinger, of the California Cultivator, made a good speech on the subject and was heartily applauded for his apt points and the good stories with which his speech was replete. Mr. Dix also sent a most pleasing invitation to all to be present at Salt Lake City next June and promised all a good time. The paper on "Credits in the Nursery Business" by Leonard Coates was read in his absence.

On the question of "Regulation and Stability of Prices," W. P. Weber, of the San Fernando Nursery Co., advised a board of information to regulate prices and find out what stock is for sale in the district with a view of standardizing prices. Fred Howard, of Howard & Smith, Los Angeles, read a very able paper on "Buying and Selling Among Nurserymen." Philip D. Wilson, the general manager of the Pacific Land and Products Exposition to be held in Los Angeles in March, 1912, invited the nurserymen to exhibit there, but Geo. Roeding advised that the association as a whole make an exhibit, as the expense was too great for individual firms. Mr. Wilson having given particulars of available space, the matter was held over and the meeting adjourned until Friday, after the delegates had received a very pressing invitation to be the guests of the California Cultivator at the Orpheum theater.

C. A. OF N.
TIME TABLE

GRAFTERS AND BUDDERS JERK-WATER BUZZ-WAGON ROUTE

Anyone changing the schedule or caught chewing the gas, will be hung on a Juniperus prostratus with a string of raffia, and buried in a Fred Howard cement flower pot Yea, verily.

THE RICKETY TIME TABLE.

8:30 A. M. Meet at the sign of the Slim Gum (Eucalyptus Bambusoides) commonly known as Howard & Smith's place, the Jim Crow nurserymen, Ninth and Olive sts. ☞Take West Ninth street cars, get off at Olive.

9:00 The aggregation of dendrologists, botanists, bug sharps, seed vendors and plant villians will leave on the dot. Anyone late will find the walking good.

9:30 Drive through Chester Place, visiting various grounds, including the celebrated Doheney gardens.

9:45 Inspection of the Germain Seed Store, where the delegates will be presented with a seed packet of the Pink of Propriety

10:00 Ride like Helen Blazes for Pasadena, the Garden Spot of the southern counties.

10:30 Visit to the rickety establishment of Ed. Rust, who grows trash and sells it for any old price.

11:00 Ten minutes meditation under the Anheuser Busch, in the gardens of the same name.

11:45 Inspection of the nurseries of Thomas Chisholm, the Bonny Scotchman who knows Good Scotch when he can get it.

12:00 On the hike for the Huntington Gardens, said to be the finest on the Pacific Coast.

1:00 P. M. At Dieterich & Turner's owners of the "Heisse Luft" shebang, and the largest glass house in S. C

2:00 Pull out for Howard & Smith's, where good digestion waits on appetite,—and then some.

5:30 From this place ambulances, hurry up wagons, and other conveyances will take care of the Wearie Willies.

CALIFORNIA ASSOCIATION OF NURSERYMEN AT LOS ANGELES, CALIF., NOVEMBER 25, 1911.

FRIDAY'S PROCEEDINGS.

President Eberle was on hand when the Friday's session opened and Frederick Maskew read his paper on "Federal Quarantine." He made out a good case for the legislation suggested and he was followed by S. A. Pease of San Bernardino county, who explained that while the United States is a "dumping ground" for European stock, it was impossible to get any American-grown stock into any European country without smuggling it in. Geo. Roeding, speaking as a member of the National Association of Nurserymen, severely criticized the opposition of this body to the legislation referred to and spoke of the many pests he had seen in European countries on nursery stock and the very crude and out-of-date methods used for their destruction.

Wm. Wood had prepared a paper which owing to a voice trouble was read by the secretary, entitled, "State and County Quarantine." Jacob Dietrich knows the troubles of both sides and his speech on "Can Nurserymen Assist Inspection?" showed him to have an open mind on the question. P. D. Barnhart advised the education of the people, the ultimate consumers of nursery stock, along the lines of keeping their stock free from insect pests—a good suggestion.

"Are We in the Tropical Fruit Zone?" the subject allotted to John S. Armstrong, of the Armstrong Nurseries, Ontario, was of interest to local men. "Growing Ornamentals that Sell," was E. H. Rust's contribution while John Vallance, manager of the C. C. Morse & Co. nurseries at Oakland, gave an interesting talk on the "Novelties of 25 Years in California," which led to a very spirited discussion showing how opinions vary on subjects of this character. J. J. Reeves then read his paper on "Conifers That Do Well in California," which was well received and elicited warm applause. E. Gill of the Gill Nursery Co., West Berkeley, gave one of the most interesting papers of the day on "California Field-Grown Roses" and Theodore Payne's paper on "California's Plant Debt to Australia" was also of great interest. O. M. Morris of the Morris & Snow Seed Co., then interestingly told of a journey he took from San Pedro to San Bernardino a good many years ago.

It was calculated that over 200 members of the trade and friends attended this session, and considering the age of the society, this was most satisfactory. It was not a gathering of a curious crowd or of persons with nothing else to do, but an earnest gathering of thoughtful, energetic business men, with the one idea in mind and that the betterment of California as a whole and California nurserymen in particular. The hall was finely decorated with palms sent by J. Dietrich. All the officers that had served protem up to now were elected to serve for the ensuing year, and with a most hearty rising vote of thanks to Secretary Kruckeberg for the work he had so finely done for the association, this most successful convention closed with hearty good feeling all around.

AUTOMOBILE OUTING NOVEMBER 25.

On the last day a large number of the members were taken in automobiles to view the principal points of interest in the city of Los Angeles and surroundings. Starting promptly at 9 a. m., the beautiful Doheney gardens were visited, where the photograph was taken. Next the Germain Co.'s new seed store, then for Pasadena to visit the establishments of Ed. Rust, Thos. Chisholm and the famous Busch gardens. From here all were taken to the already famous Huntington gardens. On leaving here a long drive over the hills to Montebello where a short stay was made at the Dietrich & Turner place, then to the Howard & Smith nurseries, where a splendid lunch was served in the big lath house. A more successful, more enjoyable outing or better fellowship all around could not be conceived and it was a grand wind-up to a most encouraging, interesting and successful convention. H. R. R.

Boston.

A SATISFACTORY TRADE.

Everybody seems satisfied with both the annual feed and business conditions. The wholesalers did a splendid Thanksgiving business. Welch Bros. had orders a month ahead, which speaks fairly good for business conditions. At the markets the conditions were very satisfactory, while prices on most staples did not rule high, the volume of trade was good and the growers in both markets feel satisfied. The retailers all did a good business. They were all well stocked and flowers, as a rule, were of good quality. There were very few pickled flowers offered by the growers, and those who did this got their just deserts. Thanksgiving is one of the recognized flower days, when everyone is in a good mood, especially the grower if he commands a fair price. He hopes now to see business go on steadily with no reaction. It has been a waiting game to see the market steady down to a business basis. Thanksgiving is usually the date that this happens and let us hope this year will be no exception to the rule. Thursday was an ideal day as regards weather conditions for the delivery of local flower orders. The markets after the Thanksgiving rush were quiet. For the balance of the week business has been good and the quality of everything is superb.

NOTES.

At the annual meeting of the Massachusetts Horticultural Society held November 18 officers were elected for the ensuing year as follows: Charles W. Parker, president; Walter Hunnewell, vice-president; Thomas Allen, Harry F. Hall, Thomas Roland, Charles S. Sargent, trustees for three years, and Richard M. Saltonstall for one year; Wilfred Wheeler, delegate to the State Board of Agriculture; Robert Cameron, Kenneth Finlayson, Walter G. Kendall, C. Minot Weld and Frank Wheeler, nominating committee.

The Boston merchants' slogan is "shop early for Christmas," and the retail stores are showing some well grown azaleas and poinsettias to let the public see what may be expected for the holidays.

Thomas Burwell, of A. H. Hews & Co., says his firm is filling orders for pots for use next spring. The florists are living up to the maxim "in times of ease prepare for work."

One of the most successful growers of carnations is Andrew Christensen, of Stoneham. Quality and quantity is where Andrew fits.

Shipments of manetti stocks for grafting are arriving from Europe. This is somewhat earlier than usual.

We are sorry to report that the genial Joe Fay, one of T. F. Galvin's mainstays, is sick.

Bernard McGinty is receiving some nice cypripedims at his stall in the Co-operative market.

Wm. Nicholson, Framingham, had the best Intensity chrysanthemums we have ever seen. MAC.

Washington.

FLOWERS ADVANCING IN PRICE.

Thanksgiving business was good. The previous day was wet and there were forebodings among those who had stocked up, but Thanksgiving was fair and mild, blest with sunshine. While there was enough stock there was no great surplus and prices were somewhat higher than they had been. There was a good trade in chrysanthemums and though a few still hang on, they were pretty well cleaned up. Roses are off crop in this locality and less plentiful than they were a month ago with higher prices, in fact, the prices of good roses have about doubled. Carnations, which have been going up in price, even before Thanksgiving, now range from four to six cents, but much better stock is appearing. With the opening of congress activity in social matters has increased and it seems reasonably certain that throughout the winter months stock will sell for a good price. There were a few plants sold for Thanksgiving, but the trade was largely in cut flowers. Azaleas are beginning to come in and there will be a steady call for them from now on. Some of the leading table decorators break large numbers of them up and use them in centerpieces.

NOTES.

The genial Wm. F. Gude was well pleased with Thanksgiving business and he is positively delighted with the long stem American Beauty roses that are coming in from their greenhouses. He is also handling a good stock of other roses. Adolphus Gude is busy building another house at the Bladensburg road range. Its dimensions are 50x350 feet. The Gude Bros. Co. are building greenhouses so fast that it is hard to keep track of them.

When J. H. Small & Sons get moved to Fifteenth and H. streets, N. W., there will then be a whole colony of florists near enough to each other to say hello without using a phone. Z. D. Blackistone and W. Marche & Co. have opposite corners on Fourteenth and G. C. Schaeffer is at Fourteenth and I and J. H. Small & Sons will be at Fifteenth and H streets.

George H. Cooke has been busy of late with decorations for dinners and luncheons and he is receiving from the Leo. Niessen Co., Philadelphia, exceptionally fine Killarney roses.

W. Marche & Co. executed a fine home wedding decoration last week in which he used several hundred yellow chrysanthemums. He was well pleased with Thanksgiving business.

Alex. B. Garden is now sending in a good stock of carnations, roses, lilies and azaleas. He had a good Thanksgiving business. A. F. F.

Hot Scotch.

Mayor Speer of Denver at a recent temperance banquet was discussing a drink cure of little efficacy.

"When I think of this cure," he said, "I recall a poor old woman with a red nose who entered a magistrate's office and said:

"'I'd like to take the pledge, if ye please.'

"'Very good,' said the polite clerk, 'and how long did you wish to take it for?'

"'In the past,' said the old woman, 'I've always took it for life.'"—San Francisco Chronicle.

LOWELL, MASS.—The flower store of R. A. Griffiths was found to be on fire Thursday morning, November 23. Quick work by the firemen prevented any great loss.

OUR Christmas number will be issued next week and it is important that advertisers and correspondents send in their copy as early as possible. The early advertisement gets there.

ORCHIDS are more in demand than ever for high class work. With the thousands of plants imported and grown each year the growers find it difficult to meet the call for these exotics.

Hornamental 'Orticulturists, Maybe.

Neighbor—I s'pose you Bill's 'ittin' the 'arp with the hangels now?

Long-suffering widow—Not 'im. 'Ittin' the hangels wiv the 'arp's nearer 'is mark.—Black and White.

Important to Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Denver Flower Show.

Denver will have a flower show November 11-16, 1912, under the auspices of the Colorado Florists' Club, for which a guarantee fund of $5,000 has already been subscribed by the florists alone.

The premium list will include a special open class for the largest chrysanthemum plant in the show, without restriction as to variety, and in this class the first prize will be $100, second $75 and third $50. These are the most liberal premiums of the sort ever offered in this country, and ought to bring out a lot of entries from all over the land.

J. A. VALENTINE, Chairman.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

Public notice is hereby given that F. H. DeWitt, Wooster, Ohio, offers for registration the geraniums and Conard & Jones Co., West Grove, Pa., the cannas, described below. Any person objecting to the registration or to the use of the proposed names is requested to communicate with the secretary at once. Failing to receive objection to the registration the same will be made three weeks from this date.

DESCRIPTIONS OF GERANIUMS.

General Wayne.—Seedling of S. A. Nutt crossed with Jean Oberle. Large, semi-double flowers, borne in large trusses; color rich carmine; foliage small; habit and foliage like Jean Oberle.

Aviator Rodgers.—Seedling of Mme. L. Bisquit; large clusters of semi-double flowers; color bright salmon; bushy habit.

Daybreak. — Seedling of L'Anbe crossed with Jean Oberle; double florets; small foliage; color darker pink than Oberle.

Aviator Atwood. -Seedling of S. A. Nutt crossed with Jean Viaud; semi-double florets; large trusses; medium sized foliage; growth like Jean Viaud.

DESCRIPTIONS OF CANNAS.

Conowingo.—The color of this flower is an intense fiery scarlet. Its foliage is an unusually beautiful plum color at the base, shading to rich olive green at the tip. The stately flowers are freely produced and stand well above the foliage, thus showing themselves off to good advantage. Height four to five feet.

Splendour.—The most impressive quality in this canna is the firm, well spread out formation of the flowers, which are an intense scarlet color and very large. It makes two or three bloom heads on each stalk, insuring flowers practically all the time, as new blooms are constantly appearing before the older flowers fade. Splendour is a fitting name to such a magnificent canna. Green foliage. Height, three to three and a half feet.

Wabash.—The bronze-leaved Rosea Gigantea. Flower is unusually large, petals broad and borne in great abundance well above the magnificent foliage of deep purple brown, striped bronze green. Height, four feet.

Beacon.—Because of its abundance of bloom this canna is notably effective. The moderate sized flowers are borne in great impressive heads of rich cardinal red. When seen in a row or bed the flowers show a mass of bloom that for color effect we think is unparalleled.

Kate F. Deemer.—The grand flowers open a rich, oriole yellow which gradually gives place to turkey red in the center and throat of the flower in striking contrast with the rest of the blossom, which turns almost white. The rich yellow buds on reddish brown stems combine with the yellow and white flowers, surmounting rich green foliage, to make a fascinating combination that always looks fresh and attractive. Height, three to four feet.

H. B. DORNER, Sec'y.

American Rose Society.

DETROIT EXHIBITION.

The Detroit flower people are wide awake and are bringing to the notice of the 300,000 people of their city that the American Rose Society will hold an exhibition there January 10-12, 1912.

The premium list is issued and any additions as specials will be included as fast as received. For years past these specials have been offered even up to the very last days.

Twenty-four persons have subscribed to the guarantee fund. The Chicago growers will do their best and this means a great deal. A public show of this kind in which roses, carnations and the treasures of local growers are combined to fill the large Crystal Palace, known as the Wayne Pavilion, is certain to be so attractive in a city of homes and gardens like Detroit, that the show will be well patronized. Wallace R. Pierson has been on a missionary tour of good will from east to west.

Do you know that the American Rose Society has only granted two gold medals? The last one was voted to M. H. Walsh, of Woods Hole, Mass., and this medal of pure gold for the exhibit of his Rambler roses has been duly forwarded to him. And here is shown the grower's affection. When the name of the rose for which the medal was given, was asked, Mr. Walsh remembered his wife and it was named for what is said to be the finest white rose, Mrs. M. H. Walsh—good for Mr. Walsh.

The executive committee will meet shortly to go over all details pertaining to the coming annual meeting, and several committees will make reports.

BENJAMIN HAMMOND, Sec'y.

The Chicago Christmas Tree Ship.

The Christmas tree ship has slipped up to its dock in the river with its cargo of spruce, its cheering aliens of smiling green. Presumably there are mortals who have seen the bridges swing to let the Christmas ship in, but the most that is known of it is that folk coming down town find it tied up at its wharf, with Christmas trees sticking their tops curiously out of hatchways, and suspect that Kris Kringle was at the wheel when it came in.

There is magic in the spruce. It might be a gray Monday, with dark skies and dark circumstances, with monotonous routine compelling and laggard feet obeying, but a sullen day has no defense against the alien spruce sailing out of the north and into the river.

Suddenly the dull sky promises snow flurries. There is a bit of wind to whistle comfortably about the house. There is a confusion of laughing, shrieking children. There is smiling comfort and the odor of something wonderful roasting in the oven. There is good nature and good cheer and ecstatic happiness—four walls inclosing content and serenity—and then the street car slides down the incline into South Water street, where the odor is not of spruce or roasts and where the confusion is not of joyous children, but the illusion is good and it endures at least to Lake street.—Chicago Tribune.

Meetings Next Week.

Baltimore, Md., December 11, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets.

Chicago, December 13.—Gardeners' and Florists' Union No. 10615, 230 North Clark street.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office enclose 10 cents extra to cover postage, etc.

Situation Wanted—Florist, German, all-around man wishes position; good references; Chicago preferred. Key 492, care American Florist.

Situation Wanted—Young man wants place as fireman; 17 years experience; good Chicago references. Address Key 504, care American Florist.

Situation Wanted—By first-class orchid grower; long experience in good places; both commercial and private. Address Key 525, care American Florist.

Situation Wanted—By orchid grower; first-class experience; good knowledge of roses, 'mums, carnations, etc.; age 29. Address Key 524, care American Florist.

Situation Wanted—By first-class grower of roses, carnations, pot and bedding plants; can give first class references; Chicago preferred. Key 523, care American Florist.

Situation Wanted—Experienced seedsman wishes to make a change; all branches; planting, breeding, growing, cataloguing, packing and selling, farm, vegetable and flower seeds Key 520, care American Florist.

Situation Wanted—By first-class florist and plantsman; American, married, strictly sober and reliable; 22 years' experience; A1 grower and propagator, also good designer; eastern states preferred. Address Key 512, care American Florist.

Situation Wanted—By a Scotch gardener and florist; life's practical experience; well up in landscape work, greenhouses, vegetable garden, making up a new place or running a private estate; first class reference in this country and Britain. Key 516, care American Florist.

Situation Wanted—As working foreman by all-around florist, expert propagator and grower of cut flowers, potted and decorative stock, etc.; first class designer; American, single; age 30; highly recommended. Please state particulars and wages. Address R. KLAG, Frederic Hotel, Minneapolis, Minn.

Help Wanted—A good all-'round florist wanted; wages, $70.00 per month. SIMANTON & PENCE, Falls City Nebr.

Help Wanted—An experienced store and order clerk for vegetable and flower seed line; address giving references. Key 531, care American Florist.

Help Wanted—A young lady florist; first-class sales lady; good designer; capable of taking charge; reference. Key 530 care American Florist.

Help Wanted—Experienced gardener for private place in country. Must have experience in garden fruit, vegetable and greenhouse work; married man preferred. Residence with hot water and all conveniences furnished. Apply JNO. T. MILLIKEN, 121 Merchants of Commerce, St. Louis Mo.

Help Wanted—Section men. Three good section men — one experienced in carnations and chrysanthemums and two in a general line of bedding plants. Applicants must come well recommended and be thoroughly experienced in the above lines. This range is located in the vicinity of Chicago, where the accommodations are fine and the surroundings homelike. Applicants if they wish, can buy stock in the company and realize a neat profit from the investment besides being in charge of the respective sections. This is not absolutely necessary, for what we really want are men qualified to fill the positions. For further particulars address Key 529, care American Florist.

For Sale—Five greenhouses cheap on easy terms; net profits $6000 per year. T. A. GETTYS, Amarillo, Texas.

For Sale—Great Falls Floral Co.'s greenhouses and stock. Splendid opening for a hustler with small capital. B. KAPPEL, Great Falls, Montana.

For Sale—Second-hand pipe; a fine lot of pipe and fittings suitable for steam or water lines; send us a list of what you can use and let us quote you. BAUR GAS COMPANY, Eaton, Indiana.

For Sale or Lease—Florist store and greenhouse with two-story dwelling house, 125x50 ft.; established 40 years by present owner; wishing to retire; near Polish Catholic also another large Catholic church. Key 530, Care American Florist.

For Sale—Nursery, well established; ½ acre lot, 4 room house, shed, glass, good stock, splendid situation, creek, blue gum trees end of the lot, good business connected; have to sell owing to leaving the country. Cash. Write for particulars; apply WALTER L. BATES Tennyson Nurseries, 2509 Persimmon St. Fruitvale, Oakland, Alameda Co., Calif.

For Sale—In a nice lively city of about 9 000, half interest, or will sell all. The only growers of flowers here. Have three greenhouses 5 000 feet of glass, one dwelling, large cellar, barn and work-rooms; steam heat. Want a man who can take entire charge; married man preferred. Established three years; have good trade. An opportunity for the right one. OVERLAND GARDENS Laramie, Wyo.

Will Buy or Lease

Small greenhouse establishment, with a number of acres of land suitable for nursery purposes. Address

Key 534, care American Florist.

VAUGHAN'S XXX XMAS HOLLY

Carload Shipments of Fresh Cut Stock Arriving Regularly and Now on Track at Chicago and New York

We have for years maintained our **XXX Holly Branches** the best in the western market. Our Holly breakers and packers have worked for us regularly for years under the supervision of our own travelers and agents and they know the quality our trade must have and they will get it for us if it is to be had. Everyone knows that seasons vary and fancy Holly in the best swamps cut over so closely that the standard cannot be maintained.

While other shippers have sometimes handled in this market as choice Holly as **Vaughan's XXX** brand, ours has averaged the best one year with another for many seasons. Sometimes we are compelled to ask a few cents higher price than that of competition Holly such as commission stock, lightly packed, poor color and from very poor Holly groves, but the value of our stock, with its care in selection, its solid packing, is more than double that of the average commission stock that we have ever seen.

Sample case, **$5.00;** 3 case lots, **$4.50** per case; larger lots 10 to 20 cents lower.

Holly Wreaths

Made in the best style of specially selected stock, artistic and substantial in every way. 12-inch, 14-inch, 16-inch, 18-inch.

Evergreen Wreathing

Fine grade, not to be compared with the commission stock usually offered. 20-yard coils, light, medium and heavy.

BOUQUET GREEN

Laurel Wreathing, Boxwood, Mistletoe, Winter Berries, Needle Pines. Immortelles and Xmas Bells.

Write or Telegraph for Latest Prices.

Vaughan's Seed Store,

CHICAGO:
31-33 Randolph Street.

NEW YORK:
25 Barclay Street.

Cincinnati.

SUPPLY SMALL AND PRICES HIGH.

There were plenty of flowers to go around on Thanksgiving. All the stock, particularly the chrysanthemums, came in at one time on Tuesday and Wednesday. As a result prices on the stock dropped a few points from its high notch of the several days preceding. Friday and Saturday were spent in cleaning up the surplusages of the preceding day. Since then the supply has been small while the demand has continued strong. Prices are at their highest point of the season and more flowers could easily be used. Chrysanthemums are about at a close. Practically only the largest and small medium sizes are included in the offerings. The varieties are W. H. Chadwick, Yellow Chadwick, Major Bonnaffon, White Bonnaffon, Mrs. Jerome Jones and Mlle. Jeanne Nonin. The supply of roses and carnations, while still scarcely sufficient for requests, is increasing. American Beauties are in better supply than they were and are about enough to go around. The shipments of double and single violets are snapped up as quickly as they arrive. Other flowers include lilies, lily of the valley, orchids and stevia. Narcissus and Roman hyacinths are now included in bulbous offerings. There is a good call for all kinds of green goods.

NOTES.

Joe Berman, of the J. M. McCollough's Sons Co., is receiving congratulations on the birth of a little daughter.

Albert McCullough has returned from Florida.

Bloomhurst Floral Co. are cutting some very fine Richmond roses.

There will be a meeting of the Florists' Society at the club rooms Monday, December 11, at 8 p. m. Important.

H.

WOBURN, MASS.—Adam Foster is extending his greenhouses by the addition of a new house running from Main to Elm street.

New Marguerite Mrs. F. Sander.

Now is the time to procure stock of this most desirable of all the Marguerites to grow on for pot plants for Easter sales.

Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures 5 inches across; the center of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. It is but rarely that a flower comes single, and when such is the case, they are as beautiful as the double forms; they are produced on long stems with a freedom not known in other varieties of the Marguerite.

2¼-inch pot plants, ready for immediate delivery, $1.25 per dozen; $8.00 per 100; $75.00 per 1000.

The above price is intended for the trade only.

NEW MARGUERITE, MRS. F. SANDER.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

Carnation "Wodenethe"

A Carnation by any other name "might smell as sweet," but it is a fact that very few of them do. The fragrance of **"Wodenethe"** is delightful. It has every other desirable quality, also size, perfect form, purity in color and the calyx positively does not split.

Come and see it growing, then you will also see

BROOKLYN

One of the **finest,** freest blooming Carnations I have ever handled and a "bread and butter Carnation" in every sense of the word.

Price on these two Carnations, **$12.00** per 100; **$100.00** per 1000.

CHAS. H. TOTTY, Madison, N. J.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

MARKET AGAIN NORMAL.

With the Thanksgiving rush over the market is again in its normal condition. There was plenty of stock for Thanksgiving to supply the demand with a few exceptions, this being in American Beauties and red roses. There were carnations enough to fill all orders, as well as chrysanthemums to supply the demand with the exception of yellow, which sold at sight. Violets were of a fine grade and quality and the market was cleaned up completely. With the appearance of stevia the demand for green goods has eased up considerably.

NOTES.

Holton & Hunkel Co. is well pleased with the Thanksgiving business and had a considerable amount of shipping business. They are extra strong on fancy white Killarney and also fancy and the regular run of Killarney. The strings of smilax are extra large and the violets cannot be beaten, being grand and with a fragrance like spring stock.

Mrs. A. Guilaume and Son of La Crosse, Wis., made a stop at Milwaukee while en route to La Crosse in the new automobile which they purchased in Chicago.

E. Welke Co. report business very good and with funeral work and Thanksgiving trade were kept on the jump.

C. C. Pollworth Co. had a very satisfactory Thanksgiving trade and had plenty of stock to fill all their orders.

Manke Bros. are cutting some very fine carnations which are being disposed of at the local markets.

Nic Zweifel was right on the job with his large cut of fancy carnations for the Thanksgiving trade.

Mitchell Street Florists had some very fine W. H. Chadwick chrysanthemums to offer their trade.

Gust. Rusch & Co. are disposing of some fine carnations and Hudson River violets.

Little interest seems to be shown in the ladies' bowling team as the attendance last week was very limited. The scores bowled were as follows:

Pohl	124	139	166	Leitz	195	113	190
Schmidt	127	131	141	Kellner	189	179	167
Halliday	111	125	116	Nohos	148	139	138
Hare	123	146	119	Manos	116	142	111
Hunkel	146	152	152	Rusch	187	153	
Leidiger	171	160	177				

ADAMS, PA.—Plans are being prepared for the erection of an extensive greenhouse by J. C. Trees that is to cost about $100,000.

STOCK CLEANED UP WELL.

Thanksgiving week was very satisfactory. There was plenty of stock, chrysanthemums being very plentiful, but nearly everything cleaned up well. Several large funerals and weddings helped business considerably. American Beauties at first seemed to drag, but sold out entirely, and Richmonds were short of the demand. In fact, Saturday, Dec. 2, the market was bare of roses and chrysanthemums, there being only a few carnations and lilies to be had. Retailers are buying their Christmas supplies a little earlier this year, for last year a number of them waited too long, and consequently missed many sales, not being able to supply the goods, as wholesale houses were entirely sold out. Southern smilax is selling better and boxwood is in big demand. Violets and lily of the valley sold well, as did sweet peas. Calendulas are arriving in small quantities. Greens of all kinds are plentiful.

NOTES.

Harley M. Wallbridge, formerly with the L. C. Hecock Floral Co. of Elyria, has accepted the position of assistant manager in the wholesale store of J. M. Gasser Co.

C. F. B.

COLLINGSWOOD, N. J.—Much damage was done to the greenhouses during the storm and cold wave November 13. Charles Zimmer had the roof of one house blown off and many plants were frozen.

CAMBRIDGE, MASS.—William H. Murdock, who for many years conducted a florist establishment, died November 26 at the Relief hospital, aged 74 years, having suffered a shock while at work in his garden a week before. He is survived by a son and two daughters.

The Chicago Flower Growers' Association

OTTO W. FRESE, General Manager.

Chicago.

STOCK RATHER SHORT OF DEMAND.

Thanksgiving has come and gone, the retailers all report that they did a very satisfactory business, many stating that the amount of sales was considerably in advance of last year. The wholesalers are not all so unanimous in saying that the business was satisfactory, many using the expression "fair business," but some of the growers are not willing to even call it that. But the growers that complain the most have only themselves to blame. Those that sent their flowers to the market the early days of the week received good prices for their stock, but those that held their flowers back and flooded the market Wednesday with pickled stock had to take what they could get. There was enough of everything, except perhaps American Beauties and orchids, to meet the demand, and the flowers that were of inferior grade or showed that they had been kept as long as possible had to be sold at any price obtainable. It seems strange that so many growers will persist in this pernicious way of doing business even when they invariably lose. The stock was cut so close and the good quality sold up so clean that a shortage of all kinds prevailed during the last days of the week. Orchids are very short, and the prices are ruling high. Nine dollars a dozen is the bottom price for cattleyas and the fine blooms are selling at higher values. While there were American Beauties enough to fill all orders, yet the supply compared to last year was much smaller. One of the prominent growers sums up the flower situation in the following manner. He says: "American Beauties at this time last year were in fine condition and in full crop, which held out until Christmas, and there was double the quantity on the market during the holidays of any previous year, but during January, February and March they were very scarce and it was almost impossible to fill regular orders, prices holding at $6 to $8 per dozen during the three months. This year the cut was made from August to November when they went off crop and have been in short supply ever since and will not be in full crop again until January 10 or 15, when it now looks as if the market would be well supplied for the remainder of the season. The plants are now setting buds and it takes six or more weeks for them to produce a marketable flower. The prices at Christmas will probably be high and retailers who want American Beauties at that time should place their orders early. Of the other roses and carnations the supply has been a little short up to Thanksgiving and will now come in heavier and there will be full crops for Christmas, and with the large additions in glass area that have been made there will be a large supply throughout the season of all kinds of flowers. The rose Mrs. Aaron Ward has become very popular and is in great demand by the retailers, but with the advent of Sunburst and the other yellow roses the call for this rose will be less." The Christmas greens are now being received and the early cases of holly show that it is of much higher quality than last year and, in fact, all the greens except bouquet greens, are in good supply and of fine grade. The Christmas plants are now being shown at the retail stores and a visit to the growers who make a specialty of these finds a good supply of splendidly grown stock.

NOTES.

The busy season is on at the George Wittbold Co.'s greenhouses at Edgebrook and the packing shed now resembles the shipping room of a large factory. The supply of Christmas plants and other decorative stock is large and some fine Boston ferns, kentias, dracænas, asparagus and Pandanus Veitchii are constantly going out. Passing through the houses we noticed a bench of Proserpine tulips nearly in bloom and almost ready for the market and which will probably be the earliest this season.

The large supply of roses, carnations and other seasonable stock that is arriving at Poehlmann Bros. Co.'s store is of fine quality and is sold quickly. Splendid American Beauty, Killarney, White Killarney and Richmond roses and lily of the valley of the best quality can be obtained at this house.

M. Wolnienicz, 3301 N. Claremont avenue, reports that the Thanksgiving trade exceeded all expectations. He is cutting a large quantity of Paper White narcissus and expects to have a large supply for Christmas. He has purchased an adjoining lot and will enlarge his plant next spring.

Vaughan & Sperry are well supplied with all kinds of seasonable stock and are offering something fine in roses and carnations. The firm will have a large quantity of poinsettias for their trade for the holidays in addition to a good supply of all other stock.

H. C. Blewitt is selling a fine grade of candytuft at his stand in the "House of Flowers" at 82-84-86 East Randolph street, in addition to his choice sweet peas and carnations.

John Schillo says his firm, the Adam Schillo Lumber Co., is winding up a successful season and is ready for 1912 with a fine grade of pecky cypress.

R. J. Southerton has a fine lot of cyclamen in his greenhouses at Highland Park that promise to be in full bloom for the holiday trade.

Miss M. C. Gunterberg is filling a large number of orders for Richmond roses and violets of good quality.

POEHLMANN'S FANCY VALLEY
EXTRA FINE HARRISII LILIES

We make these a specialty. Can supply them all the Year. Once tried you will have no other

A visit to Wietor Bros.' greenhouses this week found the stock in elegant condition with plenty of flowers assured for the holiday trade. House after house of fine American Beauty rose plants bearing very promising buds was what met our gaze as we passed through this section of the immense range of 143 houses. The 10 houses devoted to Richmond roses was also a sight to behold and that the cut will be large is true beyond a doubt and it would be safe to say that most of the blooms will be on stems averaging three to five feet in length. Killarney and White Killarney are now in crop and My Maryland, Mrs. Jardine and Uncle John are also producing a good supply of fine blooms. The carnations are covered with buds and some exceptionally fine Washington, Bonfire, Victory, Winsor, Enchantress and other leading varieties can be found here. We could not help but notice the smile of satisfaction that rested on the faces of N. J. Wietor and his able foreman, James Novac, as they escorted us through the houses, and were probably thinking of the "raft of stock their firm will have for Christmas." We greatly enjoyed the ride behind N. J.'s favorite trotter, which fairly flew over the ground and reminded us of Lou Dillon when she was in her prime.

Otto W. Frese, general manager for the Chicago Flower Growers' Association, is still receiving letters from florists throughout the country inquiring whether there is any foundation to the article which appeared under the head of corporations in the daily papers of this city a few weeks ago. Mr. Frese desires to notify all the trade through these columns that the report was erroneous; that the article appeared by mistake and has been the cause of much trouble in making the necessary explanations to friends of the association. That the company is still in business and very much alive can be seen when one visits their store in North Michigan avenue where business is very lively these days.

Samuel Slack is now proprietor of both the restaurant and rooming house at Edgebrook, having purchased the latter from Otto Wittbold this week. Mr. Slack has resigned his position as section foreman with the George Wittbold Co., and will assist his wife in conducting the hotel business in the future. His many friends among the employes wish him success and hope that he will continue to give them the same good "chuck" that they are receiving at present.

Peter Reinberg is cutting heavily in White and Pink Killarney roses which are mostly of a short medium grade, although the supply of fancy stock is plenty large enough to go around. Richmond and American Beauties are arriving in good condition and in fair supply. Tim Matchen and his force of assistants are kept busy filling the orders that are coming in and the store seems to have already taken on its holiday appearance.

The stock is arriving in splendid condition at the Bassett & Washburn store, but the demand is so good that it goes out about as fast as it comes in. This firm is now cutting about 2,000 sweet peas a day with stems that average 10 to 15 inches in length. The call for Rhea Reid roses at this house is very good and the salesmen are having their troubles trying to fill all the orders that keep coming in.

The Chicago Carnation Co. is filling a large number of orders for carnations of the prize winning quality that are pleasing their customers and bringing good prices. Washington, the new carnations that this firm placed on the market last year, is doing fine and is becoming more popular as the time passes.

Paul M. Bryant has returned from Hartford, Mich., where he bought 400 cases of selected winter berries for E. H. Hunt's holiday trade. The supply department is well stocked with Christmas goods and all that is needed now are the orders.

Harry Manheim visited Hoerber Bros.' greenhouses in Des Plaines last Sunday and was well pleased with the condition of the stock and the outlook for a large supply for the holidays.

Julius Zschau says the prolonged strike in the West Pullman shops has much to do with the general quietness that prevails in his neighborhood at present.

Kyle & Foerster are enjoying a good business and are receiving a fine line of seasonable stock which contains some choice American Beauty roses.

S. W. Pike of St. Charles must have had a second Thanksgiving day on Saturday, for he was seen in the market gathering a large supply of stock.

The next meeting of the Florists' Club will be held at the Union Restaurant, 72 West Randolph street, Thursday, December 7, at 8 p. m.

Zech & Mann are particularly well fixed on roses and carnations and are showing some fine lilies and Paper White narcissus.

George Reinberg is cutting a fancy grade of cypripediums in addition to a good supply of splendidly grown Richmond roses.

WHITE AND PINK
KILLARNEYS
BEAUTIES AND RICHMONDS.

We are cutting heavily in White and Pink Killarneys mostly of short and medium grade, but with plenty of fancy stock to go around. Richmonds are fine and arriving in large quantities as are also Beauties which are equal to the best and better than most of those to be seen in this market.

The E. C. Amling Co. can feel particularly proud of the fine cattleyas that they are handling, for they are of the finest quality and as good as any to be found in this market. John Michelsen, the efficient manager, says he is going to put in a large case so he can display these beautiful flowers to a better advantage.

H. Van Gelder is looking for a fine Christmas trade and says Percy Jones already has more orders booked for this holiday than he ever had before. Schumman & Kohout, who recently bought the Chicago Rose Co.'s greenhouses, are now shipping some of their stock to this firm.

The J. B. Deamud Co. is preparing for a busy Christmas trade and will be on deck with a large supply of seasonable cut flowers and a full line of greens. The violets that this house is offering are quickly sold to the best trade immediately upon arrival.

Sinner Bros. are cutting some fine Killarney and White Killarney roses and carnations. A. E. Hunt & Co. and Hunt Bros., who also have a stand on the floor, are showing some fine stock which is quickly disposed of.

J. A. Budlong is showing a very fine grade of Richmond and Prince de Bulgarie roses that are moving readily and bringing good prices. The carnations are arriving in quantity and are of good quality.

Weiland & Risch's stock is in fine condition for the holidays and from present indications the cuts look very promising. Exceptionally good poinsettias were seen at this house this week.

Chas. W. McKellar is having his troubles trying to fill his orders for orchids this week and could easily dispose of much larger quantities if there was any possible way of getting them.

The A. L. Randall Co.'s supply department is busy filling orders for holiday goods while the cut department is disposing of large quantities of cut flowers.

John Kruchten, the Gardenia man, is showing some fine specimens of these popular flowers which are eagerly sought for by his best trade.

Miss Gertrude Wallace is again attending to her duties as stenographer at the Chicago Flower Growers' Association's store.

Kennicott Bros. Co. is still supplying their customers with chrysanthemums and are well fixed on all other seasonable stock.

Winterson's Seed Store is receiving shipments of holly that show the quality to be as good as last year.

The Batavia Greenhouse Co. is cutting some fine American Beauty roses that find a very ready market.

A. Henderson & Co. are now busy disposing of a carload of holly which arrived this week.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

The Geo. Wittbold Co. is busy these days with decorations at the land show in the Coliseum. Window boxes, trees and decorative stock artistically arranged reflect much credit to this firm.

The "Christmas Tree Ship" which was described in the Tribune this week was the schooner Rouse Simmons, Captain H. Schunneman, now moored at the North Clark street bridge.

A. F. Amling and son, Paul, visited the local automobile salesrooms this week and seemed favorable impressed with the latest model Moline touring car. Now for a joy ride.

Chas. Wackling, formerly in the employ of Hoerber Bros., at Des Plaines, leaves this week to take charge of the Kemble Floral Co.'s greenhouses at Oskaloosa, Ia.

A ten-pound baby boy arrived at the home of Mr. and Mrs. Ernest Von Ammen this week. W. L. Kroeschell is the happy grandpa.

The Geo. M. Garland Co. is putting on the finishing touches to the alterations it is making to its factory at Des Plaines.

Thos. McAllister, of the A. Lange force, is serving on the jury in the municipal court this week.

Philip L. McGee, of the John C. Moninger Co., is busy calling on prospective customers this month.

F. C. Franzen, the Summerdale avenue florist, received a carload of Christmas trees this week.

John Poehlmann, Jr., will enter the Culver Military school at Culver, Ind., in January, 1912.

The John Nelson store and greenhouse on West Huron street is offered for sale or rent.

Visitors: Allison Currie, Milwaukee, Wis.; J. Meiklejohn, representing H. F. Darrow, New York; Joseph H. Hill, Richmond, Ind.

St. Louis.

AN IDEAL THANKSGIVING.

Thanksgiving day was ideal both in weather and as regards business. The temperature was moderate. Bright sunshine prevailed and the wholesalers and retailers all report good trade. Chrysanthemums and violets were the most in demand, but the price of the latter was not as high as it was expected they would sell for, $1 a hundred being the top price. A large number of eastern double violets were purchased by retailers. Orchids and lily of the valley had a good call, and flowering plants sold well.

NOTES.

C. A. Kuehn has erected a building at 1312 Pine street which he will occupy about December 10. There are three floors and a basement and everything will be modern and up-to-date. The first floor will be used for the cut flower department, with cold storage facilities in the basement, as well as lavatories and conveniences for the employes. The second floor will contain the florist supplies and on the top floor the wire work will be manufactured.

The M. M. Ayers Floral Co. had a splendid Thanksgiving trade. The fine plants of Gloire de Lorraine begonias and cyclamens in fancy pot covers sold well. David Geddes, the manager, arranged a very fine decoration at a cafe. The room was festooned with lycopodium and baskets of poinsettias were tastefully arranged, making a beautiful decoration.

The Florists' Union held a meeting December 4 at Twelfth and Benton streets and elected the following permanent officers: Julius Schaefer, president; Henry Duernberg, vice-president; John B. Barnard, secretary; Miss W. Seeger, treasurer.

An alarm of fire awakened Harry Young on the morning of December 4, when it was discovered that the roof of his residence had caught fire from sparks that had fallen on the shingles. The damage was slight.

Samuel Seligman, representing Wertheimer Bros., New York, stopped here this week on his way east to spend Christmas.

Geo. H. Angermueller is receiving some very fine lilies. W. F.

SCARCITY OF YELLOW CHRYSANTHEMUMS.

Thanksgiving passed but with no difference from other years, that is, a good demand for chrysanthemums, violets and roses. Lilies failed to move at all. The demand for sweet peas, white lilac, carnations, stevia, etc., was fair. As usual there was a great scarcity of yellow chrysanthemums at the last minute, but on all other flowers there was plenty at prices that were not higher than usual except a little stiffening in carnations and violets; these touched as high as five cents on carnations and $1.50 on violets.

NOTES.

The A. W. Smith Co.'s windows have contained displays of orchids that were great the past week, only specimen blooms being used. Many passersby thought they were too large to be natural.

Randolph & McClements cleaned up their immense crop of chrysanthemums Thanksgiving, and before the day was over were buying.

The Zieger Co. have been very busy with several large decorations lately. Oliver Beet is again back at his old place.

P. R. DeMuth, Connellsville, is cutting a late crop of chrysanthemums, and has a house of very fine poinsettias.

H. J. Hamm has secured several nice decorations during the past weeks, a table decoration at Fort Pitt included.

The McCallum Co. state that since chrysanthemums are over the demand for white liac is extra good.

E. C. Ludwig has been moving out very large quantities of flowers daily since before Thanksgiving.

C. H. Cramer, Uniontown, has moved into his new store and everything is in tip-top shape.

R. J. Daschbach states that he is well pleased with business so far in his new place.

A write-up appeared in the Sunday Dispatch of the Pittsburg florists and contained pictures of the members of the Pittsburg Cut Flower Co. and Bureau of Parks. Some of the other prominent florists were also mentioned.

Miss Mary Mick of Wellsville, O., has taken a position with E. Nauman & Son of Cleveland. J.

MARTINS FERRY, O.—Davidson Bros. are installing a large hot water heating system at the greenhouses on Loughlin Heights.

PUTNAM, CONN.—The greenhouses formerly operated by Ernest M. Arnold are now known as the East Side Greenhouses and C. S. Andem is the proprietor, the place being in charge of Richard Hermanson, formerly of Providence, R. I.

JACKSONVILLE, FLA.—The Tomlinson-Key Floral Co. have opened a store at 40 East Forsyth street which is fitted up in modern style, making one of the most up-to-date flower stores in the south. Both members of the firm were formerly connected with Mills, the Florist, and are well known to the city's flower buyers.

STOCK IN MUCH SHORTER SUPPLY.

Business in the wholesale market Thanksgiving week was very satisfactory. In the early part of the week conditions did not look so very promising but by Wednesday morning the supply was not as large as was expected, and the demand was greater. On Wednesday evening the afternoon shipments were still on hand and the late rush did not materialize, but on Thanksgiving morning everything was cleared out with the exception of white stock and violets. The demand for violets was very disappointing and thousands upon thousands of them were carried over until Friday and even Saturday and sold out at very low prices. Carnations were in good supply and sold remarkably well, as did all the varieties of roses. Orchids are still scarce at high figures. Lily of the valley is moving better. Lilies are plentiful with no change in quotations. On Saturday there was a great shortening up of all flowers and everything was closed out at increased prices, even chrysanthemums, though much less in quantity, have sold for very fair figures, while the consensus of opinion seems to be that it is not so much the increase in business that has caused the advanced prices as the great shortening up in the supply. Top grades of Killarneys, Radiance, Richmond, Mme. Chatenay and Lady Hillingdon and the newer yellow roses are in more demand. Paper White narcissus and Roman hyacinths are more plentiful and are commencing to stock up in all the houses. Adiantum Croweanum, asparagus and smilax of the best quality are moving better. Violets are going slowly. American Beauties, especially the top sizes, have advanced very much in price. Lilac is now all that could be desired as to quality, but moves slowly. Stevia is very plentiful, but is moving as well as can be expected. The top grades of Bridesmaid are selling better but even with the present scarcity it is impossible to move the top grades of white roses at satisfactory prices. It would seem that the days of the Bride are numbered as there seems to be demand only for the two shorter grades.

NOTES.

Myer, the popular Madison avenue florist, in addition to several orders for weddings and receptions, has been very busy with large orders for funerals. For the A. J. Mayer funeral in East Seventy-fourth street a casket cover of oak foliage, violets and lily of the valley was furnished; for the Oppenheim funeral, 33 West Fifty-eighth street, a large casket cover was arranged of Killarney roses, made solid to the floor, with a large cluster of cattleyas in the center. In addition he had eighteen designs for members of the family. It required two large automobile trucks to take the flowers to the cemetery. Mr. Myer also had the family order for the funeral of Miss Flower, of South Orange, N. J., a niece of the late Gov. Flower. The designs worthy of especial mention being a standing wreath of cattleyas with streamers of lily of the valley reaching to the base and a magnificent casket cover of the new rose, President Taft.

Chairman Chas. H. Totty, though a very busy man, is always talking national flower show, and it is remarkable the great interest already manifested in this great affair. As soon as the preliminary schedule is issued and it is decided definitely on the hall to hold the show, the work will go on incessantly to the termination of the affair, and if present appearances count for anything it will be an extraordinary exhibition in every particular.

Monday, December 11, will be an interesting night at the club meeting, the occasion being the election of officers for 1912. Election nights are always most interesting. At this meeting Prof. John Craig's important communication on "Organization of New York's Floricultural Interests" will be discussed and action taken thereon. Prof. Craig has promised to be present and help the good cause along.

The Growers' Cut Flower Co. has probably the finest chrysanthemums in the market at present. The later varieties are seen here in most magnificent shape. Harry Weston is sending to the company fine sweet peas and carnations. J. J. Coan, the manager, is fortunate in having such a fine supply of stock just at this time.

Philip Kessler, of Twenty-sixth street, is receiving smilax of very extra quality, which brings almost twice as much as the smilax in general that is in the market. Mr. Kessler is also handling very fine sweet peas and carnations.

The retailers as a rule are very much pleased with the general condition of things. The demand for flowers for the coming out of the debutantes has been phenomenal. Never before has there been such a call for flowers for this purpose.

The American Beauties forwarded to Moore, Hentz & Nash by the Brant-Hentz Flower Co., of Madison, N. J., are of the very best quality. It is a question if better American Beauties were ever seen at this season of the year.

Wm. Stuart Allen has a fine line of orchids in variety from the Julius Roehrs Co., the cattleyas being especially good. This company is also consigning to this house heavy shipments of lily of the valley of the finest quality.

A. C. Young & Co. are in receipt of very fine lilacs and carnations from Rhode Island and also good Paper White narcissus and Roman hyacinths from Ridgewood, N. J.

The attendance at the bowling alleys Friday was very light. The scores made were as follows:

Chadwick	190	212	192	208	193
Young	149	157	97	124	153
Kakuda	159	187	167	187	147
Shaw	129	138	119	111	172
Holt	107	124	114	127	79
Nugent	109	113	131	126	....
Scott	117	150	140	130	133

Y.

Philadelphia.

ROSES NOT OVER PLENTIFUL.

Things were humming the past week, there being a big daily demand that used up everything in sight. Chrysanthemums, which it was thought would be scarce for Thanksgiving day, were in good supply but only about equal to the demand; prices ruled rather high, at least 25 per cent better or above those of the week before. Good Major Bonnaffon and W. H. Chadwick were the leaders. Golden Wedding and Nagoya also sold well. Although there have been quite large additions to the rose-growing industry the past year the supply this fall is or has been, except in a few instances, not up to the demand. Many more roses of all the standard sorts could have been disposed of the past week at good prices. The quality of the roses is good for the season, some excellent stock being seen. Carnations are also getting into the game, are much improved and range 25 per cent higher than last week. Violets have been very scarce and consequently high in price, singles and doubles being quoted at the same figures. Mignonette is now carried regularly in stock and finds ready sale. Sweet peas are seen in good assortment, lavender being added to the colors of last week. Orchids are in great demand and bring holiday prices. It is wonderful where they all go to, as there are now twice as many grown for this market as there were three years ago. The assortment of chrysanthemums have narrowed to W. H. Chadwick, Golden Wedding and Mlle. Jeanne Nonin. Some very fine blooms of the latter being seen and ruling as high as $4 per dozen. In the work for the debutantes this season baskets appear to be taking a leading place and many pretty creations are seen; they are a trifle more showy and keep fresher than the bouquets, as for the most part the baskets are now made with tin linings which holds water so that the moss filling can be made wet which insures a supply of water to the flowers.

CLUB MEETING.

The December meeting of the Florists' Club was most interesting, the feature being the paper read by Secretary Rust on the history of the club since its organization. Quite a few of the charter members were present as well as others who were active in earlier movements of the trade before the founding of the club was determined. Many historical facts that had been forgotten and matters that now seem forceful were brought to mind, and the progress of the trade can be distinctly traced. In the earlier days the possibility of selling flowers on commission was the subject of a paper, and the chrysanthemum a menace to the business, was another. Efforts were also made to drive the fakir out of the business. It was also shown how the club had always helped the horticultural society with its exhibitions, contributing not only labor but money. Mr. Rust had given considerable time to the preparation of this subject and found much of his matter by referring to the files of THE AMERICAN FLORIST. Messrs. Craig, Fahrenwald, Watson, Hahlman, Kift and others took part in the discussion that followed and all expressed a desire and belief that the club would go on with the good work of the past and keep the club in the front rank of like organizations.

NOTES.

Alfred Campbell marketed a fine crop of Major Bonnaffon chrysanthemums last week; they were handled just right and were a great help to the market.

Ed Reid was right in it with his large supply of fine chrysanthemums for Thanksgiving. They were a fine lot.

American Beauty roses are in good demand with prices soaring.

Godfrey Aschmann celebrated his birthday December 3. K.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

A. J. BROWN predicts that pea beans will advance within the next four to six weeks.

IT is not anticipated that there will be any such scarcity of garden beans as exists in peas.

VISITED CHICAGO: A. J. Brown, Grand Rapids, Mich.; F. J. Poor, representing the Pieters-Wheeler Seed Co., Hollister, Calif.

HOLLISTER, CALIF. — Mrs. L. W. Wheeler, who has been seriously ill, is progressing as rapidly as can be expected.

MR. CARNEGIE'S list of the Twenty Greatest Men is readable, but a seed catalogue has pictures in it.—Chicago Tribune.

THERE are all kinds of rumors about the high price of peas. Sales are reported as high as $14 for Gradus and $12 for Telephone.

HENRY NUNGESSER, of Henry Nungesser & Co., New York, has resigned as president of that company and disposed of his interests in the firm.

IT is reported that one of the leading seed houses in the west will place considerable pea stock on the Pacific coast for growing the coming season under its own supervisors.

THE grass seed market certainly seems to be in the hands of bulls, with practically no sales to direct consumers. The market not only remains firm, but advances a little.

GLASGOW, KY.—A $5,000 suit has been brought by the attorney for the commonwealth against the American Seeding & Machine Co., alleging that they had entered into a combination with other companies to control and fix the price of agricultural implements.

CHICAGO.—Prices on the Board of Trade, December 6, for grass seed were noted as follows: Timothy, $13.50 to $15.25 per 100 pounds.—J. C. Vaughan is busy this week as a member of the board of control at the Irrigation Congress, Mayor Harrison having appointed him delegate for this city.

California Seed Crops.

The general outlook is that a much smaller acreage of onion will be planted this year than that of last year. Lettuce acreage will also be smaller. Sweet peas will be about the same as in 1911 and radishes not much different. Carrots will not be planted as heavily as last year.

The labor situation is very serious. None of the growers were able the past season to get sufficient help to properly harvest their crops, although the wages paid were 10 per cent to 20 per cent in advance of the previous year. There appears to be nothing ahead but a greater scarcity of labor and higher prices for the same. All things considered, the seed growers in this section will be compelled to secure better prices for their products in future. W.

Government Seed Distribution.

We take the following from Secretary Wilson's annual report, just issued:

"Seeds and plants were distributed upon congressional order as in former years. Between six and seven hundred tons of vegetable and flower seeds, put up in approximately 60,000,000 packets, were distributed the past season. Of this quantity about 10 per cent was flower seed and 90 vegetable seed. Approximately one-third of the total quantity was procured from surplus stocks, and the remainder was grown under contract for the department during the current season. In every case seed was secured on competitive bids, and no seed was accepted for distribution unless it was found after repeated tests to be of satisfactory purity and vitality. Every lot of seed is tested for germination two or more times before and after shipment and a sample of each lot is grown on the trial grounds of the department under the direct supervision of expert horticulturists to determine its trueness to type. Many thousand pounds of vegetable and flower seeds which do not meet the requirements of the department are rejected every year and returned to the seedsmen by whom they were shipped. Where seeds are contracted to be grown for the department the fields are inspected at the proper season by specialists, who see that the plants are uniformly true to type and that a proper system of roguing out variations and mixtures is followed. This system has resulted in steady improvement of the quality of seeds distributed by the department, as shown by the results obtained on the trial grounds and by hundreds of reports from all sections of the country.

The work of packeting, assembling and mailing the vegetable and flower seeds was done under contract at a cost of $1.10½ per thousand packets, which included delivery of the packeted seed in mail sacks direct to the Union Station. A new contract has been entered into for putting up and mailing the seeds for the coming distribution at a saving over the former contract of 1 cent per thousand packets."

Maine Seed Improvement Association.

The meeting of the Maine Seed Improvement Association was held at Augusta, Me., November 22-23, and was replete with matters of interest to the large attendance. President Hunton in his address called attention to the necessity of ascertaining what was a perfect specimen of any crop and of so educating the members that it could be recognized, and of having available seed ready for the purchase of the members. Among the recommendations of the secretary was that the Maine Experiment Station make arrangements that the members might secure from the station such varieties of seed as it may have for sale. The state has granted the association the sum of $500 for the purpose of encouraging the

breeding and development of pure seeds, to be expended in employing speakers and paying premiums. The meeting was addressed by Dr. G. M. Twichell on "Best Type of Field Corn," and Prof. Barrus of Cornell University on "Diseases." Premiums were awarded for the best seeds and demonstrations of oat and corn judging were held, followed by a judging contest.

Government Bulbs.

Secretary Wilson, in his annual report, has the following with reference to experiments in the production of bulbs:

"The propagation of Dutch bulbs in the Puget Sound region in connection with the congressional distribution is progressing favorably. Trial sets of narcissus and tulip bulbs propagated near Bellingham, Wash., were planted at Washington, D. C., with sets of bulbs of the same varieties imported from Holland, and the Bellingham bulbs produced better blossoms 10 days earlier than the imported bulbs. The early blooming period of American-grown bulbs is of importance to all professional florists, because of the saving in time and fuel where bulbs are forced for market."

F. C. Heinemann's Novelties.

Among the novelties offered by F. C. Heinemann, Erfurt, Germany, for 1912, the following are noted:

Dianthus laciniatus marginatus The African, a single flowering annual pink of dwarf and compact habit, bearing dark purple, almost black flowers, with a distinct velvety white edge.

Artemisia raccorum viridis Summer Fir, a new ornamental foliage plant introduced from China. It forms pyramindal bushes of dark rich green, three to five feet high, like a Christmas tree. The cut branches are very useful in wreaths and decorations.

Myosotis alpestris stricta grandiflora Fairy Queen, a large flowering pillar-shaped forget-me-not of light porcelain blue color.

Better Seeds.

Again and again I have asked gardeners and truckers, "What would you give for seed ninety-nine per cent of which you were sure would develop into plants like that?" pointing to some nearly perfect samples of the sort of which the field contained a good many, and received such answers as, "Oh, any price they asked," or, "The price would cut no figure; I would buy enough for several years, for I never could hope to get it again." Nor is the production of such seed an impossibility, for it has been done again and again. We may not be able to fully accomplish it in all cases, but I am very certain that it is not only possible but entirely practical to produce stocks which shall be a great deal better than those now in common use, and that too without adding inordinately to the cost of production.—W. W. Tracy in Market Growers' Journal, November 11.

[They always say they will, but put them face to face with the high priced product and nineteen out of twenty will try to buy "a little cheaper."—ED. AMERICAN FLORIST.]

QUALITY

THE

Carnation Sensat on

OF THE YEAR

MERIT

RAINBOW

WINNER OF THE BRONZE MEDAL

National Flower Show, Boston, March, 1911.

A Glorified Prosperity with all the Good Features of the Lawson Strain

With its name proclaiming its beautiful color combination, RAINBOW is one of the best, most profitable and remarkable carnations offered to the growers today. This excellent seedling should be grown by every carnation grower, because—

It is the best
It is easily propagated
It has a remarkably long, heavy, stiff stem
It has a strong, non-splitting calyx
It has large flowers of perfect form
It is a cool grower, doing best with 50°
It blooms freely, early, continuously
It is a good keeper

and, best of all, it is a money maker and sells on sight.

We realize 40% to 60% more profit on Rainbow than on any of the many standard varieties we have ever grown. It was sold last season exclusively to the largest retail dealer in New York City; who took our entire output.

The delicate shading from deep to light pink makes it both a superior display bloom and a general purpose flower, commanding the highest price everywhere. Our claims to superiority in Rainbow are supported by 15 years of painstaking experience in producing and growing carnation seedlings of extreme merit.

Rainbow should not be confused or classed with the ordinary pink and white variegated—it is far superior.

PEDIGREE:—Morning Glory crossed with Lawson, producing white seedling, overlaid with pink. This resulting seedling crossed with Lawson, producing Rainbow—"profitable and prolific."

Our propagating facilities are strictly up-to-date. We can deliver a half million rooted cuttings and guarantee them to be perfect and satisfactory in every way. **Orders booked now for January delivery.**

Massachusetts Asparagus Growers' Ass'n.

The third annual field day of the Massachusetts Asparagus Growers' association was held at the association's experiment station in September and an examination of the breeding experiments seemed to prove that a non-rusting marketable asparagus will be the outcome. The association was addressed by H. F. Hall, president of the Boston Market Gardeners' Association; Dr. William P. Brooks, Prof. Shamel and Prof. Norton.

THOMAS HOLLIS, Sec'y.

Prices of Indoor Fruits and Vegetables.

Chicago, December 4.—Mushrooms, 15 cents to 25 cents per pound; cucumbers, $1.20 to $1.50 per dozen; tomatoes, 20 cents to 25 cents per pound; radishes, 15 cents to 45 cents per dozen bunches; lettuce, 22½ cents to 25 cents per pound.

New York, December 2.—Mushrooms, $1 to $2 per 4-pound basket; cucumbers, $1.25 cents to $1.50 per dozen; tomatoes, 10 cents to 20 cents per pound; radishes, $1.50 to $2.50 per 100 bunches; lettuce, $1.25 to $2 per strap; mint, 40 cents to 60 cents per dozen bunches.

Indoor Parsley.

Parsley can be grown beautifully under glass, in fact, it can be done so well as to rival the finest ferns. We believe if greenhouse growers would pay more attention to parsley there would be little southern parsley used. The mistake generally made is to stick the parsley under benches, or along walks, or in some shady corner. To such growers we have nothing to say; but to him who is willing and wide awake to give the crop full light in a good house, these remarks are intended. Our method has been explained in these columns repeatedly. It is to sow the seed as early as possible in good garden ground in drills 14 to 16 inches apart, to thin the plants to four inches in the rows; to keep absolutely clean and cultivated down to September 1, and to house about that time the same as carnation growers house their plants. We remove most of the foliage, plant a little closer than in the field and treat much like lettuce. This method allows the formation of a powerful root system before cold weather, which is necessary. When cutting commences we break or cut every mature leaf as we go and do not jump here or there. A cleaning up of yellow or decayed foliage follows and the cut section is run on the dry side until new growth is active. Parsley responds to nitrate of soda or any other method of feeding. The bunches are stood in water for some time to strengthen them for market exposure.

Another method followed by some is the renewal method. This is somewhat along the line of forcing bulbs. A new lot is brought in every few weeks, as by this method the roots are soon exhausted and play out. The roots are kept in a cold shed or in benches where they can be reached and brought into heat as needed. Being brought from a cold place into a warm one they respond at once, but at the cost of their stored-up vitality, which is soon exhausted. We do not like this method, as it requires too many roots, too much labor, and one is more subject to be off crop than by the other. This method applies where one can get a large supply of strong roots and either has overlooked this crop earlier in the season or where empty space is available later on.

MARKETMAN.

Cost of Producing Potatoes.

The cost of producing potatoes in the different sections of the country together with the yield per acre according to more than 4,000 correspondents of the Bureau of Statistics is issued by the U. S. Department of Agriculture in the November Crop Reporter. The country is divided into six sections: North Atlantic states, South Atlantic states, North central east of Mississippi river, North central west of Mississippi river, South central and Far western states. The largest yield is in the North Atlantic states, 138 bushels per acre; the second the Far western, 137 bushels, and the lowest yield in South central, 84 bushels, the average of the country being 118 bushels. The cost of production varies from 22.5 cents per bushel in the Far western to 30.4 in the South central, the average being 24.6 cents. The value of the product per bushel is 46 cents in the North central east, 53 cents in North Atlantic and North central west, 60 cents in South Atlantic, 64 cents in Far western and 71 cents in South central states, the average value for the country being 53 cents per bushel.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y.

Thirty-seventh annual convention to be held at Boston, Mass., 1912.

HUMBOLDT, IA.—Fire destroyed the dwelling house on the Humboldt Nursery Co.'s property November 15. The loss is estimated at $2,500.

ALBANY, N. Y.—In order to increase the output of the state nurseries the state conservation commission has directed the establishment of a nursery at Great Meadows prison at Comstock.

THE ninth annual meeting of the Alabama State Horticultural Society will be held at Jasper, Ala., January 25, 1912. Many excellent speakers have been secured, and papers will be read on fruit growing, pruning, spraying, harvesting and marketing, vegetable growing and insects, and practical demonstrations of spraying outfits and in pruning and setting of fruit trees.

Autumn Foliage in Arnold Arboretum.

A few plants in the Arnold Arboretum are still conspicuous for the beauty of the autumn color of their leaves. The most conspicuous, states the Bulletin, perhaps, is Parrotia persica, a member of the witch hazel family and a native of the Trans-Caucasus and Persia. Sometimes a small tree, it here grows in the form of a high broad bush. The flowers and the fruit are not conspicuous but the leaves, which in shape resemble those of the native witch hazel, are now splendid with tints of clear yellow, orange and red.

A handsome plant in flower, the value of Fothergilla major of the Appalachian Mountains is increased by the autumn color of the leaves which are now light orange and red. The handsomest, perhaps, of the barberries which have been successfully cultivated in the Arboretum is the Japanese Berberis Regeliana. This plant was introduced into the United States many years ago by the Parsons Nursery at Flushing, Long Island, and was distributed under the the name of "Hakodate." It is a medium-sized shrub with large pale yellow flowers in long clusters, and large thick leaves which turn in the autumn to brilliant shades of orange and red, and handsome showy fruits. The leaves are now falling rapidly but the fruit will remain on the branches for several weeks longer. Plants of the Japanese Berberis Sieboldii, with dull deep red leaves, and two Chinese species are just beginning to take on their autumn colors, Berberis diaphana and B. dictyophylla. The former is a compact, low, round-topped shrub with large solitary flowers and fruits, and leaves which in the late autumn are hardly surpassed in the brightness of their scarlet tints. Berberis dictyophylla is a taller shrub with erect branches and just now the red on the upper surface of the small spiny leaves contrasts finely with the silvery color of their lower surface. These three Asiatic species, which are still rare in gardens, deserve more general cultivation.

The autumn colors of the leaves of the Yellowroot, Xanthorrhiza apiifolia, a pale canary yellow and green, add to the value of this useful little plant which has been largely used as an undershrub along several of the drives in the Arboretum. It is admirably suited for this purpose as it rarely grows more than a couple of feet high and spreads rapidly into dense masses which take entire possession of the ground. The small purple flowers which appear before the leaves and the fruits do not make much show, but the color of the foliage is good throughout the season.

Among the large number of cotoneasters which have recently come to the Arboretum from western China Cotoneaster Dielsiana has become well established and promises to be a valuable decorative plant in this climate. It is a shrub with arching stems and branches which just now are covered with bright red fruits and small leaves which have turned deep bright reddish purple.

The slender leafless branches of Callicarpa Japonica are now covered with the small violet-colored fruits of this hardy shrub which is a desirable addition to northern gardens, although the fruits are smaller and less showy than those of the American species, the so-called French mulberry of the southern states which is not hardy here, and of several of the Asiatic species which are not yet established in the Arboretum.

Tree Planting Prizes in Autralia.

In order to remedy the mistake of the past in destroying valuable belts of timber in the preparation of land for agricultural purposes and to encourage settlers to undertake the systematic planting of trees on their holdings, the Government of the State of Victoria, Australia, has decided to offer prizes for competition, states Vice Consul Charles Hartlett. The state is to be divided into seven divisions, under which entries will be classified, a list compiled of the trees suitable for planting in each, and a table issued setting forth the minimum area of the holding that will be recognized, the minimum area that must be planted, and the value of the prizes in each division. For instance, division No. 5 (hill country, formerly forest, more or less cleared, and old timber killed) will require a minimum holding of 75 acres, of which a minimum area of four per cent is to be planted, and the prizes are first $292, second $122, and third $73.

A certificate will be issued to every prize taker and a gold medal to all winners of a first prize. Prizes will be awarded after three years, dating from May 1, 1912. In judging the work of competitors, consideration will be given to the value of the plantation for shelter purposes, value for wind breaks, value for timber supply, and value for ornamental purposes and general utility. The judges will be a committee of six and comprise the Minister of Lands, Conservator of Forests, Director of the Melbourne Botanical Gardens, and the horticultural representatives of the three leading newspapers.

JOSEPH HEACOCK CO., Wyncote, Pa. Railway Station, Jenkintown.

Denver, Colo.

Everyone reports good business for Thanksgiving, with everything cleaning up in good shape. Chrysanthemums were in good condition and sold well at fair prices. The weather being mild, a great many more were worn at the games than in previous years, which cleaned up the surplus stock. Roses sold well, especially American Beauties and Richmonds, which were used to supply the red for the college colors. Carnations were scarce and many of the growers were called upon to cut the stock before it was ready. Violets did not go so readily owing to the large amount of chrysanthemums which were worn. Plants sold well, Begonia Gloire de Lorraine taking the lead, many being in fine shape; cyclamen sold fairly well, but will be in better shape for Christmas. Poinsettias and azaleas have made their appearance, taking the place of chrysanthemums for window decorations.

NOTES.

The flower show committee made a favorable report at the meeting November 20. Nearly all the growers and store men subscribed to the guarantee fund, assuring a good show for 1912 at the Auditorium November 11-16. J. A. Valentine, N. A. Benson and A. H. Bush were selected as a permanent committee to have charge of the exhibition.

Geo. H. Cooper and wife entertained the Coterie of the Park Floral Co. at their home, 649 Marion street, on the evening of November 22. After an excellent dinner games and music were indulged in and a very pleasant evening spent. Mr. and Mrs. Cooper were formerly with the Park Floral Co. and are members of the Coterie.

Harry Berry has moved his store from 613 Fifteenth street to 1519 and 1521 Wilson street, next door to the Orpheum theater.

Cupid has been busy among the florists again. Thurston Smith has joined the married ranks.

Another store has been opened by Frank Goeschle at 245 Broadway.

E. P. N.

HOLYOKE, MASS.—Gallivan Bros. have just completed a greenhouse 50x200 feet at Smith's Ferry, built by the King Construction Co.

HARTFORD, CONN.—At a meeting of the Connecticut Horticultural Society held November 24 the matter of holding the next chrysanthemum show at New Britain was discussed, that city making a very profitable proposition. The proposed national inspection law regarding nursery stock was also considered. Eleven new members were admitted.

Seasonable Stock

Asparagus Plumosus, 2¼-in. $3.00 per 100; $25.00 per 1000;

AZALEAS.

Another specialty of ours are now in. **Azalea Indica.** New stock. They are all in fine condition, full of buds.

Have only large size of Deutsbbe Perle, double white, $1.25, $1.50, $1.75 to $2.00; Vervæneana, double rose variegated, large sizes only, $1.00, $1.25, $1.50 to $1.75; Mme. Petrick double pink 75c, $1.00, $1.25 to $1.50; a novelty and scarce, very handsome, large flowers resembles Vervæneana, and are called in Belgium the White Vervæneana, price 75c, $1.00, $1.25 to $1.50. Remember, for Christmas forcing we have to select only large, healthy plants; small, weak plants will not force successfully for Christmas.

Just Arrived with the Azaleas.

A fine consignment of **Latania Borbonica,** in first-class condition, perfect foliage, large stock, 8 good leaves, height given in consular invoice at 35 to 40 in., fit for 7 to 8 in pots, 75c to $1.00.

Combination Latania Borbonica (3 plants) in a 6-in. pot, which gives them a fine appearance, bushy about 13 to 14 leaves to a pot, 6-in. pots, 50c, 60c to 75c

Cocos Weddelliana Palms, made up of 3 plants 4 to 5-in. pots, 30c and 40c; 3-in., 15c, 18c and 20c; 4-in., 25c.

Primula Obconica Grandiflora, assorted colors, in bloom, large 4-in., 20c; medium large 5½-in., 25c bushy.

Cyclamen Grandiflora, 4-in., 25c; 5¼-in., 35c.

Primula Chinensis, John F. Rupp's so well known strain, assorted colors, 4-in., 10c; 5¼-in. pots, $2.50 per doz.

What Mr. F. J. Michell, of the Well Known Seed House, Henry F. Michell Company, Philadelphia, Said:

"Have just visited the greenhouses of Godfrey Aschmann, and must say it was indeed a great surprise to me. I have never seen a better lot of Araucarias, Azaleas, Ferns and other plants in all sizes and prices as are at Mr. Aschmann's."

25 at 100 rates. **Cash with order, please.**
All plants must travel at purchaser's risk.

Poinsettias.

Just look! We have a full house of that Christmas novelty, the **Poinsettia,** in bloom medium size, 3-in., 15c; 4-in., 25c; 5, 5½ to 6 in., for basket work or for cutting, 35c, 40c to 50c; 8 to 10-in pans, 3 Poinsettias in center, and either Asparagus Plumosus Nanus or Assorted Dish Ferns as a border, 75c, $1.00 to $1.25 per pan.

Jerusalem Cherries.

What is Christmas without red berries like those on the Holly? Also the **Jerusalem Cherries** are welcome plants and much admired by everyone interested in Christmas decorations. We never had in all our experience a better stock of Jerusalem Cherries than we have this year. Every plant is loaded with red, ripe berries; only large plants. We can offer 6 to 6½-in. pots, 35c, 40c, 50c, 75c to $1.00.

In Rubbers (Ficus Elastica) we are well prepared; finest stock in the country; 5½, 6 to 7-in. pots 25c, 35c, 40c, 50c, 75c to $1.00; all staked up.

20,000 Asparagus Plumosus Nanus, 2½-in., $3.00 per 100, $25.00 per 1000; 3-in., $5.00 per 100; 4-in., $10.00 per 100.

Asparagus Sprengeri, large size, 4-in., 15c; medium size, 4 in., 10c; 2½-in., $3.00 per 100.

Cineraria Hybrida Grandiflora, Aschmann's well known strain, 2½-in. pots, 3c; 3-in., 8c; 4-in., 15c.

Look! **Kentia Belmoreana,** new stock, arrived with the Azaleas from Europe, 25 in. high, 5½-in. pots only 50c to 60c.

Yonkers Horticultural Society.

A well-attended meeting of the Yonkers Horticultural Society was held December 1, and many interesting matters discussed. The committee on spring show reported progress and the executive committee the financial result of the past fall show. It was voted to pay a deficit of $83.80 from the society's funds. Four active members, A. W. Millard, W. A. Murray, F. Smith and W. Muir, were elected and one associate member, W. Butts. Two nominations for membership were received.

A prize for twelve carnations, any variety, was awarded R. Cochrane for splendid blooms of Enchantress, White Enchantress and Dorothy Gordon. Messrs. Macdonald and Kinney were awarded cultural certificates, Messrs. Mooney, Nichols and Miller acting as judges. J. Roehrs Co., of Rutherford, N. J., exhibited Begonia La Patrie, to which a certificate of merit was awarded, its handsome, glossy foliage being much admired. H. M. B.

ROBBINSVILLE, N. J.—C. A. Bennett has just closed a contract for the erection of a handsome residence.

BIRDSBORO, PA.—Allen J. Grubb is making extensive alterations and improvements to his greenhouses.

PALESTINE, TEXAS.—Mrs. W. C. Kendall has just completed a greenhouse 21x33 feet, which is greatly admired by all who have seen it. She reports trade as rather slow.

HOLIDAY BOOKS.

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. $6.00.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

HEATING AND VENTILATING BUILDINGS (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

Landscape Gardening

PROF. CRAIG.

A course for Gardeners, Florists and Home-makers, taught by Prof. Craig and Prof. Beal of Cornell University.

Progressive Florists recognize the growing importance of a knowledge of Landscape Art.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

VERBENAS!

Verbenas! Verbenas!!

Large variety of 2¼-inch stock now ready for shipping.

Fine for use in the South.

J. L. DILLON, Bloomsburg, Pa.

Hollyhocks for the West

Now ready. Splendid field-grown plants from the famous **Chater's strain** of double Hollyhocks, in separate colors as follows: White, canary, yellow, apple blossom, peach blossom, scarlet, rose, deep red and brown-black. These are from seeds sown early in the spring and given space in the open. They are simply perfect, strong plants, which will flower heavily next year, yet I can send fine sizes for mailing if desired. I will doliver to customer by express at **$5.00 per 100,** assorted or choice. Sample plants on application. Other hardy plants.

CARL PURDY, UKIAH, CALIF.

NORTH BEVERLY, MASS.—The violets in the houses of C. E. Streamberg are blooming finely and are proving an attraction to the flower lovers.

FALL RIVER, MASS.—The bids for the construction of the greenhouse at Watuppa pumping station were opened by the board November 22. There were three bids submitted by Hitchings & Co., Elizabeth, N. J.; Pierson U-Bar Co., New York; and William H. Hulton, Jersey City, N. J.

ENID, OKLA.—The boiler room and about one-fourth of the greenhouse plant of J. R. Detweiler was destroyed by fire November 30 which originated from an oil burner. By spreading tarpaulins over the openings and the use of oil stoves the plants were saved. Repairs were made at once and business transacted with no intermission. The loss was estimated at $1,500.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

RANDOLPH & McCLEMENTS, Successors to Chas. T. Siebert, Baum & Beatty Sts., Pittsburg.

Tacoma, Wash.

Business, taken as a whole, has improved in the last two weeks. According to reports from a majority of the florists, the gain will be probably about fifty per cent. Thanksgiving trade will certainly bring about better business and the supply is of much better quality with considerable increase in quantity. The real hard freeze that cut down all outdoor stock has been a benefit to the trade. Never before in our eight years' residence here have we seen such an early and severe blizzard. However, the frost on Puget Sound never kills and injures as it does back east or inland. Often after a hard freeze at night a fog sweeps inland from the salt water, causing an evaporation that leaves vegetation uninjured. Rose bushes hold their foliage sometimes throughout the entire winter.

NOTES.

The interior of the office of the Northwestern Floral Co. was burned and stock and building damaged to the amount of about $1,000. Mr. Pilkington states the cause was some defect in electric wiring. He reports very good business up to date and business especially good at his place in Portland.

Several local growers have a very nice crop of lettuce with the market not especially anxious for it, probably due to the fact that gardeners are growing head lettuce outside quite extensively.

The new store opened by F. C. Smith gives very good reports of trade conditions. S. L. H.

Are You on the List for this Beautiful 1912 Calendar?

IF you are not, you ought to be. Here's a little bit of history about the calendar. Along last June we got the idea that instead of spending several hundreds of dollars for ten thousand or more calendars of the usual sort, if we were to spend the same money for say 3000, we could make a calendar that would be so attractive, so down right good that even you would like to have one to hang in the best room in your house.

So that's exactly what we did. Holrock, the well-known artist, did the color drawing for the back and an expert calendar man designed the general arrangement. Then we gave it to the best printer we knew in New York and told him this was his chance to show what he could do.

As a result our 1912 calendar is an unusally beautiful one. Just your kind of calendar. If you want one, tear off this coupon, fill it in and mail it to us. Your name will then be put on the list and you will surely get one.

This is the only sure way of making sure of having one.

Where There Is Condensation

——there is need for a **Morehead Steam Trap**
Condensation in steam lines is akin to matter out of place—means wasted energy.

If your lines are sluggish—if your houses are not of uniform temperature, write us. We guarantee to drain your lines perfectly—return the pure, hot condensation to your boiler without pump or injector or make no charge for the trial. Obey that impulse—write now.

Send for "Book on Condensation."

MASTICA

FOR Greenhouse Glazing
USE IT NOW.
F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

MASTICA is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass, as occurs with putty. **Lasts longer than putty.** Easy to apply.

Mention the American Florist when writing

Crimped Invisible **Superior Carnation Staple**

(PATENT APPLIED FOR.)

For repairing Split Carnations. 1000 for 50 cents postpaid. Sample free.

F. W. WAITE, 293 Main St., Springfield, Mass.

Mention the American Florist when writing

Wichita, Kans.

Thanksgiving week showed a volume of business fully as good as last year, possibly a little better. The flowers most desired were chrysanthemums in various grades with a good demand for the best qualities at retail prices of $3 to $5 per dozen. Carnations were well cleaned up, and good roses met with a fair demand. There was only a moderate sale of potted plants. The weather conditions were almost perfect and no doubt aided largely in putting the public into a buying frame of mind.

Evangelist "Billy" Sunday, who is conducting a religious revival meeting here, announced Friday, Dec. 1, as "Mother's Day" and requested that all who attended the services that day wear a white flower in honor of mother. This resulted in quite a run on white stock which was much enjoyed by the florists. W. I. CHITA.

SHAWNEE, OKLA.—The Brenner Floral Co. has been declared in bankruptcy and the court has ordered the property sold December 14. The C. E. Francke Floral Co. hold a lease on the property and will dispose of the stock to anyone who desires to buy the business.

FALLS CITY, NEB.—Simonton & Pence report a good Thanksgiving business. They built two new rose houses last summer from which they are cutting some fine Killarney, Richmond, Perle and Bridesmaid roses. The indications are for a good Christmas trade.

Los Angeles, Calif.

Nearly $40,000 has been appropriated by the council for the remodeling of Eastlake park and the erection of a modern conservatory. The shore of the lake is to be improved by the planting of trees, giving it a more natural appearance and hiding the roadways and tops of city buildings. New trails have been cut over Mount Hollywood in Griffith park, thus rendering this beautiful park more accessible but—at least until the trails have grovn over some—not more beautiful.

Thee Florists have altered their windows at Fifth and Hill streets and a much better display can now be made. Some exceedingly pretty baskets are shown and both partners keep busy. Herbert Wolfskill has been absent from the store for a time on account of his sister's serious illness.

O. C. Saakes says people are too busy talking about the election to buy flowers but he seems to keep busy just the same. A big consignment of bulbs from Vaughan's Seed Store, Chicago, recently arrived for planting at his nursery.

A. F. Borden has been sending in quantities of sprays of pompon chrysanthemums from outside that meet with a ready sale.

The Superior Nursery Co. has a fine stock of Boston ferns and others of the nephrolepsis, and the plants sent into the stores of late are fine, well finished and healthy. H. R. R.

THE GUARANTEED GREENHOUSE

What sort of a guarantee does your local planing mill give you on greenhouse material? What sort of a guarantee does the interior finish manufacturer give you on greenhouse material? What sort of a guarantee can any firm give that is obliged to go out and buy most of the material after they get your order?

Now we are serious about this guarantee proposition. For many years we have tried to devise a method of identification for our material so that we could unconditionally guarantee it. We think we have at last hit on a plan. We have not worked it out in detail but you will hear more about it very shortly. We want you to know now that every piece of material that we sell is sold with an absolute guarantee. We want you to know that we are interested as a firm, also personally, in each and every customer and we intend that each of these customers shall have the fullest measure of satisfaction. This guarantee will be made very binding. Before you build another greenhouse get figures from a firm that makes nothing else but greenhouses. The first step is to get our catalogues.

Send for the one you want:
No. 6 Heating Goods, Pipes, etc.
No. 7 Greenhouse Materials.
No. 8 The Moninger Boiler.

Our catalog gives a full description. Write for one.

ADVANCE CO., Richmond, Ind.

Davenport, Ia.

Several of the florists report Thanksgiving trade up to last year, but most of the boys claim it fell short at least 25 per cent. Chrysanthemums were the most called for blooms, yellow taking the lead with not enough to meet the demand. All other colors were plentiful. There were also plenty of carnations, violets and roses of good quality. The fine weather of the past week has greatly improved roses and carnations. November has been the coldest and most cloudy for the past 20 years, but December is opening up fine, so there will be, without doubt, plenty of flowers for the holidays.

NOTES.

The next club meeting will be held at the home of John Staack Thursday, December 14. Better be on hand, you know there will be a big time. Something is apt to be said about the annual banquet.

The chrysanthemum show at Van der Veer park was a great success, judging from the thousands of people that visited there while the show was in progress.

John T. Temple slipped on the ice about a week ago and was confined to the house for several days. Uncle is out again and as spry as ever.

Henry Pauli has put one over the rest, so to speak, being the first florist in these parts to use an auto for delivery purposes.

The Davis Co.'s large plant at Bettendorf is nearing completion and will soon be in running order.

The bulb man is around. Load your gun, boys! T. E.

Modern Lover.

Yes, my dear, I'm very modern,
New inventions are my forte;
Seedless apples, horseless carts and
Wireless 'phones have my support.

You demand a modern lover?
I can prove I'm it by this:
For the days preceding Christmas
I've a mistletoe-less kiss.

—Burges Johnson in Life.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Wreaths.

With the cheaper grades of Christmas wreaths it is much better to purchase them of the dealers than to attempt to manufacture them, for they are made where the material is plenty and by cheap labor that learn to handle them very rapidly, but the better wreaths the dealer can arrange himself and make a finer article and also introduce features that are not found elsewhere. A few sprays of holly or bunches of winterberries and red immortelles will often brighten up a green wreath and make it attractive. The wreaths of pine, with the cones worked into them, are particularly pleasing and always attract attention when shown. A good supply of holly-red ribbon is a necessity at this season, and the wreaths displayed should have a nice bow of this tied on them to show the customer how these Christmas offerings are to be used. These small details are all of great assistance to the sale at this time and are all carefully attended to by up-to-date dealers.

Plant Baskets.

The presentation to the prospective buyer of plants in baskets or boxes has become a prominent feature of the trade at both Christmas and Easter and a great many of these are arranged and sold by the large stores. Occasionally the report is made that the call for these is not so large as formerly, but invariably this is caused by the dealer not accurately feeling the demands of his trade. It is not every store that will have a trade that purchases the high cost assortments, but baskets of all sizes and shapes can be obtained and small boxes are easily and cheaply made, and these covered with bark are nicely adapted to this work and are really inexpensive. The baskets of willow can be purchased at a moderate price, and these can be filled with cheaper plants for those that do not want to make expensive presents. With a trade that ordinarily does not pay more than two or three dollars for a plant, a ten or fifteen-dollar basket is altogether too expensive to offer them at first. This trade must be educated to these nice gifts by first inducing them to buy some at not so high a figure. They will greatly admire these more costly arrangements, but will have to be shown that plants in this form are satisfactory, and will first buy something cheaper. Nice boxes and baskets can be put up at the same prices that they have been in the custom of buying, and when they prove satisfactory larger and more expensive offerings will be purchased.

Many growers and dealers use their specimen plants for their boxes and baskets, which makes them expensive, but this is unnecessary. There are always in every grower's collection many plants that are one-sided in their growth, lose many of their leaves, or in some other way are far from being plants that can be called specimens and would not find sale, and these can be put in the baskets with the best side out or with a few small ferns to cover up the blemishes and sold. By so doing what would in all probability be thrown away, or at any rate be a loss, can be made to turn the balance in the right way. The plants in these arrangements are always set very close and this helps to cover up any deficiency that the plant has.

Baskets are now offered by the manufacturers with tins to conform to the basket, and in these the plants can be set, and with proper care they will make a splendid ornament for the home that will last a long time. The arrangement of the plants, especially in regard to the colors, should be carefully studied. The reds will, of course, be the most in demand. Poinsettias make a nice basket offering in themselves, but with the exception of those who have wealthy customers the basket or box should not be made too expensive, for these plants do not last any great length of time. A beautiful effect in red can be obtained by filling the basket with decorative plants and placing among them nicely berried sprays of winterberries. In the arrangements containing the different plants bearing pink flowers, it is neces-

sary to use judgment in the selection of colors or they may clash. The cerise neither harmonizes nor contrasts well with any of the bright colors, white only being permissible with this shade. The plants with variegated foliage should also be used with care. It is not well to use too many in one basket, but to have plenty of green decorative plants to set them off.

Our illustrations of the several baskets plainly show what beautiful effects may be produced by the proper assembling of the Christmas plants in these offerings to the trade. While these are made up in most cases of the more expensive plants and intended for the wealthier class of people, yet by the application of good judgment very beautiful arrangements can be put up with the cheaper plants.

Festooning.

It always pays to have festooning artistically hung in the store or office. It is part of the Christmas trade, but the customer will never know that the dealer has it unless it is shown in the best possible shape. To leave in the original coils does not attract the purchaser, so it is better to festoon the salesroom and show the public how these ropes of foliage can be made attractive. The festooning of laurel is by far the best, and does not have the cheap look that the festoon of bouquet green has, and this year the latter being so scarce is at nearly the same price as the laurel. Large halls and churches are invariable hung with the laurel festooning, but if these are lofty and the festoons do not come down to the level of the eye coarser greens can be used. Arbor-vitæ for such locations makes very suitable festooning.

Prepared Flowers.

Baskets of dried and prepared flowers make very decorative features for the holidays. The prepared branches of beech and the highly colored fern fronds make up beautifully. The red ruscus is also very bright and showy and just the right color for Christmas. The sprays of dried statice work in nicely with the high colored foliage, as do the spikes of eulalia or pampas grass. All these prepared flowers and leaves arrange beautifully in handle baskets and if adorned with bright ribbons that are in harmony with the colors used, make fine offerings for the Christmas trade and they will be ornamental throughout the winter.

Pelargoniums Not Flowering.

ED. AMERICAN FLORIST:

Our show pelargoniums grew finely with almost perfect foliage, but did not bloom. Can you tell what was the cause? J. O.

Utah.

As nothing is said as to culture of the plants it is very difficult to state the cause of the plants not blooming. Pelargoniums bloom in spring and early summer, but they do not like the hot, dry summers and do much better if given a little shade. After the blooming season the plants require but little water and a cool temperature until the beginning of the year, when they should be started slowly and potted. They should be watered sparingly until the flower buds set and in a climate where the sun shines brightly and the atmosphere is dry, grown in a house that is slightly shaded. W.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Holiday Suggestions.

CHRISTMAS WINDOW.

An up-to-date display in the window can be made of automobile flower-holders made of bamboo, wicker, metal or glass of different sizes arranged on a triple screen of green.

In the low Japanese bamboo design in natural color, in which a glass tube

Partridge Berry Novelty.

Arranged by Geo. M. Stumpp, New York.

is filled with water, arrange the tiny yellow chrysanthemums and suspend with a yellow satin ribbon, the different sizes of the one design arranged in groups by themselves. In the wicker designs, use pink roses and lily of the valley combinations for the opposite fold of screen. In the center fold arrange the cut glass and other automobile flower-holders with cattleyas. Then to make it more to the point make an electric auto of flowers, or rather the body of galax leaves and the wheels of lily of the valley, and arrange the balance of the window with greens and palms.

SHOW WINDOW.

Have a good-sized frame made of wire, say about three to four feet, in the shape of a griffin. Have one arm of the design raised in which to hold a tall tube-shaped staff, about 27 inches across the top, tapering to a point at the bottom. This should extend a little above the griffin's head. The body and staff should be made of galax leaves, the head and wings of dark red carnations, and the staff of galax leaves. Fill the top of the staff with a large bunch of dark red chrysanthemums. From the foot of the griffin, resting on the ground, extend a wide red sash ribbon and attach the other end to a pillar placed at the side of the griffin, finishing with a full rosette bow. There should be two pillars and the griffin should be placed about its height in distance from the pillars and in a central position. The pillars should be placed diagonally in the window, and should be painted white. On the top of each pillar place a huge ball of red carnations and at the base surround them with small growing ferns. Cover the floor of the window with green moss. At the background group palms, placing them so as to lend a finish to the griffin design. The other end of the window should have nothing, allowing the green moss to lend it a finish and if necessary asparagus can be draped at the side, in case no mirror is available. Electric lights could be used for the eyes of the griffin. A curtain of asparagus to cover the glass or windows at the back could be effectively arranged in case there should be no mirror reflection. Care should be used in securing a wire frame of good proportions. Instead of having the staff of moss and galax, a glass tube or tall vase, from which the foot has been broken, can be used advantageously by placing this in the wire staff and covering it closely with Southern smilax. Then fill and arrange chrysanthemums or American Beauty roses in this vase.

This griffin can be very useful for decorations, using them at the sides of fireplaces, from which garlands can be most beautifully arranged. They can also be made into a bridal bower in which case garlands of pink roses can be arranged around the neck of the griffin, and the wings can also be made of full blown roses showing their yellow centers and the staff filled with pink roses. Tall palms at the back will allow for the pink sash ribbon to be tied. Group the palms in a half circle at the back and finish with small ferns. Scatter rose leaves around the griffins. Too much stress cannot be laid upon an artistic wire frame for the griffin. For instance, the head may have the form of a lion and the body shaped accordingly. Then the sphinx suggestion is effective as well. Ingenuity must be used in its make-up.

A. E. KLUNDER.

Poinsettia Leaves Falling.

ED. AMERICAN FLORIST:

Can you inform me why the leaves of poinsettias fall off? J. O.

There are many things that will cause the leaves of the poinsettias to fall off. Over-watering will cause it as well as any check to the plant's growth. A variable temperature is, however, more often than anything else the cause of this. The poinsettia is a native of Mexico and does best in a warm temperature. About 60° at night with a small rise during the daytime is the temperature in which the most successful gardeners grow this plant. It will grow in a cooler temperature but the heads will be much smaller, yet it will not stand a variable night temperature. If grown in 60° this must be maintained until the bracts are fully out or the leaves will surely drop. W.

BASKET OF LILAC, CATTLEYAS, DENDROBIUM FORMOSUM AND BOUGAINVILLEA.
Arranged by Geo. M. Stumpp, New York.

GREENHOUSER'S OBSERVATIONS.

Stealing the Thunder.

For much too long it has been the custom of florists to get hold of a variety, unknown in their locality, and, if it proves a good thing, to rename it and call it after their own place. A raiser, for instance, will send out a new carnation, a chrysanthemum or a rose and Mr. Florist in the small town immediately gets hold of it, propagates it and when the first flowers are fit for market robs it of its name and pedigree and gives it a name of his own. When his friends ask him about it says he has purchased the entire stock from the raiser or else he raised it himself and gives the parentage and all particulars glibly. After a while, having told these lies so often, he almost believes them himself and "Brown's Beauty," "Smith's Surprise" or "Robinson's Record" becomes a well-known factor in the local market. The faker gets the credit for what has cost the raiser many years of earnest effort and hard work, while the latter is not thought of in the matter at all.

A flagrant case of this kind occurred to the writer's knowledge quite recently. That beautiful rose, Radiance, raised by our veteran friend, John Cook of Baltimore, was tried out in a southern California establishment and so well did it thrive that the proprietor, in order to prevent other growers getting the variety, named it after his place, a place that is absolutely unknown to the trade generally. Now Radiance is a suitable name for this charming rose when it thrives so well as it does in sunny southern California. Its color has a luminous character that is totally different from all others; it is a magnificent grower, throwing fine flowers from every shoot, is not a cropper and is one of the best money makers ever sent out. And it is only fair that John Cook should have all the credit that is coming to him, but the miserable, small-souled individual who is afraid to let his neighbor in on a good thing has not a fair thought in his whole makeup. He is on a par with the grower who is afraid to let others see him at work for fear they will learn something, afraid to have visitors to his place, afraid in fact of his own shadow. Fortunately, with an enlightened press, with open discussions at florists' clubs and other means of disseminating knowledge and good feeling such back numbers are becoming less in evidence, and when the last of them drops out of the florists' business to enter one where such hidebound policy succeeds the better for all concerned.

Prices of Orchids.

There has always been a considerable amount of uncertainty as to the value of orchids and especially among those who, having heard of high prices being paid for varieties, think that any departure from the ordinary types is bound to be worth big money. There are forms that are valuable and others that are, comparatively speaking, worthless, and it takes an expert to decide or to sort the "wheat from the chaff." Again, what were once valuable species or varieties are now, even though rare, not worth much money, simply because the tastes of later times have altered from the old ideas. Many years ago, when the single stemmed distichous leaved orchids of the vanda, saccolabrium and similar genera were at the height of their popularity considerably over $1,000 was paid at a public auction for a plant of Aerides Lawrenciæ and long since then over $1,500 for a cypripedium. It is extremely doubtful if the plants would bring any such prices now.

In the matter of large specimens of popular varieties a good deal of ignorance exists. Quite recently we saw a plant of a rather mild form of Cattleya Trianæ with about 40 flowers on it tagged for sale at $150. Now this plant had absolutely nothing to recommend it but its size and if cut up as it should be into, say, half a dozen plants, they would not be particularly cheap at $5 each. Had this been even a small plant of a really good form or an albino it would have been worth more money. But here again there is apt to be an exaggerated idea of the value on the part of the owner. When an orchid dealer buys such stock he runs a big risk. He has to pay high priced help to look after the plants and it frequently means a high priced salesman to sell them, and there is always the chance of losing them. There is of course still a chance of making money out of good things—indeed really fine varieties are almost priceless and the gambling element in it lends an interest. In an English collection soon after the reintroduction of Cattleya labiata a plant was purchased for about $2 in American money among an importation. This proved to be a white form and it was propagated by the experienced grower in charge and the next season four pieces of the original plant were sold for the equivalent of $900. But these chances do not come every day.

Plants Damaged in Transit.

We know of few things more annoying to a florist than to receive a consignment of plants so damaged, either owing to faulty packing or delay, that they are practically useless. In these days of keen competition there is naturally a desire on the part of the grower to save if possible the outrageous charges inflicted on the public by express companies in addition to their arbitrary rules. This temptation to have stock sent by freight is often the cause of its arrival in bad condition. Take, for instance, the case of azaleas. They are dug in Europe and shipped, say, to New York. Eastern growers get them quickly, pot them at once and the plants hardly feel the removal. In the Middle West it only takes a couple of days to get them by fast freight and if watered and repacked at the ship-

BOX FILLED WITH ERICAS AND DAPHNE.
Arranged by Geo. M. Stumpp, New York.

ping point they arrive in good order. But take the grower in Portland, Ore., or San Francisco. Should he decide to have his stock sent by freight it would surely be in a sorry condition by the time it reached the coast and it is best, because safest, to pay the express charges and have the plants delivered in good order.

In this connection it may be well to note that florists and growers at far distant points could greatly assist shippers if they would send the routing and say how they wish the plants shipped. Supposing, for instance, a jobber in Chicago gets a wire from a grower in California to send a consignment of live green plants at once. It leads to delay if the jobber in question has to look up routings and decide, in the absence of any instructions, as to how the goods are to go. Meanwhile the grower is fussing and fuming because his stock has not arrived and more expensive telegrams are sent to and fro. All this confusion and waste of money could be prevented by a little thought and precaution on the part of the grower. Take cold storage lilies again. Express charges on original cases are simply out of the question if the grower is to make and profit on his bulbs, while if shipped by freight root action and growth will take place in the cases and the bulbs will be considerably deteriorated by the time the grower receives them. Here he should plainly specify that the bulbs are repacked in the driest and lightest material and cases which will reduce the express charges at least one-half.

But it is not always the grower at fault. During the present season we had occasion to send for a shipment of Gloire de Lorraine begonias. They were ordered by express and duly arrived well within the time we expected them, having been only a little over three days on the road. But in opening the cases the plants were found to be dust dry and the balls nearly as hard as bricks. What we expected followed. Despite our best care in damping, shading and trying to bring them back to life at least 30 per cent damped off right away and not until the middle of September was there anything like a fair growth in any of them. Now this was a case where the shipper was entirely to blame. A month later a consignment of poinsettias was received from a firm nearly 300 miles further away and every plant was good because they had been packed firmly and just nicely moist. The plants took hold at once and did well. And we think we are quite within the mark in saying that in nine cases out of ten it is the shipper's fault when stock fails to arrive in good condition, always supposing that he is given the best route or choice of routes and allowed to ship by express when the distance is too great for safety by freight. GREENHOUSER.

Solanum Capsicastrum Melvini.

This new introduction, seeds of which are being placed on the market by Thomas J. Grey Co., Boston, Mass., is described by the firm as one of the best holiday plants disseminated for years, producing a plant, dwarf and bushy, 12 to 15 inches high, covered with brilliant scarlet berries, conical shape and carried well above the dark, shining foliage.

SEWING BASKET FILLED WITH ERICAS AND BEGONIA GLOIRE DE LORRAINE

Crimson Ramblers for Easter.

ED. AMERICAN FLORIST:

We have some Crimson Rambler roses that we would like to pot and bloom for Easter. We have a carnation house with a night temperature of 50° and a day temperature of 60° to 70°. When would be the proper time to place them in such a house?

New York. SUBSCRIBER.

By saying that the plants are to be potted it is supposed that they are field grown stock. If the supposition is correct they will take a little longer than pot-grown plants already established. Easter this year comes April 7, one week earlier than last year. It will be necessary with such a house to start the plants the first of the year at least. It would be better if the plants could be placed in a cooler house until the buds begin to break when the temperature stated would be all right until the flower buds show. At that time a little warmer temperature would be an improvement, a house with a rose temperature finishing the plants much easier and better. When the plants are first started they should be frequently syringed to make the wood soft and open the eyes evenly, and when the eyes first show growth they should be tied into the shape it is desired to grow them. W.

Mistletoe.

Probably no plants are better known in England than those lending their Christmas and New Year brightness to our streets and markets, in our homes and churches; and it may be said that few, if any, plants have had their histories more frequently served up for popular edification than the holly, the ivy, and the mistletoe, all going over precisely the same ground, giving the same illustrations, and the same quotations, and meeting with the same indulgent readers. It is not our intention to add one more to the goodly list of wanderers across the beaten track, and yet we are going to chat for a few moments about the "mirth-provoking mistletoe," viewed from a somewhat unusual, and some may think unseasonable and belated point of view.

In the first place the mistletoe, in Druidical times, had no relation to Christmas, but with the new year sacred solemnities of the Druids, and these we cannot name without thinking of our woods and national oaks, the Celtic word for oak being drui, and is the same word with drus, which signifies an oak in the Greek language. The things are inseparable from our imagination, yet Cæsar nowhere makes mention of the sacred groves and the reverence paid to the oak, which make so great a figure in the other accounts of Druidism. Seneca, the philosopher, says: "If you come to a grove thick planted with ancient trees which have outgrown the usual altitude, and which shut out the view of the heaven with their interwoven boughs, the vast height of the wood, and the retired secrecy of the place, and the wonder and awe inspired by so dense and unbroken a gloom in the midst of the open day, impress you with the conviction of a present Deity." Pliny informs us that the oak was the tree the Druids principally venerated, that they chose groves of oak for their residence, and performed no sacred rites without the leaf of the oak. Pomponius Mela, the geographer, describes the Druids as teaching the youths of noble families that thronged to them in caves, or in the depths of forests. When Suetonius Paulinus made himself master of the Isle of Anglesey, in A. D. 61, he cut down the Druidical groves. These groves, says Tacitus, were "hallowed with cruel superstitions, for they held it right to stain their altars with the blood of prisoners taken in war, and to seek to know the mind of the gods from the fibres of human victims."

But the most remarkable of the Druidical superstitions connected with the oak, not the groves, was the reverence paid to the parasitical plant called the mistletoe, when it was found growing on that tree. Pliny has given us an account of the ceremony of gathering this plant, which, like all the other sacred solemnities of the Druids, was performed on the sixth day of the moon, probably because the satellite has usually at that age become distinctly visible. The festival of gathering the mistletoe was kept always as near to the 10th of March, which was their New Year's Day, as this rule would permit. The Druids also, according to Pliny, believed that God loved the oak above all other trees, and that everything growing upon that tree came from heaven, and there is nothing they held more sacred than the mistletoe of the oak. Whenever the plant was found on that tree, which it rarely was, a procession was made to it on the sacred day with great form and pomp. First two white bulls were bound to the oak by their horns, and then a Druid clothed in white mounted the tree, and with a knife of gold cut the mistletoe, which another, standing on the ground, held out his white robe to receive. The sacrifice of the victims and festive rejoicings followed.

Virgil, the poet, has been thought to intend an allusion to the old religious rite of the Druids by the golden branch which Aeneas had to pluck to be his passport to the infernal regions. Indeed, he (Virgil), expressly likens the branch to the mistletoe:

"As in the woods, beneath midwinter's snow,
Shoots from the oak the fresh-leaved mistletoe,
Girding the dark stem with its saffron glow,
So spring the bright gold from the dusky rind,
So the leaf rustled in the fanning wind."

The sacredness of the mistletoe is said to have been also part of the ancient religious creed of the Persians, and not to be yet forgotten in India; and it is one of the Druidical superstitions of which traces still survive among our popular customs. No Druidical groves, so far as determined, now remain in Britain, though within little more than a century ancient oaks were still standing around some of the circles of stone set upright in the earth, which are supposed to be the temples of the old religion. "In the parish of Holywood, in Dumfriesshire, there is such a temple, formed of very large stones, enclosing a piece of ground about eighty yards in diameter, and although there are no trees on the spot, there is a tradition that there existed many trees in the last age, and many roots of trees have been dug out of the ground even in our own day" (Sinclair, Statistical Account of Scotland). These sacred enclosures seem in their perfect state to have generally consisted of a circular row or double row of great stones in the central open space (the proper lucus, or place of light), and beyond these, of a wood surrounded by a ditch and mound of earth. The sacred grove appears to have been usually watered by a holy fountain. The reverence for rivers or streams, springs or wells, is

BASKET FILLED WITH ERICAS, DAPHNE AND FERNS WITH GNOME.
Arranged by Geo M. Stumpp, New York.

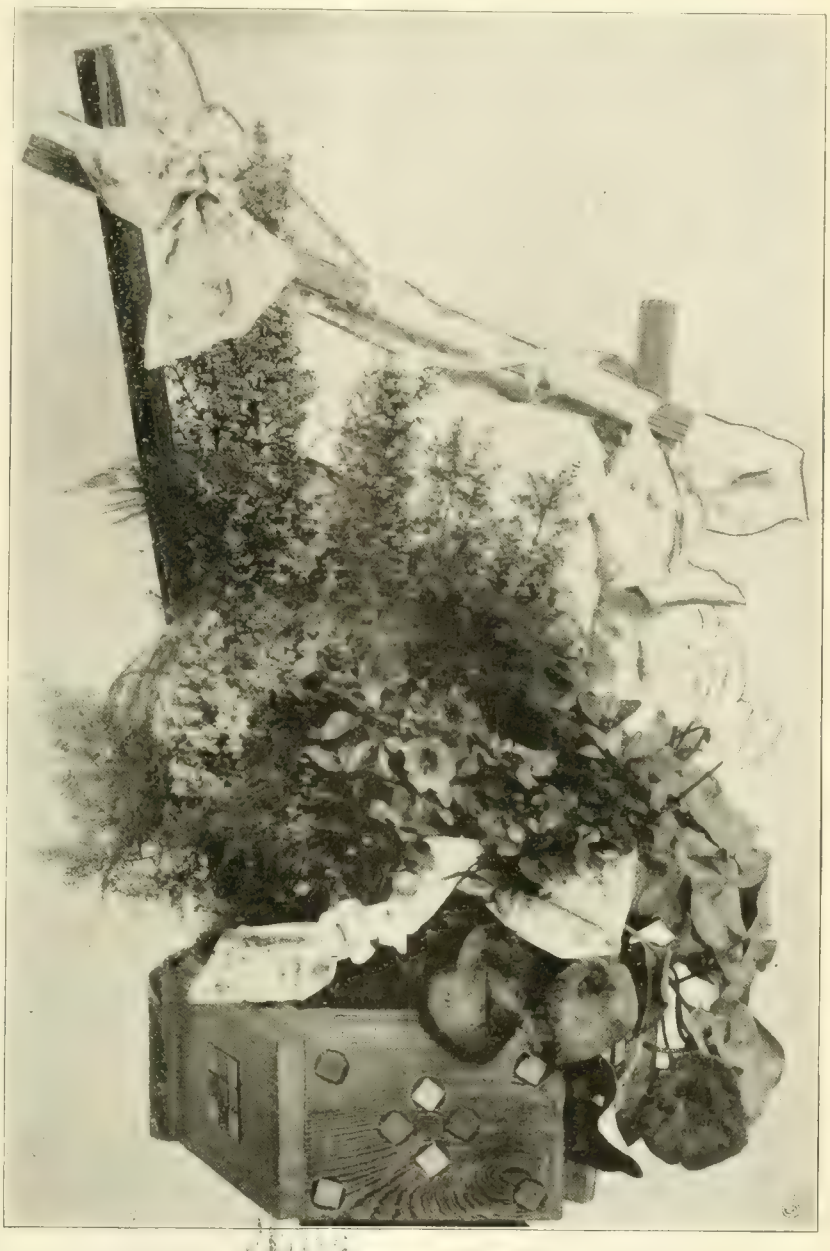
another of the most prevalent of ancient superstitions, and it is one which, having, along with many other Pagan customs, been adopted, or at least tolerated, by Christianity as first preached by the Roman missionaries, and being, besides, in some sort recommended to the reason by the high utility of the object of regard, has not yet altogether passed away. The holy wells, to which some of our early monks gave the names of their saints, had in many instances been objects of veneration many centuries before; and the cultivation of the country, or the decay from lapse of time, which has almost everywhere swept away the antique religious grove, has for the most part spared the holy well.

The mistletoe, as we have shown, had no connection with or relation to our present time winter solstice in Druidical times; but the parasitical plant celebrated on account of the religious purposes to which it was consecrated by the ancient Celtic nations of Europe, particularly when it was found growing on the oak, still retains a strong hold on the populace of the British Islands, few persons not observing the custom to hang up branches of this plant in their homes at Christmas, and especially for the New Year festivities, thus transferring the Druidical custom from March to January, or even Christmas, and even continuing the religious as well as the festivous sides of the ceremonies of the Druids on Christianity lines.

The mistletoe is rarely found upon the oak, I not having seen an example, though there are records of its being found on the oak in this country, as at Godalming, at Gorke, and St. Dials in Monmouthshire, Eastnor Castle, Herefordshire, and in the neighborhood of Usk, therefore the proclivities of mistletoe for the oak are most pronounced in the direction of the Druids' holy isle (Anglesey). Specimens have been seen on horse chestnut, wych, elm, mountain ash, maple, acacia, laburnum, white poplar, black poplar, hazel, white beam, sallow, larch, ash, service, elm, and common laurel. It, however, is most commonly met with on lime, white thorn, crab, and apple trees; indeed, the "branch of spectres" still covers the apple orchards of Glastonbury, which, as the Isle of Avelon—Isle of the Apple—was a stronghold of Druidism. And possibly it might be induced, in such a sheltered and favorable situation, to strike root upon the branches of the oak, as it does very freely on those of the apple, when the viscid pulp of the fruit is smeared upon them.

The mistletoe was also formerly held in high repute as a medicine, and, as in Druid times the plant was held sacred, so the preparations were regarded as gifts from heaven as remedial agents. In 1719 Sir John Colbatch published "A dissertation concerning mistletoe; a most wonderful remedy for the cure of convulsive distempers." "I have it upon my spirits for weeks past," he says, "that it would be highly criminal to me to let another mistletoe season pass without informing the world what a treasure God Almighty has every year presented to their view;" and he proceeds to show in how many and various ways it may be employed for the benefit of the human race. The "Mistletoe of the Oak" was regarded as the most efficacious, but Sir John says: "Suppose the mistletoe of the oak does surpass that of all other trees, yet from ten years' large experience I find the ordinary mistletoe to be the most noble medicine I ever knew"; and he even places its virtues above those of the "Jesuits' Bark." "By the powder of the true mistletoe of the oak, given as much as would lie upon a sixpence, early in the morning in black cherry water, or even in beer, for some days near the full moon," epilepsy was cured. Ordinary mistletoe was equally efficacious in agues, St. Vitus' dance, and in children's diseases; it seems to have worked as many wonderful cures as any patent medicines and faith-healers of modern times. The plant was to be gathered at the end of December, the leaves, berries, and very tender twigs to be laid over a baker's oven when there was a constant gentle heat, and then made in a very fine powder, and afterwards kept close and dry. Overdrying or scorching was also to be avoided, and the larger stalks were to be carefully dried and preserved for decoctions and infusions. Tincture of mistletoe was a later discovery of Sir John Colbatch, and of the use of the berries he says: "I have not yet dared to rob the mistletoe of its berries, but from some observations I have made of them I am inclined to think they are the greatest restorers of decayed nature, swallowed whole as they are, either green or dry, and a draught of generous wine to be drunk after them, ten or a dozen, every night at going to bed."

The older writers greatly advocated the medical uses of mistletoe, and Sir John Colbatch does little more than give the weight of his own support to views which had been already expressed, and which had received the support of John Ray, who mentions it as a specific in epilepsy, and as useful in apoplexy and giddiness. Dr. Bull, however, says that "the real properties of the mistletoe are those of a



BOX FILLED WITH ERICAS, AZALEAS AND CYCLAMENS.
Arranged by Geo. M. Stumpp, New York.

slight tonic," and it is not employed in any way in modern practice, except as far as animals are concerned. In some parts of the country Sir Thomas Brown mentions a common practice in his time, that of giving "a branch of mistletoe to the cow which calves first after New Year's Day, it being supposed that this will give luck to the dairy throughout the coming year"; and Dr. Bull states that he learnt from a woodman near Ledbury, that "a piece of mistletoe from the haw, chopped in pieces and given to a cow after calving, will do her more good than any drench you can give her." It is also given to sheep after lambing, and the berries are sometimes administered to them as a purgative, but the chief use of the mistletoe in present times is for decoration and merriment.—Journal of Horticulture.

Rose and Carnation Convention Show

AT DETROIT.

A good deal of adverse criticism has been going around regarding the earliness of the rose show. The Executive Board of the Rose society thought it best to stretch a point and go together with the Carnation society as an experiment. Many rose growers grow carnations, too. They would like to go to both conventions, but to spare the time is often not possible, besides the extra cost of fare. By having these two conventions together I think both societies will strengthen their membership in this way; that a grower whose interest is weakest, say in roses, and is a member of the Carnation society, would possibly, if able to attend both meetings, join the Rose society, as he is most likely interested in roses also, but not caring to spend the time and money for both meetings, goes to the one which takes care of his greatest interest. So, being able to kill two birds with one stone, he goes to the joint meeting. As this works both ways, both societies will be gainers. Besides the exhibition of the two societies together should be an attraction to the public, that a good attendance seems assured, which is a great factor toward the success of the show. The Rose society has always suffered from lack of attendance. If the show was just held of roses alone, it was too small an affair and the general public did not get to know of it. Advertisements cost a lot of money, and if the exhibition is held in conjunction with some horticultural society, we had the attendance, but we could not always arrange such conditions, so we are trying this combination. I feel sure it will be a great success. The hall is ideal, very light and with plenty of ventilation, and the Detroit Florists' Club is going to do its best to make us all feel at home. Every member is working and seems to feel as if the success of the show and meeting depended on just his share of work. This makes the officers and executive board of both societies feel assured of one of the greatest meetings and exhibitions ever held by either society. So, my dear friend, drop your growling, if you are one of the growlers, and make up your mind to come, and you will never regret it. The exhibition of roses alone will surpass your expectations. So many new varieties will be there, not by the dozen, but by big fifty bunches, and if they are not there you can form your own conclusion why. If you have any good roses look over the premium list and see if there is not one class where you can come in. I know there is. All varieties and all classes are taken care of, some $1,700 for cash prizes, and the society's gold, silver and bronze medals. Enough for everybody who is keen and alert, to know that to have good roses at that time of the year, so they can come in competition with the best, and possibly carry away the first prizes, is a glory, besides a good advertisement. Money is not everything in this life. To show your skill and good judgment, your fine points of cultivation and care, and then to triumph over your competitors, is the great glory in our profession. Not to have felt that way is to have missed the best in your work, and those who lost will strive to do better in the hopes of taking the blue ribbon some other day, and that is just one of the results of exhibitions.

Improvements in methods of cultivation, to keep one's eyes and ears wide open, going to these meetings and exhibitions is very important. You may not get great big chunks of information every time you go, but as the saying is, "Every little bit helps." Competition is strong, so one has to be posted all along the line. Everyone needs that to keep abreast of the times. There are lots of men crying that there is no more money in it, as there was twenty to twenty-five years ago. The little men are getting crowded out. That's all nonsense; there is just as much money in it as ever, and more, and the small grower has just as good a chance as ever. Of course, the old ways of doing things will not answer any more; new ways and means have to be adapted and lived up to and success is assured as ever. A. FARENWALD.

ROCHESTER, N. Y.—There will be a meeting of the creditors of E. C. Campbell and Campbell the Florist, at the offices of Smith, DeGraff, Castleman & Mosher, 50 Trust building, 25 Exchange street, Friday, December 15, 1911, at 3:30 o'clock p. m. to consider what action will be for the best interest of the creditors.

DECORATED TUB FILLED WITH OTAHEITE ORANGES, CROTONS AND FERNS.
Arranged by Geo. M. Stumpp, New York.

THE VIOLET.

Hyeres, The Home of the Violets.

Hyeres-les-Palmiers, as the charming little tourist city of Southern France is most widely known, may well be said to be the cradle of the open air violet culture in France. Only with Vence and Tourettes in the Alpes-Maritimes, in the valley of the Loup, back of Nice, is there any considerable competition, and there the varieties commonly known as Victoria and Princesse de Galles can hardly be said to compete with those of Hyeres, at least not in the quantity shipped nor with respect to price, for it is the latter which is usually found on the flower stalls of Paris when the city itself is in the throes of the chills and fogs of mid-winter.

Out of some eight hundred horticulturists in the Commune of Hyeres, working three thousand irrigated acres and employing five or six thousand hands in one capacity or another, by far the largest number devote themselves almost exclusively to the cultivation of the odorous Violette Hyerois. The traffic begins in the late autumn months and extends well into February, when, in Paris and northern markets, to which the product is chiefly shipped (nearly two hundred thousand postal parcels were sent off from the Gare de Hyeres during the season of 1909-10), the ruling market prices usually drop so low as to be no longer remunerative. These hundreds of thousands of five kilo baskets of the violets of Hyeres (each containing a hundred bunches of fifty blooms each), are shipped north by fast express to Paris, London, Berlin, Hamburg and Cologne markets. Paris sells half a million francs worth in a season, November prices running from three francs 50 centimes to seven francs (70 cents to $1.40). At Cologne, at the same period, prices are double, at Hamburg something between the two, while at Brussels they will often bring from 13 francs to 20 francs ($2.60 to $4.00).

That the traffic is of great importance and value to the growers of the region, no less than to the Paris dealers, is plainly shown by the demand of the Horticultural Syndicate of Hyeres for a special pavilion to be granted them in the Paris Halles Centrales to aid in the distribution of the product once it arrives at Paris. Today all the first transactions with regard to these delicate products of Southern France are made in the open, even in mid-winter, greatly to the detriment of such a fragile and perishable commodity as cut flowers.

The violet growers of Hyeres, in general, set out their plants in the early autumn months, though others, who would risk the chances of marketing early autumn blooms, may replant the young shoots in May that they may be well rooted before the coming of the summer heat and dryness, which are here often something abnormal. The violets of Hyeres are not especially exigent as to the conditions necessary to produce some sort of a crop, but to give of their best it is necessary that they be planted in a light, but highly fertilized, soil, slightly shaded, perhaps, and with the necessary means for irrigating at hand. The fertile alluvial soils of Hyeres suit admirably

SHIPPING BASKETS OF VIOLETS AT HYERES, FRANCE.

and for this reason the industry has largely prospered hereabouts. The plants are set out in beds of three or four rows, invariably running from east to west, the plants themselves a dozen or fifteen inches apart, the banked up rows being separated by perhaps double this distance with a shallow irrigation ditch between. Often the plantations are quite in the open, but more frequently are they sheltered by a species of cane, or reed, wind-break which roofs over the beds in lean-to fashion, the sides and ends being quite open with, of course, the greatest exposure to the south.

The newly-set-out plants are much more floriferous in the autumn than the older ones, but on the other hand, if those which have been longest in the ground can be made to hold off flowering until about Christmas, they will continue to bloom for a much more extended period. This is seemingly a peculiarity of the open air growth of the Hyeres violet. For this reason, again, most of the plantations at Hyeres are composed of "pieds" (plants) of one and two years, about equally divided.

Primarily what shelter is given to the violets of Hyeres is merely to save them from what might prove, on occasion, the disastrous effects of that howling north wind, the mistral, which, as the Provencal saying has it, "Would blow a pine knot from its hole." From this one may judge that it is something of a wind, and that some sort of shelter from it would be desirable. Brilliant sun of almost a summer temperature is the concomitant, but the contrast between the sun and the shade, when the mistral is blowing its fiercest, is the marvel of all strangers on the Riviera who experience it for the first time. Disastrous frosts are rare at Hyeres, but again these reed lean-to shelters serve another purpose, that of keeping off any supervening frost, which they do very effectually in spite of their open sides and ends.

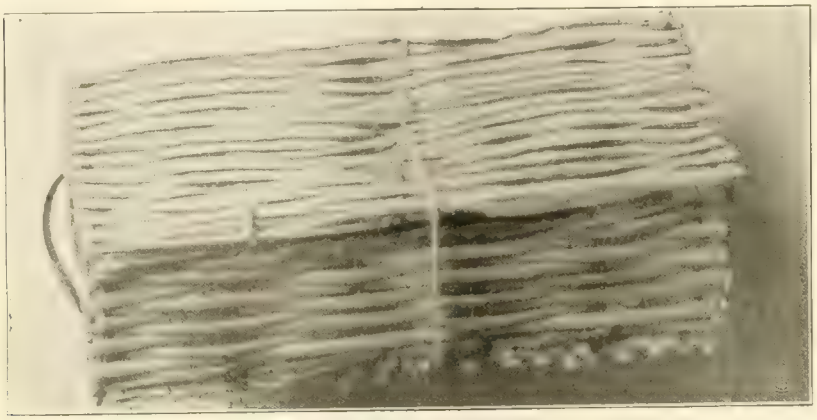
The shipment of cut flowers to the northern markets is invariably by means of a sort of a box-like panier made of the split stalks of the roseaux

of Provence, a tough, fibrous, bamboo-like cane which grows wild along the Mediterranean coast. The cost of a five kilo panier is infinitesimal, and that of ten kilos but little more. They are cheap, light and tough, and the making of the couple of hundred thousand required for the annual cut flower shipments of Hyeres gives employment and profit to a considerable army of men, women, boys and girls, who when they are not picking or packing flowers are making baskets.

The violet does not travel well, that is, it is more delicate than the narcissus or the hyacinth when it comes to transporting it to Paris, London or Hamburg, but with the careful packing and quick, cheap transit the Violettes d'Hyeres "make the market" and the price for all similar products offered in the Paris Halles or London's Covent Garden. The fact that fifteen or thirty hours' transit has some effect upon the vitality of cut violet blooms is amply demonstrated by the comparison of freshly picked blossoms with those a day or more old. To the eye, at first glance, each is apparently fresh. In reality those freshly picked when put into water will remain fresh for a period three times as long as the "shipped" variety. This is the only criticism than can justly be placed upon the violets of Hyeres when they are bought from a Paris flower seller at a sou (one cent) a bunch on the steps of the Madeleine, or for a penny in Picadilly Circus in London.

If the successful shipping of violets from Hyeres to New York is ever made possible (as it has been with regard to fresh asparagus and artichokes), and Broadway offers them in exchange for the popular nickel, a business proposition of magnitude will be opened up which will be worth the while of some one to exploit. It is up to the American grower to forestall such a possibility.

FRANCES MILTOUN.



BASKET IN WHICH VIOLETS ARE SHIPPED FROM HYERES, FRANCE.

THE Sunnyside Floral Co. of Leavenworth, Kan., has issued a neat booklet, beautifully printed and an ornament for "my lady's" table, containing information on flowers for social functions and other occasions with a constant reminder where they can be best obtained, and a list of the flowers for each month, and other floral items of interest and for reference.

Christmas Violets.

With the approach of the holidays there is always an increased call for violets and at Christmas the demand generally exceeds the supply, for it has been impossible for the growers to anywhere near fill their orders at Christmas in some of the past years. Growers have, however, made mistakes by advancing the prices so high that the customers refused to be held up and have been satisfied with some other flower. While the chrysanthemums are in bloom the sale of violets is greatly affected by the Queen of Autumn, for there are numbers of these large single blooms worn for corsages, and when the chrysanthemums are gone the call for violets increases, but it is only a short time between the last of these flowers and the holidays and the trade will not stand the advance in price to three or four times what has been asked, in the same number of weeks. It is but a short time ago that the violet was almost the only flower for corsages at this season, but for the last few years the orchids, especially the cattleyas, and the sweet peas have been strong rivals for popular favor in corsages, not only at the holidays, but during the entire winter season, and the violet has not held the exalted position without a competitor, which it had for many years. It can easily be understood why the price obtained for the flowers a decade ago is impossible now.

Another matter that has received too little attention is the manner of bunching violets, while much has been done in the way of accessories, in tinfoil, violet ribbons and tassels and special boxes; yet the compact bunches are tied in about the same manner as they were twenty years ago. Where the violets are of good size and with long stems a much looser bunch can be tied with some of the larger blooms above the others, and this makes a more artistic arrangement, thereby making a change from the "little blue cauliflower," as we have heard some customers call the closely tied bunch. The single violets, especially arranged in this manner, with a few small violet leaves tied in among the flowers, makes a larger and much more beautiful bunch. In all floral work the old compact manner of placing the flowers has been superseded by lighter arrangements and a bunch of violets tied loosely will be greatly appreciated by the select trade.

To properly handle violets today in the retail store requires a full assortment of accessories used by the up-to-date dealers. These flowers, probably more than any other, are presented, and in many cases the gifts of young men to their lady friends, so they must be put up and delivered in the best possible shape. Boxes, especially for bunches of violets, are necessary, and of different sizes to hold the bunches made up at different prices. Violet wax paper to line the box, for with this around the violets the odor is retained much longer. Under no circumstances place cotton around the violet, for this quickly absorbs the fragrance. Violet tinfoil to encase the stems, and violet cord or tassels to tie over the tin foil. The violet kerchiefs are also demanded by many young ladies to protect the gloves. Last the violet headed pin by which the bunches may be fastened to the dress. These accessories are all in demand by those who have visited the stores in the large cities that have a high-class trade and they help to keep the price of violets up and make them the popular flower that they are at social functions during the winter season.

CONCORD, MASS.—Harry W. Brigham is going to erect a large greenhouse on his property at Nine Acre corner.

THE VIOLET FIELDS OF HYERES, FRANCE.

HYERES, FRANCE. A TOWN OF HOTELS, PALM TREES AND VIOLETS.

WITH THE GROWERS

H. A. Dreer, Riverton, N. J.

Everything about covers it when one is asked what is to be seen at this immense establishment. As probably with the exception of fruit, shade and ornamental trees, everything else for in or out of the greenhouse can be purchased here. In the last year or two a department devoted to flowering shrubs for lawn decoration has been added and twenty acres are given up to their culture. Forty-five acres are planted with dahlias, and a special catalogue, handsomely illustrated, has been issued to describe them. Large storage sheds are necessary to carry the stock over the winter, where the tubers are seen arranged on shelves so as to be convenient for the selection of orders. Herbaceous stock, much the largest in this country, is potted and stored in cold frames, being ready for shipment throughout the winter.

At this time the indoor stock is especially attractive, the immense ranges being filled with the greatest variety of palms and other foliage plants and ferns, such a stock which for excellence and variety cannot be duplicated elsewhere in this country. Special features in the palms are Cocos Wedelliana and Phoenix Roebelenii. The cocos are grown into larger sizes that make beautiful specimens. As seen here they show a luxurious green foliage and strength and vigor that makes the finished specimens and one is made to wonder if

Violet Shelter at Hyeres, France

that is really a cocos, as in vigorous growth it resembles somewhat a narrow leaved kentia. The cocos is now grown here by the hundred thousand and the demand for the larger sizes is rapidly increasing. Phoenix Roebelenii is also seen in quantity and is sure to become one of the standard sort. This is the home of the kentia and very large blocks are seen from the seedbed in the various sizes up to the large decorative stock that require vans to transport them. Quite a large lot of K. Belmoreana were planted in bottom heat, the lot being for next season's sales. It is an experiment here, but is largely done in Belgium.

The features of the fern houses are, first, Asplenium nidus or Bird's Nest fern. As grown here, the possibilities of this very valuable plant are seen, plants in 8-inch pots with six to eight center leaves or fronds, six to eight inches wide and thirty inches to three feet long, surrounded at the bottom by several layers of smaller fronds, are certainly stunning and at once compel attention. Five or six-inch pot specimens are also very well done. The stock is entirely sold out and very many more could have been disposed of. In small sizes, as in 3-inch pots, this has been found very valuable for the centers of fern dishes for the table. This variety succeeds best when grown in frames outside during the summer. Until recently the young stock was all imported, but old seed bearing stock has been secured and hundreds of seed pans were seen full of young plants, about 15,000, just showing their character by their leaves.

Cibotium Schiedei fills a large range, the best assortment they have ever offered. In order to get bushy plants in six or seven-inch pots they

have grown on the small stock three together in one pot and a very salable plant is the result. Several have been planted in the tops of Dicksonia fern trunks and present a very natural "tree fern" appearance. It is said that although a tree fern, it makes, even in large sizes, but a very short trunk. Adiantum Farleyense is one of their old loves. Time was when this variety gave them many anxious moments, but close attention has eliminated all trouble and almost every plant is salable and shows splendid vigor. The English Glory fern, Gloire Von Moordrecht, named after the man who raised or discovered it, will, it is said, be a factor and a strong rival, if it does not supersede A. Farleyense. It is a much stronger grower, germinates easily from seed, as is evidenced in a lot of seed pans that are filled with young stock, which is coming along very well. Planted out in beds alongside of Neprolepis Scottii, it throws up fronds rapidly. Mr. Eisele thinks it has a great future.

A. Dickson & Sons' and Paul & Sons' roses were just in from the other side, over 200,000 of them. They are heeled in at first and as they get time are potted up. They are a splendid lot. Immense blocks of araucaria fill one of the ranges. It is said that this plant will do well in the store or house if it is frequently given a good sprinkling over the foliage once or twice a day will not hurt in a warm room.

J. D. Eisele describes the heating system in use at Riverview as ideal. Hot water is forced or drawn through pipes by a centrifugal pump and it carries the heat to all parts of the place, keeping every house at any temperature desired. It is also used to heat outside frames, one pipe being sufficient to keep frost out in the coldest weather. With this system it is not necessary to have the pipes at any particular level or give them a fall back to the boiler, as the water races through the pipes regardless of levels. An auxiliary plant for use in case of accident has been installed from the first. K.

Peter Reinberg, Chicago.

In no other way is the wonderful growth of the cut flower business shown any more plainly than in the size of the establishments in which cut flowers are grown. Twenty years ago the growers accredited with 100,000 feet of glass could be counted on the fingers of one hand, and the idea of a greenhouse plant ten or fifteen times that size would have been thought preposterous. To the vast majority of greenhouse owners today with their plants of twenty thousand feet or less the idea of a plant covering nearly forty acres and all devoted to rose culture would be beyond their comprehension. It must really be seen and inspected to understand the magnitude, but here in Chicago, covering city lot after city lot with just the space left for streets between the blocks of houses, is this immense plant like the factories in the other parts of the city. It seems odd to compare the floral business to other lines, but one can not but think as he passes through this immense range of houses, built with its iron gutters of Garland's and of Moninger material, to stand for years, that he is in a manufacturing plant turning out roses in the most up-to-date manner; and to look on the immense cut shipped every day to the market fully convinces him that this is verily a manufacturing business and he is in a great rose factory.

Just before Christmas is the time to inspect such a plant, for the rose is the flower par excellence at that period and the crops at this time must be in good shape, and they certainly are at this great plant. Foreman Collins handles the crops just as easily as if he was directing big machines to turn out roses and he seems to have mastered the growing so that the crops are brought on in succession and at the times most desired. Richmond, the Christmas rose, will be cut in great quantities and of the finest quality. House after house of this crimson rose is in the finest possible condition for this season, the plants being full of buds just showing color and the quality is of the finest, stems measuring 48 inches in length standing all through the beds, clothed with finest foliage with long buds of the most brilliant color. American Beauty is also in splendid shape and considering the poor season for this rose with many growers an excellent crop is being cut with a good supply for the holidays. The quality is most excellent the buds being very large and of magnificent color and the foliage superb. Killarney is handled splendidly, house after house following each other in crop, some with a grand crop of flowers just coming into bloom, others with that beautifully colored young foliage which the young growth has and still others just breaking after having borne an excellent crop. White Killarney is in just as fine condition as the pink variety.

This is the home of Mrs. Marshall Field and it can be seen at its best. A grand trade has been built up for this rose and it is a great favorite with many of their customers. Yellow roses are receiving much more attention. Perle des Jardins is grown in

WHITE KILLARNEY ROSES AT PETER REINBERG'S, CHICAGO

Foreman Collins in Front, Store Manager Matchen in the Rear.

CARNATION WHITE PERFECTION AT C. C. POLLWORTH CO.'S, MILWAUKEE, WIS.

large numbers and some very extra fine blooms are produced. The two newer roses, Mrs. Aaron Ward and Melody, are also being grown largely and both are doing well and receiving a good call from the trade. Sunrise is in splendid shape, the plants producing large quantities of fine blooms. The only product at this range beside roses is a block of houses devoted to asparagus plumosus, and a large cut of splendid sprays is made daily from this range. Propagation is now on for the coming season and the benches are being rapidly filled with rose cuttings and the carnation cuttings from the other range of the proprietor, a mile or more away, where the carnations of splendid quality are grown.

RICHMOND ROSES AT PETER REINBERG'S CHICAGO.

The large refrigerator which is centrally located in this great plant was full of excellent roses and a sight to be long remembered. These are forwarded daily to the store at 30 East Randolph street where Manager Matchen and his faithful corps quickly handle the great output and ship it to the trade which years of careful business management and satisfactory dealings have built up. These roses are shipped all through the west and southern states to customers who have dealt with the firm for years.

Holton & Hunkel Co., Milwaukee, Wis.

The country well knows for what Milwaukee is famous, for hustling advertising has made everyone well acquainted with its product, but in horticultural lines the body of men of this city who have adopted floriculture as a profession have by the same progressive spirit made Milwaukee a floral center, where many fine flowers and plants are grown and a supply depot for a rapidly growing business in the north and northwest as well as some of the western territory. One of the hustling houses of this thriving city is Holton & Hunkel Co., who beside the well appointed store in the city have two ranges of greenhouses, one on Humboldt avenue which is devoted to the culture of palms and decorative stock and a large modern range at Brown Deer in which is cultivated the plants that produce much of the high grade stock which they dispose of to their many customers.

Here is located one of the most compact modern ranges that can be erected with all the modern conveniences, and the stock is in fine condition. The roses are growing nicely and a large cut is being made. Killarney and White Killarney are producing extra grade blooms on fine long stems. Richmond is growing well but the cut is not heavy for Christmas but a good crop for later is promised of excellent quality. American Beauties are in fine growth and some very fine flowers are being cut. The new roses, Mrs. Aaron Ward and Melody, are doing nicely and meeting with a steady demand. Two houses of asparagus are in excellent condition. Both A. plumosus and Sprengeri are grown and some fine strings of the former are ready for decorations. A splendid stock of Boston ferns and adiantum for cutting were finely grown, the fronds of the latter being of good size. The houses from which the chrysanthemums had been cut are being filled with Lilium Giganteum and a large cut for the winter season is the outlook.

At the range of houses on Humboldt avenue were to be found a fine collection of palms and decorative stock, especially of Kentia Belmoreana in all the best marketable sizes and splendid assortment of Boston ferns from small sizes up to large specimens. A fine lot of Araucaria excelsa was also grown here. A nice line of blooming plants are also in fine condition for the holiday trade.

The product of these ranges are all marketed from the firm's store at 462 Milwaukee street, which is one of the most commodious and finely arranged wholesale stores in the west. Here are to be found all the conveniences to carry on their successful business and a stock so complete as to be able to supply any customer's wants immediately. Leading directly from the street on the ground floor is the large salesroom with tables to carry an immense stock and show it off to advantage and with plenty of room to handle it conveniently and expeditiously. In the center are refrigerators which are large enough to hold a great quantity of stock and a large supply of the most elegant grade is always on hand. In the rear the work and packing rooms are also of good size with space enough to carry on their large business without any crowding or cramping for room. The doors from the packing room open into a covered shed where the teams can drive right up to the door and the plants and flowers be delivered without any fear of injury regardless of weather. Up a short flight is the supply department and a complete stock of ribbons and other accessories are displayed. Everything that the retail store might desire is on hand. In the basement is the box supply where all sizes of florists' boxes are carried in stock, and in the wire work department they are making all the necessary wire designs for their trade. Another cold storage room opens from the basement where a full stock of greens of all kinds is ready for shipment at a moment's notice. In the back of the store up a short flight are the offices and here H. V. Hunkel and his efficient clerks

WHITE KILLARNEY ROSES AT HOLTON & HUNKEL CO.'S, MILWAUKEE, WIS.

attend to the clerical duties and office work, the office being so arranged that it overlooks the entire store. On the floor below the genial senior partner meets the trade and overlooks the sorting and packing of the splendid stock. Everything is arranged to carry on this successful business in the most up-to-date manner possible and one could but see how their splendid trade has been so well built up.

C. C. Pollworth Co , Milwaukee, Wis.

One of the finest flower shows held in the west this fall was that held at Milwaukee by the Florists' Club of that city, and when the many exhibitors from the other cities who had reaped many prizes at the exhibitions held previously to this one staged their blooms they immediately found that competing with them were growers who were showing stock of as excellent quality as they had brought and in many cases blooms that were enough better to be awarded the first premium. One of the most successful exhibitors of stock that was of a grade to win premiums was that displayed by the C. C. Pollworth Co., of Milwaukee, and many exhibitors who had shipped the cream of their stock for hundreds of miles with the firm conviction that they would take home the premiums, had to be content with the second or third award and see this local grower win the coveted blue ribbon.

This firm has a very large range of glass of about 175,000 square feet, about six miles from the center of the city, and an inspection of the plant would at once show why so many premiums were taken by the stock from these houses. The chrysanthemums, to the blooms of which so many prizes were awarded, were nearly all cut but there were a few still left which showed the splendid quality of stock that had been grown. These houses were being rapidly cleaned up and the winter and spring plants taking their place. But the carnation houses were full of most elegant stock and the highest quality of blooms were being cut. White Perfection was a sight to behold, and as grown here no one could ask for a better white carnation. The blooms were of the largest size and the plants were covered with flowers and buds. Beacon was also in splendid condition and an immense cut for the holiday trade is assured. Mrs. C. W. Ward is doing nicely, the flowers being exceptionally large and the plants blooming freely. Alma Ward and Dorothy Gordon are being given a good trial and while the blooms are of the highest quality yet at this time the crop was not as large as on the other new varieties. Enchantress and White Enchantress were producing the finest of flowers and in large quantities. Winsor also was in grand shape and producing extra large blooms of excellent color.

The rose houses were bearing an excellent crop of roses and the cut of Killarney and White Killarney was large for the season and of excellent quality. Richmond had a most luxuriant growth with a good showing for the holidays. Perle des Jardins was blooming wonderfully well for the midwinter season and a very strong growth was breaking for the coming late winter and spring. Two large houses were devoted to asparagus. A. plumosus was grown both for strings and sprays and a grand crop was in sight, but A. Sprengeri seemed to be in its native element for it was producing the finest of long sprays, just the thing for nicest retail work. The houses of palms and decorative stock contained splendid specimens of the popular varieties of palms of the most salable sizes, particularly noticeable being some fine Phoenix Roebeleni and in the decorative stock were fine dracaenas and pandanus. A fine lot of nicely berried aucubas for the holiday trade was in splendid condition being well berried and well colored. Boston ferns were grown in quantity and some splendid plants were ready for the customers' trade.

Christmas plants were nicely done. A bunch of Simon Mardner azaleas were in just the most showy condition for Christmas and were being hardened up in a cooler house guaranteeing the best of satisfaction. Begonia Gloire de Lorraine and cyclamen were also good and in fine shape for the holidays. A bunch of well grown poinsettias were in excellent shape for the Christmas trade. Lilies are grown in large numbers and were to be seen in all stages promising a succession throughout the season, and fine lily of the valley was also cut. The houses were certainly a great credit to Foreman Kennedy and his efficient corp of assistants.

Chicago Florists' Club.

There was a large attendance at the regular meeting of the Florists' Club December 7, at the Union Restaurant. Thirteen new members were admitted as follows: Dick Salm, Louis Lickenger, Ander Benson, Ed. Toeple, Guy French and Tony Gabel, Morton Grove; Chas. Erne, 162 North Michigan avenue; Edw. H. Gale, 108 East Delaware place; Wm. F. Kasting, Buffalo, N. Y.; A. Van der Pohl, 3811 Harrison street; Chas. Bond, Naperville; James B. Foley and Isaac Cassidy, Twenty-sixth street and Western avenue. Fifty-four delinquents were dropped from the roll and 42 new names were presented for membership.

The important business of the meeting was the nomination of officers, which resulted as follows: For president, P. J. Foley and H. E. Philpott; for vice-president, Carl Cropp and Duncan A. Robertson; for treasurer, E. F. Winterson; for secretary, A. T. Pyfer; for trustees, A. Henderson, E. C. Amling, Walter Scott and H. N. Bruns; for sergeant-at-arms, Michael Fink, George Gabel and Geo. Grimm.

The Chicago Carnation Co. exhibited their new carnation Herald, and Baur & Steinkamp, of Indianapolis, Ind., exhibited St. Nicholas, the latter scoring 87 points. The visitors included James McHutchison, New York; Joseph H. Hill and John A. Evans, Richmond, Ind., and A. F. J. Baur, Indianapolis, Ind.

John Evans, on being called upon, congratulated the club on its membership and large attendance. Mr. McHutchison gave a very interesting account of his South American trip and A. F. J. Baur invited the members to attend the meeting of the rose and carnation societies at Detroit, January 10-12.

The date of the next meeting, when the election of officers takes place, is January 4.

Sulphate of Ammonia From Shale.

As it is understood that a plant for the manufacture of sulphate of ammonia from shale is to be established at Cape Breton, Nova Scotia, the following description of the Scotch process from the London Chemical Trade Journal will be of interest to our readers:

"A correspondent writes us concerning the change that is taking place in the Scottish mineral oil trade in the attention which is being given to the manufacture of sulphate of ammonia. Sulphate, as a profit earner, has taken the place of oils and even paraffin wax. The Pumpherston Mineral Oil Company, for instance, have three sulphate of ammonia plants, one each at Pumpherston, Seafield, and Dean's Works, but all their oil and wax refining plant is concentrated at Pumpherston. The latest plant for the extraction of sulphate from shale and in active operation at Pumpherston consists of a number of cylindrical retorts set vertically in ovens, each oven containing four cylinders. Heat is applied externally from the combustion of the incondensable gases obtained from distillation of the shale, and also from producer gas. The heating gas enters near the bottom of the retort along with a certain quantity of air, and a temperature is maintained at this portion of from 1,200° to 1,600° F. The nitrogen of the shale is thereby converted into ammonia, which is preserved by a continuous supply of steam delivered at a slight pressure into the bottom of the hopper.

"The oil gases are distilled from the shale in the upper portion of the retort at a temperature of about 900° F., and along with the ammonia gas are drawn off by the exhausters at a branch pipe at the top of the cast-iron retort, through the atmospheric condensers. The condensed liquid oil and water containing ammonia flow into a small separator tank, in which, by their difference of specific gravity, they assume different levels, and are drawn off into separate receiving tanks.

"After being 'washed' for ammonia, by the ammonia scrubbers, the gases then pass through the naphtha scrubbers, where the lighter gases, which could not be caught in the atmospheric condensers, are washed with oil, and a good quality of light oil or naphtha is recovered, and the incondensable portion goes to heat the retorts. A shale of average yield not only supplies sufficient of these incondensable gases to heat the retorts, but also leaves a surplus for burning under steam boilers. The poorer qualities of shale are deficient in gases.

"The ammonia water obtained from the atmospheric condensers is pumped through a heater, in which the temperature is raised by the waste water flowing from the still, and passes through the still in the ordinary way. The ammonia gas afterwards enters the usual scrubber for fixation with sulphuric acid to form sulphate. The plant is constructed to make the fullest use of every product. Thus, the waste steam and waste gases are sent to the retort. The weak acid liquor from the refinery is saturated with ammonia gas, and after being allowed to settle is put into the saturator. The sulphuric acid tars obtained in the refinery are steamed and washed, the resulting acid liquor flowing to the sulphate house, while the tar is mixed with other waste tars and used as fuel."

Carl Cropp, for Vice-President.

P. J. Foley, for President.

H. N. Bruns, Trustee.

E. C. Amling, Trustee.

H. E. Philpott, for President.

E. F. Winterson, Treasurer.

Duncan A. Robertson, for Vice-President.

A. T. Pyfer, Secretary.

Walter Scott, Trustee.

CHICAGO FLORISTS' CLUB NOMINEES.

Report of the Secretary of Agriculture.

The fifteenth annual report of the Secretary of Agriculture issued December 7 begins with a series of short paragraphs, among which are the following of interest to horticulturists:

Would it be asking too much of our universities to have them educate more plant pathologists and road engineers?

Every country in the world that has diseased plants that cannot be sold at home can ship them to us. The result is great loss. The chestnut disease here is an illustration.

After years of experimentation we find that we can grow bulbs in the state of Washington.

No seed is sent out from this department without being tested for germination.

The schools want more of our publications than we can give them.

The day is not far distant when we shall cease to import potash.

We are sending explorers to the ends of the earth for new plants—and getting them.

The phosphates are abundant in our country for all possible uses. Florida, Kentucky, Tennessee and Idaho can be mentioned as depositories.

If good roads from the producer to the consumer were general the benefit to both would be considerable.

When a foreign insect invades, our scientists seek its enemy where it came from. The natural enemy of the boll weevil was an ant that could not endure our winters, but the native ant is getting busy.

The experiment stations of the several states are doing better work each succeeding year, the scientists are maturing and the people are appreciating.

The object lesson in agriculture is the best teacher; we had 60,000 of them at work last year.

The consumer pays a dollar for food, the farmer gets less than fifty cents for it. Who gets the rest?

The Department of Agriculture has had success in the southern states through object lessons in the fields where the best southern farmers in these counties were the instructors. This method should be organized in all the states along the lines of the greatest necessity.

Alaska will some day provide farmers in lower latitudes with grain seeds superior to what they can grow at home.

The corn crop is moving northward by seed selection.

The southern farm boy is showing the way to grow more of all crops on an acre.

Save all the liquid fertilizers on the farm in cisterns, to be applied where crops are to grow; this will recover the greatest farm waste of our times.

Our foresters are learning by experiments how to reforest 30,000 acres in a year; ten times as much must be planted annually to cover all the bare acres in a generation. It will be done.

In the discussion of crop production and values the Secretary states that the climatic conditions of the early part of the growing season of 1911 were adverse to agriculture throughout the country east of the Rocky Mountains in a degree that exceeds all records, and declares that "while the total values of the crops of 1911 are not as high as in 1910, that there is a great abundance for all purposes." For the first time in many years the total value of all farm products has declined from that of the preceding year, chargeable to the general classes of animal products. On the other hand the crops are worth more, there being an estimated gain of $44,000,000 over 1910. Farm prices for all products except cotton, cottonseed and flaxseed are higher than 1910. The several crops are taken up separately, the potato crop being about 90 per cent of the average production, but the farm price has increased to such an extent that the total value of the crop is the highest on record and amounts to $213,000,000.

The work of the Bureau of Plant Industry in combating plant diseases, investigations into the culture of different crops, establishment of seed laboratories and the progress of plant introduction and the work accomplished by the Bureau of Entomology in their labors of ridding the different sections of the country of insect pests, are fully described.

Washington.

BEAUTIFUL WEATHER.

The weather of the past week was so fine that this city can well claim the distinction of being a great winter resort, which, in fact, it is. As a resort for statesmen and diplomats and tailor made imitations of the same, this city stands away up. To be sure, we have no Durbar with performing elephants, unless the members of the Republican national committee now in session may be placed in the latter class, but we have a Gridiron Club that can furnish a good imitation of any oriental or occidental function. But as to the weather, since December 6 the outdoor temperature has run up to 60° at noon each day, and sometimes higher. There has been bright sunshine, and even with ventilators well opened the indoor temperature of greenhouses has shown a tendency to touch the 90° mark. As a natural result of all this stock has been coming on fast, but there is no surplus on the market. The various events that always are attendant on a session of congress such as dinners, luncheons and the blossoming of fair debutante buds, has been calling for a great amount of fine stock. Roses are more plentiful than carnations and though wholesale prices are good for this time of year, it does not seem that they will soar to prohibitive figures at Christmas. With carnations it is different. They are now wholesaling at from four to six cents and are likely to go higher. Lilies, callas and violets are in fair supply and now that the chrysanthemum season is ended, a use can be made of everything that comes in.

CLUB MEETING.

The regular monthly meeting of the Florists' Club was held on the night of December 5. The matter of providing suitable and instructive entertainment for each meeting was taken up and after an interesting discussion the following committee was appointed: N. L. Hammer, Otto Bauer, O. A. C. Oehmler. Each member of the committee is an active worker in the club with a wide acquaintance among members of the craft, and it is expected that able talent will be secured.

NOTES.

At a recent meeting of the society of oldest inhabitants, resolutions of sympathy were adopted and forwarded to W. R. Smith, who is in Providence hospital. He is reported much better and was thinking of leaving the hospital a week ago, but John Clark, Wm. F. Gude and some of his other chums, advised him that when he got out he would be sure to go to turning handsprings and cutting up like sixty and they did not think he was quite strong enough for that yet. So, much against his will, he consented to stay in the hospital a while longer.

Charles Hemlock, head gardener at the U. S. Propagating gardens, visited a number of the Anacostia greenhouses December 9. Mr. Hemlock is an up-to-date gardener and florist and is always on the lookout for good things, since it devolves upon him to please Uncle Sam. The Propagating gardens is one department of the government service where the employes really earn their salaries by work and not by superintending, talking and writing to kill time.

Margaret Quinn, daughter of James Quinn, foreman of Freeman's Brightwood range, was married December 4 to Le Roy Nicholson, a young business man of this city. As a child Mrs. Nicholson was well and favorably known in the Anacostia colony of florists when her father was employed at the range of Alex. B. Garden, and many good wishes follow her in taking up the duties of a homemaker.

George Field, Otto Bauer and Wm. F. Gude attended the Baltimore show December 4 as judges. Mr. Gude on his return was enthusiastic over the high grade of stock exhibited, particularly chrysanthemums and roses. He said that the exhibits in dinner table decorations were the best in that line he had ever seen.

It is reported that William Lacey, now employed at the Freeman range, will succeed his brother Robert, who is going into business for himself, as rose grower for F. H. Kramer.

George H. Cooke had planned to attend the Baltimore show, but was compelled to abandon the trip by a great rush of business.

A. F. F.

St. Louis.

PREPARING FOR THE HOLIDAYS.

During the past week we have had some spring-like weather, but it is now cloudy and growing cooler. Stock is now arriving only in moderate supply and it is sincerely hoped that the growers will not hold the stock back, as in the long run they will be the losers. Carnations are bringing three and four cents. Some fine Killarney roses are seen, violets are quite plentiful and prices are lower. The retail stores are decorating their windows with Christmas greens.

NOTES.

C. A. Kuehn's new wholesale house will open Saturday, December 16. Everything will be in shape and when completed will have cost $50,000. C. A. Keuhn has always been known as very conservative and belonging to the old school, but thoroughly cognizant of modern business customs. His new place is elegantly fitted and will create a stir among wholesale growers and retailers.

The Wm. C. Smith Wholesale Floral Co. have a fine lot of home grown stock, lily of the valley, roses, carnations and a splendid supply of violets and sweet peas. Wire work and florists' supplies in general can be found in endless variety.

Geo. H. Angermueller has a fine lot of Christmas novelties and greens. His supply of cut flowers is good and the quality superb, and he is making a specialty of cut orchids.

August Eggers, East St. Louis, has five houses devoted to bedding stock. He grows a few carnations, but buys most of his cut flower stock and supplies in St. Louis.

Henry Emmons is bringing into market some fine Golden Chadwick and W. H. Chadwick chrysanthemums.

Luther Armstrong brought to market some choice white camellias.

George Waldbart, M. M. Ayres, Metropolitan Floral Co., Riessen Floral Co., Paris Floral Co. and Otto Sander are all making great holiday displays.

Grimm & Gorly's windows are dressed in holiday attire and attract the public by their artistic arrangement.

Mullanphy Flower Co. is busy and the wagons and automobiles are seen at all the wholesale houses. W. F.

European Horticulture.

FROM THE FRENCH TRADE PAPERS.

Among the New Primulas.—Those recently obtained from Western Asia and by hybridization from these newly discovered sorts, three varieties seem to be of habit and culture adapted for cultivation in England and France, and probably with us. According to an article by S. Mottel in the Revue Horticole of October 16, these are P. pulverulenta, P. Balleyana and P. Beesiana. The first-named, discovered by E. H. Wilson and introduced by James Veitch & Son, is closely related to P. Japonica, but might be called a giant form. It has long, narrow leaves, somewhat dented and curled, and a very strong growth; the spikes are 30 to 40 inches high and sometimes even taller, carrying eight to ten whorls of flowers of an intense velvety carmine red color, with yellow eye. The stem and calyx are heavily pulverulent or powdered, whence the name. The two latter varieties are much more recent, discoveries of G. Forrest and introduced by Bees & Co. of Liverpool. Both are allied to pulverulenta; P. Buddleyana, the more interesting, has stalks about 20 inches high, carrying three to five whorls of flowers, chrome yellow within, yellow shaded orange without. P. Beesiana can almost be described as a variety of pulverulenta.

New Rose Bordure (Barbier)—As its name suggests, "a dwarf plant for borders, growing not over 12 inches high, of stocky growth, and covered through the season with flowers that almost conceal the foliage. Flowers one to two inches in diameter, double, well formed, pure carmine; bud bright carmine. The color does not fade in the sun and in the corymbs of 25 to 50 flowers no difference in color is seen between the freshly opened blooms and the older ones. Excellent for pot culture or borders.

An Unfortunate Accident.—E. H. Wilson, the intrepid English explorer and botanist, has been the victim of a serious accident, which occurred during a recent voyage in China, and which will prevent his undertaking such expeditions in future. It is a great misfortune for this zealous and expert botanist, to whom horticulture owes many new and valuable varieties. The primulas introduced by him in recent years have attracted much attention in England and France. He was for some time in the employ of James Veitch & Co. of London.

Zinnia Elegans Hybrida Variegata.—This new zinnia, introduced by Vilmorin-Andrieux Co., combines the varied and charming coloring of Z. Haageana with a size and showiness almost equal to that of the old Zinnia elegans. It blooms from June until frost and is greatly liked for beds and borders as well as for bouquets. The recent vogue of the zinnia among amateurs is only to be understood as one becomes familiar with these new hybrids.

Paeony Souvenir du Professeur Maxime Corna.—This superb new yellow paeony is a hybrid of P. Delavayi lutea and P. Moutan, and is remarkable for its handsome canary yellow color, with tracery of carmine on a few of the petals; it is remarkably large, up to eight inches in diameter, almost perfectly double. The first plant obtained has done well this season, giving in the latter half of May ten blooms, which, owing to the favorable weather, lasted for three weeks. Grafts from this plant have been made successfully this year. V. Lemoine and Son's yellow seedling, La Lorraine, somewhat resembles this variety, but is of a uniform canary yellow color.

Aster Amellus Nanus Compactus Multiflorus, certified September 14, 1911, by the National Society of Horticulture of France, is a seedling of Pink Pearl, a hardy aster 12 to 15 inches high, covered during September with beautiful soft pink flowers. Should be excellent in pots or for borders.

The Journal Les Amis des Roses, the organ of the French Societe des Rosieristes, publish a double number September-October.

THE present outlook for holiday business is exceptionally good east and west and the demand for plants is much better than was anticipated in the west.

THE next meeting of the Society for Horticultural Science will be held in connection with the meetings of the American Association for the Advancement of Science at Washington, D. C., December 29.

THE man who sends pickled stock to market does more injury to the business than ten upright men can repair. Inject a little of the "Golden Rule" into business and do to the other as you would be done by.

REPORTS of the holiday trade from all sections of the country will be greatly appreciated. These should be addressed to THE AMERICAN FLORIST, 440 South Dearborn street, Chicago, and mailed as soon as possible after December 25.

GUARD against fire all the time but especially during the holidays. Every year records some disastrous fire at this season. In hanging festoons keep them away from lights and take every precaution with the boilers when they often are left without watching during the busy time.

THE preliminary schedule of prizes for the annual exhibition of the American Rose Society to be held at Detroit, Mich., January 10-12, is issued and contains offers of premiums to both commercial and private gardeners for exhibits of the popular and newer varieties of roses. Medals are also offered for novelties. A copy may be obtained by request of Benjamin Hammond, secretary, Fishkill-on-Hudson, N. Y.

Important to Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Western Dahlia and Gladiolus Association

Chicago.—From a printed notice, signed by E. S. Thompson, secretary, and H. W. Koerner, vice-president and chairman, we learn that there will be an adjourned meeting of the Western Dahlia and Gladiolus Association at the Sherman House, Chicago, Wednesday, December 15, 10 o'clock a. m. Wednesday of this week was December 13 and December 15 of 1912 will be on Sunday, according to the calendar. We are inclined to think they are coming along here pretty soon.

National Flower Show of 1913.

The Committee on National Flower Show is now working on the preliminary plant schedule for 1913. Strong representations have been made them that any firms who desire to contribute special prizes in the plant classes should be given due credit for the same and their names placed in this preliminary list, to insure for them the widest publicity possible. The committee feels that it cannot get in touch personally with all who may be desirous of contributing in this manner and therefore asks that they write on or before January 1, 1912, stating their wishes in this matter.

CHAS. H. TOTTY, Chairman.

Chrysanthemum Society of America.

REPORTS OF EXAMINING COMMITTEES.

Chicago, November 18.—Grace Muller, yellow, single, scored 88 points; Mrs. Kenneth Barnhart, pink, single, scored 90 points. Exhibited by Peter Schlit, Evanston, Ill.

Chicago, November 25.—Helen Newberry, white, pompon, scored 90 points. Exhibited by Fred Pautke, Grosse Pointe Farms, Mich. H. Tong, yellow, Japanese reflexed, scored 77 points. Exhibited by Tong & Weeks, Ashtabula, O. No. 25-06, lemon yellow, Japanese, scored 85 points. Exhibited by Baur & Steinkamp, Indianapolis, Ind.

Cincinnati, O., November 25.—Helen Newberry, white pompon, scored 91 points. Exhibited by Fred Pautke, Grosse Pointe Farms, Mich. H. Tong, yellow, Japanese reflexed, scored 82 points. Exhibited by Tong & Weeks, Ashtabula, O.

New York, November 28.—Helen Newberry, white, pompon, scored 88 points. Exhibited by Fred Pautke, Grosse Pointe Farms, Mich.

CHAS. W. JOHNSON, Sec'y.

Hail Insurance.

The advantage of carrying hail insurance when a heavy loss is sustained is clearly shown by the following communication to the Florists' Hail Association. Addems, Morgan & Co. of Loda, Ill., were sufferers during one of the many severe hail storms of the year, but were fortunately insured, and write of their experience with the Association as follows:

FLORISTS' HAIL ASS'N OF AMERICA,
Joseph Heacock, Treas.

We are mighty well pleased with manner in which the Association has settled with us, and we enclose payment to cover the balance of our glass. We do not know what we would have done had it not been for the insurance money, for we were under very heavy expense in removing and rebuilding.

ADDEMS, MORGAN & CO.

Worthless Soil Testing Outfit.

The following letter from Prof. C. G. Hopkins, head of the Department of Agronomy and Chemistry at the University of Illinois, gives warning to those who have received the advertisement of the soil testing outfit.

EDITOR AMERICAN FLORIST:

The Foote Farm Laboratories of Fredericktown, Ohio, are putting out what they call the "Foote Soil Testing Outfit." They are widely advertising this outfit and offering it to individuals for $10. They also include in the outfit a copy of my book, "The Story of the Soil," supposedly as an added inducement to the purchaser. I wish to say that I knew nothing of the Foote Farm Laboratories until we began to receive inquiries from their advertisements. We at once ordered an outfit, including all instructions, and have thoroughly investigated the outfit and the methods by which the Foote Farm Laboratories claim any one can analyze his soil, the following quotation being a sample of their advertising:

"The Foote Soil Testing Outfit is a complete, practical farm equipment with which you can readily tell what plant food each one of your fields needs and what they already have. It tells you just what food elements are in your soil and what is lacking."

A thorough investigation of this outfit clearly reveals the fact that it is absolutely worthless. The so-called directions for testing soil not only give no valuable information, but they are absurd and senseless. The farmer who pays $10 for the outfit and attempts to use it will have thrown away both his time and money. I make this statement because my name is being used in a way to mislead.

CYRIL G. HOPKINS.
University of Illinois.

Meetings Next Week.

Boston, Mass., December 19.—Gardeners' and Florists' Club of Boston, Horticultural hall.

Detroit, Mich., December 18, 8 p. m.—Detroit Florists' Club, 112 Farm street.

Grand Rapids, Mich., December 18.—Grand Rapids, Florists' and Gardeners' Club, office of member.

Hartford, Conn., December 22, 8 p. m.—Connecticut Horticultural Society, County building.

Montreal, Que., December 18, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guardians building, 211 Sherbrook street, west.

New Orleans, La., December 21, 8 p. m.—New Orleans Horticultural Society, Kolb's hall, 127 St. Charles avenue.

Newport, R. I., December 20.—Newport Horticultural Society.

Providence, R. I., December 18, 8 p. m.—Florists' and Gardeners' Club of Rhode Island, 96 Westminster street.

Salt Lake City, Utah, December 19.—Salt Lake Florists' Club, Huddart Floral Co., 64 Main street.

Seattle, Wash., December 19.—Seattle Florists' Association, Chamber of Commerce, Second avenue and Columbia street.

St. Paul, Minn., December 19, 8 p. m.—Minnesota State Florists' Association, 510 Snelling avenue, north.

Toronto, Ont., December 19, 8 p. m.—Toronto Gardeners' and Florists' Association, St. George's hall, Elm street.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office enclose 10 cents extra to cover postage, etc.

Situation Wanted—By traveling salesman; 15 years' experience; well acquainted with plants, seeds and florists' supplies; a hustler; can speak German. Key 540, care American Florist.

Situation Wanted—Experienced seedsman wishes to make a change; all branches; planting, breeding, growing, cataloguing, packing and selling, farm, vegetable and flower seeds. Key 520, care American Florist.

Situation Wanted—By an American; married; strictly sober and reliable; four years' experience in general greenhouse work. Please state wages and particulars in first letter. Address Key 539, care American Florist.

Situation Wanted—As working foreman by all-around florist, expert propagator and grower of cut flowers, potted and decorative stock, etc.; first class designer; American, single; age 30; highly recommended. Please state particulars and wages. Address R. KLAG, Frederic Hotel, Minneapolis, Minn.

Help Wanted—A good all-'round florist wanted; wages, $70.00 per month. SIMANTON & PENCE, Falls City Nebr.

Help Wanted—A young lady florist; first-class sales lady; good designer; capable of taking charge; reference. Key 530 care American Florist.

Help Wanted—A good all around man, one who thoroughly understands growing and watering, married man preferred, references. Address Key 537, care American Florist.

Help Wanted—Landscape architect, thoroughly practical in all branches; must be good correspondent; apply with references. L. L. MAY & Co., St. Paul, Minn.

Help Wanted—Three or four men who are good quick grafters and budders and understand general nursery work; state experience and wages desired give reference. W. T. HOOD & Co., Richmond, Va.

Help Wanted—A first-class retail florist, experienced in decorating and selling; good address necessary; state age, experience in detail, salary expected and give reference in first letter. Key 535, care American Florist.

Help Wanted—Experienced gardener for private place in country. Must have experience in garden fruit, vegetable and greenhouse work; married man preferred. Residence with hot water and all conveniences furnished. Apply JNO. T. MILLIKEN, 121 Merchants of Commerce, St. Louis, Mo.

For Sale—Great Falls Floral Co.'s greenhouses and stock. Splendid opening for a hustler with small capital. B. KAPPEL, Great Falls, Montana.

For Sale or Lease—Florist store and greenhouse with two-story dwelling house, 125x50 ft.; established 40 years by present owner; wishing to retire; near Polish Catholic also another large Catholic church. Key 535, Care American Florist.

For Sale—In a nice lively city of about 9,000, a half interest, or will sell all. The only growers of flowers here. Have three greenhouses, 5 000 feet of glass, one dwelling, large cellar, barn and work-rooms; steam heat. Want a man who can take entire charge; married man preferred. Established three years; have good trade. An opportunity for the right one. OVERLAND GARDENS Laramie, Wyo.

Will Buy or Lease

Small greenhouse establishment, with a number of acres of land suitable for nursery purposes. Address

Key 534, care American Florist.

Situation Wanted.

Good rose grower capable of taking charge. State salary when writing. Chicago preferred. For further particulars address

Key 538, care American Florist.

Wanted—Man for Store.

Must have wide experience in designing and decorating, and be accustomed to waiting upon high class trade. Must come well recommended. Steady position and good salary to right person. Give full particulars with application. Address

Key 532, care American Florist.

VAUGHAN'S XXX XMAS HOLLY

Carload Shipments of Fresh Cut Stock Arriving Regularly and Now on Track at Chicago and New York

We have for years maintained our **XXX Holly Branches** the best in the western market. Our Holly breakers and packers have worked for us regularly for years under the supervision of our own travelers and agents and they know the quality our trade must have and they will get it for us if it is to be had. Everyone knows that seasons vary and fancy Holly in the best swamps cut over so closely that the standard cannot be maintained.

While other shippers have sometimes handled in this market as choice Holly as **Vaughan's XXX** brand, ours has averaged the best one year with another for many seasons. Sometimes we are compelled to ask a few cents higher price than that of competition Holly such as commission stock, lightly packed, poor color and from very poor Holly groves, but the value of our stock, with its care in selection, its solid packing, is more than double that of the average commission stock that we have ever seen.

Sample case, **$5.00;** 3 case lots, **$4.50** per case; larger lots 10 to 20 cents lower.

Holly Wreaths

Made in the best style of specially selected stock, artistic and substantial in every way. 12-inch, 14-inch, 16-inch, 18-inch.

Evergreen Wreathing

Fine grade, not to be compared with the commission stock usually offered. 20-yard coils, light, medium and heavy.

Bouquet Green, Laurel Wreathing, Mistletoe, Winter Berries, Needle Pines, Immortelles and Xmas Bells.

Write or Telegraph for Latest Prices.

CHICAGO:
31-33 Randolph Street.

NEW YORK:
25 Barclay Street.

Philadelphia Notes.

The Robert Craig Co. have their same fine stock of crotons, dracænas, pandanus and an extra fine lot of the Boston and Scottii ferns, and their variations. Ficus pandurata are splendid stock. A new departure here are the combinations. Small tubs are being artistically filled with choice foliage plants which sell on sight and they are going out by the hundreds.

The installation of Philadelphia's reform mayor and other city officers on Monday last created a great demand for chrysanthemums which were used in large clusters and baskets and presented to the various officials. The work was well distributed over the city and dozens of florists' wagons were lined up at the curb of the city hall at one time.

Dennis T. Connor secured the contract for the Foley Manufacturing Co. for the large twin houses, 40x300 feet, for W. A. Leonard of Lansdowne. It will take a train of five cars to transport the materials for this operation.

Aucubas have arrived in good condition and are splendidly berried. They appear to be coloring nicely, which is a great matter, as there are few better holiday plants than the aucuba when the berries attain that rich holly red.

The supply men say the sale of all holiday goods has been immense. Immortelles, which have advanced about 100 per cent over last season, are nearly all sold out, the dealers seeming to require them at any price.

S. S. Pennock-Meehan Co. are strong in all departments. Christmas greens of all kinds, together with their immense stock of cut flowers, will keep a largely augmented force busy until the final hour.

The commission men are busy as beavers with boxwood, ground pine and other greens. It appears to be in fair supply but the strong demand may give the late comers a lot of trouble before the final day.

Alfred Campbell is resting after his large business in chrysanthemums for the last two weeks. He is proud of the part he took in handling the thousands of these flowers when they were so scarce.

At W. K. Harris' they are strong on azaleas, ferns, Pandanus Veitchii, rubbers, madeup or combination pots or tubs, English hollies and aucubas well berried. Splendid box trees are also seen.

E. W. Bernheimer is the sweet pea king. The large houses at North Wales, he says, will be in fine crop at the holidays and he can fill orders for large quantities.

The Leo Niessen Co. are proud of their American Beauty stock. They say there is none better in the market and no other house can show the quantity.

One of Edward Reid's leaders for the holidays will be double violets. The "Reid brand," he says, can't be beat and he is busy booking orders for them.

Charles F. Edgar is back in town looking very well. His past two years have been spent in the retail business with Miss Rebstock of Buffalo.

Berger Brothers have a winner in their Princeton rose. They have exclusive control of this fine variety.

K.

LILY OF THE VALLEY

Brun's Valley gives the largest number and the biggest bells all the year

Chicago Market Brand

New Stock Is Now Ready

This is the best stock for early forcing if strict'y fancy valley is wanted. When it was shipped my grower wrote "The finest shipment that is going to the United States this season," and he knows. My representative in Europe is constantly on the lookout for the best pips to be had.

PLANTS SELLING WELL.

Roses of all kinds are plentiful and are in the best of form, mid-winter size and color. The Christmas supply promises to be better than in any previous year and the advance orders are already very large. Orders for holly, ground pine, southern smilax and boxwood keep the wholesalers busy. Artificial poinsettias and hibiscus are having a good sale, nearly every florist using them in wreaths or window decorations. Jerusalem cherries and poinsettia plants are being ordered by the hundreds; ferns also are having an excellent call. Callas and Easter lilies were very short of the demand the past week. A few good chrysanthemums are still arriving. Sweet peas, daisies, calendula, mignonette and violets clean up daily. Carnations are quite plentiful but the demand is good and the stock moves quickly. Lily of the valley is also plentiful and the quality fine. Orchids are short of the demand. Greens of all kinds are plentiful. Paper White narcissus, Roman hyacinths and stevia form a part of the daily stock. C. F. B.

BEAUTIES

Our American Beauty roses are arriving in splendid condition in all lengths, especially long, with fine foliage and color.

RICHMONDS

Our Richmonds, the Cream of the Market, are really magnificent, fine long stems, with beautiful foliage and large buds of the deepest crimson. If you are looking for stock that will please your customers and increase your sales, send in your order for Richmonds today.

KILLARNEYS.

White and Pink, we will be on with a large crop and we can honestly say that our stock never looked more promising than at present. Can fill all orders for long, medium and short.

CARNATIONS.

Large crop of the finest blooms of all the leading varieties. The cuts promise to be the largest ever and we will be able to fill your orders promptly on short notice.

XMAS STOCK

POINSETTIAS

We have made arrangements with a large grower to handle his entire crop, and will have to offer for Christmas several thousand Poinsettias with exceptionally fine, large, brilliant colored heads. This is absolutely the best stock in this market, so you cannot go wrong if you buy from us.

BEAUTIES

Large supply of extra choice stock. Large sized buds on long stems, well clothed in luxuriant foliage.

ROSES

Extra fancy **Killarney, White Killarney** and **Richmond.** The latter are fine. Perfect in color, foliage and stem.

CARNATIONS

All the leading varieties in **Red, White** and **Pink.** The quantity is large, and we expect to be able to fill all orders up to the last minute. We particularly advise the out-of-town buyers to place their orders here, for we have the stock that will stand long distance shipment and arrive at its destination in fine condition. Better let us take care of you.

Plenty of All Other Seasonable Stock

in large supply, especially all items mentioned in Price List below. We would appreciate it if you would give us an opportunity to show you what we can do. We have shown others and believe we can show you.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

AMERICAN BEAUTIES SCARCE.

Business has been quiet for the past week. Chrysanthemums are practically out of the market, carnations up to standard, and Paper White narcissi are coming in quite plentifully. Lilies are now in greater demand, which is no doubt due to the fact that the chrysanthemums are gone. Lily of the valley and violets are in supply enough to fill all orders. Richmond and American Beauties are a scarce article in this market. There are enough green goods to supply the demand.

NOTES.

Henry Dobberphul, for many years with Holton & Hunkel Co., in the plant department, has leased the greenhouses of R. Heiden on the Green Bay road and intends growing stock for the local market.

Holton & Hunkel Co. is entirely sold out of poinsettias at the greenhouses. They have a fine lot of blooming plants which are selling readily.

— Kaufman, formerly of Kaufman & Eschrich, has purchased the greenhouses formerly owned by A. Burmeister.

Heitman & Baerman contemplate the addition of several new houses to their range.

A. F. Kellner is a busy man with Christmas decorations of all kinds.

Visitors: Mrs. Phulsinger, Racine; M. B. Lassen, Racine; Mrs. Hinchliffe, Racine; F. Kesting, West Bend.

The bowling scores at the last meeting were:

Currie	170	114	132	Nohos	111	104	192
Zweifel	143	170	151	Holton	204	172	179
Hare	127	167	144	Leidiger	128	148	114
Halliday	146	102	127	Hunkel	104	138	138

WRITE, PHONE OR TELEGRAPH

Chicago.

TRADE A LITTLE QUIET.

The lull which invariably follows a holiday and which is always felt for a short time before Christmas is on and the trade in all lines is quiet. Society functions are not held for the few days before the holidays, the buying of presents and other shopping occupying the attention of the people and much money spent in entertaining is diverted to other channels, so the flower business generally is a little quiet at this time. But although the demand is not great yet it is large enough to take the supply on hand. The taking of the chrysanthemum out of the market always leaves a large void to be filled and it takes quite a little time for the other crops to catch up and stock up the market, so there is a good sale for all the best quality stock coming into the market, the only surplus noted being in white stock which does not sell quite as quickly as the colored, and the only really shortages are orchids and gardenias of which more could be sold. American Beauty roses are not in great supply, but there are just about enough received to fill the orders. Richmond is coming in in grand shape and many of the growers have timed their crops splendidly for the holiday trade. Some elegant stock is now being received. Killarney is also good and in splendid supply. White Killarney hangs a little at times. The demand for yellow roses increases and all that are received are quickly disposed of. Carnations are in good supply and of splendid quality; the colored varieties sell well with white a little slow. Violets are coming in plentifully and the quality is grand. Sweet peas are of fine grade, some fine long stemmed flowers being offered in the several colors. Lilies are a little more plentiful and lily of the valley is of most excellent grade. Paper White narcissus and Roman hyacinths are received in plentiful supply. Tulips are also to be seen at several of the stores, but they are quite short in stem. Orders for Christmas greens are being received and the trade promises large; the quality of all kinds is good. The retail stores have taken on a Christmas look, the greens being displayed and the potted plants adorn the stores and windows, some very fine plants of poinsettias, begonias, azaleas and cyclamen being shown. The growers have done these finely this year and they make a splendid display in the several shops. Everybody is looking forward to fine Christmas trade and indications are that their hopes will be fulfilled.

Dissolution of Partnership

NOTICE is hereby given that **KESSLER BROTHERS** of **113 West 28th Street, New York,** have dissolved partnership; and that **WILLIAM KESSLER,** the successor to the above named firm, will continue to conduct the Plant and Cut Flower Business at the same address, where a most cordial welcome awaits all.

Kessler Brothers

113 West 28th Street, New York

Telephone 2336 Madison Square.

NOTES.

Vaughan & Sperry have made arrangements to handle large quantities of poinsettias for the holidays and expect to have plenty of this choice stock to supply their many customers. Roses, carnations and other seasonable stock of fine quality is arriving at this store daily. A large supply, 200 cases, of specially fine boxwood, is on hand for the holiday trade.

The Chicago Carnation Co. is booking a large number of orders for rooted cuttings for January 1 delivery. Washington, Manager Pyfer's favorite flower, seems to have made a hit with the growers for it is included in nearly every order that comes in. A large quantity of choice lily of the valley is now a daily arrival at this store.

A visit to the Peter Reinberg establishment this week found the stock looking in fine condition with a good cut of Richmond roses assured for the holiday trade. The Killarneys and American Beauties are arriving at the store in fair sized quantities, and find a ready sale.

The J. B. Deamud Co. is showing a fine line of seasonable stock with roses, carnations and violets showing up exceptionally well. Green goods are seen here in quantities and a large supply is in stock to take care of the Christmas trade.

Zech & Mann are enjoying a fine shipping trade and large quantities of choice roses and carnations are sent out daily. Richmond, Killarney, White Killarney and My Maryland roses are leaders at this hustling house this week.

D. E. Freres is offering a fine grade of roses and carnations in addition to much other seasonable stock. Miss H. V. Tonner, who also has space in this store, is showing a fine grade of violets and some fancy carnations.

Merry Christmas

J. A. BUDLONG

82-86 East Randolph Street, CHICAGO.

ROSES, VALLEY and CARNATIONS A Specialty.....

WILLIAM P. FORD

Wholesale Florist, Telephone 5335 Madison Square. **45 West 28th St., NEW YORK**

Bassett & Washburn's large shipments include a very fine grade of all kinds of seasonable stock, especially Richmond, Rhea Reid, Killarney and White Killarney roses and carnations. The latter will be in full crop for Christmas, when some fine blooms of O. P. Bassett will be obtainable. The sweet peas continue to arrive in large quantities and some extra fancy stock is very noticeable.

Wm. Graff, of Graff Bros., Columbus, O., was in the city this week buying stock for his holiday trade. His firm is doing much advertising in his city and carried a quarter of a page last Sunday in one of Columbus' leading dailies.

E. E. Pieser says business this month was very good, the first seven days being especially so. His firm, Kennicott Bros. Co., will have a large supply of Helen Frick chrysanthemums for Christmas.

John Starrett is kept very busy at the Hotel La Salle arranging the decorations for the numerous banquets and other social affairs that are continually being held at this well-known hostelry.

Sinner Bros. are showing a fine grade of White and Pink Killarney roses and carnations. The cut will be large for Christmas and John expects to have plenty to supply all his customers.

Edw. Amerpohl, of Janesville, Wis., was in the city this week looking up stock for the holiday trade. He reports business good with the outlook bright for Christmas.

Wm. F. Schofield is enjoying a busy season with plenty of funeral work.

Everything in Cut Flowers and Greens

Phones { L.D. Central 3155. Automatic 44-389.

160 N. Wabash Ave., Chicago

The Geo. Wittbold Co.'s greenhouses at Edgebrook have certainly taken on a holiday appearance and the way the stock goes out is a sight to see. Orders from all parts of the country as far southwest as Mexico and Guatemala are being filled and shipped out at the earliest possible moment. Poinsettias, azaleas, rhodendrons, hyacinths and other Christmas blooming plants are seen here in all their glory but are being ordered so fast that those who intend to secure some from this firm had better step lively or they will be disappointed.

The Chicago Flower Growers' Association is doing a fine business and is supplying their customers with a very fancy grade of all seasonable cut flowers. Christmas orders are being booked and a most satisfactory trade is looked for. This firm is offering a large supply of holly oak which is very effective for decorations and promises to be one of the leading Christmas greens.

The Pulverized Manure Co., 32 Union Stock Yards, is putting their pure sheep manure on the market in five pound boxes and are making some liberal inducements to the retail florist to carry this line of goods in stock. All who are interested would do well to communicate with Dwight L. Harris, genial manager of this enterprising company.

H. N. Brun's fine grade of lily of the valley has acquired a great reputation with the growers, and his Chicago Market Brand is a strain selected by his own representative in Europe. Good lily of the valley pips are scarce this year and this stock is in fine condition.

John Kruchten's long suit is a large supply of roses and a fair sized quantity of extra fancy carnations. Sweet peas, gardenias, Paper White narcissus and other seasonable stock is arriving in large quantities with large cuts promised for the holiday trade.

A bouncing baby boy arrived at the home of Harry S. Garland at Des Plaines, last Wednesday, December 6. The young chap, Harry S. Jr., is doing nicely and is going to assist his father a little later to manufacture the gutter that has a reputation.

Phil. Schupp is supplying J. A. Budling's customers with a fine grade of Richmond, My Maryland, American Beauty, Killarney and White Killarney roses. The cut of the first named is large and promises to continue so until after the holidays.

The A. Dietsch Co. has booked an order for four greenhouses, 24x150 feet, for the American Rose and Plant Co., of Springfield, O. A couple of other good sized orders were also booked recently and will help to keep the factory busy all winter.

Any gardener or florist in this vicinity who would like to secure a beautiful calendar for 1912 would do well to write to Hitchings & Company, Elizabeth, New Jersey, inclosing the coupon found elsewhere in this issue.

Hoerber Bros.' stock is arriving in fine shape at the store, but goes out about as fast as it comes in. Several good sized orders for Christmas have already been booked and everything points to a banner year.

The Deerfield Nurseries are going to make an addition to their greenhouse plant and have already placed an order for material with the Geo. M. Garland Co. of Des Plaines.

C. W. Ward, of Queens, N. Y., and Detroit, Mich., was a visitor this week, en route to Louisiana where he will spend the winter near New Orleans.

—LARGE SUPPLY—

and

Violets

M. C. GUNTERBERG,

82-84-86 E. Randolph St., Chicago.

Chas. W. McKellar is now receiving much larger quantities of orchids and expects to have a large supply of these beautiful flowers for the holidays.

Buchbinder Bros., manufacturers of florist ice-boxes, are enjoying a busy season and selling many refrigerators to the trade.

George Stanger, formerly employed here, left December 8 to enter the employ of the Park Flora Co., San Francisco, Calif.

Miss Ida Evert is still showing some fine chrysanthemums at her stand in the Batavia Greenhouse Co.'s store.

The Des Plaines Floral Co. is going into the rooted carnation cuttings business more heavily this season.

John Grossman, Poehlmann Bros. Co.'s bookkeeper, visited his folks in Evansville, Ind., last week.

Rober & Radke of Maywood have a nice lot of poinsettias for their Christmas trade.

C. M. Dickenson is in New York on a combined business and pleasure trip.

SINNER BROS.

82-84-86 E. Randolph St., Chicago

☛ It would be a great pleasure for us to quote you prices and book your order for cut flowers for Christmas. Write for prices.

Wietor Bros. are cutting a fine grade of American Beauty, Richmond, Killarney, White Killarney, Mrs. Jardine and Uncle John roses, and a large quantity of choice carnations. The cut is getting larger every day and the long hoped for crops for Christmas now promise to be on time which will help things out considerably and enable them not only to take care of their regular customers, but a few more as well. N. J. is devoting most of his time to grading the American Beauty roses that are of exceptionally fine quality and a credit to this old established firm. A customer in a western Oklahoma city wrote this firm a very complimentary letter last week in which he stated that the carnations he received for Thanksgiving carried well and reached him in the best possible condition.

James McHutchison of McHutchison & Co., of New York, was a most welcome visitor here this week. His talk on South America at the club meeting last week was very interesting and was considered a treat by all those who were present.

Otto Lang of Dallas, Tex., was in the city this week looking up stock for his Christmas trade. The genial Texan reports business very good with a record-breaking Thanksgiving trade and the outlook very bright for Santa Claus day.

Curtis Kindler, of the Raedlein Basket Co., left December 10 for Ebersdorf, Germany, to visit his firm's factories and select stock for next year's trade.

F. A. Longren and Clifford Pruner, E. H. Hunt's hustling traveling representatives, are helping out at the store during the holiday rush.

R. W. Peterson, representing J. A. Peterson, the well-known grower of Westwood, Cincinnati, O., called on the trade here this week.

Humphrey Bros., of Columbus, O., have placed an order for a large sized greenhouse with the John C. Moninger Co.

Miss M. C. Gunterberg is featuring a fine grade of violets and a large quantity of Richmond roses.

A. Miller of A. Henderson & Co., has returned from a successful business trip through the west.

Mrs. Wm. Feninger of Toledo, O., renewed old acquaintances in this city this week.

Anton Then is confined to his home with pneumonia and bronchitis.

Henry Wietor is hunting big game in the vicinity of Cascade, Ia.

The large supply of stock that is arriving at Poehlmann Bros. Co.'s store is of fine quality and sells readily. American Beauty, Richmond, Killarney, White Killarney, My Maryland and Mrs. Aaron Ward roses are fine as are also the carnations which are of unusually large size. Fine poinsettias, sweet peas, violets, orchids and other choice flowers in season can be seen at this busy house, where trade is very lively nowadays.

H. Van Gelder is having some new electric light fixtures installed in the Percy Jones' store this week. We can not help but wonder why some florist does not lease the unoccupied space in this store for the location is an ideal one and is well equipped for the conducting of a wholesale business.

A baby boy arrived at the home of Mr. and Mrs. Krueger on Friday, December 8. Grandpa George Reinberg is going to teach the young chap the wholesale business when he grows a little older.

The John C. Moninger Co. is enjoying a very busy season and its large factory is kept running in full blast to turn out the material for the many orders that it has booked.

Mrs. Fred Strail is helping out at John Mangel's during the holiday rush and can be seen pleasantly waiting on the many customers that patronize this well known store.

W. N. Rudd is attending the annual meeting of the State Horticultural Society at Urbana this week and is on the programme for an address.

Miss Agnes Rigden of Ottawa visited the local market this week.

J. A. Sikuta has closed his store on N. State street.

Visitors: A. F. J. Baur, Indianapolis, Ind.; J. L. Johnson, De Kalb, Otto Lang, Dallas, Tex.; J. F. Goodlive, Geo. W. Canton, Zanesville, O.; Joseph H. Hill and John A. Evans, Richmond, Ind.; A. L. Glaser, Dubuque, Ia.; E. J. Fancourt, representing S. S. Pennock-Meehan Co., Philadelphia, Pa.

BUSINESS FAIR.

We have had one of the most beautiful week's weather for this time ever on record. Some of the shrewd ad. men ought to boom Boston as a winter resort, but next week we may be buried in snow. Business continues fairly good. Carnations the past few days have been somewhat druggy, yet we have much for which to be thankful. Roses are in good quality. Indications are now that unless we have extremely cold weather there will be no great scarcity of flowers for Christmas.

NOTES.

Welch Bros. are in the midst of their annual rush. An advance shipment of several hundred cases of boxwood sprays and holly was the opening gun for the Christmas trade. We noted some excellent Killarney, Lady Hillingdon and My Maryland roses, sweet peas and lily of the valley. P. Welch, talking of holiday trade, says from the orders already received it promises to be a record breaker.

Steam coal has advanced 80 cents per ton. It is reported that many of the coal carrying roads are working the mines 24 hours each day and storing the coal in New York. This looks like trouble. Coal that was sold f. o. b. $3.30 is today $4.10. Those growers who have contracts are safe.

It brought back old memories when we saw some well grown camelias in T. F. Galvin's window. The flower may not have any stem, but there is a certain fascination about the plant that it usually sells quickly.

The Growers' Sales Co. is to occupy the adjoining store to Julius A. Zinn's. It has been sub-leased from T. F. Galvin. This will make two markets, two wholesalers and two retailers all within a few yards on Park street.

Wm. Sim is sending in some nice sweet peas.

Lady Hillingdon is still making good. MAC.

Pittsburg.

GETTING READY FOR CHRISTMAS.

The beginning of December finds every one talking Christmas and few seem to arrive at the same conclusion. One thing seems assured, and that is all growers will be on full crop. There should be no scarcity of anything. Boxwood and other holiday goods are being moved in quantity.

NOTES.

The green goods men are now located and are making things hustle. Wm. Loew is at 647 and Joe Jones at 931 Liberty avenue.

Jack Thompson, manager of the Zeiger Co.'s Highland avenue store, is laid up with a bad attack of rheumatism.

SUPPLY IS SHORT.

The demand for flowers the past week shows that the large quantity of stock required for Thanksgiving week was not enough, for the market has been cleaned up daily. The call is still for more. Prices are advancing and the quality of all kinds of stock is much improved. The unusual weather conditions of the past three or four days, from Friday until Monday of this week, when the glass has hardly touched the freezing point and has been more often above 50°, is making the rose stock particularly much softer, the Killarneys especially coming in anything but tight and close. There will certainly be a change before long. The plant men are taking advantage of the mild weather and hurrying out all the orders so as to avoid the risk of frost. Chrysanthemums are about done, although there are still a few fine Jeanne Nonins. All growers who had crops of the late varieties have done well this year, as the demand for good flowers has been unusual, being at all times greater than the supply. Aside from roses, flowers that are leaders on the market now are white lilac, snapdragon, mignonette and sweet peas. The latter are coming finer each week and will be a factor in the holiday trade. Violets are not at all plentiful. There is plenty of good lily of the valley and cattleya orders are more easily filled than they were two weeks ago. It looks as if there would be a good supply for Christmas. Cypripediums are also in demand. All kinds of green goods clean up daily, bunch asparagus and adiantum being on everybody's list as indispensible. The plant men are worked up to their fullest capacity in getting their orders out. The express companies, Philadelphia only has two, the Adams and the United States, but to get the business they keep men stationed at the greenhouses with eyes on the packing shed and vans within call so that the growers are saved the expense of delivery to the stations, which is quite an item when one considers the immense lot sent out for the Christmas trade. The quality of the stock is quite up to the standard of other years. Poinsettias have never been seen in better shape. The Robert Craig Co., who make a specialty of this gorgeous plant, have a splendid stock, now about all sold out. Jacob Becker has also a large house full and they could not be done better than those seen with this careful grower. James S. Griffin of Frankford is very proud of his poinsettias. They certainly are a fine lot.

New York.

TRADE VERY QUIET.

Business in the wholesale market has been very disappointing. Stock of all kinds has been plentiful and prices took a very severe tumble. Immediately following Thanksgiving prices on roses and carnations reached high-water mark and everyone seemed to think that the business had started in to be what it should be at this season of the year. But the forepart of the following week proved they were all wrong, and at present the market is in anything but a satisfactory state. American Beauties are plentiful and of very fine quality and moving slowly. The top grades of Mme. Chatenay, Hilda, Lady Hillingdon, Prince de Bulgarie, My Maryland are not over plentiful and the prices on these have not been affected so much. Killarneys are more plentiful, but the best of these are being disposed of at lower prices. Bridesmaids and Brides are now of better quality, and as usual it is difficult to get as much for the best grade Brides as can be obtained for Bridesmaids. There seems, however, to be a good, steady demand for the lower grades of both of these varieties. Yellow roses are scarce. Lily of the valley is moving better. Lilies are more plentiful with even demand and no change in the prices. Carnations are of all prices and qualities. While the best grades of the fancy varieties and novelties realize very good figures, indeed, there are thousands of small grades and poor quality that have to be disposed of at a very low price. Violets are very plentiful and though the better quality remains at prices formerly quoted there are very large lots disposed of at extremely low figures. Orchids are a little more plentiful and prices are not quite as good. The values in cattleyas have dropped a little and cypripediums and D. Formosum remain the same. Sweet peas are of excellent quality, with no apparent change in quotations. Paper White narcissus and Roman hyacinths are in abundance, meeting with very fair demand. As usual at this time stevia is very plentiful and of good quality. Smilax, asparagus and adiantum of good quality are moving a little better. Chrysanthemums are almost over and are doing much better than was expected, and as a supply is promised until Christmas satisfactory prices should be obtained for what comes in from now on, though there are still large quantities of inferior blooms in market that will have to be cleared out at very low figures. Gardenias are selling well; that is, the best grades, but the same cannot be said of inferior flowers, of which the market seems to be overstocked. Poinsettias are in good supply and the prices asked are the same as in former years, though most of the growers are sending in poinsettias in pans and the call for these is very brisk.

NOTES.

The annual meeting of the New York and New Jersey Association of Plant Growers was held at the office of the secretary, William H. Siebrecht, Jr., No. 277 Broadway, New York City, on December 5, and important business was transacted. The annual election of officers took place with the following results:

Frederick Marquardt, president.
Louis Schmutz, vice-president.
Herman C. Steinhoff, treasurer.
Wm. H. Siebrecht, Jr., secretary.
A. L. Miller, Louis Dupuy and George Scott, directors.

It was voted to have an annual dinner and Julius Roehrs, Jr., Louis Dupuy and Herman C. Steinhoff were appointed a committee to make all necessary arrangements.

"Boss" Weir of Brooklyn, who holds the record for regular attendance in the wholesale flower district, Sundays included, is contemplating an extended European trip the coming summer with his friend John Nicholas. It is not generally known that Mr. Weir, who has been the champion checker player of the florists of Brooklyn, has now taken up pinocle and is anxious to get up a series of games among the florists, he to have "Joe" Fenrich as a partner. This will surely be an interesting event.

The Kervan Co. of 119 West Twenty-eighth street also report the busiest season in years. This firm handle a line of all decorating evergreens, the whole building being devoted to this purpose. They have now made arrangements whereby they extend their store through to Twenty-ninth street. This is a very valuable addition, as most of their receiving and shipping can be done through the Twenty-ninth street entrance.

The reunion of the New York Gardener's Society will be a bowling tournament and dinner at Thum's alleys, Broadway and Thirty-first street, and promises to be a success in every way. Bert Chadwick of Vaughan's Seed Store will have charge of the bowling. J. I. Donlon, W. E. Marshall and Jas. A. Manda are the committee working out the other arrangements.

Traendly & Schenck handle the output of several of the largest orchid, carnation and rose specialists of this vicinity and will have a large supply for the holidays. It would be difficult to get better cattleyas, dendrobriums and cypripediums than are seen here. In addition to orchids they handle a fine line of gardenias.

Wm. Kessler, who has succeeded the firm of Kessler Bros., is extremely busy at this time handling a complete line of winter flowering plants. In the greenhouse at the rear of his store he has a most excellent place to show these plants to good advantage. The palms and ferns seen here are of the very best quality.

The late varieties of chrysanthemums are seen in quantity and quality at the establishment of the Growers' Cut Flower Co. and Manager Coan states he will have a good supply up to and including the holidays. Probably the largest shipper to this house at present is Jacob Hauck, Bloomfield, N. J.

L. B. Coddington of Murray Hill, N. J., whose great rose establishment is so well known, has taken up sweet peas and if they do well this season will grow them extensively another year. The roses from this place are of excellent quality at present and are all sold by H. E. Froment.

Lecakes & Co. of 53 West Twenty-eighth street report they have never received so many advance orders for Christmas greens as this season. The call for princess pine and laurel wreaths has been phenomenal and their entire force is compelled to work night and day.

Alfred H. Langjahr is very much pleased with his success at his new store, which is fitted up in such fine shape for the handling of the product of his growers. The unexcelled features seen here were planned and carried out by Mr. Langjahr personally.

James Bell, who was operated on recently in the Presbyterian hospital, is about again and will assume his duties as superintendent at C. F. G. Billings' estate, One Hundred and Ninty-sixth street and Fort Washington, on January 1.

C. W. Scott of the Yokohoma Nursery Co. reports receiving word from Japan that they have planted one million 7x9 lily bulbs so as to have that quantity in the 8x10 size next year.

Among recent visitors to C. H. Totty's place at Madison, N. J., to see the new rose Sunburst and Mr. Totty's other novelties was Benjamin Dorrance of Dorranceton, Pa.

Charles K. Witter, in charge of all the decorating and the cut flower stand in the Hotel St. Regis, reports a very good business for the past week.

J. J. COAN, Manager — Consignments Solicited
111 W. 28th St. — Telephone 6237 Madison Square — NEW YORK

New York Florists' Club.

One of the most interesting meetings of the New York Florists' Club was held Monday evening, December 11. There was an attendance of 100, the interesting event, of course, being the election, which resulted in the following officers being chosen:

Joseph A. Manda, president.
Philip Einsmann, vice-president.
John Young, secretary.
W. C. Rickards, Jr., treasurer.
John Donaldson, Philip Kessler and Wm. Duckham, trustees.

The details of vote for officers are as follow: For president, Joseph A. Manda, 73; I. S. Hendrickson, 3; J. B. Nugent, Jr., 1; vice-president, Philip Einsman, 41; John A. Rassbach, 39; secretary, John Young, 75; W. G. Badgley, 6; treasurer, W. C. Rickards, Jr., 45; C. W. Scott, 36; trustees, John Donaldson, 69; Philip Kessler, 57; Wm. Duckham, 54; R. G. Wilson, 25; F. A. Balles, 13; Harry Turner, 13.

An interesting topic was the organization of New York's floricultural interests, which was thoroughly discussed by many of the members present. Prof. John Craig, who was present, outlined what was the proper method to obtain the necessary legislation. It was finally decided to leave the matter to the executive committee of the club, which is the board of trustees and the officers. William Chalmers, H. Langeler, Meyer Othile, Henry C. Reidel, John Birnie and Roman J. Irwin were elected, A. Macdonald, Cold Spring on Hudson, N. Y.; A. P. Smith, Madison, N. J.; J. K. Fleuti, Highwood, N. J.; A. L. Young, 54 West Twenty-eighth street; J. K. M. L. Farquar, Boston, were proposed for membership. The resignations of J. H. Kemper and Samuel Whitefield were accepted with regrets. The committee on awards made the following report: Vase of Carnation Brooklyn; thanks of the club.

Patrick O'Mara introduced the following resolutions, which were adopted:

Whereas, it has come to our knowledge that Wm. F. Kasting of Buffalo, N. Y., is a candidate for the office of commissioner of agriculture of the state of New York, and,

Whereas, from the long acquaintance with him and a knowledge of his attainments in horticultural, we have every reason to believe that he would render the state signal service if he receives the appointment.

Therefore, be it resolved, That we herewith endorse the candidacy of Wm. F. Kasting for the position mentioned and pledge to him our support in his efforts to secure this appointment.

Sunflowers.

The most remarkable use to which the sunflower has been put is in the construction of battleships. The stalk of the plant is very pithy, and even when compressed into blocks this pith is capable of absorbing a tremendous quantity of water. These blocks, in which the pith retains some of its flexibility, have been employed with much success in the solution of the vexed problem of the lining of a battleship's sides. They are placed between two walls of steel, and the substance is so resilient that it completely closes up the hole made by the projectile, keeping out the water for a long time.

Another little known use of the sunflower is in the manufacture of cigars. There is not a part of the plant that is without commercial value. The seed, which is raised by hundreds of millions of pounds every year in Russia, makes a palatable edible oil, with a residue of seed cake for cattle, or it may be fed in the kernal to poultry. The blossoms furnish honey first and then an excellent yellow dye. As for the stalks, the Chinese are clever enough to get a sort of silky fiber from them, and they are also good for fuel and for the production of potash. In New England it is believed that the sunflower "keeps away malaria." It is also believed that the blossoms follow the sun in its daily course, but that is not true.—Newbern Sun.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan Chicago President; Marshall H Duryea, New York First Vice-President; Edgar Gregory Marblehead, Mass., Second Vice President; C. E. Kendel, Cleveland O. Secretary and Treasurer.

Next annual convention, June 1912.

F. H. HENRY, of New York, and family, expected to leave Japan for the United States early this month.

CANADIAN houses report that the winter weather set in early, leaving considerable surpluses of Dutch bulbs on hand.

THE demand for onion seed is quite unprecedented and the price of Globe varieties has advanced within the past few days.

TENNESSEE bottom lands, where the holly is cut, are flooded and carload shipments expected December 14-16 are not coming through.

CHICAGO.—Prices on the Board of Trade, December 13, for grass seed were noted as follows: Timothy, $13.50 to $15.25 per 100 pounds.

THE Boddington and Livingston catalogues reached us this week, the first of the 1912 series, closely followed by the Ebbert Seed Co.'s and Burpee's.

THE Department of Agriculture has just issued a circular giving useful tables of the average dates of the beginning of corn and winter wheat planting in the various states.

NEW YORK.—Alfred Emerich, representing Vilmorin-Andrieux & Co., Paris, France, sailed November 30 after a very successful trip through the United States and Canada.

PHILADELPHIA, PA. — Wm. Henry Maule has just returned from a recuperative visit to Hot Springs, Va., whither he retired after advancing the price of Golden Self-Blanching celery of the genuine Maule strain to $15 per pound ($1.00 discount to seedsmen).

VISITED CHICAGO: C. F. Wood, of Wood, Stubbs & Co., Louisville, Ky.; Edw. Dungan, representing Wm. Henry Maule, Philadelphia, Pa.; W. J. Fosgate and daughter Margaret, Santa Clara, Calif.; J. Schnur, representing Steele-Briggs Seed Co., Toronto, Ont.; Fred H. Hunter, representing Waldo Rohnert, Gilroy, Calif. Chas. R. Kimberlin, Santa Clara, Calif.; H. Eicke, of Vaughan's Seed Store, who spent a week at the home place warehouses, greenhouses and nursery, and is now routed eastward to arrive in New York at Christmas; John Bockman, representing A. T. Boddington, New York.

Another Congressional Seed Bill.

Washington, D. C.—Seedsmen will be interested to hear that Congressman Mann on December 5 filed another bill, H. R. 14483, entitled "To regulate foreign commerce by prohibiting the admission into the United States of certain adulterated seeds and seeds unfit for seeding purposes," copies of which may be secured from the clerk of the House of Representatives, U. S., Washington, D. C.

CURTIS NYE SMITH.

[The bill is reproduced on page 1180 of this issue.—Ed.]

The Non-Warranty Clause.

The decision of the supreme court of Wisconsin in the case of Leonard Seed Co. versus Crary Canning Co. (see THE AMERICAN FLORIST of November 18, page 938), is so obviously right that comment is hardly necessary. The disclaimer clause was in the body of the contract of sale which the buyer subscribed to. It was as much a part of the contract as the price of the seeds. Seedsmen have no trouble in cases of this kind. It is equally clear that where the contract of sale is effected by interchange of letters and the seedsman definitely states, or refers to his non-warranty clause, the clause is clearly a part of the contract. But, in those cases, and they are unfortunately too many, where the clause is not definitely fixed as a term of the contract the question arises whether both parties agreed to the clause as a term or condition of the contract, and the court or jury, depending on the jurisdiction of the case, must decide the point. And in discussing this class of cases it is pertinent to refer to the recently decided Iowa case of Blizzard Bros. versus Growers Canning Co., 132 N. W. 176 (see THE AMERICAN FLORIST of September 30, 1911, page 534), where the clause was read into this contract of sale by virtue of a general custom of the seed trade to sell seeds without warranty, and it made no difference whether or not the buyer read the clause printed on the package containing the seeds. While this decision means much to Iowa seed dealers and to seedsmen in a very few other states, it is advisable to warn them that in most states this doctrine is not only unsustained but directly controverted.

The disclaimer clause is entirely legitimate, reasonable and necessary to the seedsmen because of the nature of seeds and of the character of the seedsman's business and I wish the seedsmen could understand how, when and where it could be used to afford them reasonable protection.

CURTIS NYE SMITH.

Christmas Greens at Chicago.

Much to the surprise of the trade, Christmas business, possibly in part due to the mild weather and possibly in part due to the dull times, has opened up slowly. So quickly did the commission men on South Water street respond to this condition of affairs that light wreathing, usually standard on the street, which has been selling at 55 cents per 20-yard coil, declined to 45 cents per coil, and a fair grade of the medium wreathing was sold in 5,000 lots as low as 47½ cents. Of course, this was an exception and the medium generally sold considerably higher.

Bouquet green has shown up at interior points which were usually buyers. Prices have remained around $7.50 to $8.50 per 100-pound crate, according to quality.

Holly has not been plentiful nor of good quality on the "street." Both holly and green have been handled by the seed trade fully as much as usual.

ANOTHER SEED BILL.

H. R. 14483. Introduced by Mr. Mann Dec. 5, and referred to Com. on Interstate and Foreign Commerce

A BILL to regulate foreign commerce by prohibiting the admission into the United States of certain adulterated seeds and seeds unfit for seeding purposes.

PAGE 1

Be it enacted by the Senate and House of Representatives of the United States of America in Congress Assembled, That the importation into the United States of seeds of alfalfa, barley, Canadian blue grass, Kentucky blue grass, awnless brome grass, buckwheat, clover, field corn, Kafir corn, meadow fescue, flax, millet, oats, orchard grass, rape, redtop, rye, sorghum, timothy, vetch, and wheat, or mixtures of seeds containing any of such seeds as one of the principal component parts, which are adulterated or unfit for seeding purposes under the terms of this Act is hereby prohibited; and the Secretary of the Treasury and the Secretary of Agriculture shall jointly or severally make such rules and regulations as will prevent the importation of such seeds into

PAGE 2

the United States: *Provided, however,* That such seed may be delivered to the owner or consignee thereof under bond, to be recleaned in accordance with and subject to such regulations as the Secretary of the Treasury may prescribe, and when cleaned to the standard of purity specified in this Act for admission into the United States, such seed may be released to the owner or consignee thereof after the screenings and other refuse removed from such seed shall have been disposed of in a manner prescribed by the Secretary of Agriculture: *Provided further,* That this Act shall not apply to the importation of barley, buckwheat, field corn, flax, oats, rye, or wheat not intended for seeding purposes.

SEC. 2. That seed shall be considered adulterated, within the meaning of this Act—

First. When seed of red clover contains more than three per centum of seed of yellow trefoil, or any other seed of similar appearance to and of lower market value than seed of red clover.

Second. When seed of alfalfa contains more than three per centum of seed of yellow trefoil, burr clover and sweet clover, singly or combined.

Third. When any kind or variety of the seeds, or any mixture described in section one of this Act, contains more than five per centum of seed of another kind or variety of lower market value and of similar appearance: *Provided,*

PAGE 3.

That the mixture of the seed of white and alsike clover, red and alsike clover, or alsike clover and timothy, shall not be deemed an adulteration under this section.

SEC. 3. That seed shall be considered unfit for seeding purposes within the meaning of this Act—

First. When any kind or variety of clover or alfalfa seed contains more than one seed of dodder to five grams of clover or alfalfa seed, respectively.

Second. When any kind or variety of the seeds or any mixture described in section one of this Act contains more than three per centum by weight of seeds of weeds.

Burpee's Annual for 1912

"The Leading American Seed Catalog"

Is now ready for mailing. The first edition of more than four hundred thousand copies will soon be distributed. As usual, it is sent only to "Customers of Record." We shall be pleased, however, to mail a copy immediately upon application (a postal card will do) to every one who appreciates QUALITY IN SEEDS.

This SILENT SALESMAN (and we employ no "talking" salesman to solicit orders) tells the plain truth about The Best Seeds That Can Be Grown. It is a bright book of 178 pages and shows, besides colored plates of Burpee-Specialties, hundreds of the choicest vegetables and most beautiful flowers, illustrated from photographs. It is almost indispensable to all who garden either for pleasure or profit.

The "HOUSE OF BURPEE" is known the world over not only as EXPERTS IN SWEET PEAS, but also as SEED SPECIALISTS. No other American firm has ever introduced so many novelties of sterling value,—and no other growers supply seeds annually direct to so many planters. It might be to your interest to read THE BURPEE ANNUAL. It will cost you only one cent for a post-card to send us your address—and you are under no obligation to buy. We never annoy applicants with "follow up" letters!

Shall we mail you a copy?
If so, kindly WRITE TODAY.

Burpee's Blue List for 1912

The Most Complete Catalog Published for Market Gardeners, Truckers and Florists.

For the planter who "knows" it contains complete lists of all that is best in vegetables and flowers, while the grower who is uncertain as to the best varieties suited for his purpose may be guided by the bull's-eye ⊙ placed after what is known to be best. In addition, full descriptions are given of many new and most valuable varieties.

BURPEE'S BLUE LIST FOR 1912 contains 143 pages, with hundreds of half-tones and engraved illustrations. Within the pages of this catalog we have condensed an experience of thirty-five years both in handling and the actual growing of seeds.

If you garden for profit (that is, sell your products in the market), you are entitled to a copy of this complete and easily understood catalog, but if you are a private gardener please do not ask for it, as we must protect the Market Gardener, Trucker and Florist.

Market Gardeners

Vegetable Growers' Association of America.

H. F. Hall, Boston Mass., President; C. West, Irondequoit N. Y., Vice-President; S. W. Severance, 508 Walker Building Louisville, Ky., Secretary; M. L. Ruetenik Cleveland, O., Treasurer.

SOME pessimist is trying to create a scare by announcing the failure of the artichoke crop. We shall not admit, as long as the endive holds out, that all is lost.—Chicago Record-Herald.

COUNCIL BLUFFS, IOWA.—F. L. Lainson has just completed a house 30x260 feet which took only 30 days to build. He has 14,000 carnation plants growing this year which are doing nicely and the flowers bringing a good price. Business is reported as unusually good.

Potato Famine in Sight.

New York, December 8.—Importations of potatoes from abroad are beginning to arrive at this port, the main bulk of them coming from Ireland. Up to date this fall about 25,000 sacks have arrived.

Wholesalers quote Maine potatoes in the market here at $3 a sack, and say this price is just about double the price of a year ago. Since early fall the price has risen steadily, and $4 a sack is expected by February.

Prices of Indoor Fruits and Vegetables.

Chicago, December 11.—Mushrooms, 10 cents to 50 cents per pound; cucumbers, 90 cents to $1.25 per dozen; tomatoes, 10 cents to 25 cents per pound; radishes, 15 cents to 40 cents per dozen bunches; lettuce, 25 cents to 27½ cents per pound.

New York, December 9.—Mushrooms, 60 cents to $1.80 per 4-pound basket; cucumbers, $1.25 per dozen; tomatoes, 10 cents to 20 cents per pound; radishes, $1.50 to $2.25 per 100 bunches; lettuce, $1.50 to $2 per strap; mint, 40 cents to 60 cents per dozen bunches.

Midwinter Mushrooms.

To our mind the midwinter crop of mushrooms seems most desirable. Just as soon as outdoor work breaks down we have more time to look after other things, which includes the mushroom. Earlier in the season we would be sure to neglect turning of the manure owing to the pressure of other work. But by the middle or end of November we generally are relieved to a great extent and can give this part attention. We proceed to get the necessary fresh horse manure and pile it up in a shed, or if such is unavailable, in the open; but here we are sure to protect our pile with boards to shed rain, as we want neither the moisture thus added nor can we afford the leaching of fertility caused by heavy showers; further, some confinement of the pile induces more even heating and more speedy reduction. As far back as we can remember we have practiced preheating manure for hotbeds and for mushrooms we do just the same thing. We have learned to pile our manure rather flat and square than high and peaked, as this latter induces burning or fire-fanging. The flat pile is compacted by tramping. As soon as thoroughly heated it is forked over, being careful to turn all outside parts in and inside out, to shake out all solid bunches fine and even and to remove undue bedding. If at first forking we find the mass at all dry we turn on and water freely with the hose, enough to supply ample moisture for the whole period. Thus there should never be any dry parts, yet if squeezed no liquid should appear. After two or three days this same process is repeated and so on until the whole pile is one even mass as regards moisture, color and body. All rankness should be gone, and instead it should be rather agreeable to the breath and dark in color. It is a mistake to go too far in this reducing process, as we want enough life left to keep our beds warm for a long time to come. While the material is being cured we prepare the beds by whitewashing our old ones or building new ones entirely; 12-inch boards make ideal beds, as less than 12 inches will not heat evenly. Beds should not be too wide, about the same as greenhouse benches, and can be any length. They must be off the floor if there is any danger of flooding, and where head room is available tiers can be built up. The main points are to provide a place which can be heated to about 50° and kept evenly warm—no drip from overhead, no standing water underneath, no strong air currents to induce drying out. Light is unnecessary. Convenience for handling manure in and out is highly desirable, as otherwise the expense of handling may be too great. Many a florist could provide for a handy mushroom house by attaching a lean-to against a greenhouse or boiler shed on the north side. We will consider spawning separately.

MARKETMAN.

GREENWICH, CONN.—Fire destroyed the greenhouses, gardener's cottage and barn on the Jacob Langloth estate December 5, the gardener and men having a narrow escape. The loss is estimated at $20,000.

Watch for our Trade Mark stamped on every brick of Lambert's

Pure Culture Mushroom Spawn

Substitution of cheaper grades is thus easily exposed. Fresh sample brick, with illustrated book, mailed postpaid by manufacturers upon receipt of 40 cents in postage. Address

Trade Mark. American Spawn Co., St. Paul, Minn.

J. D. THOMPSON CARNATION CO.,

Carnation Specialists, JOLIET, ILL.

Los Angeles Notes.

Thee Florists have had a big demand at the store and their Thanksgiving business was the best they have known. They are extending their sphere of influence considerably, among the recent orders being one for a wedding at Oxnard, Ventura county. The flowers were all shipped up from the city and Frank Lichtenberg was in charge of the decorations. In the house and on the tables pink roses and carnations were principally used, the bride's bouquet being of lily of the valley, the bridesmaids, pink roses. They have several other large decorations booked for the near future and prospects look good.

Charlie Lewis of Freeman-Lewis on Fourth street expresses himself as perfectly satisfied with the business coming their way since the opening of the new store. Finely lit and attractive windows and a general appearance of push and tidiness around the store helps out quite a little and the good stock carried, both in cut flowers and plants, a good deal more.

The monthly meeting of the Los Angeles County Horticultural Society was held December 5, the principal speaker being Theodore Payne, on "Shade Trees for Southern California." This is a good live topic and Mr. Payne was listened to with great attention, the discussion following proving of great interest.

Speckman Brothers are sending in fine Killarney roses to the Los Angeles Flower Market. They have only one house as yet but another is in the stocks and the principal crops grown are Killarney roses and lily of the valley. The new house, 27x335, is to be planted to American Beauty roses.

O. C. Saakes sits back and smiles at the fine Thanksgiving business done and funeral work of the better kind is coming his way in large quantities.

Fine business is reported at the Hayward Floral Company, especially in bouquets and good funeral work.

H. R. R.

FALL RIVER, MASS.—C. Warburton made a beautiful and artistic decoration in the Armory, December 1, at the annual ball of the Women's Board of the Union Hospital. The large drill shed was festooned with large quantities of laurel and bay trees decorated the platform.

LENOX, MASS.—The annual meeting of the Lenox Horticultural Society was held December 2 and the following officers elected: George Foulsham, president; George Breed, vice-president; George Instone, secretary; William Hooper, assistant secretary; Allan Jenkins, treasurer.

Roses for Forcing

The J & P Preferred Stock.

We consider the deliveries we are now making to be the best plants we have ever grown. We have a few left for late buyers.

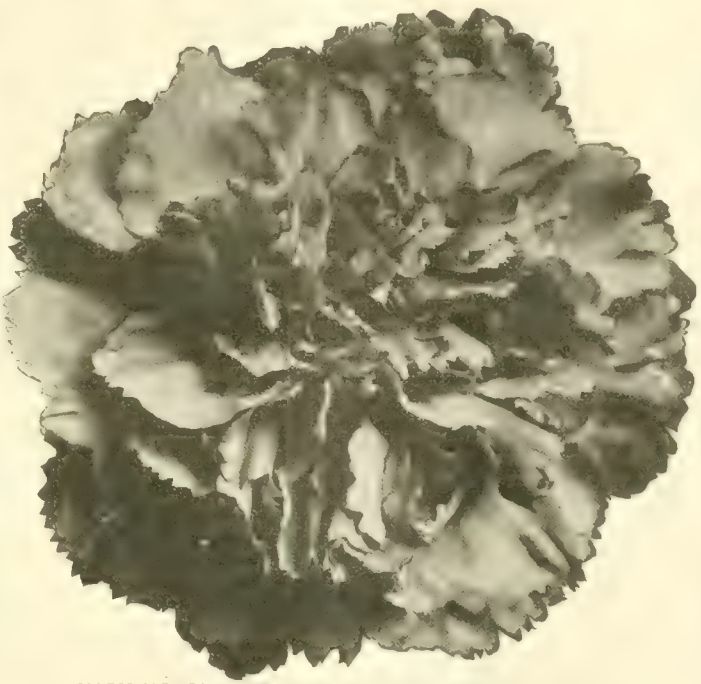
Washington

Dark Pink Sport of Enchantress, Like All the Other Members of the Enchantress Family, the Best in Their Respective Colors

Washington is the only variety sent out last year that was shown extensively at the Flower shows this year, and the only second year novelty shown in the Hundred Class; wining **First Prize** over all standard varieties.

Washington like Enchantress, is easy to handle and brings satisfactory returns to the grower.

Washington is a strong, healthy grower; the foliage is much darker than the Enchantress. Strong, well rooted cuttings ready January 1, 1912. $6.00 per 100; $50.00 per 1000.



WASHINGTON, THE VARIETY THAT HAS MADE GOOD

OTHER LEADERS

White Wonder, exceptionally free, fine large flower; good stems. $6.00 per 100; $50.00 per 1000.

Gloriosa, medium pink, very fine flowers on good stems. $6 00 per 100: $50 00 per 100.

Pink Delight, flesh pink, the best keeper of any carnation grown. $6.00 per 100; $50.00 per 1000.

Bonfire, scarlet, very bright, long strong stems. $6.00 per 100; $50.00 per 1000.

Christmas Cheer, scarlet, very free. $6.00 per 100; $50.00 per 1000.

Pricess Charming, large flesh pink, long heavy stems, very fine. $6.00 per 100; $50.00 per 1000.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N. Y., Sec'y. Thirty-seventh annual convention to be held at Boston, Mass., 1912.

DELTA, COLO.—There will not be as many trees planted here next spring as last year or the year before last.

VISITED CHICAGO: James McHutchison, New York; James Meiklejohn, representing H. Frank Darrow, New York.

The Chestnut Bark Disease.

The chestnut bark disease was first noted near New York in 1904 and has spread until it is now present in ten states east of the Allegheny mountains and the methods of control are the subject of Bulletin 467 issued by the United States Department of Agriculture. It attacks nearly all the chestnuts. The Japanese and Asiatic chestnuts are the only ones that appear to have any resistance, and the total financial loss is now estimated at $25,000,000.

The disease is caused by a fungus and the entrance at any point where the bark is broken may cause infection. It then spreads primarily in the inner bark and produces characteristics which girdle the tree at the point attacked. Conspicuous symptoms are the development of bunches of sprouts below the girdling lesions; the half-formed yellowish leaves in the spring on the previously girdled branches; the reddish-brown leaves on branches girdled in summer and the yellow-orange or reddish-brown pustules of the fruiting fungus on the bark. The symptoms are so obscure during the time from October to April that it is useless to attempt any systematic location of the disease. The spores may be carried considerable distances on chestnut nursery stock, tan bark, and unbarked timber; also by birds, insects, squirrels, etc., which have come in contact with the sticky spore masses. Water quickly dissolves these spore masses and the minute spores are in this way carried along with water as, for instance, with rain water running down a tree. Borers' tunnels form the most common places of entrance for spores.

The only known practical way of controlling the disease in a forest is to locate and destroy the advance infections as soon as possible after they appear and, if the disease is well established near by, to separate the area of complete infection from the comparatively uninfected by an immune zone. Advance infections should be located by trained observers and destroyed by cutting and burning. As the disease develops almost entirely in the bark, this must be completely burned. In order to carry out these methods it is essential that the several states secure necessary legislation and appropriations as no law exists whereby the Federal government can undertake this work and co-operation among private owners without State supervision is impracticable. Chestnut nurseries should be rigidly inspected for the disease and only healthy plants passed.

The life of valuable ornamental trees may be greatly prolonged by promptly cutting out all diseased areas and removing all disease-girdled branches and covering the cuts with tar. The addition of a little creosote to the tar will improve it for antiseptic purposes as well as for ease in applying. The fungus usually develops most vigorously in the inner bark next to the wood, and in this case all the diseased bark and an inch of healthy bark around it, as well as two or three annual layers of wood beneath the diseased bark should be removed and the cut covered with tar.

It is recommended that owners of infected woodland cut down and utilize the disease chestnut timber as soon as possible and for the present the planting of chestnuts east of Ohio is not advised, but there is no apparent reason why trees west of this may not be kept free from the disease.

Propagating Clematises.

The easy and right way of propagating clematises is by layers, it is the old way and the right way, and the nurserymen who gave up their layering grounds for any other way were mistaken. There is an important nursery in this country which advertises clematises very much, and I wrote to ask what stock they had used, says a writer in Gardening Illustrated, and they told me the common wild clematis, which is almost like a forest tree in its vigor. Imagine the wisdom of putting delicate climbers of other countries, like the Hairbell clematis and the beautiful C. crispa, on a stock of this sort. I think it is naturally one of the causes why one sees so little of this beautiful family of plants. I gathered many kinds the other day in perfect beauty in the hot sunny weather, and I doubt if any other plants would have shown so well in great heat. It is clear, therefore, that it is very important we should have the right way of propagating them, and, as a first step, all buyers should refuse to have plants that are grafted on the native wild clematis.

Grafting certain beautiful kinds that have sprung from C. Viticella on that stock is not so risky, and I believe some cases. A very charming lot the plants so grafted root themselves in forms of Viticella are, but even these might be raised from layers in the same way. It is when things of a totally different nature, like the large Japanese and the delicate little American forms, come to be grafted on a totally distinct plant that they suffer. Much could be done from seed—for instance, the beautiful scarlet clematis should be raised in that way, and others of the true species. The seed is produced in abundance. The fine, new C. tangutica is a plant that should certainly only be raised in that way.

JOSEPH HEACOCK CO., Wyncote, Pa. Railway Station, Jenkintown.

Los Angeles, Calif.

The glut of chrysanthemums being about over there has been less trouble in disposing of other stocks. While trade has not been rushing there has been a good deal of funeral work of the better class which helps out considerably. Good roses are not too plentiful and have sold well at fair prices. Carnations are equal to the demand but keep well and bring fair prices. Lily of the valley has been scarce and high in price and the quality at times has been none too good. Plants are having a fair call, especially large and medium sized Nephrolepis Whitmani and small Bostons. The new Begonia Glory of Cincinnati, is proving its superiority over the ordinary Lorraine types. It holds its flowers much longer in the stores and is more showy while the fact of its being a better grower will doubtless also aid in making it popular. A few azaleas are scattered around the stores, but they are very poor as yet. The stock for Christmas is likely to be short, some of the local growers not handling any this year while others who secured plants say they are not as good as usual owing to the drought in Europe. Paper White narcissus and Chinese lilies are in and find a good demand and the large quantities of asparagus plumosus, smilax and adiantum grown around the city seems none too much. The Thanksgiving business was far ahead of anticipations, nearly all the stores having to keep open until quite late in the day and several selling out entirely in all classes of cut flowers and almost all the plants. Everyone is delighted with the business done and in prospect.

NOTES.

The continually increasing business of the H. N. Gage Co., is a striking proof of what may be done by constant plugging. Mr. Gage started his business in a very small way with practically no capital but brains and the will to succeed and he now has a fine wholesale trade in all kinds of supplies as well as flowers and his store in the Pantages theater building is one of the busiest places in town. Here Mrs. Gage reigns supreme and is not only a remarkably good business woman but her pleasant manner and willingness to go out of her way to oblige customers makes her hosts of friends. Mr. Gage is one of the largest bulb growers in this section and at his two places (Long Beach and Hollywood), grows over one million bulbs as well as other stock. His orders for Dutch bulbs alone this season called for a quarter of a million. His stock looks well and he has several fine varieties of carnations which he grows by the acre under lath and in the open at Hollywood. In the bulb season these grounds are greatly admired by passengers on the cars, good soil, plenty of water and the best of care leading to fine results. The Long Beach place consists principally of two acres of lath under which he grows asparagus plumosus, A. Sprengeri,

STOCK ALWAYS NEEDED

Small Ferns, for dishes, Pteris Mayi, Serrulata Cristata Variegata, Wimsetti, Cretica Alba Lineata, $3.00 per 100, $25.00 per 1000.

Aspidium Tsussimense and **Cyr. tomium Falcatum,** $3.50 per 100, $30.00 per 1000.

Asparagus Plumosus, 2½-in., $3.00 per 100, $25.00 per 1000.

Asparagus Sprengeri, 2½-in., $2 50 per 100, $22.00 per 1000.

Pandanus Utilis, 3-in., $10.00 per 100; 4-in , $20.00 per 100.

Cocos Weddelliana, 2½-in., $10.00 per 100.

Kentia Belmoreana and **Forsteriana**—Made-up and single plants, all sizes. Special value in Made-up Forsteriana, 4 plants in 8-in. tubs, 40 to 44 in. high, $1.00 each; 8-in. tubs, 44 to 48 in. high, $5.00 each (very bushy).

Genista Racemosa, 6-in pot plants, $25 per 100: very heavy 4-in. pot plants at $15 per 100.

Azaleas for Christmas

IN BLOOM AND BUD

at Godfrey Aschmann's greenhouses to beat the band, selected for us in Belgium purposely for our Christmas forcing. I tell you they are crackerjacks. We have Mme. Petrick, finest pink, from 75c up. This is the earliest and best of all the pinks.

Stock up with Godfrey Aschmann's Plants, well known from ocean to ocean in quality and prices. It won't pay to let others get ahead of you. Don't look at what is behind, but go right straight forward. Make a break for Godfrey Aschmann's Greenhouses, to the old reliable firm which has always looked after your interests and which protects you. **We protect the trade.**

We Have No Department Store Customers. We Sell Strictly to the Trade Only.

Please look at our special low prices for superior stock in

AZALEAS.

Another specialty of ours are now in. **Azalea Indica.** New stock. They are all in fine condition, full of buds.

Have only large size of Deutsbhe Perle, double white, $1.25, $1.50, $1.75 to $2.00; Vervæneana, double rose variegated, large sizes only, $1.00, $1.25, $1.50 to $1.75; Mme. Petrick double pink 75c, $1.00, $1.25 to $1.50; a novelty and scarce, very handsome, large flowers resembles Vervæneana, and are called in Belgium the White Vervæneana, price 75c $1.00 $1.25 to $1.50. Remember for Christmas forcing we have to select only large, healthy plants; small, weak plants will not force successfully for Christmas.

Four Houses in Ferns

10,000, Pot, Not Bench Grown.

Where will you go for good ferns? We are headquarters for you. We have four houses full; good and cheap.

Neph. Scottii, Scholzeli and Whitmani, 4-in. pots 15c to 20c; 5½ to 6-in. pots, 25c 35c, 40c and 50c; 7-in., 75c to $1.00, as large as a bushel basket.

Boston Ferns, 5½-in., 35c to 40c; 6-in., 50c; 7-in., 75c to $1.00; as large as a bushel basket.

Neph. Cordata Compacta, 4-in., 10c.

Ferns for Dishes, a good assortment, 2½-in. pots $5.00 per 100. large plants.

Pteris Wilsoni Ferns, 6 in. pans, 3 plants in a pan, 25c to 35c per pan; very bushy.

Fern Balls, imported direct from Japan, already started, 50c.

Adiantum Hybridum, the new Maidenhair Fern, 3-in., 8c; medium size 4 in., 10c; large 4-in., 15c.

In Rubbers (Ficus Elastica) we are well prepared; finest stock in the country: 5½, 6 to 7 in. pots, 25c, 35c, 40c, 50c, 75c to $1.00; all staked up

Cyclamen Grandiflora, 4-in., 25c; 5¼-in., 35c.

POINSETTIAS.

Just look! We have a full house of that Christmas novelty, the **Poinsettia,** in bloom, medium size, 3-in., 15c; 4-in., 25c; 5, 5½ to 6 in., for basket work or for cutting, 35c, 40c to 50c; 8 to 10-in pans, 3 Poinsettias in center, and either Asparagus Plumosus Nanus or Assorted Dish Ferns as a border, 75c, $1.00 to $1.25 per pan.

THE TOWN TALK.

"Did you see those large 12-inch pans made up of 3 large Poinsettias, 20 to 25 in. high, trimmed with Scottii, Whitmani and other Ferns, Areca Palms, Cocos Asparagus, etc., in McGinty's show window? Aren't they dainties? They came from Godfrey Aschmann's Greenhouses. We paid only $2.50 for them and can sell them for a ten dollar bill." "O, I bought one not quite as big as yours (11-in. pan), for which I paid Aschmann only two dollars" explained Mr. Muller. "I let it go for eight dollars, I thought that was a fair profit."

Begonia Gloire de Lorraine.

This is another great specialty of ours. We have grown them very extensively for the past ten years. Our special treatment makes the flowers very bright. We have the bright red and the pink Lonsdale. Have a houseful. Now ready, in bloom for Christmas 6 in. pots, 50c, 60c 75c to $1.00; 3-in. pots, 12c 5 to 5½-in. pots, 35c.

Begonia Gloire de Lorraine Betty Anderson, this is a new handsome variety; bushy; have only large 7-in. size to offer, $1.50.

Begonias New Improved Erfordi, Aschmann's Beauty, the finest Christmas and winter blooming Begonia in existence. Their beautiful pink and bright red large flowers are a puzzle to anyone who sees them in bloom; in flower now and all the winter through; large 4-in. pots, 20c; large 5¼-in. pots, 25c to 35c. Bear in mind this is an immense bloomer which has no equal.

We have the **Bright Red** and the **Pink Lonsdale,** and don't forget we have also the newest, the

Begonia Gloire de Cincinnati, 4-in. pots, 35c to 40c; 5½-in. pots, 50c to 75c; 6-in., $1.00 to $1.50.

Jerusalem Cherries.

What is Christmas without red berries like those on the Holly? Also the **Jerusalem Cherries** are welcome plants and much admired by everyone interested in Christmas decorations. We never had in all our experience a better stock of Jerusalem Cherries than we have this year. Every plant is loaded with red ripe berries; only large plants. We can offer 6 to 6½ in. pots, 35c, 40c, 50c, 75c to $1.00.

Just Arrived with the Azaleas.

A fine consignment of **Latania Borbonica,** in first-class condition, perfect foliage, large stock, 8 good leaves, height given in consular invoice at 35 to 40 in., fit for 7 to 8 in pots, 75c to $1.00.

Combination Latania Borbonica (3 plants) in a 6-in. pot, which gives them a fine appearance, bushy, about 13 to 14 leaves to a pot, 6-in. pots, 50c, 60c to 75c

Cocos Weddelliana Palms, made up of 3 plants, 4 to 5-in. pots, 30c and 40c; 3-in., 15c, 18c and 20c; 4-in., 25c.

25 at 100 rates. **Cash with order, please.**

All plants must travel at purchaser's risk.

ARAUCARIA EXCELSA

Our Specialty.

Warning—Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias. For decorative purposes, in connection with palms, they will make a fine display. Christmas prices of the so well known evergreen novelty, the Araucarias, cut in half:

GEO, A. KUHL. PEKIN, ILL.

Mention the American Florist when writing

LEEDLE SPRINGFIELD ROSES
2½-in. 4-in.

Shipping — Booking — Growing.

smilax and other greens and seed. He also grows quite a lot of bulbs here and some carnations, as well as contracting for several growers' cuts of violets. Agapanthus umbellatus, a plant not often grown for cut bloom, is grown in large quantities here and has proved a good seller.

Business has been good at the Third street store of Morris Goldenson and we were pleased to see Walter Garbett back at his post again. Walter has again had to go to the operating table, for the last time we hope, but has kept up cheerfully through it all and looks much better than one could expect under the circumstances. He was very busy when seen at a seven-foot broken column of white chrysanthemums and violets, the base of oak leaves, violets and American Beauty roses. This and a good deal of other work was for the Niell funeral.

Fred Rafferty, the well-known grower of Santa Ana, has returned from his European trip looking well, and pleased with his experiences. All the same he says that Southern California looks mighty good to him again. Mr. Rafferty is getting more and more out of the wholesale and more into the retail end of the business as it is less worry and more profitable.

The Los Angeles Flower Market has handled immense numbers of chrysanthemums this season, mostly at good prices, though during the worst of the glut the buyers naturally had the best of it. This firm now handles the entire cut of one of the newer rose growers and the stock is good. Smilax strings have been in big demand, also maidenhair and the market is a busy place at all times.

Ed Rust, of Pasadena, has the planting of the new grounds of J. Jerew at Hollywood. Large quantities of the big palms that he grows so well and other nursery stock will be planted just as soon as water can be piped to the place, most of the rough grading being already completed.

Dietrich & Turner are cutting a magnificent crop of roses from their houses at Montebello and we never saw the place looking better. Henry Turner has worked here almost day and night since the inception of the place and he is now getting his reward in the shape of fine stock in all varieties. His smile as he looks over the fine cut in the morning and totals up the bills is expansive and, judging by the condition of the plants, likely to be permanent. In the big 900-foot lath house are some of the most promising looking ferns and palms and Jake Dietrich promises to make some of the San Francisco growers look to their laurels pretty soon.

Howard & Smith report business as excellent and the condition of their two places, at Ninth and Olive streets in the city and out at Montebello leave nothing to be desired. Ed Howard is in the city recuperating after a long trip in Mexico collecting plants for the famous Doheney gardens. He says he is "loafing" but when we have seen him he has usually been going at a pretty lively clip and there is little that is good in the city and surrounding that escapes him. H. R. R.

Order To Day

VAUGHAN'S SEED STORE,
CHICAGO.

HOLIDAY BOOKS.

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. $6.00.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

CHRYSANTHEMUM MANUAL (Smith). —By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).— It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

HEDGES, WINDBREAKS, ETC. (Powell). —A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

Landscape Gardening

PROF. CRAIG.

A course for Gardeners, Florists and Home-makers, taught by Prof. Craig and Prof. Beal of Cornell University.

Progressive Florists recognize the growing importance of a knowledge of Landscape Art.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

250-page Catalog free. Write today.

The Home Correspondence School
Dept. A. F., Springfield, Mass.

Nashville, Tenn.

The famous football game that occupies all the attention and interest of Thanksgiving week was not a disappointment to the floral world in this city. On the other hand the orders that they looked for came with a mighty rush and lasted until everybody was so nearly sold and worn out that they were glad to go home to the Thanksgiving turkey. Dudley Field, where the game was played, was a perfect riot of color of the two contending teams, Vanderbilt and Sewanee. The yellow and black of Vanderbilt was rather in the ascendency, and dominated the white and purple of Sewanee. The chrysanthemums were gorgeous, all the very best stock having been held in reserve for the great occasion. There were none too poor nor too disloyal to attend the great game, without carrying the colors of the team they favored, and the result was a most satisfactory sale for the trade. Violets, while good in quality and strong in quantity, were soon exhausted and the white chrysanthemum with royal purple ribbon was used extensively to represent Sewanee's colors. The stores of the uptown florists were worth visiting the day before and the day of the game and the dealers were busy shipping out flowers all over the state and nearby towns. There was a fine call for roses and carnations for table and house decoration. Altogether the Thanksgiving trade was eminently satisfactory.

NOTES.

The most artistic decoration was that of the Joy Floral Co. They have two large show windows; in one was a huge football made of yellow chrysanthemums with a belt of black ribbon around it bearing the word "Vanderbilt," suspended by yellow and black ribbons, while threading all around and forming a background were knots and cascades of baby ribbon in the two colors. In the other was a football made of white chrysanthemums, the belt of broad purple ribbon and the same lace-like network of baby ribbon in which the purple was very pronounced, the name "Sewanee" appearing on the belt around the football. Palms and ferns were used as a background.

Geny Bros. had superb specimen flowers and enjoyed a fine shipping as well as local trade. Counters and shelves as well as refrigerators were loaded with flowers ready for shipment.

Haury & Sons had beautifully decorated windows and hundreds of handsome blossoms and did a fine business.

M. C. D.

BRADFORD, PA.—George L. Graham became suddenly insane on the night of November 29 and was removed to safety. He was recently an inmate of a sanitarium and was supposed to have recovered.

Orchids

We are now taking orders for early delivery of fresh stock in the spring. Placed early insures best results.

Send for Catalogue.

G. L. FREEMAN, Wellfleet, Mass.

Hollyhocks for the West

Now ready. Splendid field-grown plants from the famous **Chater's strain** of double Hollyhocks, in separate colors as follows: White, canary, yellow, apple blossom, peach blossom, scarlet, rose, deep red and brown-black. These are from seeds sown early in the spring and given space in the open. They are simply perfect, strong plants, which will flower heavily next year, yet I can send fine sizes for mailing if desired. I will doliver to customer by express at **$5.00 per 100,** assorted or choice. Sample plants on application. Other hardy plants.

CARL PURDY, UKIAH, CALIF.

New Marguerite Mrs. F. Sander.

Now is the time to procure stock of this most desirable of all the Marguerites to grow on for pot plants for Easter sales.

Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures 5 inches across; the center of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. It is but rarely that a flower comes single, and when such is the case, they are as beautiful as the double forms; they are produced on long stems with a freedom not known in other varieties of the Marguerite.

2¼-inch pot plants, ready for immediate delivery, $1.25 per dozen; $8.00 per 100; $75.00 per 1000.

The above price is intended for the trade only.

NEW MARGUERITE, MRS. F. SANDER.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

San Francisco.

TRADE GOOD WITH FAVORABLE PROSPECTS.

Chrysanthemums hold first place on the market. For a while first class Major Bonnaffons sold at 75 cents per dozen, but in consequence of a few light showers and ensuing frosts prices have stiffened considerably in the last week. Carnations have been plentiful but of mediocre quality. Roses about the same, American Beauties being such in name only; with the necessity of firing steadily for the future a better class of this stock may be expected. Red berries are plentiful and green goods in plenty for all demand. Business for the trade in general is good and the prospects for the future very favorable.

HORTICULTURAL SOCIETY MEETING.

At the last meeting of the Pacific Coast Horticultural Society the principal business related to the late fall exhibition at the Fairmont hotel. President Angelo J. Rossi reported a number of new patrons of the society who have offered cups for the spring show. At the December meeting the matter of holding a spring show will be discussed. During the last year the society has held a series of monthly competitive exhibitions at the meetings. Silver cups are to be awarded to the three exhibitors receiving the highest number of points for the series. At the coming meeting these cups will be presented to the winners, William Kettlewell, H. Plath and the MacRorie & McLaren Co.

The Gill Nursery Co., of Oakland, showed some excellent blooms from their new sport, the white climbing Maman Cochet. The flowers shown did not differ from the bush form of this charming variety and should be a popular addition to the list of climbing roses.

NOTES.

Manager Roach, of the old Lynch place near Redwood, has been doing a heavy shipping trade in outdoor chrysanthemums to the neighboring states. He has several houses of Enchantress, carnations and one each of White Enchantress and White Perfection, and in addition to Killarney a fine lot of White Killarney, all in fine shape.

Even if he did win nearly all the firsts at the fall show, that "live wire," Albert O. Stein, still wears the same smile, same size hat and can button his coat across his manly bosom. Among others he won the elegant cup offered by Mrs. Phoebe Hearst for the best table decoration.

Eric James is growing a choice lot of potted plants for the holidays. Gloire de Lorraine begonias, Boston ferns and cyclamen are specialties with him but when you see an exceptionally good poinsettia you may safely mark it to James.

H. Goertzhain, of Redwood, reports that the Japanese growers of chrysanthemums have cut in so heavily with their outdoor midseason varieties that he will in the future handle only the early and late ones.

The MacRorie & McLaren Co. have closed several large contracts for landscape work. Their shipments of cattleya blooms to all parts of the state are in steady demand.

N. Peterson, our enterprising young florist in the park district, is sending in some of the best carnations in the town from his new establishment in San Mateo. T. F. T.

KEENE, N. H.—A. O. Amidon's greenhouses caught fire December 2, which resulted in considerable damage to woodwork and glass.

MADISON, N. J.—The Morris County Gardeners' and Florists' Society held its annual dinner and election of officers December 13. The following were placed in nomination: Robert Tyron, president; John Dunn, vice-president; Edward Reagan, secretary; Robert M. Schulz, assistant secretary; William Duckham, treasurer.

Chicago New York.

Alliums and Campanelles.

ED. AMERICAN FLORIST:

Will you kindly inform me when Allium Neapolitanum should be planted to have them in flower at Easter; also when Campanelles should be brought into a greenhouse with a temperature of 50° for Easter?

New Jersey. SUBSCRIBER.

Allium Neapolitanum should be planted at once, allowed to come along slowly in the temperature of a violet house. Towards the middle of February the plants can be placed in a house at 50° and should be about right for Easter, but as with so many other things which we try to get into flower for a certain date, so much depends on weather conditions and the grower must make allowance for these. Campanelle (Narcissus odorus) requires the same treatment as the Von Sion and other narcissi intended for Easter. If thoroughly rooted hardly three weeks in a 50° house will be necessary to get them into flower. Personally, I should prefer a 45° house and allow a few days more; better flowers will be the result.

Next Week We are Going to Mail Our 1912 Calendar Are You on the List?

IT is a particularly fine calendar. Not the kind that is covered all over with Hitchings' name and advertisements. No, not that kind—but an attractive artistic one, beautifully printed in colors. The kind of calendar you would want to take right in your home and hang up in the "front room." Just that kind of a calendar.

As we told you last week it's not going to be sent out broadcast, so if you want one, fill out the coupon below and send to us at once.

HERE is how the first leaf of the calendar starts off: "Well here I am, the good husky hustling 1912 youngster that you have been looking for. Came on a motor cycle. I commenced to work the very minute I landed by starting the sand running in a brand new hour glass. Gave the old one to venerable Father Time. He didn't seem very gleeful about it. But what can you expect of a grouchy old man who works every minute of every day and every night without even stopping to sharpen his scythe? But old as he is, he always keeps just a little ahead of all of us. Give him the credit for that! They tell me, however, that he was caught napping just once and that was the time when"—but send for the calendar, then you'll get the whole story.

Montreal.

STOCK MUCH SCARCER.

Preparations for the Christmas trade are in full swing and everything looks very promising. There will be a shortage in some lines, especially in carnations and violets, but there will be a large number of pot plants. Poinsettias are good but a little too tall, azaleas, cyclamen and primulas are very fine. The greens are arriving and appear to be well berried, especially the holly. The wholesale prices have advanced and cut flowers are very scarce. Chrysanthemums are finished, the few that are to be seen are of poor quality. The death of a noted clergyman caused a large demand for funeral work and the florists found it very difficult to meet the extra call.

NOTES.

The annual meeting of the Montreal Gardeners' and Florists' Club was well attended. The most important subject was the question of holding a chrysanthemum show next November. It was decided to do so, and a committee was appointed to make the necessary arrangements, secure a hall and issue a prize list early enough to give the exhibitors time to prepare the plants. The annual dinner will be held, as usual, the last week in January. It was proposed to have the ladies invited but this was not accepted, and it was then suggested to have a social for the ladies. The reports of the officers were read showing the club to be in good condition. The election of officers resulted as follows:

W. C. Hall, president.
E. J. Hayward, first vice-president.
W. S. Watts, second vice-president.
W. H. Horobin, secretary and treasurer.
H. J. Schoning, assistant.
J. Walsh, C. Byford, J. Pidduck, G. A. Robinson, W. G. Pascoe, W. G. Miles, executive committee.

The Horticultural Printing Company,
BURNLEY, ENGLAND

Have Two L. & B. Houses and Have Graded for Another.

WE are not denying that we had troubles of our own to get the firm of Myers & Samtman (so well known in the Philadelphia section) to build one of our Sectional Iron Frame Houses. We have a notion that their ancestors were from Missouri, for they certainly had to be **"shown."**

Not that we haven't the superior construction to show, but that Myers & Samtman wanted a thorough understanding of its superior points, and they got them.

The last house is equipped with our new chain operated ventilating gear. Four runs of sash can be operated from the one point—two runs at the one time. Doesn't that sound good to you? Send for facts, figures and photos.

We recently wrote them, asking their frank opinion of their house, for use in this particular ad. This is their reply:

"You might say Myers & Samtman built one of your Iron Frame Houses in 1910 and another in 1911, and, being so well pleased, have graded for another. Also that they feel the iron-constructed houses are permanent structures—not temporary ones like the wooden structures we used to build."

Lord & Burnham Co. Factories: Irvington, N. Y., and Des Plaines, Ill. New York St. James Building. Boston Tremont Building. Philadelphia Franklin Bank Bldg. Chicago Rookery Bldg.

A Convincing Proposition.

When florists are constantly repeating orders for our machines. It demonstrates that they deliver the right service.

Our machines possess features distinctly different from the general class of ventilating machines.

Write for our catalog. It describes the features thoroughly.

Quaker City Machine Works, Richmond, Ind

This is the U-Bar the bar that makes U-BarGreenhouses the Famous Green houses They Are.

This little glimpse gives you only a suggestion of the beautiful setting of this unusual range. The photo was taken directly from the residence terrace, looking down the sunken grass plot towards the rose gardens. On the terrace is a choice U-Bar palm house of classic design which is connected to the residence conservatory by a loggia that is glass enclosed in the winter. The palm house leads directly into the greenhouses themselves. A very unusal grouping you see—one that, because of its close association with the residence, demanded a construction combining both simplicity and ornamentalness. The U-Bar is strictly that kind That's why it won out. **And that's the sequel.** The catalog shows numerous views of the entire layout. Send for it.

Albany, N. Y.

Nominations for 1912 made the principal order of business at the December meeting of the Albany Florists' Club held December 7. The ticket made out for the election on January 4 is as follows: For president, Fred A. Danker, renominated, and William C. Gloeckner; for vice-president, R. W. Billson, John A. Murnane, Jr., and Louis H. Schaefer; for treasurer, Patrick Hyde, renominated; for secretary, Robert Davidson, renominated; for trustees, three to be elected, R. D. Griffin, Fred Henkes, Frederick Goldring and Frank A. Briare. Ballots properly made out will be sent to each member prior to the January meeting. William Lucas, gardener for Mrs. Spencer Trask, Yaddo, Saratoga Springs, and William Christie, gardener for William Sage, Menands, were elected to membership. Among the visitors present was Stephen Green of H. Bayersdorfer & Co., Philadelphia. He was called upon to speak and entertained the members with anecdotes of famous men in the trade whom he has met in his travels. Refreshments will be served at the January meeting following the election and installation of officers. R. D.

Stamford Horticulturists.

The annual meeting of the Westchester and Fairfield Horticultural Society was held in Stamford, Conn., Friday evening, December 8, President Stuart in the chair with 80 members present. Seven new members were elected and two propositions received. The following officers were elected for the ensuing year:

James Stuart, president.
Robt. Williamson, vice-president.
Thos. Aitchison, treasurer.
Oscar Addor, corresponding secretary.
J. B. McArdle, financial secretary.
Chas. Adcock, J. T. Burns, Wm. Smith, Jas. Aitchison, P. W. Popp, executive committee.

It was decided to hold the meetings for the year 1912 in Greenwich, Conn. John K. M. L. Farquhar of Boston, Mass., will deliver a lecture on "Gardens in Japan" at the meeting January 12. It was voted to hold the fall chrysanthemum show at New Rochelle, N. Y., and the summer rose show at Greenwich, Conn.

At the close of business a social session of one hour's entertainment was held, cigars and refreshments being provided by the Stamford members as an appropriate closing of the many pleasant meetings the society has held there the past year.

The judges reported the following awards: Certificate of merit to James Stuart for vase of calanthes; cultural certificates to Thos. W. Stobo for carnations and Robert Williamson for collection of vegetables; honorable mention to James Foster for Cypripedium insigne and Thos. Ryan for carnations; vote of thanks to A. Petersen for sweet peas; Mrs. Alex. Wallace and John Gaut for rose Kaiserin Augusta Victoria.

Take our Advice on Boilers

WHAT THE USERS SAY ABOUT KROESCHELL BOILERS

Saved Two Carloads of Coal; Does Not Need to Fire Boiler From 11 p. m. to 6 a. m.

Your No. 9 Boiler is heating my entire range of two houses, 18x132, one house 6x108, two houses 16x88, one house 20x86, and one house 24x50, and will easily take care of 5,000 sq. ft. more. With the thermometer 18 degrees outdoors, **fire at 11 p.m. and not again until 6 a.m.** The boiler surely is giving me perfect satisfaction. I have used one steam and five hot water boilers I like your boiler and cannot keep still when I meet a brother florist, but must tell him about your boiler and how much it has saved me in coal bills. With my last boilers I required four to five carloads of coal to heat the same space which is now heated by your boiler with about three carloads of coal. You for another boiler when I have to buy again.

Adam Schillo Lumber Co.

Hawthorne and Weed Streets, Telephones Lincoln 410 and 411 CHICAGO.

Tacoma, Wash.

Business on a whole seems to be about the same as in previous years, but the opinions of the several dealers vary considerably. All, however, report a good Thanksgiving trade. Chrysanthemums sold well, the total sales being about a 20 per cent increase, and other flowers were about the same as last year. A small increase in the sale of plants was noted, and there was a decreased call for Paper White narcissus and Roman hyacinths. California violets are arriving in first class condition, and the city is getting metropolitan enough to have a few street fakirs sell them at the prominent corners. The extraordinary high rentals which merchants have to pay hurts not only the florist business but all lines of trade, they being far in excess of what stores of the same size and location let for in cities in the east of like size.

NOTES.

Watson the Florist is bringing in some fine stock from his place at Watapa Lake. He certainly deserves great credit for producing the quality of blooms he is, taking into consideration the condition of the plant when he took it a year ago.

H. W. Manike lost some stock in the recent freeze, but he was heard consoling himself with the fact that the outdoor flowers were killed and the public would be obliged to buy of the florist.

H. H. Hinze's chrysanthemums were of fine quality and he reports the sales as satisfactory and at good prices.

S. L. H.

MINNEAPOLIS, MINN.—Plans have been drawn for the erection of greenhouses and store building to cost about $20,000, at Thirty-sixth street and Grand avenue for J. Duncan. The greenhouses will cover one acre and are to be of steel frame construction with concrete base. The benches are to be of reinforced concrete and tile, and two steam boilers will be installed.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Packing and Wrapping.

So many of the flowers and plants sold at Christmas are presents made by one person to another that it is necessary that great care should be taken in having them packed and done up safely and in a proper manner. Nice boxes, well lined with paraffine paper, are the first necessity in all up-to-date stores. The arranging of the cut flowers in the box should be done in an artistic manner, for the first impression on opening the box is very lasting, and a well arranged box, even of poorer stock, is preferable to one containing the highest grade carelessly put up. Under no circumstances forget the card. This has caused more trouble and lost more good customers than any one small detail, for it is a piece of carelessness that cannot be explained and is not easily forgiven. A sprig of mistletoe or a spray of holly placed on the top of the flowers is always appreciated, and a pansy or one or two violets or other small flowers tied on the card with a gold cord or baby ribbon is very attractive and made a great feature by many progressive dealers. The box should be wrapped in enough thicknesses of paper to insure its delivery safe from frost. There is nothing more unsatisfactory than to receive a box of cut flowers in a frozen condition or to hear that the present arrived in that shape. This is easily guarded against and a thing that should never occur. Above all things, do not ship any flowers that are not fresh. As a rule, the customers have paid good prices and are entitled to first-class stock, and it is nothing short of robbery to take their money and send them worthless goods.

The plants should be wrapped neatly and with paper enough to be sure that they will not be touched by frost. A little practice, with care, will soon teach one how to do this and make a neat package. Too often plants are so carelessly wrapped that they make a disgraceful package when left at the door. Six to eight thicknesses of newspaper, with a clean, plain paper outside, are none too much during the cool weather and more if the temperature is at all low. The dealer must remember that most of the plants brought into flower for the holidays are grown in a very warm temperature and chill easily. Plants with flowers that are easily bruised should be first wrapped with a sheet of cotton batting before being wrapped with paper. The delivery boys should be cautioned not to place the plants on the frozen ground or snow. Many fine plants are ruined by this thoughtless act of the men or boys delivery them. These small details are necessary and should be carefully watched during the holiday trade.

Selling the Stock.

The plants and flowers for the holiday sales have been raised or procured and upon their being properly sold and delivered depends the success of all the labor which has been expended. Every dealer during the three days before Christmas will do as much business as is ordinarily done in a month. It is therefore necessary that this should be done in a systematic manner in order that the business may be successful. Poor business methods at this time will often result in the loss of some steady customers or prospective business on account of the dissatisfaction that will result unless the smallest details are looked after. The question of help is one of the first matters. It may be possible in some places to procure extra efficient help, but in the majority of cases the entire selling will fall upon the regular force. Where extra help is employed, every plant and other article possible should have a tag with the price plainly marked, so that the salesman can immediately tell the customers the price, or much time will be lost by running back and forth and interrupting the proprietor with questions regarding the value. The booking and filing of orders must be strictly and accurately attended to. The handling of stock should receive the most careful attention, and the manner of placing it before the customers is often

the making or losing of a sale. Many salesmen will complete the sale of a plant by properly showing it to the customers. There is always a better side to a plant and the salesman who knows how will always keep this side toward the customer's view, and a plant always looks larger when placed alone, so that taking it from the bench or collection and setting by itself will show it off much more advantageously. When a plant is sold it should be immediately marked and set aside, for it is poor business to allow the customer to think that they will not get the plant they have bought or that the same plant may be sold to another. The proprietor must keep a watchful eye all the time upon the salesmen and other employes and see that every customer is properly served. Many customers prefer to buy of the one with whom they have always dealt, and in this case extra help will sometimes become insistent to wait upon them. This should be guarded against, for if the customer is willing to wait for the one they prefer to have serve them it is good business policy to see that their wishes are gratified.

Business Systems.

During the holiday rush it is necessary that some system should be adopted that will be sure to fulfill the wants of the customer. While the business in small places may be carried on during much of the year depending a great deal on the memory of those in charge, at this time this should not be attempted, but everything written down and so placed that any one of the force can immediately find it. One of the best methods that has come to our attention is adopted by many stores, the details being changed more or less to suit the proprietor's fancy. A supply of large envelopes is secured, and when an order is received and properly written on the order blank, it is passed to one who has charge of this work, and the order copied in the order book. It is best to have a book for each day. The order is then placed in one of the envelopes, with the tag with the address written thereon, and if there is a card or a ribbon to be used with the order this is also placed in the envelope. These envelopes are then placed in a pigeon-hole or hung on a hook that is labeled for the day of delivery. Any order that is to be delivered at a special hour should have a distinguishing mark that will surely attract the attention of the one that is to put the order up or the one who has charge of the delivery. This system can be so modified as to be applied to a small or large business and will result in rectifying many mistakes that are often made during this busy season. These envelopes can be handed to those who put up the flowers or wrap the plants. The matter of delivery should also be systematized, and one should be placed in charge of this important part. Unless this is done the delivery will be very expensive. The placing together of all packages going in the same direction when wrapped will save many journeys and facilitate the work.

PUTNAM, CONN.—The East Side Greenhouses have opened a down town store during the holidays.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Holiday Suggestions.

A WORD ABOUT BASKETS.

Suggest to the basketmaker that the merits of those displayed in Oriental shops be looked into, for they are replete with ideas that are different. For instance, have made a stein of bamboo in a burnt brown tint in all the different sizes. They can not only be prettily arranged at top with flowers, but tiny garlands can be placed around the center of the body. Take as an example, lily of the valley for the top and a tiny garland of the same around the body in the center—not a heavy one, but as dainty as possible. Orchids with the burnt wood of the bamboo tint are beautiful for cattleyas especially. A gauze ribbon oddly arranged with it is still more pleasing.

The Japanese vase of bamboo, made like a flat, round candle-holder of the old-fashion kind, with tall, square handles, makes an effective design filled with Shasta daisies, with a bunch of same in the center or top of the handle, finished with rosettes of gauze ribbon on either side of the body of the basket. The bamboo in the shape of a work basket, with raised lid, makes a pretty present when filled with violets and with violet gauze ribbon around the body of the basket. The tall bamboo vase, with handles on either side, can be filled with Killarney or any other small roses, using maidenhair as a finish. The meat bowl effect, with low pending extended handles, makes up artistically. Growing ferns can here be arranged with a possibility of a touch of color in a growing plant, using the lace ribbon as a finish.

A basket effect made of rope is novel. An old tin pail can be covered with a heavy rope, glued to the pail so as to cover it, and also wind the handles with it. Varnish this rope or tint it with a pretty green. Fill this with growing plants of small sizes, and finish on either side with a rope fringe made by splitting the rope and combing it to make it fluffy. This rope can also be covered with a gold or silver wash and filled with chrysanthemums or pink roses, combined with maidenhair. Automobile flower-holders can also be made with the rope effect, using a thinner quality. Artistic shapes can be made of cardboard first and then covered with rope and shellac. Any tinsmith will make a water-tight receptacle to fit inside. Filled with violets and finished with gauze violet and white ribbon, this makes a novel present. A loop of the rope is useful in attaching it to the auto. These holders in tints of gold, bronze, silver or mission tints would be effective.

A. E. KLUNDER.

SYRACUSE, N. Y.—The W. E. Day Co. has put into commission a new Franklin auto delivery car which was specially designed for florists' work. It contains a heating arrangement to prevent the chilling of plants and flowers.

CATTLEYA TRIANÆ.

ORCHID NOTES.

Christmas Orchids.

A supply of orchid flowers at Christmas can be obtained without much difficulty when a good stock of plants is grown. Some species flower naturally at that time while others, owing to their long lasting qualities, may be held for that holiday while again some can be hurried a little and get into flower rather earlier than their natural season. In most places cattleyas of the labiata group are those most sought for cutting and there are no better sellers in the whole orchid family than these. In the colder northern states and in the middle west it is usually possible to hold over some of the autumn flowering C labiata until Christmas, but in the south this will probably be over and C. Percivaliana and C. Trianæ will be the standbys in this genus. These will also be represented in the more northern collections though the bulk of C. Trianæ will not be usually in until the turn of the year.

Looking ahead one can not help thinking that the fine hybrids between the labiata cattleyas and C. Bowringeana will be extremely popular as Christmas orchids. The beautiful color of the latter species is represented in its progeny also the faculty of producing a large number of flowers upon the spikes while the individual flowers in many cases are almost as large as a good labiata. It is no use our giving names of these hybrids. They have been raised in different places within this country and Europe and specialists have given them names, each according to their own fancy. Year by year the confusion becomes greater but it matters little to the cut flower grower. He only sees in these hybrids beautiful material for his use and whether they are called Venus, Adonis or Shakespeare makes little difference to him—he wants the flowers that are to bring the dollars, not the fancy names. This will some day be a mighty fine section for orchids.

Among the dendrobiums that can be had for Christmas the Australasian section comes first. D. Phalænopsis Schroderianum may often be kept for this date and when it is there is no finer species in the genus. Quite recently European importations have included D. superbiens, an old and half-forgotten species that is full and very showy. In a retailer's store recently we saw a few vases of flowers of this charming old orchid and we had to consider a few minutes to recall it. This would make a fine Christmas seller, its color being so bright and attractive. D. formosum and D. Dearei are two excellent white flowered species that can be had for the holiday though the latter would probably have to be held some time under the opposite conditions, or with a little forcing, D. nobile and its varieties and some of the many hybrids that have sprung from them and other species may easily be had for Christmas. They are fine, full flowering, showy orchids that may be cut with a considerable portion of the stem without injury. Some growers, indeed, claim that the pruning the plants receive is of benefit to them but this is hardly the place to discuss that point. D. aureum is the other parent of many fine hybrids of D. nobile but though early flowering is not showy enough to be recommended as a cut flower.

CATTLEYA LABIATA AT POEHLMANN BROS. CO., MORTON GROVE, ILL.

Red is the color for Christmas and when it can be induced to flower that early, Epidendrum vitellinum is one of the showiest and best of orchids, lasting well in a cut state. The few species of sophronitis are of the richest glowing color and the flowers are immense, out of all comparison with the size of the growth, but the stems are too short to be used without mounting in some way. The two varieties of S. grandiflora, the crimson and the scarlet, are the best. Other red flowering orchids are found in the Harryana and coccinea section of masdevallias. They are good winter bloomers but unfortunately the great part of our American summers is against them and they are difficult to keep in health. Odontoglossum grande, O. Insleayi and one or two others are occasionally seen among Christmas orchids, but they can hardly be described as popular. Oncidium varicosum is too well known to need description and may easily be included in the Christmas list. Most of the Brazilian species like O. Forbesi, O. crispum, O. Gardneri and the beautiful cool house O. tigrinum and O. Marshallianum can also be had for Christmas by a little manipulation. The trouble with oncidiums is the almost invariable yellow tint of the flowers, but their long lasting qualities are well known and they have attained quite a little popularity.

The moth orchids, or phalænopsis are among our finest winter flowering species and popular everywhere. To have them in time for Christmas considerable heat is required but they are worth this and the little trouble necessary to grow them well. There are several other species, but P. amabilis, P. grandiflora, P. Sanderiana and P. Schilleriana are the best of all. If we were tied to only two kinds the first and last would be our choice. For Christmas flowering no list can be considered complete that does not include some at least of the cypripediums. If we were asked for two of the most useful in this genus we would think a long time before getting away from the good old C. insigna and C. villosum. These in their better varieties and the hybrids that have been raised from them are grand winter flowering orchids. The Mexican lælias again, especially L. anceps and L. autumnalis, are among the showiest and best of orchids at Christmas. It is true they do not last quite as long as the cattleyas when cut but they are very popu-

lar with ladies for decorations and will become more so.

This by no means exhausts the list of orchids that can be had in flower at Christmas. We have only touched lightly on a few of the better known kinds. It is a great pity that they are not more popular as cut flowers. Retailers say that they can only sell them at odd times and that the demand is all for cattleyas. But how often, when given carte blanche for a wedding or table decoration do they go out of the rut themselves? If they would only try the effect of a little originality and introduce some of these charming flowers instead of the ever present cattleyas we have little doubt that their efforts would be appreciated and that in time their customers would call for them. The orchid as a cut flower has been very encouraging of late years and hundreds are sold today where dozens were not ten years ago. But this will not continue if cattleyas only are grown. The public demands novelties and something fresh all the time. If these are not forthcoming in orchids they will be in something else but there is such a wonderful variety in this great family and the flowers have so many claims upon both grower and consumer that it is worth straining a point to try and increase the love for them by keeping pace with the demand for something new and striking by the best people all the time.

H. R. R.

Oklahoma Mistletoe.

Three carloads of mistletoe were shipped from Oklahoma City to the different sections of the country just before Christmas, two by the Bartheldes Seed Co. and one by the Enterprise Seed Co. The mistletoe, which is the state flower, grows on the elm, apple, ash and other trees in Oklahoma and is gathered by the farmers and boys and brought to market, where it is crated and forwarded to the northern cities, shipments being made to Butte, Minneapolis, Chicago, Detroit, Cleveland, Cincinnati, Boston and New York. The first shipment was made eight years ago by the Bartheldes Seed Co. and the demand has increased until it now competes with the mistletoe of England in Canada, orders this year being shipped to Montreal and other Dominion cities. The mistletoe this year is in excellent condition. The plants are large and heavy with leaves and the berries are very abundant, full, white and waxy. —Oklahoma City Times.

INDIANAPOLIS, IND.—A. W. Brandt has purchased a Ford delivery car.

GERMANTOWN, PA.—At the annual meeting of the Germantown Horticultural Society, held December 8, the old board of officers was re-elected. A display of flowers was made and Charles Redles read a paper on "House Gardening in the Winter."

HARTFORD, CONN.—The annual meeting of the Connecticut Horticultural Society was held December 8 and the following officers elected: J. F. Huss, president; J. A. Webber, Alexander Cumming, Jr., and Carl Peterson, vice-presidents; George W. Smith, Melrose, secretary; W. W. Hunt, treasurer; John Gerard, George B. Baker, G. H. Hollister, Howard A. Pinney and Alexander Cumming, Jr., executive committee.

CHRYSANTHEMUMS

Insects on Chrysanthemums.

ED. AMERICAN FLORIST—

We forward leaves of chysanthemums which are infested with insects. Can you inform us what the insects are and an effective remedy for their extermination? O. G. K.

Missouri.

The specimens submitted were badly infested with thrips and red spider. The most effective remedy is a thorough syringing of the under side of the foliage, followed up by fumigating with one of the nicotine preparations.

C. W. JOHNSON.

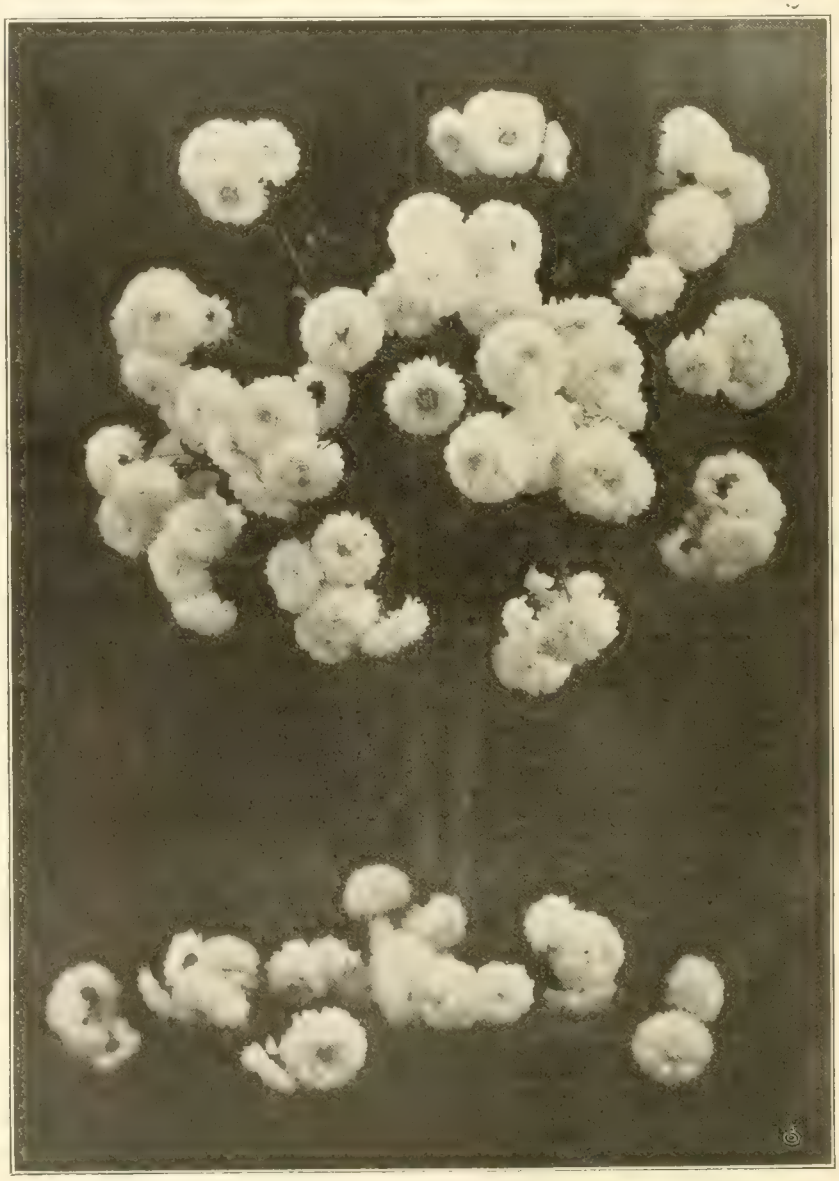
New Pompon Helen Newberry.

Recently we had the pleasure of seeing the new pompon chrysanthemum Helen Newberry. This variety originated with Fred Pautke of Grosse Pointe Farms, Detroit, Mich., whom we understand has disposed of half interest to Fred Breitmeyer, Mt. Clemens. It belongs to the large flowering section of pompons, being about two inches in diameter, a high rounded flower of the purest white, good upright stems and apparently a good keeper. Besides other good qualities it is very late. The main crop will be in prime condition just after Thanksgiving and Mr. Breitmeyer informs us the July planted stock will prolong the season to Christmas.

ELMER D. SMITH.

Chrysanthemum Elise Papworth.

There having been so many complaints by florists of their having trouble in growing Elise Papworth chrysanthemums, we wish to say we also had trouble until we learned that it succeeds much better to be planted early, so that the plants are strong when hot weather sets in, and if sprayed with Fungine three or four times a season (which keeps them healthy and in fine growing condition, which is also applicable to all other varieties), they make healthier plants and finer flowers. Elise Papworth has proved to be a fine commercial variety and better than Timothy Eaton, a pure white flower, with better foliage than that variety.



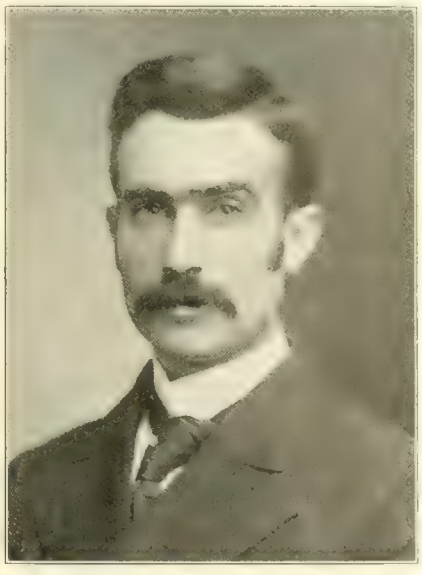
NEW POMPON CHRYSANTHEMUM HELEN NEWBERRY.

Grown by Fred. Pautke, Grosse Pointe Farms, Mich.

Joseph A. Manda, President.

John Young, Secretary.

Philip F. Kessler, Trustee.



Wm. H. Duckham, Trustee.

SOME OF THE OFFICERS OF THE NEW YORK FLORISTS' CLUB.

Fungine we find indispensable for cuttings. We use it on our cutting bench all the time, especially for chrysanthemums, and thereby are able to use the same sand over and over again. HARRY PAPWORTH.

New Orleans, La.

Hydrocyanic Acid Gas.

ED. AMERICAN FLORIST—

We have two ranges of glass, one 150x150 feet, consisting of six houses 25x150 feet, sides five feet high and 12 feet to the ridge. The other range is 100x150 feet, consisting of three houses 33 1-3x150 feet, sides 6½ feet, 16 feet to ridge. Will you kindly inform us how many jars it would take to each house to fumigate with hydrocyanic acid gas and the proportions of cyanide, sulphuric acid and water for each jar? SUBSCRIBER.

If the houses are even-spans, which is invariably the case where houses are built joining in blocks, there would be 31,875 cubic feet in each of the six houses in the first range, and 56,900 cubic feet in each of the three houses in the second range. With houses of average tightness cyanide of potassium may be used at the rate of one ounce to every 3,500 cubic feet and in new houses that are very tight the same amount to 5,000 cubic feet has been found efficacious. The formula advocated by the best authorities is one ounce of cyanide of potassium, two ounces of sulphuric acid to four ounces of water. Two quart jars, which should be either of glass or some other substance not metallic, will hold two ounces of cyanide. If the houses are tight it would take three such jars to each house in the range of six houses, and six to each house in the other range, or three jars of double capacity may be used. The cyanide of potassium of a grade 98 to 99 per cent. pure should all be weighed out in two ounces, each placed in a paper bag. The jars should be placed equidistant in each house with eight ounces of water to which four ounces of sulphuric acid is added. With so many houses joined and open between men should be placed in each house and work simultaneously, starting at the end farthest from the entrance, and drop the paper bag enclosing the cyanide into the jar, walking quickly along to the next and then so on and out of the house. This should be done as rapidly as possible and under no circumstances tarry or bend over the jar. The houses should then be locked and labels posted designating the danger. It is advisable to fumigate in the evening, keeping the house closed over night, and open the door and lower ventilators from outside if possible before entering the house in the morning. The best results are obtained and there is less liability of damage to fumigate when the foliage is dry and the temperature below 60°, for under other conditions the foliage may be damaged.

ROCHESTER, N. Y.—Articles of incorporation have been granted M. Cushman & Co. to grow and deal in seed, plants and agricultural supplies. The capital stock is $30,000, and the incorporators are H. B. Hathaway, W. G. Cushman and M. Cushman of Rochester.

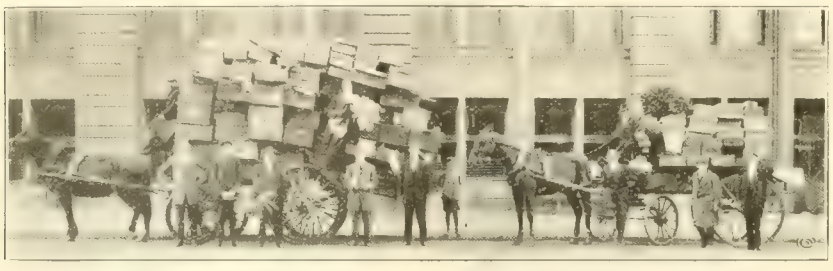
Adams-Robertson Co., Chicago.

The prettily decorated store of Adams-Robertson Co., Chicago, which we illustrate, situated on the corner of Rush street and Bellevue place, was opened this fall and the energetic proprietors have had a very satisfactory season. In the midst of the fashionable patrons of the North Side and with a thorough knowledge of the business, both members of the firm having been connected for some time with the Ernst Weinhoeber Floral Co., a bright outlook is promised for this new enterprise.

Boston.

UNFAVORABLE WEATHER.

Weather conditions are unfavorable for trade and there is a laxity in business conditions. No one seems to be able to place the blame where it belongs, and the weatherman comes in for the abuse. It has certainly been hard, especially for the rose grower, to keep the right temperature anything near where it should be. Sixty degrees out doors at night places him where it is guess work how to run the houses and not injure the plants. Roses have been too plentiful for this time of the year. Crops that under ordinary conditions would be ready in January are in now. The flowers lack stamina and the crispness, so characteristic at this time, is unknown except to those who can put them in ice chests at a very low temperature. If the same conditions continue to prevail there is likely to be a slump both in roses and carnations unless the demand exceeds that of any other year.



C. C. TREPEL'S WAGONS AT LOESER'S, BROOKLYN, N. Y.
Delivering Two Loads of Cut Flowers One Day During Thanksgiving Week

FLORISTS CLUB OUTING.

The Gardeners' & Florists' Club made a trip to Framingham Saturday, December 16, to visit the places of W. R. Nicholson, S. J. Goddard and J. T. Butterworth in the order named. A special car left Park Square at noon with over 60 members and friends, and the number was largely augmented after they got there. At Nicholson's there was a grand show. Never have we seen so many flowers on the plants at one time and the quality was all that could possibly be desired. We wish a photograph could have been taken of the houses to show how the plants looked. It was a revelation to many and comments and congratulations on all sides showed that something superior was being inspected. Certainly Mr. Nicholson and his foreman, Wm. Marshall, deserve credit. Among the leading varieties noted were Mrs. C. W. Ward, Golden Ray (Dorner's), this is a charming yellow the best, in the opinion of many, that has been sent out yet; Pocahontas, White Wonder, Pink Delight, Gloriosa and many more. The carnation cuttings were all rooting well with scarcely any losses. Freesia Purity was in good shape but will not be in for the holidays. Marguerite Mrs. Sanders is a recent acquisition. It is a product from the Queen Alexandra type, a double white. They have quite a stock of this variety and are busy working up more. Shamrocks occupy a good space. A house of mignonette came in for commendataion. This is a strain raised by Mr. Nicholson. A large full flower, long stem and heavy foliage. Everything about the place shows a master hand. Cleanliness is the first essential of success and certainly this is vigorously ilved up to in this place. At Mr. Goddard's place the same conditions prevailed, as almost the same varieties are grown with one or two exceptions. This place, like the former, is kept scrupulously clean, although there were not so many flowers showing on the plants. At a glance one could see where the flowers had been. It is an up-to-date place in every respect with quality dominant everywhere. A vase of carnation St. Nicholas was shown, it having been sent to Mr. Goddard from Baur & Steinkamp, Indianapolis, Ind. Although they had been on the road for two days they arrived in perfect condition and were admired very much by those present. Mr. Butterworth's was next visited. Orchids predominate. He has worked up one of the best collections of orchids in the state. Bulbs are forced here in large quantities. One house of carnations is grown for local trade, the place being situated in the center of the town commands a good business. Mr. Butterworth is enthusiastic over his orchids and the condition of the plants shows that he understands them thoroughly. A great contrast in greenhouse building was noticed, the old and the new; an up-to-date iron frame house and the oldest house between Boston and Worcester. The latter house was built in 1848. Certainly it holds its age well and stands a reminder of the glory of former days and a mute lesson in the advance of the present day construction. Cigars at Nicholson's, cigars and refreshments at Goddard's and cigars and refreshments at Butterworth's ended a pleasant and instructive day. President Miller made an address followed by Mr. Kennedy and a vote of thanks and three rousing cheers for the three gentlemen closed the day. A special car took the party to Boston.

In conversation with the glass and greenhouse lumbermen we find there are numerous inquiries for their goods and they say next year will see the biggest building operations in this section they ever had. The review of trade by R. G. Dun gives a hopeful feeling to general trade conditions in industrial branches and with the steel and copper outlook they conclude that the trades are going to have better conditions than for some time past.

There has been no decision on the trolley express question. Of course the express companies are against the innovation. The postmaster general's report on parcels post we think would be an entering wedge against the express company monopoly and if put in operation, coupled with trolley express, force the express people to lower their rates and still give their stockholders a good dividend.

A merry Christmas to all. MAC.

Washington.

ROSES OFF CROP. CARNATIONS SCARCE.

There was an average amount of business during the past week but Christmas thoughts are uppermost in the minds of all the florists. An irreverent person once said that an Englishman dearly loves a lord, if he can make money out of him and possibly that might be paraphrased to apply to the florists in relation to Christmas. But no fault can be found; it is what they are here for. Thus far the prin-

INTERIOR OF ADAMS-ROBERTSON CO.'S STORE, CHICAGO, ILL.

cipal preparations have been in the making up of wreaths and suitable window decorations. In wreaths there promises to be a large and pleasing variety. While we have always been opposed to the great amount of purely artificial stock that is annually thrown upon the market, we look at the prepared stock in the light, to some extent, of the preservation and extension of the beauties of nature. The oak, beech and other leaves that are now seen and being used in wreaths and for other decorative purposes are certainly worthy of commendation. Ruscus seems this year to be receiving considerable favor in wreaths in preference to immortelles. The boxwood will be considerably used and in the hands of a man of taste nothing finer is needed for a wreath. Already the Christmas trees are beginning to stack up about the market places and doubtless by the middle of this week they will be piled up in some places as high as haystacks. But little holly or mistletoe has been noticed as yet, but no doubt it will be here. In greenhouse stock, relating to supply, there is little change in the situation. The fine weather, mentioned last week, gave place to several very dark and gloomy days with rain. However, the temperature ranged between forty and fifty degrees, so there was no serious check to stock. Present indications are for fine weather. Good prices should be realized for Christmas, for while at present there is enough stock for the demand there is no surplus. Roses are generally off crop and good carnations have been scarce ever since the increased demand on the going out of the chrysanthemums. A very good quality of cut poinsettia is now on the market and indications point to a good Christmas supply. There are plenty of good violets and no uneasiness is felt in regard to the supply. In plants there will be plenty of azaleas, begonias of the Lorraine type, small poinsettias in pans and various other stocks.

NOTES.

George H. Cooke has just received from the greenhouses of H. D. Darlington, Flushing, N. Y., a large consignment of Christmas erica or heather, a particularly fine lot. The plants are large and well flowered and with Mr. Cooke's well known taste for decorative arrangement are sure to add a great attraction to his fine Christmas stock.

At F. H. Kramer's store the decorators have already got busy and completed a window in red in which wreaths, bells and other suitable and timely works of art are conspicuously displayed.

W. F. Gude, as the resident representative of the S. A. F., spoke before the senate committee on postoffices and post roads December 15 in favor of a parcel post.

Visitors: Richard Vincent, Jr., White Marsh, Md.; Robt. Shock, representing Rice & Co., Philadelphia, Pa.; J. W. Grandy, Norfolk, Va.; Prof. Symons, College Park, Md.

A. F. F.

HAVERHILL, MASS.—A disastrous fire on the night of December 9 destroyed the residence and barn of Charles H. Kaulbach, as well as the potting shed and the ends of the greenhouses. The fire is supposed to have caught from a defective flue in the headhouse of the greenhouses and then communicated to the barn and dwelling. The property loss is estimated at $8,000, but the stock of bulbs and dormant plants for winter flowering stored in the shed were all consumed and this, with the damage to the growing crops, will make the loss much more.

OBITUARY.

Henry F. Lord.

Henry F. Lord, treasurer of the Lord & Burnham Co., was found crushed to death in his garage at Irvington, N. Y., Saturday night, December 16. Mr. Lord was of a mechanical turn of mind and refused to allow anyone to touch his automobile and he recently decided to overhaul the car himself. After luncheon he went out and not returning to dinner, search was instituted and he was found by his son lying under the car. The engine, which weighed several hundred pounds, had fallen on his chest, killing him instantly.

Mr. Lord was about 60 years of age and was the son of the founder of the firm of Lord & Burnham Co., being the treasurer of the corporation. He was a prominent citizen of Irvington, where he had resided since he was fifteen years old, being elected by his townspeople to positions of trust, having formerly been president of the village and at the time of his death was trustee. He was a director in the Irvington Bank and the Irvington Presbyterian Church. A family, consisting of three sons and a daughter, survive him.

Mrs. Lucy Ravier.

Mrs. Lucy Ravier, aged 67 years, widow of the late Claude Ravier, died Wednesday night, December 13, at her late residence, 250 George street, Mobile, Ala., after an illness of more than a year's duration. Mrs. Ravier had been a resident of Mobile for 35 years, and after her husband's death continued his floral business. She is survived by three sons, Louis, Fred and Claude Ravier; a daughter, Mrs. Pansy Akeridge, and a brother, Louis Thublin.

The Ravier establishment at Mobile was one of that substantial type which holds the trade, the respect and the interest of the whole community. The large gardens, centrally located, contained a great variety of the best plants for the south. It was almost a botanic garden in itself and its owners were trained horticulturists who loved and honored their chosen profession. Mrs. Ravier continued the business as stated above and was much loved and respected by the best families in that aristocratic old southern city.

Charles E. Clark.

Charles E. Clark, a leading florist of Newark, N. Y., died suddenly of apoplexy December 8, aged 69 years. He attended a meeting of the board of officers of the Methodist Episcopal church, of which he was secretary, Friday evening, December 8, and at the close started for home. Shortly after his body was found lying in the street, having been stricken on his way. He was born at Chatham, N. Y., settling in Newark 20 years ago where he successfully conducted a florist business. He was a member of the Grange and the Masons. Funeral services were held at his late residence and at the church December 12. He is survived by his widow.

Jonathan Periam.

Jonathan Periam, a pioneer of Chicago and for years regarded as an authority on agricultural subjects, died at his residence, 6842 Perry street, Chicago, December 9, from hardening of the arteries, aged 88 years.

Mr. Periam was born in New York City in 1823 and came to Chicago in 1838. From 1841 to 1861 be engaged in farming when he enlisted in the Civil War, serving until the close. After the war he wrote on agricultural topics for farm journals, and become editor of the Prairie Farmer, which position he filled for 15 years until his retirement 13 years ago. He was a life member of the Illinois Horticultural Society and an honorary member of the Wisconsin Horticultural Society, and a member of the Knights Templar. He is survived by four daughters.

G. Van Antwerp.

G. Van Antwerp of G. Van Antwerp & Son, Mobile, Ala., died Sunday, December 10. Mr. Van Antwerp came to Mobile in 1858 and served in the civil war. After the close of the conflict he returned and entered the drug business and also conducted a large seed business until his death. He was a member of the Masonic order and was buried by that fraternity December 11.

Robert S. Tabb.

Robert S. Tabb who for a greater part of his life was connected with Nanz & Neuner, Louisville, Ky., died November 26, of Brights' disease, aged 62 years. He was a native of Martinsburg, W. Va., and came to Louisville 40 years ago. He is survived by a widow, three sons and three daughters.

Toronto.

GOOD BUSINESS CONDITIONS.

Business conditions were never better and even the most pessimistic predict a good Christmas. The weather conditions are not such that stimulate early buying, and though local trade has not started heavily as yet, the out-of-town orders are coming in very well and are usually good ones. The outlook for stock is fair, the roses especially looking well and American Beauties will be above the average holiday crop. Richmond is not so promising, but the other varieties are fairly plentiful. Carnations promise a good picking and violets, lily of the valley, orchids and bulbous stock seems plentiful enough to fill all orders. Artificial poinsettias and ruscus are selling well, being mostly used for store and window decorations. The stock of ground pine seems to be running short as usual and the complaint of poor quality holly is general. In plants there are some fine specimens, some of the cyclamens carrying three dozen blooms. Lilacs, cherries, azaleas and red tulip and hyacinth pans all help to complete a good variety of specimen and basket arrangements.

NOTES.

Having royalty at the government seat has been a great boon to florists, and the journey of the royal party through the country can be easily followed through the many orders for flowers. The Toronto visit was the cause of many decorations, Dillemuth having the ball and the banquet given in honor to His Royal Highness, using 1,600 large chrysanthemums on one job.

Grobba & Wandrey are completing their water-works system. The water is being taken from the lake, about three-quarters of a mile distant, and some $15,000 has already been expended. There is a possibility of their supplying the town of Mimico. Even this extra work has not detracted from their output and their holiday stock is larger than ever.

An applicant for a position in the west advised me that the salary there for greenhousemen is $24 per week. There must be money in other things besides wheat. H. G. D.

HARTFORD, MICH.—L. E. Davis has erected a house 25x100 feet, which he has stocked and the crops are very satisfactory.

REPORTS of the holiday trade from all sections of the country will be greatly appreciated. These should be addressed to THE AMERICAN FLORIST, 440 South Dearborn street, Chicago, and mailed as soon as possible after December 25.

AT a meeting of the Chicago-Northwestern Beekeepers' Association, held in Chicago, a resolution was adopted demanding that congress enact a law prohibiting the spraying of trees when in bloom, as the use of poisonous sprays kills the bees.

Important to Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Our Christmas Number.

Our subscribers are very generous in their praise of our Christmas special number which was issued December 16. The matter was all extremely timely and designed to help the many workers at this busy season. The home advertisers surely showed their appreciation of this paper, which has the best paid circulation to the trade in the trade. There were more than 25 pages of home advertisements in this issue and every one a fully paid up advertisement—no special discounts to favored advertisers and no free advertisements to fatten the issue. Any new subscriber desiring a copy will be gladly furnished with one on application. We wish one and all a Merry Christmas and Happy New Year.

New York to Detroit.

The committee on transportation, etc., appointed by the New York Florists' club, have made the following arrangements: The party will leave the Grand Central station on the N. Y. Central & H. R. Railroad Tuesday, January 9, on the "Wolverine," leaving at 5 o'clock p. m., arriving at Detroit at 7:15 the next morning. The fare one way, $16; for a party of ten or more a fare of $13.25 each way can be obtained. Tickets for transportation may be had on the train, but reservation for berths should be made by January 8 at least. Lower berth, $3.50; upper, $2.80; compartment, $10; drawing room, $13. Any further information may be had of Frank H. Traendly, 133 West Twenty-eighth St., N. Y.

FRANK H. TRAENDLY,
WALTER F. SHERIDAN,
JOHN YOUNG, Committee.

Heliotrope Lacking Fragrance.

ED. AMERICAN FLORIST—

Can you inform me what variety of heliotrope for bedding purposes has the best fragrance? Doubtless New Century is the best bedding variety, but it is not very fragrant.

New York. HELIOTROPE.

We find the best variety to grow for color and also sweetness is Centefleur, if this is the kind known also as New Century, as appears possible, and does not give satisfaction, why not try seedlings from a good strain of seed and select the best? This has proved most interesting in the past and the flowers are very sweet scented. Heliotrope seedlings are very vigorous like seedling geraniums, and do not bloom so early in the season as plants from cuttings, consequently cannot be depended on to use or sell for immediate effect.

E. O. O.

Western Dahlia and Gladiolus Society.

There was a meeting and exhibition of the Western Dahlia and Gladiolus Association at A. L. Randall Co.'s, 66 East Randolph street, Chicago, December 15. The members in attendance were E. S. Thompson, Benton Harbor, Mich.; A. E. Kunderd, Goshen, Ind., and H. W. Koerner, Milwaukee, Wis., the latter officiating as chairman of the meeting, at which it was decided to hold the annual meeting and election of officers during the exhibition of bulbs and tubers. It was the sense of the meeting that there should be a nomenclature committee and that M. Crawford, Cuyahoga Falls, O., should be chairman of this committee. Brief papers were read as follows: "The Gladiolus and Its Future," by A. E. Kunderd; "Hybridizing and Culture," by H. W. Koerner, and "American Bulbs," by E. S. Thompson. Arrangements for the next meeting are in the hands of the executive committee.

The above three members made displays of dahlia tubers, gladiolus corms and miscellaneous bulbs of home growth.

American Gladiolus Society.

A meeting of the executive committee of the American Gladiolus Society was held in New York December 6, with the following members present: Arthur Cowee, A. T. Boddington, E. W. Fengar, I. S. Hendrickson. The matter of a die and medals was taken up and discussed. It was finally decided to purchase a die and offer ten sets of medals the first year to as many local horticultural societies. It was thought best to offer a silver medal for first prize and bronze medal for second prize, the ten sets of medals to cost $70.

In regard to the registration bureau, it was decided to combine this committee with that of the nomenclature committee already established, with trial grounds at Ithaca, N. Y., where all tests can be made. It was the sense of the meeting that certificates of merit should be awarded only by the nomenclature committee and not by judges appointed for the annual exhibition. President Hendrickson has appointed Arthur Cowee and Professor A. C. Beal as members of the color chart committee.

Civic Federation at Washington.

The meeting here last week of the Civic Federation was an interesting event. Whatever may be said of it along political lines, this is certain that in its campaign against ugliness and dirt and the house fly it deserves the hearty support of everybody, and we are particularly pleased that it has made war on that pestiferous little cuss, the house fly. We hope that it will keep up the fight until the last fly is exterminated and find out, as they move to battle, what the fly was made for any way. The Federation took strong ground in favor of parks, which was endorsed by President Taft in a speech before the delegates. He promised to recommend a bureau of parks to be under one of the departments of the government. Engineer-Commissioner Judson of the District spoke in favor of working out municipal problems here in Washington so that other cities might come here and be benefited. Dr. Woods Hutchinson of New York, a very interesting writer on health topics, Dr. L. O. Howard of the Department of Agricutlure and Edward Hatch, Jr., of New York all took a swat at the fly. Smoke and billboards are also on the taboo list of the Federation. Billboard pictures of theatrical stars, "clad in a necklace and a smile," do not appeal to the staid members of the Federation. J. Horace McFarland of Harrisburg, Pa., well known in the florist trade, was honored by a re-election as president. Richard B. Watrous of this city was elected secretary. Among the women of national distinction placed on the executive board were Miss Mabel T. Boardman of this city, famous for her work for the Red Cross, and Mrs. Woodrow Wilson of Princeton, N. J. A. F. F.

Value of United Action.

The following letter plainly shows the advantage of membership in a live organization looking out for the interests of its members, such as the Society of American Florists:

ED. AMERICAN FLORIST—

As an aftermath to the report of the chairman of the Tariff and Legislative Committee of the Society of American Florists, we would add our appreciation of the work which Mr. Esler did for us personally. We were among the victims of the unsatisfactory deliveries of the express companies, and as individuals were unable to get satisfaction. We appealed to Mr. Esler, and, thanks to his interest and indefatigable efforts, backed by the Society of American Florists, we gained our point. This shows two things very clearly and emphatically: first, the great value of united action and "pulling together," as under the patronage of a society like the American Florists, and secondly, officering any society with the right men in the right place. To spare Mr. Esler's blushes we will let you make the inference here.

Key 535, Care American Florist.

Situation Wanted.

Good rose grower capable of taking charge. State salary when writing. Chicago preferred. For further particulars address

Key 541, care American Florist.

We invite the trade to attend a

MASQUERADE

given by the

GARDENERS' and FLORISTS' Union, No. 10615 at Club Room A, North Side Turner Hall 820 N. Clark St. Saturday eve., Jan. 13, 1912 Tickets 25c a person. Prizes announced in hall.

WIRE WORKERS

TAKE NOTICE

Mr. H. W. Fachmann for many years in the Florists' Wire design business in the city of Indianapolis, Ind., now offers the same for sale. This is a good, live proposition with plenty of custom work and no opposition; any good workman that wishes to get into an established business and be his own boss now is your chance. Reason for selling I have some patents that I wish to put on the market.

Of course we have **All Other Seasonable Flowers and Greens.**

EARLY ORDERS SOLICITED.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

BUSINESS FINE.

The holiday business has commenced and the advance orders point to a banner year. Stock is selling very readily with the exception of Paper White narcissus, about the only item that is not in good demand. American Beauties are arriving in splendid condition and are bringing fancy prices. Killarney and White Killarney are arriving in large quantities with plenty of white to go around. Carnations are good property and the grower who is fortunate enough to be in full crop is very lucky indeed.

NOTES.

Holton & Hunkel are cutting a very fine grade of roses and carnations with Killarney and White Killarney showing up remarkably well. The advance orders are very satisfactory and everything points to a most successful year. The management is very grateful to their many friends and customers for their valued patronage and wish them a Merry Christmas and a Happy and Prosperous New Year.

C. C. Pollworth Co. is cutting some very fine carnations and roses and are selling some fine blooming plants to their many customers. The outlook for Christmas is bright and the firm's expectations will be more than realized.

Gust Rusch & Co. are doing a fine business and express themselves as perfectly satisfied with the outlook for Christmas.

H. W. Koerner attended a meeting of the Western Dahlia and Gladiolus Association in Chicago last week.

TROY, N. Y.—Among the recommendations made in the report of Superintendent of Parks William H. Cahill is one for the erection of a greenhouse in Prospect Park.

Philadelphia.

Everybody seems to feel that the Christmas trade will be all right. The growers of plants for the holiday trade say that the sales have been very large, everything the least bit fancy being sold out long ago, which is an indication that the storemen have had a good fall trade and are banking on a continuation of the demand for the holidays. The unusual weather has brought the cut flowers along rather faster than was desired and as a result there has not been much of an advance in prices; $15 per hundred is about high for all special tea roses. Some of the stock offered is very fine and were it not so plentiful would readily command more money. American Beauties are more plentiful and it is said will be in fair supply for the holidays. The best stock is quoted for Christmas delivery at $12 per dozen, about the same price as last season. There was evidence last week of stock that had undergone the saline process. The soft weather did not lend itself to this treatment and as a result many long-stemmed Killarneys were seen on the street stands. Carnations are having their inning and many fine flowers are seen. It is said there will be a good supply for the coming week. Violets are not any too plentiful but the commission men say they will take orders for all that are wanted for the Christmas delivery. In the stores all is bustle and hustle getting ready for the grand rush. Wreaths of all kinds are being made up, boxwood predominating. Great quantities of red ruscus is being used to give color to the statice and box wreaths. A great variety of baskets is seen at the different stores, each man having something of his own that he is running. A willow with the bark on made into a basket of pot cover shape that will hold one pot and a handle with a harp-like curve is seen in one store only. A basket of white willow with openwork sides and finished with a large twisted willow handle, is plain but looks effective. A zinc pan for each basket is painted on the sides which show through. Other baskets of this pattern are painted in tint colors.

NOTES.

H. Bayersdorfer & Co. pulled off a quick trick with the customs house one day this week. The steamer Chemnitz, due on Monday, was bringing a number of large cases of red immortelle wreaths. Mr. Bayersdorfer got busy; it was necessary to get these the moment the boat was docked, so he had the whole importation passed by the officers, paid the duty while the goods were still two days out, and had his drays at the wharf and the moment the boat was made fast he was aboard and directed the removal of the goods. Quick work and quite a stroke of genius on the part of Harry Bayersdorfer.

The street men promise to be in it this Christmas on Market street curb. Ordinarily all kinds of vendors have been permitted to do business on this busy thoroughfare for the holidays. This year they must get the storekeepers' permission and now it is a case of the men who will pay the most getting the stands. When these privileges are in full swing the street is almost impassable.

M. Rice & Co. are kept busy with ribbon orders for the holidays. Their holly red ribbon is having a great run.

The Princeton rose, as seen at Berger Bros. is certainly a fine thing. It recalls the old Mrs. John Laing in color, being such a rich shade of pink and having much the appearance of a hybrid.

BASSETT & WASHBURN

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Ill

Chicago.

EVERYBODY READY FOR CHRISTMAS.

Preparations for the holidays are to be seen on every hand. The retail stores are resplendent with high colors, gaily decorated for the coming festival to attract the eye and patronage of customer. The poinsettia is shown both in plants and in enormous cut blooms and they are very conspicuous in all the window displays and in the stores. Beautiful plants are also very prominent, azaleas in pink, white and red, splendid specimens of Begonia Gloire de Lorraine and Glory of Cincinnati, finely grown cyclamens in bright colors and shapely ardisias beautifully berried. These are all shown to the best advantage in pot covers that add to the attractiveness of the plants and large numbers of smaller plants such as hyacinths, tulips, primroses, etc., are displayed for the purchaser's selection. Some finely grown lily of the valley are also offered and one of the large stores has a window of cattleyas in full bloom. The plant baskets and boxes made up in artistic combinations are attractive features and receiving much attention by the buyers. The stores are beautifully decorated with greens and holly both inside and out and quantities of winterberries are used everywhere to complete the display. Holly and greens of all kinds have had a good sale. During the warm weather of last week some dealers dropped their prices, but with the return of real winter weather the first of the week the prices stiffened and a good advance was made on the high grade stock. At the wholesale stores everything is ready for the large shipments that will be made. The advance orders are large, most of the houses reporting larger than in previous years and a grand rush is expected during the last three days of the week. The stock is mostly in first-class condition and of some lines there will be plenty. In roses there is a large quantity of Killarney coming in and the large proportion is of fine color and excellent quality. Richmond is in elegant condition with nearly all the growers and a large quantity will be cut and shipped in, but the orders for this rose are also very large, and while there will in all probability be enough to fill the orders the choice stock is being picked up very quickly. American Beauties are in no such supply as they were a year ago; the stock is of high quality and the orders are large, but there will be a great scarcity of short and medium lengths, in fact one of the growers states that orders already received will take all of these grades that will come in. White roses are in good supply and there will probably be enough to fill every order with good grade stock. It certainly looks as if carnations of the best grades would be far short of the demand. The weather for the last two weeks has not been the best for the production of the highest grades, so consequently there are a large quantity of blooms on the market that would be classed as seconds. Violets are quite plentiful and prices have not been quoted as high as they often are at this season. Orchids are none too plentiful and the choice blooms are held at good figures. Lily of the valley is in splendid condition, some elegant stock being seen and prices are normal. There are large quantities of stevia and the stock is of high quality. Sweet peas are of good quality and are being received in good supply. Gardenias are not at all plentiful; the advance orders booked will nearly cover all the first grade stock received. There are large quantities of Paper White narcissus and Roman hyacinths and red tulips are freely offered by some growers. Mignonette, marguerites and calendulas are to be had but in no great quantities. The supply of greens is very large, there being plenty of smilax and asparagus and large quantities of boxwood of splendid quality is on hand with all the dealers. Real Christmas weather prevails the first of the week and if this continues a banner trade is predicted.

E. A. Kanst.

Who Resigns South Park, Chicago, Position After 22 Years' Service, to Become Professional Landscape Gardener.

NOTES

Wietor Bros. are cutting heavily in American Beauty, Killarney, White Killarney, Mrs. Jardine and Uncle John roses and all the leading varieties of carnations. The immense amount of stock that was expected for the holidays is arriving and can be seen in large quantities at the store, where specially fine Richmond roses of all lengths are already attracting the attention of the Christmas shoppers.

Secretary O'Neill of the Small Parks Commission has been suspended pending an investigation and the board has recommended that Mayor Harrison take a hand in the inquiry. This in part confirms the suspicion that there has been mismanagement of the small parks business for some time.

Poehlmann Bros. Co. are cutting a large supply of all kinds of seasonable stock and are very well fixed for the holidays. Especially fine American Beauty, Richmond, Killarney, White Killarney and other choice roses and an unusually large quantity of fancy carnation blooms are daily arrivals at this well-known house.

Meier Bros., of Morton Grove, are cutting some fine carnations and are in full crop with Winsor for Christmas. Their entire output is sold by the Chicago Flower Growers' Association at its store on North Michigan avenue.

Vaughan & Sperry are headquarters for a fine grade of poinsettias and are showing some very fancy stock in all lines. The trade evidently appreciate a good grade of boxwood when they see it for the large shipment that was received last week is moving fast and nearly sold out.

Bassett & Washburn are more than pleased with outlook for Christmas and the orders that are already booked will call for a large quantity of stock. This firm's Rhea Reid roses and O. P. Bassett carnations are in great demand and are bringing top notch prices.

Lubliner & Trinz are doing a big business at their store on East Randolph street, where trade is very lively and the outlook is bright for a banner Christmas.

Chas. W. McKellar is well supplied with orchids for the holidays, in addition to a complete line of greens and a large supply of other seasonable stock.

John Kruchten is showing some very fancy gardenias, roses, carnations and lily of the valley and is well supplied with boxwood for the holiday trade.

E. A. Kanst, for the past 22 years identified with the South Park system, will resign January 1 to take up the profession of landscape gardening.

The J. B. Deamud Co. is filling a large number of orders for a fine grade of home-grown double violets, of which large supply is being received.

A. C. Rott, of Joliet, was in the city this week buying stock for a big store opening, in the decoration of which there were used 1,500 roses.

Zech & Mann are receiving a large quantity of roses and carnations and are busy as bees filling both local and shipping orders.

E. E. Pieser says this was the most successful year that Kennicott Bros. Co. has ever had with Christmas yet to hear from.

Eric Arlt is shipping a fine grade of Paper White narcissus to Hoerber Bros., who find very ready sale for his fancy stock.

Louis Turner, of Kenosha, Wis., was one of the out-of-town holiday shoppers that paid this market a visit this week.

Miss Mae McAdams has recovered from a severe cold and her smiling countenance is again seen on the market.

C. L. Huffert's pretty winter window scene is attracting the attention of the public on West North avenue.

Snapdragons, gardenias and daisies are some of the Christmas offerings at the Weiland & Risch store.

A. Henderson & Co., are enjoying a busy season and selling large quantities of choice holly.

Peter Reinberg is receiving large shipments of choice American Beauty, Killarney and White Killarney roses and a very fancy grade of red, white and pink carnations. An exceptionally fine grade of Richmond roses is the leading feature at this house this week. Tim Matchen, the hustling store manager, and his two assistants, Joe Welsh and John Lozer, visited the greenhouse last Sunday, where everything looks promising, and then journeyed to the Matchen home where a bountiful dinner awaited them. The boys say that Mrs. Mathen is sure some cook.

The Chicago Flower Growers' Association is handling a fine grade of stock for the holidays with carnations showing up exceptionally well. The advance orders for Christmas have been very satisfactory and large quantities of choice stock will be shipped out from this house for that day. Manager Frese and his assistants will be on the job all day Sunday ready to receive and fill any late orders that may come in.

George Perdikas has some fine window displays at his stores in South Wabash avenue, Dearborn street and Jackson boulevard. Azaleas, poinsettias and other Christmas plants arranged in an artistic manner make a very pleasing and effective appearance. The proprietor and his assistants are busy looking after the splendid trade that he enjoys.

John Canger, of Canger & Gormley, says that his firm is busy with table decorations and that they are receiving their share of the Christmas orders. Wm. Gray, the accommodating salesman and artistic designer, has already received his Christmas present and is exhibiting a carbuncle on the right wrist.

Wm. Timme has returned from a successful hunting trip at Crystal lake and is now helping out at Vaughan & Sperry's store during the holiday rush.

Miss Tonner says that the A. L. Randall Co.'s supply department is enjoying a very busy season and that holiday business is exceptionally good.

The Foley Mfg. Co. has secured the contract of the E. G. Hill Co., Richmond, Ind., for four new flat rafter iron houses each 34x400 feet.

Mrs. Luke Collins, who has been seriously ill for some time, is feeling much better and an early recovery is looked for.

M. Rocklin, everybody knows Mike, of Rocklin & Lehrman, Sioux City, Ia., is in the city buying stock for the holiday trade.

Paul M. Bryant says that E. H. Hunt's holiday business is most satisfactory and much better than last year.

Kyle & Foerster are showing a fine grade of American Beauty roses for the holidays.

A splendid grade of Richmond roses is a feature at the J. A. Budlong store this week.

Telegraph, Telephone, Write. We Have the Stock.

N. J. Wietor is now the proud possessor of one of the finest Haynes automobiles ever placed on the market. It it a 40 h. p., five-passenger Newport Limousine, model 21. The car is on exhibition at the Haynes headquarters where it is attracting considerable attention. The genial wholesaler and his friend, John Schillo, the man who sells the famous pecky cypress, are already planning where they are going to go when the handsome new car is delivered. How about Clear Lake, Wis.?

The George Wittbold Co. had an exceedingly busy season at their greenhouses at Edgebrook where the force is kept on the jump filling the many orders that are received. The store on Buckingham place in this city also looks as if it had a banner year for the large stock of Christmas plants is disappearing very fast, which goes to show that the public is buying early.

Theodore Callos, formerly in partnership with Wm. Kotshonis under the name of the White House Florists, has purchased Ch. Pederson's store at State and Washington streets where he will be pleased to meet his friends and customers.

Henry Wittbold, formerly connected with the Geo. Wittbold Co., has withdrawn from that firm and will likely continue in this line of business on his own account.

Fred Lautenschlager says his firm, Kroeschell Bros. Co., is still selling boilers by telegraph, two orders being booked this week.

Edgar Winterson, Jr., is at Lake Geneva, Wis., this week.

Visitors: C. Ph. Freriks, representing F. R. Pierson Co., Tarrytown-on-Hudson, N. Y.; Louis Turner, Kenosha, Wis.; J. J. Soper and wife, Rockford.

Illinois State Horticultural Society.

The forty-sixth annual convention of the Illinois State Horticultural Society was held in Agricultural building of the University of Illinois at Urbana December 11-16. Many valuable and interesting papers regarding fruit and vegetable culture and the care of orchards were read and discussed. Discourses on floral subjects were delivered by Prof. H. B. Dorner, "Flowers for the Home;" A. M. Augustine, "Arrangement and Treatment of Shrubs and Perennials for the Home Grounds;" W. N. Rudd, "School Yards and Church Grounds;" E. Bolinger, "Arrangement of Shrubs and Ornamental Plants in the Home Grounds."

New Jersey Floricultural Society.

The annual meeting of the New Jersey Floricultural Society was held December 8 at Orange, N. J., and the following officers were elected:

Frank Drew, president.
G. B. Wilson, vice-president.
William Reid, secretary.
Walter M. Gray, treasurer.

It was decided to hold a banquet in February instead of the annual smoker. Lager & Hurrell were awarded the silver cup donated by John R. Le Count for the best display of orchids at the November meeting. The awards of the judges for exhibits were as follows: Essex County Country Club, carnations, 82 points; S. M. & A. Colgate, carnations, 95 points; roses, 97 points; orchids, 97 points; Lager & Hurrell, orchids, 88 points; Thomas Jones, orchids, 85 points; Mrs. C. C. Goodrich, carnations, 97 points; Charles Hathaway, chrysanthemums, 83 points. The winners of the prize offered by W. E. Marshall & Co. for the best 18 carnations were S. M. & A. Colgate, first; Charles Hathaway, second; Popken & Collins, third. Certificates of merit were awarded Essex County Country Club for carnations; Lager & Hurrell for orchids; M. B.

PLENTY OF STOCK FOR CHRISTMAS.

Laurel wreathing and holly sold like hot cakes the past week, nearly every retailer having decorations which kept him busy. Supplies of all kinds are moving at a rate that has never been equaled, and everything looks like a busy time the coming week. Stock is shortening up a little, but there will be plenty for all when the Christmas cut arrives. American Beauties, chrysanthemums, carnations, Paper White narcissus, stevia, violets, sweet peas, poinsettias, lily of the valley, Roman hyacinths, orchids, Killarney and Richmond roses and green of all kinds will be plentiful; also novelties such as calendulas, mignonette, etc., will be part of the stock. All the growers are predicting fine stock and plenty of it, and recent visits to greenhouses bear out this statement. The new Christmas flower, hibiscus has been a very good seller, nearly every decoration has included some of them.

NOTES

The florists of Cleveland are going to Detroit for the January flower show in a body. All who wish to attend, please get in communication with Geo. W. Smith of the Cleveland Florists' Exchange. Quite a number have already signified their intentions of going accompanied by their wives, and everything looks like a good and enjoyable time. C. F. B.

Kansas City, Mo.

A trip through the greenhouses of W. J. Barnes found everything in nice order for the Christmas trade. One house of Gloire de Lorraine and Glory of Cincinnati begonias in sizes from three-inch to nine-inch pans showed nothing to be desired; they are grand. A house of about 1,500 poinsettias, all in pots and pans, is a scarlet blaze—every one a beauty. A house of ferns also in very fine condition. A block of several hundred azaleas almost in bloom showed up finely. Large quantities of narcissus, Roman hyacinths, Christmas peppers, primroses, araucarias and a big lot of Christmas odds and ends make up a mighty fine display. Safe to say, that not a corner of the 25,000-foot range is going to waste—on and under the benches, something growing everywhere. Mr. Barnes has just finished cutting four houses of chrysanthemums and claims not to have lost or wasted a dozen blooms. They were all good. The chrysanthemum houses are now being filled with bedding stock. A big house of carnations in full crop shows lots of care and immediate and future profit. A large stock of ribbons, chiffon, fancy goods and baskets is carried and with two phones and an auto delivery all going, things generally, and the Christmas trade in particular, look prosperous. B.

CHRISTMAS SUPPLIES SELLING WELL.

The last week has been more or less dull in the cut flower business. An ordinary supply scarcely cleaned up while a small amount of stock found its exit via the ash can. These were, however, only those that arrived in poor condition. The supply and green goods departments of the various houses were rushed continually throughout the week. The forces worked overtime many evenings to fill the orders of those that were to leave the next morning and to replenish the stock from the stockrooms. All the various strictly Christmas novelties were in great demand. The call for red immortelles was especially strong. A number of florists from towns in the surrounding states have been coming to the local market in person to select their goods and place their orders preparatory to the final rush. This week the demand for almost all kinds of stock started with a rush. In fact business was better than was expected and much better than any day during the preceding week. In roses indications are that there will be a shortage of supply in American Beauties while others, especially Killarney and Richmond, will scarcely take care of the very heavy orders received. Taking all in all, however, everyone desiring roses will undoubtedly have their orders filled very substantially. The supply of carnations will be large. The same is true of choice poinsettias, chrysanthemums and Paper White narcissus. Roman hyacinths seem to have struck a rut and are not moving as they should. Violets, both double and single, lily of the valley and orchids clean up quickly. The market for stevia is fair and the call for green goods of all kinds is good.

NOTES.

P. J. Olinger went to New Castle, Ind., on Friday, December 15.

Visitors: John Evans, Richmond, Ind.; O. C. Heberling, Georgetown, O.; M. Anderson, Cynthiana, Ky.; Chas. Dietrich, Maysville, Ky.; Louis D. Singer, Lexington, Ky. H.

MARKET DISAPPOINTING.

The looked for improvement in the wholesale cut flower market did not materialize. In fact, conditions are much worse than the week previous. The weather has been very unseasonable with the thermometer at times hovering around sixty. Carnations are in large supply and it is impossible to realize good prices except for the novelties and the extra grade blooms. Paper White narcissus are a drug on the market and thousands are being disposed of at very low figures. Roman hyacinths are moving a little better than Paper Whites, but not very much. Lily of the valley of good quality seems to clean out well, though the poorer quality is almost unsalable. Stevia is doing as well as it generally does at this season of the year. Lilies have dropped very much in price and large lots are disposed of at about one-half of last week's quotations. It is in roses that prices have dropped the most. American Beauties, which are of magnificent quality, are being carried over from day to day and then have to be disposed of at almost unheard of figures for this time of year. Mrs. Aaron Ward, Radiance, Lady Hillingdon, Prince de Bulgarie, not being so plentiful, the top grades of these varieties do better than the others. All other roses are moving very slowly and it is only occasionally when a fair price is obtained. Gardenias are more plentiful with a marked tendency to lower prices. The demand for orchids has also eased up and as the quantity has increased prices have dropped considerably. Chrysanthemums, which are fast disappearing from the market, are only in fair demand. Violets are a drug on the market and almost any price obtained seems to be a good price. Sweet peas of excellent quality are selling at very low prices and the market is flooded with smilax, asparagus and ferns which meet with very poor demand, in fact the whole condition of the cut flower market is disappointing and very unsatisfactory.

Sunday, December 17.—The market is still overstocked with everything with poor demand, but as the weather is much colder business should improve.

NOTES.

John Nicholas, the well known florist of Forty-second street, near the Grand Central station and who is the landlord of the property where Wm. A. Kessler and the Growers' Cut Flower Co. are situated in Twenty-eighth street, has acquired the adjoining properties, 103, 105, 107, and will make extensive alterations which, when completed, will be the most up-to-date stores for the sale of cut flowers at wholesale or for florists' supplies. Mr. Nicholas reports that even now he has received many applications for the stores when completed.

There is promise of a large delegation going to the conventions of the American Rose Society and the American Carnation Society at Detroit January 10 and the transportation committee wish that all members or visitors from the east will join the party and every arrangement will be made for their comfort. All further information may be obtained from Chairman Frank H. Traendly, 133 West Twenty-eighth street, N. Y.

The election of Joseph A. Manda to the presidency of the New York Florists' Club was very gratifying to his many friends. Mr. Manda has always been an enthusiastic and loyal member of the club and a hard worker and there is no question but that he will make every effort to boom the club the coming year. "More power to him!"

A. Moltz & Co. of 55 West Twenty-sixth street have made arrangements for a supply of everything in the cut flower line for Christmas. In fact Mr. Moltz makes it a point to have a supply of everything that may be in the market. He now has a supply of cattleyas and gardenias of superior quality.

Henshaw & Fenrich are probably the largest receivers of violets in this market but do not devote their entire time to this flower by any means. Very fine sweet peas, carnations and roses are seen here in quantity. The carnations grown by E. W. Fengar being exceptionally good.

Henry F. Lord, treasurer of the Lord & Burnham Co., was found dead under his automobile in his garage at Irvington Saturday night, December 16. It is supposed that he was overhauling his automobile and while under the car the engine fell on his chest killing him instantly.

Harry A. Bunyard spent most of the week in Boston at work on the schedule of the National Sweet Pea Society. Mr. Bunyard is most enthusiastic about the success of the next exhibition of this society. There are more than $2,000 in prizes provided for at present.

J. K. M. L. Farquhar of Boston was in town this week and on Saturday at 4 p. m. delivered an illustrated lecture before the Horticultural Society of New York at the American Museum of Natural History on the "Gardens of Italy."

J. K. Allen is handling a fine line of flowering plants for Christmas, the poinsettias and Begonia Gloire de Lorraine being especially fine. Most of these are grown by Charles Hunt, Port Richmond, S. I.

Henri Beoulieu, who has just returned from Europe, gave a brief interesting talk at the recent meeting of the New York Florists' club on his trip. His remarks were interesting as well as instructive.

P. J. Smith, whose establishment is properly called the "Home of the Lily," is also receiving at the present time sweet peas, American Beauties and lily of the valley of very fine quality.

Visitors. J. K. M. L. Farquhar, Boston; Elmer D. Smith, Adrian, Mich.; Wm. P. Craig, Philadelphia, Pa.; Wm. Sim, Cliftondale, Mass.; E. G. Hill, Richmond, Ind.

Harry Weston of Hempstead is sending sweet peas of the finest quality to the Growers' Cut Flower Co.

A. L. Young & Co. are receiving a fine lot of cypripediums from Joseph Towell, Paterson, N. J.

Philip F. Kessler will have a fine supply of freesias for the holidays.

Y.

Tour of the New York and N. J. Plantsmen

The annual fall inspection tour of the members of the New York and New Jersey Association of Plant Growers took place recently. The trip took two days and the members were conveyed in automobiles to seventeen establishments on Long Island and fourteen in New Jersey.

On the Long Island trip a noon-day stop was made at the dining hall of John Niederstein, Middle Village, where a sumptuous meal had been prepared under Frederick Marquardt's direction and a group photograph was taken by Miss Marie Marquardt. F. R. Pierson, ex-president of the S. A. F., occupied the front seat and was the guiding spirit of the larger car, while the committee's car was dominated by such large bodies as A. L. Miller and Anton Schultheis. Not only was the trip very instructive and profitable, but the members had an enjoyable time.

WM. H. SIEBRECHT, JR., Sec'y.

INDICATIONS OF GOOD CHRISTMAS TRADE.

The weather conditions have been variable ever since Thanksgiving. The trade on that day was all that could be desired. Debutantes and wedding receptions and still more debutantes have kept all the florists busy. Stock has been good and in fair supply. Chrysanthemums are gone, consequently carnations are very much in demand. The advance orders for Christmas are coming in, which is a sure indication that trade will be good.

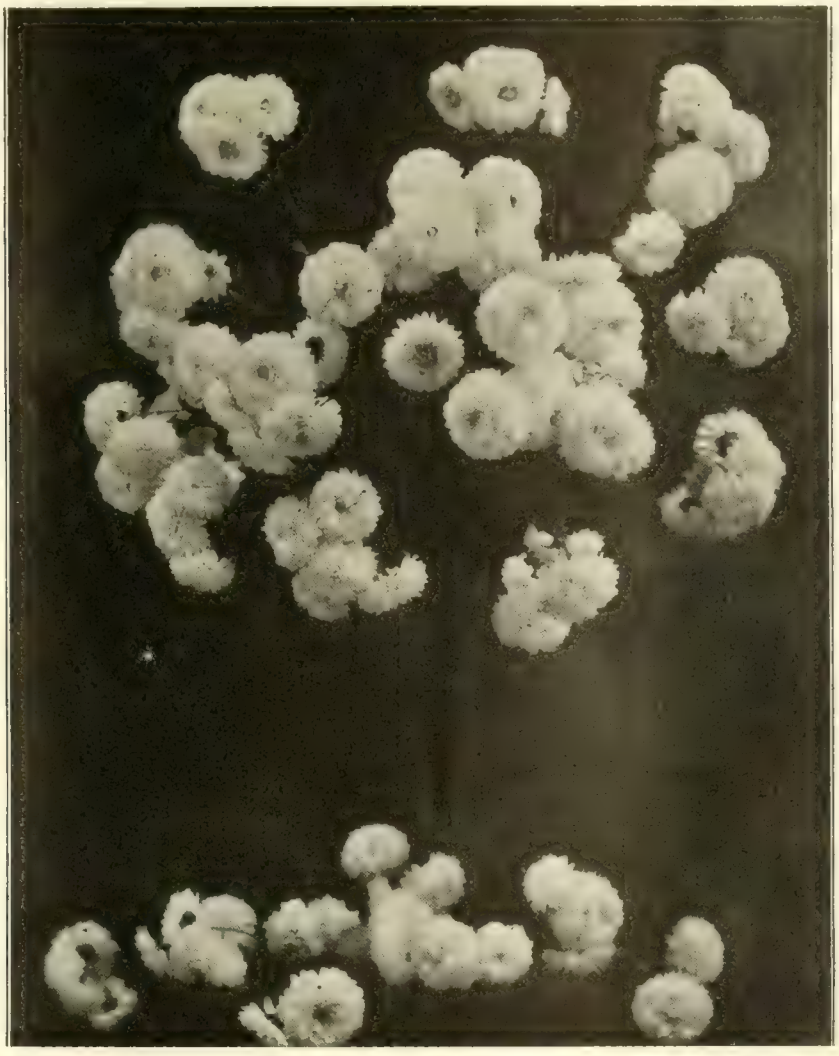
NOTES.

Attractive windows at S. A. Anderson's, W. J. Palmer & Son's, Stroh's Flower Shop and J. B. Stafford's have been very much talked of. The dry good stores have been unusually early this year in their Christmas decorations which has given the florists a chance to get an idea of what their holly and pine will be like. So far it is good.

The contest of the Wm. Scott Co. for the greatest number of words from the word chrysanthemum was very interesting. The first prize was awarded to the one who presented 20,030 words, the second 1,618, third 1,360; fourth was a tie with 1,000, which shows that Young America is up and doing.

Elmer D. Smith of Adrain, Mich., was a recent visitor and was the guest of Prof. Cowell.

The Florists' Club was short of a quorum on last Tuesday, consequently no meeting. BISON.



The new late white Pompon

Helen Newberry

just as good and a little better than the popular variety, Diana, which it follows in fine for Thanksgiving and up to Christmas. Its record, Committees N. C. S.:

Chicago, scored 90 points. **New York, scored 88 points.** **Cincinnati, scored, 91 points.**

Won Silver Cup in Detroit, best undisseminated Pompon.
Won $50.00 in Gold, Detroit Show, best display Pompon.
Won 1st, best Pompon, Detroit, Show.

St. Louis.

A DULL WEEK.

The past week has been very dull, the retailers buying but little and the wholesalers having quite a little stock on hand. Especially is this noticeable of narcissus and violets, which have been quite plentiful. Carnations have been somewhat short and had there been any business would have been scarce and the supply for Christmas depends much on the weather. This week the holly and mistletoe will be disposed of and it is expected that poinsettias will be used in large quantities, both the natural and the artificial. The downtown and west end stores are gaily decorated in holly red.

NOTES.

The Florists' Club met Thursday, December 14, with 25 members present and President Robert J. Windler in the chair. N. F. Nichol of the St. Louis Seed Co. was elected a member. — Carroll, former carnation grower, who has become blind, was a visitor and the club voted him a Christmas gift.

C. A. Kuehn opened his store Thursday, December 14, but it will be fully two weeks before the interior fittings are completed. Electric elevator, cold storage plant in basement and steam heating will make the place one of the most modern and elegant of its kind.

Some of the finest stock in home-grown roses is to be seen at Wm. C. Smith's Wholesale Floral Co. A large supply of Baby Christmas trees is one of the novelties.

Alexander Floral Co. are going more extensively into rose growing next year. They have a modern plant which they intend to enlarge, of which John J. Wunderli is manager.

C. Young & Sons Co.'s downtown show windows are beautifully decorated with well grown poinsettias. Their west end branch is having a fine plant trade.

George H. Angermueller has a fine lot of Christmas supplies on hand and a good supply of stock is expected for the holidays.

Gross Bros. are shipping heavily to the violet market and a good supply will be on hand for the Christmas trade.

Miss M. C. Newman's windows are very artistically arranged and the store has a general holiday appearance.

Ellison Floral Co., Kalisch Bros., The Paris Floral Co., Otto Sander and F. C. Weber have fine Christmas displays.

W. J. Pilcher's violets are looking fine and promise a good crop for the holidays.

H. G. Berning will have for his Christmas trade his usual supply of cut flowers.

Grosvenor Gardens Flower Shop is well prepared to handle Christmas trade.

The St. Louis Seed Co. has a large stock of holly and Christmas wreathing.

A. Werner & Bros. of Clayton are growing fine White Killarney roses.

Diemer Floral Co. is having a first-class trade on South Broadway.

Jules Bourdet has a fine supply of stock for the holiday trade.

Alex Siegel has some specially fine mistletoe.

Charles Beyer is still on the sick list. W. F.

Lancaster, Pa.

The florists of Lancaster, Pa., city and county, to the number of some 50, have started a co-operative florists' association at the call of Albert M. Herr. Co-operative buying and co-operation in selling, along with some cultural talks and better business methods, are the objects to be attained and the first regular meeting will be held January 18, with carnations the main topic. Introducers should get busy with some flowers for this meeting. Send in care of H. A. Schroyer, Lancaster, Pa. ALBERT M. HERR.

MIDDLETOWN, CONN.—A. L. Southmayd has installed a new refrigerator.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

FIFTEEN hundred tons of Scotch potatoes were received at New York December 19.

THE covers of two of the five new catalogues received to date exploit culinary peas, notwithstanding all the talk of seed shortage.

G. VAN ANTWERP, of G. Van Antwerp & Son, Mobile, died Sunday, December 10. The obituary appears in another column of this issue.

WHOLESALE dealers in canner's varieties of peas, such as Horsford's, Advance, etc., say the demand is unprecedented. Even small lots are being diligently sought.

VISITED CHICAGO: Albert McCullough, Cincinnati, O.; J. W. Edmundson, representing the Braslan Seed Growers' Co., San Jose, Calif.; Theo. Cobb, representing D. M. Ferry & Co., Detroit, Mich.; J. B. Agnew, Agnew, Calif.

THE Braslan Seed Growers Co. has established a branch house in Paris, for the convenience of European customers, with J. Keyser in charge. Representatives of the firm say its entire output could have been marketed in Europe to advantage this season.

NEW YORK, December 18.—The mild weather aided the pickers of club moss during the past two weeks with the result that the market is now glutted and plenty can be picked up, when too late to use, as low as 4½ cents per pound. Fair commission holly can be picked up on the docks at $3.00 to $3.50.

CHICAGO, December 19.—The closing of the season for Christmas greens finds ground pine in liberal supply at about 6 cents without buyers, it being now too late to wind to advantage. Fancy holly is very scarce and practically unobtainable. Common commission stock, light packed, off color and with few berries, sells at $3.50 to $4.00 per case. The cause of this shortage lies possibly in the slow demand early and the flooded river bottoms referred to in ours of last week. Good boxwood is scarce.

GEO. R. PEDRICK and wife, of Pedricktown, N. J., are spending the winter in Miami, Fla., Mr. Pedrick being in very poor health.

Seedsmen's Needs.

Some time before his death the late Chas. P. Braslan dictated the following for THE FLORIST, but the item was shelved in the hope that conditions would improve:

"I read in the newspapers lately about a young lady kneading bread with her gloves on. It appears to me that all dealers in the seed trade soon will be needing bread in shirt and pants or with only their boots on. If they do not wake up to the fact that it is very important that they change their tactics and get better prices, both retail and wholesale, they will be needing bread with no clothes at all on. What do you think?"

From the New Catalogues.

The cost of seeds for the garden is comparatively so trifling as to be hardly worth considering. For instance, two ounces of tomato or cabbage seed will produce sufficient plants to set out an acre. Does it really matter whether you pay 20 or 40 cents an ounce for the seed?—Burpee's.

All reliable seedsmen sell good seeds. Most of the complaints about seeds are the fault of the purchaser, or perhaps weather conditions, when the seed is sown or growing.—Boddington's.

Oscar H. Will & Co., have this headline on their catalogue envelope: "The sun never sets on planters of Will's seeds."

The most fortunate seedsmen these years are those who grow many crops. —Livingston's.

Bulb Sorting Machine.

W. Mauger & Sons, of Guernsey, Channel Islands, England, have in use a bulb sorting machine which grades the bulbs in the several sizes without ever making a mistake. The bulbs are placed upon a table which is worked by an electric motor (and which is also used to light the premises) and by a rapid motion backward and forward the bulbs are carried along the under board. This is divided into ten sections, all of which except the first are perforated with different sized holes through which the bulbs fall. The first section clears off the rubbish, the second allows the smallest bulbs to fall through, the third the next size and so on until the largest fall through the last section. To prevent the bulbs from sticking in the perforations two rollers are constantly passing backwards and forwards which move any fixed bulbs. It does the work of half a dozen employes much more carefully and effectively.

Vilmorin-Andrieux & Co.'s Novelties.

The house of Vilmorin-Andrieux & Co., Paris, France, offer the following novelties in seeds for the season of 1912:

Calceolaria hybrida graciosa.—The flowers are large and are almost self-colored, instead of being spotted or striped. The range of colors includes white, cream, yellow, sulphur-yellow, canary, orange, rose and carmine.

Primula sinensis fimbriata salmonea Beaute de Nice.—A compact growing plant with rich dark green foliage and reddish stems bearing flowers of salmon pink.

Lobelia nana compacta.—A dwarf compact variety with flowers of rich blue with a large white eye, well fixed and true.

Lobelia erinus nana compacta grandiflora alba.—An improvement on Erinus white and gracilis alba. The flowers are much larger and have an erect, compact habit.

Stocks summer Excelsior.—Three handsome colors, reddish-brown, red and light violet.

Sweet William, copper red.—An additional shade to this well-known plant.

French bean Flageolet.—Extra early white for forcing, well adapted for growing under frames but 10-12 inches high.

Cabbage, earliest large-headed.—An improvement on Express, which it excels in size.

Cabbage, Savoy, curled oxheart.—Very early with coarsely crimped leaves and large head.

Endive Olivet curled.—Like golden heart but with rosy ribs, compact full heart and larger size.

Lettuce, Brittany white winter.—Large, round close-hearted head, hardy and productive for winter.

Onion, Earliest Paris Market.—The earliest of white onions.

European Horticulture.

FROM THE FRENCH TRADE PAPERS.

Impatiens Balfouri.—Introduced into England about 1901 from the Himalayas, this balsam is very decorative, growing well in ordinary soil in partial shade, and attaining a size of three feet in height and diameter. The flowers are carmine rose and white, borne in clusters of 15 to 20 on an auxillary peduncle and opening successively. It flowers from the first of July until frost and is most effective. It does not produce fertile seed and must be multiplied by cuttings, its difficulty of propagation being its one failing.

Fragrant Roses.—As for fragrance, the 12 roses awarded first place at the Crystal Palace show in London last July were: Francois Michelon, Leopold Habsbourg, Earl of Dufferin, La France, Augustine Guinnoisseau, Marie Pavie, Robin Lyth, Zephirin Drouhin, Prince Arthur, Ulrich Brunner, Viscountess Folkestone, Gladys Harkness.

Campanula Pyraversi. — (Cayeux.) Hybrid of C. pyramidalis and versicolor; grows three to four feet high in the manner of pyramidalis, a cluster of strong stalks terminating in long spikes of pale blue flowers marked with an eye or ring of dark blue; lasts in bloom a long time, the flowers opening successively.

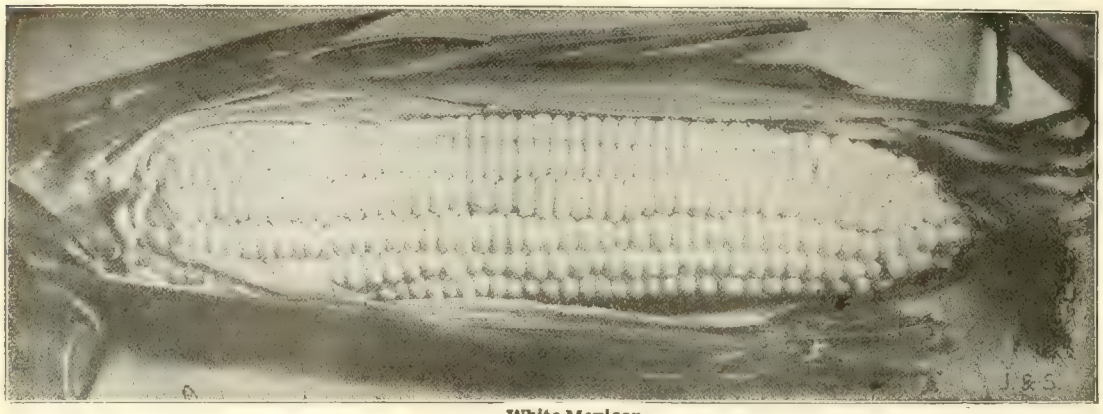
White Mexican.

Every one knows the marvellous sweetness of the old Black Mexican. The White Mexican equals the Black Mexican in sweetness, but is a pure ivory white. It is the first of the extra earlies to be ready for the table. Time from fifty-five to sixty days. It is a bud proposition of the Black Mexican.



White Mexican

We are the originators. You had better look to us for true stock of this marvelous extra early corn. Just the thing for market gardeners.

We are growers for the American Seed trade of **Peas, Beans, Sweet Corn** and **Field Corn.** Peas and Beans are grown at our Michigan stations, Alpena and Millington. Our corn at Sioux City, Ia.

The region around and about Sioux City for the growing of **Sweet Corn** and **Field Corn** is unexcelled, fertile soil, topographical conditions just right climate the best for Fall curing, in fact an ideal spot and unsurpassed in America for corn growing and as far north as all varieties of sweet corn can be safely grown to ripen well.

Prices of Indoor Fruits and Vegetables.

Chicago, December 18.—Mushrooms, 10 cents to 25 cents per pound; asparagus, $2.50 to $3 per dozen bunches; cucumbers, 75 cents to $1 per dozen; tomatoes, 10 cents to 25 cents per pound; radishes, 15 cents to 35 cents per dozen bunches; lettuce, 25 cents per pound.

New York, December 16.—Mushrooms, 65 cents to $1.25 per 4-pound basket; cucumbers, $1 to $1.25 per dozen; tomatoes, 10 cents to 25 cents per pound; radishes, $1.50 to $2.50 per 100 bunches; lettuce, $1.50 to $3 per strap; mint, 50 cents to 65 cents per dozen bunches.

Forcing French Beans.

French beans are esteemed at any time of the year, but especially are they appreciated during the winter and early spring months, when supplies can be obtained from glass-grown plants. Like a few other vegetables, French beans are, when well grown, almost, if not quite, as delicate in flavor grown under glass as when produced in the open. No great skill is required to insure an unbroken supply, but assiduous attention to details is essential.

A good batch of plants in full bearing at this date will prove of immense value to the gardener who is expected to supply during the winter and spring choice vegetables that require artificial heat, and the shelter of glass, in their production. High-class vegetables will undoubtedly be doubly appreciated during the coming winter, for the drouth experienced in the past summer has greatly diminished the supplies of some kinds that are usually available from the open quarters.

I prefer to raise the first batch of French beans for forcing on a half-spent hotbed, sowing the seed in lines, and thinning the plants to about twelve inches apart, says a correspondent in the Gardeners' Magazine. They are grown cool, and as soon as they are well out of the seed-leaf stage are lifted carefully with a good ball of soil, and placed two or three together in ten-inch pots. The compost used consists of three-fifths loam, broken with the hand, one of flaky leaf soil, and one of fairly dry decomposed cow manure, or the manure from a spent mushroom bed. The materials are well mixed and used lumpy. A sprinkling of soot and powdered charcoal is also of benefit. Any stagnation about the roots is fatal, therefore an open soil and ample drainage are important. A humid atmosphere should be maintained, except when flowering, and the plants fully exposed to the light. Red spider can only be kept in check by maintaining a liberal degree of atmospheric humidity, and extra attention must be given to this detail if the plants are near the hot water pipes.

As soon as the plants forming the first batch are established in the pots, a second sowing should be made in 60-sized pots filled with rich loam. Put five seeds in each pot, and plunge the pots in the propagating bed to insure quick and regular germination. When the seedling are three or four inches high place them on a shelf near the roof glass, in a structure in which a temperature of about 70 degrees is maintained. Shift into the fruiting pots, which should be six inches in diameter, for this and subsequent sowings. This is the best size until the days begin to lengthen, when ten-inch pots are the best.

The best results are achieved where a small, low span house can be specially devoted to French beans, as the plants are then under full control.

Underground Truck Farming.

The hanging gardens of Babylon may soon have to give way to the underground truck farms of Mexico if an experiment recently made by a Chihuahua miner becomes generally prevalent in the mining districts of that country. An Almoloya miner has found out that he can save a great deal of time over the putting together of a lettuce leaf sandwich for his lunch, or the occasional partaking of a luscious raw tomato, without having to go to the surface to satisfy his tastes. All he has to do, and he has done it, so he says, is to bring down some good top soil into the mine, plant the seeds and Nature will do the rest, due to the even temperature which prevails in the mine.

As a result of this experiment, this progressive miner has a fine truck farm growing down in one of the old levels of his mine, and so far has produced a diminutive but at the same time a satisfactory crop of potatoes, onions, lettuce and tomatoes. All that is necessary is to take down some planks and on these spread about an inch of good earth, place large potatoes in this, without covering and at a good distance apart, they will soon sprout, and all the work necessary is to keep the suckers and leaves cut off. The potatoes grow to a good size and having been grown in the dark have practically no skin, are dry and mealy and of excellent flavor.—Mexican Mining Journal.

GREENWICH, CONN.—The Inter-State Tree Co. has applied for a certificate of incorporation. The capital stock is $10,000.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y. Thirty-seventh annual convention to be held at Boston, Mass., 1912.

MADERA, CALIF.—Kirkman & Son of Fresno have purchased the Borden estate and will convert it into a nursery.

ROCHESTER, N. Y.—The Western New York Horticultural Society will hold its annual meeting in this city January 24-26. Prominent men connected with the fruit and vegetable industry will address the meeting.

THE annual meeting of the Tennessee State Horticultural Society will be held in Nashville, January 25, 1912. The State Nurserymen's Association meeting will be held at the same place on January 26.

Autumn Fruits at Arnold Arboretum.

Brilliant now are the scarlet fruits of the aromatic sumac, Rhus aromatica, which has been planted freely in great masses along the drives. Beautiful, too, along many of the drives are plants of Aronia nigra, remarks the Bulletin of Popular Information, one of the chokeberries of the eastern United States with its clusters of large drooping black fruits and dark red foliage. Of the native shrubs, however, none now are as brilliant as the High-bush Blueberry, Vaccinium corymbosum, which is conspicuous in the brilliant scarlet of its leaves in many parts of the Arboretum. This is one of the most ornamental shrubs of eastern North America. It grows into a large bush sometimes eight or ten feet high; the habit is good; the flowers are attractive and produced in profusion; and the fruit, which surpasses that of the other blueberries and huckleberries in size and quality, is bright blue, and in the autumn no other shrub is more beautiful. This is a plant to cultivate generally for its fruit and as an ornament of the garden. Like other plants of the heath family, it is not easy to raise from seed but small plants from the swamps can be readily established in ordinary garden soil.

Federal Inspection Bill.

In an address before the Western Association of Nurserymen at the twenty-second annual meeting held at Kansas City, Mo., W. P. Stark, treasurer of Stark Bros.' Nurseries and Orchard Co., Louisiana, Mo., in regard to the Federal Inspection Bill as proposed by the Department of Agriculture stated his position as follows:

The nurseryman, the same as all citizens, should take an active interest in all legislation and especially is it his duty to see that efficient laws are enacted directly connected with the transaction of his business. As regards the Simmons' inspection bill, the nurseryman has not been active enough in protecting himself, and the Department and others at Washington have undertaken the work for him, but they did not practically understand the nursery business and misunderstandings and antagonisms have arisen.

Taking into consideration the different bills which have been offered in congress, and the work done by the nurserymen in preventing drastic legislation, it can be stated that effective legislation is necessary and so recognized, but the nurserymen do not feel that they have been treated fairly and do not place implicit confidence in the sincerity of some of the Department men, and to place the control of one large industry, and indirectly the control of a far greater one—the orchards—in the hands of one man is really placing them in danger of a remedy which might prove to be worse than the original trouble. The San Jose scale, for instance, was at first predicted to be devastating the orchards and forests. During this agitation nursery sales in orchard regions were greatly reduced, but the pest was controlled. If one man with power of quarantine at that time had destroyed the industry of raising fruit trees, it would have been years before the orchards would have recovered.

The nurserymen need national and state inspection, but objection is made to the section which provides: "That the Secretary of Agriculture shall have authority to quarantine any state or any portion thereof when, in his judgment, any dangerous plant disease or insect infection exists in such state, territory or portion, and while such quarantine is in force no stock may be shipped from such section." The objection to this is in giving absolute power to one man. The Department has placed the matter before the public, but the nurserymen who are opposed to the bill should not be misrepresented. There is pressing need of efficient, sane legislation toward an effective control of insect pests and fungous diseases and nurserymen are willing to co-operate in drawing up a rational bill at the present session of congress.

FREEHOLD, N. J.—The thirty-seventh annual meeting of the State Horticultural Society was held December 12-13. An exhibition of fruits, flowers, spraying and other horticultural apparatus was held, and a two days' session devoted to interesting papers.

Landscape Gardening

PROF. CRAIG.

A course for Gardeners, Florists and Home-makers, taught by Prof. Craig and Prof. Beal of Cornell University.

Progressive Florists recognize the growing importance of a knowledge of Landscape Art. Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Plants for the Trade

Wishes all the readers of THE AMERICAN FLORIST, Patrons and Friends a very

Merry Christmas and a Happy New Year.

Tell Them Where You Saw the Advertisement

Azaleas for Christmas

IN BLOOM AND BUD

at Godfrey Aschmann's greenhouses to beat the band, selected for us in Belgium purposely for our Christmas forcing. I tell you they are crackerjacks. We have Mme. Petrick, finest pink, from 75c up. This is the earliest and best of all the pinks.

Stock up with Godfrey Aschmann's Plants, well known from ocean to ocean in quality and prices. It won't pay to let others get ahead of you. Don't look at what is behind, but go right straight forward. Make a break for Godfrey Aschmann's Greenhouses, to the old reliable firm which has always looked after your interests and which proteets you. **We protect the trade.**

We Have No Department Store Customers. We Sell Strictly to the Trade Only.

Please look at our special low prices for superior stock in

AZALEAS.

Another specialty of ours are now in. **Azalea Indica.** New stock. They are all in fine condition, full of buds.

Have only large size of Deutsbhe Perle, double white, $1.25. $1.50, $1.75 to $2.00; Vervæneana, double rose variegated, large sizes only, $1.00, $1.25 $1.50 to $1.75; Mme. Petrick double pink 75c, $1.00, $1.25 to $1.50; a novelty and scarce, very handsome, large flowers resembles Vervæneana, and are called in Belgium the White Vervæneana, price 75c, $1 00, $1.25 to $1.50. Remember, for Christmas forcing we have to select only large, healthy plants; small, weak plants will not force successfully for Christmas.

Four Houses in Ferns

10,000, Pot, Not Bench Grown.

Where will you go for good ferns? We are headquarters for you. We have four houses full; good and cheap.

Neph. Scottii, Scholzeli and Whitmani, 4-in. pots 15c to 20c; 5½ to 6-in. pots, 25c 35c, 40c and 50c; 7-in., 75c to $1.00, as large as a bushel basket.

Boston Ferns, 5½-in., 35c to 40c; 6-in., 50c; 7 in., 75c to $1.00; as large as a bushel basket.

Neph. Cordata Compacta, 4-in., 10c.

Ferns for Dishes, a good assortment, 2½-in. pots $5.00 per 100; large plants.

Pteris Wilsoni Ferns, 6-in. pans, 3 plants in a pan, 25c to 35c per pan; very bushy.

Fern Balls, imported direct from Japan, already started, 50c.

Adiantum Hybridum, the new Maidenhair Fern, 3-in., 8c; medium size 4 in., 10c; large 4-in., 15c.

In Rubbers (Ficus Elastica) we are well prepared; finest stock in the country; 5½, 6 to 7 in. pots, 25c, 35c, 40c, 50c, 75c to $1.00; all staked up.

Cyclamen Grandiflora, 4-in., 25c; 5¼-in., 35c.

POINSETTIAS.

Just look! We have a full house of that Christmas novelty, the **Poinsettia,** in bloom, medium size, 3-in., 15c; 4-in., 25c; 5, 5½ to 6 in., for basket work or for cutting, 35c, 40c to 50c; 8 to 10-in pans, 3 Poinsettias in center, and either Asparagus Plumosus Nanus or Assorted Dish Ferns as a border, 75c, $1.00 to $1.25 per pan.

THE TOWN TALK.

Did you see those large 12-inch pans made up of 3 large Poinsettias, 20 to 25 in. high, trimmed with Scottii, Whitmani and other Ferns, Areca Palms, Cocos Asparagus etc., in McGint:'s show window? Aren't they dainties? They came from Godfrey Aschmann's Greenhouses. We paid only $2.50 for them and can sell them for a ten dollar bill." "O, I bought one not quite as big as yours (11-in. pan), for which I paid Aschmann only two dollars," explained Mr. Muller. "I let it go for eight dollars. I thought that was a fair profit."

Begonia Gloire de Lorraine.

This is another great specialty of ours. We have grown them very extensively for the past ten years. Our special treatment makes the flowers very bright. We have the bright red and the pink Lonsdale. Have a houseful. Now ready, in bloom for Christmas, 6-in. pots, 50c, 60c, 75c to $1.00; 3-in. pots, 12c 5 to 5½-in. pots, 35c.

Begonia Gloire de Lorraine Betty Anderson, this is a new handsome variety; bushy; have only large 7-in. size to offer, $1.50.

Begonias New Improved Erfordi, Aschmann's Beauty, the finest Christmas and winter blooming Begonia in existence. Their beautiful pink and bright red large flowers are a puzzle to anyone who sees them in bloom; in flower now and all the winter through; large 4-in. pots, 20c; large 5¼-in. pots, 25c to 35c. Bear in mind this is an immense bloomer which has no equal.

We have the **Bright Red** and the **Pink Lonsdale,** and don't forget we have also the newest, the

Begonia Gloire de Cincinnati, 4-in. pots, 35c to 40c; 5½-in. pots, 50c to 75c; 6-in., $1.00 to $1.50.

Jerusalem Cherries.

What is Christmas without red berries like those on the Holly? Also the **Jerusalem Cherries** are welcome plants and much admired by everyone interested in Christmas decorations. We never had in all our experience a better stock of Jerusalem Cherries than we have this year. Every plant is loaded with red, ripe berries; only large plants. We can offer 6 to 6½ in. pots, 35c, 40c, 50c, 75c to $1.00.

Just Arrived with the Azaleas.

A fine consignment of **Latania Borbonica,** in first-class condition, perfect foliage, large stock, 8 good leaves, height given in consular invoice at 35 to 40 in., fit for 7 to 8 in pots, 75c to $1.00.

Combination Latania Borbonica (3 plants) in a 6-in. pot, which gives them a fine appearance, bushy, about 13 to 14 leaves to a pot, 6-in. pots, 50c, 60c to 75c

Cocos Weddelliana Palms, made up of 3 plants, 4 to 5-in. pots, 30c and 40c; 3-in., 15c, 18c and 20c; 4-in., 25c.

25 at 100 rates. **Cash with order, please.**

All plants must travel at purchaser's risk.

ARAUCARIA EXCELSA

Our Specialty.

Warning — Don't be deceived. Now, as well as for the last twenty-five years, we hold the ground as leaders in importing, growing and shipping of our specialty, the Araucarias. For decorative purposes, in connection with palms, they will make a fine display. Christmas prices of the so well known evergreen novelty, the Araucarias, cut in half:

Araucaria Excelsa, raised from top cuttings, 6-7 inch pots, 4 to 5 years old 5, 6 and 7 tiers 25, 28, 30, 35, 40-in. in height. .....$1.00, $1.25, $1.50, $2.00 to $2.50 each

Araucaria Excelsa, specimen plants, 6-7 in. pots, 35 to 50 in. high g from bottom up, only $2.00

Araucaria Excelsa Glauca and **Robusta compacta,** 6-7 in. pots, fine bushy plants .. ..$1.00, $1.25, $1.50, $2.00 each

Araucaria Excelsa, out of 5, 5½, and 6 in. pots, 2 to 3 years old, 3, 4 and 5 tiers, 16, 18, 20 to 30 inches high..... ..... 50c, 75c and $1.00 each

Look! **Kentia Belmoreana,** new stock, arrived with the Azaleas from Europe, 25 in. high, 5½ in pots only 50c to 60c.

Kentia Belmoreana, 4 year old, 40 to 50 inches high, $1.00, $1.25 and $1.50.

Kentia Forsteriana, 4 year old, 30 to 35 inches high, $1.00, $1.25, $1.50 and $2.00.

Kentia Forsteriana, 4 year old, 24 to 26 inches high, 50c to 75c.

Kentia Belmoreana, 4 year old, combination or made up of 3 plants, 26 to 28 inches high, 75c, $1.00 and $1.25

Kentia Belmoreana, 4 year old, single, 26, 28 to 30 inches high, 75c, $1.00 and $1.25.

Areca Lutescens, 4 in. pots, made up, 18 to 20 in. high, 20c to 25c; 5-in., 20 to 25 in. high, 30c to 35c

20,000 Asparagus Plumosus Nanus, 2½-in., $3.00 per 100, $25 00 per 1000; 3-in., $5.00 per 100; 4-in., $10.00 per 100.

Asparagus Sprengeri, large size, 4-in., 15c; medium size, 4 in., 10c; 2½-in., $3.00 per 100.

Cineraria Hybrida Grandiflora, Aschmann's well-known strain, 2½-in. pots, 3c; 3-in., 8c; 4-in., 15c.

Primula Obconica Grandiflora, assorted colors, in bloom, large 4-in., 20c; medium large 5½-in., 25c; bushy.

Primula Chinensis, John F. Rupp's so well known strain, assorted colors, 4-in., 10c; 5¼-in. pots, $2.50 per doz.

What Mr. F. J. Michell, of the Well Known Seed House, Henry F. Michell Company, Philadelphia, Said:

"Have just visited the greenhouses of Godfrey Aschmann, and must say it was indeed a great surprise to me. I have never seen a better lot of Araucarias, Azaleas, Ferns and other plants in all sizes and prices as are at Mr. Aschmann's."

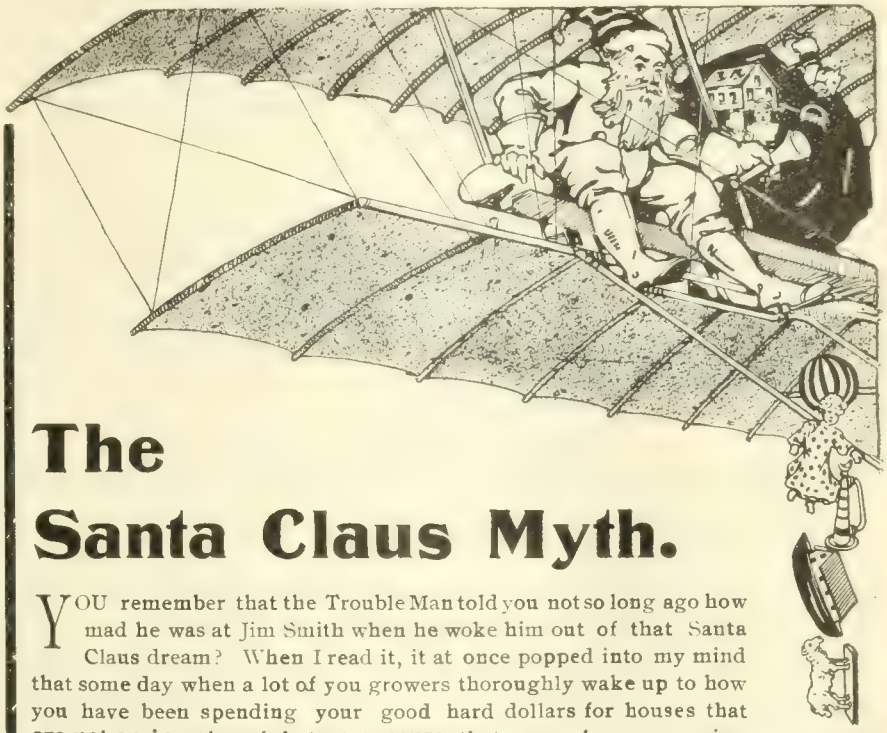
Please mention the American Florist when writing.



The Santa Claus Myth.

YOU remember that the Trouble Man told you not so long ago how mad he was at Jim Smith when he woke him out of that Santa Claus dream? When I read it, it at once popped into my mind that some day when a lot of you growers thoroughly wake up to how you have been spending your good hard dollars for houses that **are not an investment,** but **an expense,** that some of you are going to be pretty sour about it. If that day happens to be this Xmas, and your good intentioned neighbor, who has his money invested in our Iron Frame Houses, comes along and wishes you a Merry Xmas, it's our notion he won't get a very happy reception.

Now you may think that such talk is "just for advertising purposes," but be that as it may, here is a thot that you better think over good and hard before you build this coming year. Here it is: It costs more to put up a cypress house than it does our Half Iron Frame (a good deal more). It costs no more to put up our Iron Frame House than it does our Semi-Iron in widths from 40 feet up.

Sooner or later the man who builds all cypress houses will build better—he'll have to. And while he is building, inasmuch as there is so little actual difference in the expense of our Half Iron and the Full Iron Frame, why not jump straight from the cypress house to an Iron Frame one?

Let us give you some actual facts and figures.

It will open your eyes. Best way to do it is to have us come and talk it over; then you can fire all the questions you want at us.

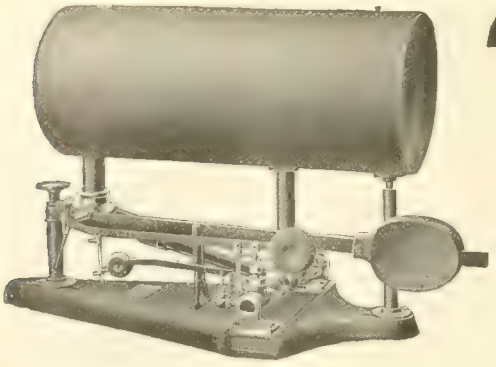
Hitchings & Company

Write To or Call at our General Offices

ELIZABETH, NEW JERSEY

N. Y. Office, 1170 Broadway.

Chas. Metcalf, a vegetable grower of Milford Mass., first built an all-cypress house—then he passed right by the Half Iron Frame Construction and bought one of our Full Iron Framers, 40x216. We are just comp eting another for him of same size. Ask him what he thinks of Iron Frame Houses—and why he buys ours.



Where There Is Condensation

——there is need for a **Morehead Steam Trap**
Condensation in steam lines is akin to matter out of place—means wasted energy.

If your lines are sluggish—if your houses are not of uniform temperature, write us. We guarantee to drain your lines perfectly—return the pure, hot condensation to your boiler without pump or injector or make no charge for the trial. Obey that impulse—write now.

Send for "Book on Condensation."

Morehead Manufacturing Co.,

Dept, "N," DETROIT, MICHIGAN

——Stocks Carried in——

New York, Chicago, Wichita, Kan., New Orleans, La, Philadelphia, Birmingham, Ala., Memphis, Tenn., Los Angeles, Chatham, Ontario, San Francisco

Cattle Manure in Bags

Shredded or Pulverized

Pure—dry—uniform and reliable. The best of all manures for the greenhouse. Florists all over the country are using it instead of rough manure.

Pulverized Sheep Manure

Absolutely the best Sheep Manure on the market. Pure manure and nothing else. The best fertilizer for carnations and for liquid top-dressing. Unequalled for all field use. Write for circulars and prices.

The Pulverized Manure Company,
32 Union Stock Yards, Chicago

GRAVITY SOIL CARRIER

In conveying Bench Soil into or out of Greenhouses,

Saves Money, Labor and Wear and Tear on Benches and Houses

PEIRCE BROTHERS, Waltham, Mass., use our Gravity Soil Carrier and say *"The Carrier easily paid for itself the first week we had it in operation."*

INEXPENSIVE. For further particulars and prices address

The Importance of This Reason Book.

BEFORE talking about the Reason Booklet itself, let us first ask you a question or two:

When you buy anything of importance involving the expenditure of several hundred or thousands of dollars, do you rely entirely on your own individual information, and go right out and buy it? Of course you don't.

In making your final decision, are you not strongly influenced by the opinion of some one who has already bought—and is satisfied?

Doesn't the fact that this or that person, company or institution of prominence has put their stamp of approval on it, by putting their money into it, carry a good deal of weight with you!

This being so, then naturally enough you will buy a greenhouse much the same way. Suppose, for instance, you want to know thoroughly about the U-Bar Greenhouse, and have been wondering if there are any houses in your vicinity you could see; wouldn't a booklet giving you the names of all U-Bar owners and the character and extent of the greenhouse they own, be of interest and assistance to you?

Let us suppose still further, that you want to confirm your decision to buy a U-Bar house by seeing who some of the others are who arrived at the same decision and built; wouldn't a booklet grouping such names in a readily get-at-able way be just the thing you want?

That's why we made just such a booklet.

It's called "Reasons."

The Reasons themselves are told in 93 words, right at the start—the rest is given over to a unique and interesting arrangement of the locations and owners of U-Bar houses built in the last few years. Send for this Booklet. With it we will mail you our catalog and a section of the **U-Bar itself**—so you can see exactly what the U-Bar is.

The U-Bar itself is mailed to you in a green box like this.

WHAT THE USERS SAY ABOUT KROESCHELL BOILERS

Saved Two Carloads of Coal; Does Not Need to Fire Boiler From 11 p. m. to 6 a. m.

Your No. 9 Boiler is heating my entire range of two houses, 18x132, one house 6x108, two houses 16x88, one house 20x86, and one house 24x50, and will easily take care of 5,000 sq. ft. more. With the thermometer 18 degrees outdoors, **fire at 11 p.m. and not again until 6 a.m.** The boiler surely is giving me perfect satisfaction. I have used one steam and five hot water boilers. I like your boiler and cannot keep still when I meet a brother florist, but must tell him about your boiler and how much it has saved me in coal bills. With my last boilers I required four to five carloads of coal to heat the same space which is now heated by your boiler with about three carloads of coal. You for another boiler when I have to buy again.

H. M. HUMFELD, Frankfort, Ind.

KROESCHELL BROS. CO. 452 W. ERIE ST. CHICAGO

Get the big prices on the early market

The two layers of glass let your plants have all the light all the time

This causes them to mature earlier—become hardier—sturdier. When the plants grown under single glass sash (that must be covered) are still small and weak, your plants under Sunlight Sash will be ready for the field. The resulting crops will get the big prices.

Start now for early Spring Plants

Get some Sunlight Sash and have your cabbage, cauliflower, tomato or other plants, etc., ready to set out as soon as the weather permits.

Send for these books. One is our free catalog; the other is a book on hot-beds and cold-frames by Professor Massey. It is authoritative and of vital interest to all growers, florists and gardeners. 4c in stamps will bring Professor Massey's book in addition to the catalog.

Have Two L. & B. Houses and Have Graded for Another.

WE are not denying that we had troubles of our own to get the firm of Myers & Samtman (so well known in the Philadelphia section) to build one of our Sectional Iron Frame Houses. We have a notion that their ancestors were from Missouri, for they certainly had to be **"shown."**

Not that we haven't the superior construction to show, but that Myers & Samtman wanted a thorough understanding of its superior points, and they got them.

The last house is equipped with our new chain operated ventilating gear. Four runs of sash can be operated from the one point—two runs at the one time. Doesn't that sound good to you? Send for facts, figures and photos.

We recently wrote them, asking their frank opinion of their house, for use in this particular ad. This is their reply:

"You might say Myers & Samtman built one of your Iron Frame Houses in 1910 and another in 1911, and, being so well pleased, have graded for another. Also that they feel the iron-constructed houses are permanent structures—not temporary ones like the wooden structures we used to build."

THE GUARANTEED GREENHOUSE

What sort of a guarantee does your local planing mill give you on greenhouse material? What sort of a guarantee does the interior finish manufacturer give you on greenhouse material? What sort of a guarantee can any firm give that is obliged to go out and buy most of the material after they get your order?

Now we are serious about this guarantee proposition. For many years we have tried to devise a method of identification for our material so that we could unconditionally guarantee it. We think we have at last hit on a plan. We have not worked it out in detail but you will hear more about it very shortly. We want you to know now that every piece of material that we sell is sold with an absolute guarantee. We want you to know that we are interested as a firm, also personally, in each and every customer and we intend that each of these customers shall have the fullest measure of satisfaction. This guarantee will be made very binding. Before you build another greenhouse get figures from a firm that makes nothing else but greenhouses. The first step is to get our catalogues.

Send for the one you want:
No. 6 Heating Goods, Pipes, etc.
No. 7 Greenhouse Materials.

Next meeting and exhibition, August, 1912. I. S. HENDRICKSON, Floral Park, N.Y., President; L. MERTON GAGE, Orange, Mass., Secretary.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

Next meeting at Boston, Mass., 1912. W. H. DUNN, Kansas City, Mo., Pres.; F. L. MULFORD Washington, D. C., Sec'y-Treas.

THE CHRISTMAS BUSINESS.

Good Trade Everywhere.

A general increase in the amount of business done during the holidays of 1911 is reported from all sections of the country. The weather in most of the large cities and throughout the land was very propitious, not only for the sale of plants and flowers, but also for the delivery on Sunday and Monday. The increase in business is reported all the way from 10 per cent to 50 per cent. The trade in well-grown flowering plants shows a steady increase and has become the great factor of Christmas business. Roses and carnations were not so plentiful as a year ago and in some cases are reported of not so good a quality. The reduced quantity, however, was the cause of advanced prices, which in many cases swelled the total amount of business while in others it caused a falling off in the quantity sold. Other stock was received in most cases in supply to meet the demand and the prices were about the same as last year, but there was a general better cleaning up of all stock than last year. The practice of pickling of carnations has had a serious effect with some customers in some sections, they refusing to buy them, being afraid that they will not last. The violet crop was large and in all the large centres there were plenty to meet the demand. An immense business was done in Christmas greens, the decorations being very general and the high grade stock sold up cleanly.

ATLANTA, GA.—The flowers were of excellent quality and all in fine shape for Christmas, writes The Atlantic Greenhouse, and the trade will show an increase of twenty per cent over last year. There were plenty of roses and carnations and prices were higher than the year before, and the fine weather was greatly responsible for the improvement in quality. There was not much call for bulbous flowers. Blooming plants sold better, especially cyclamen and poinsettias, which took the lead. Azaleas were not very good this year. The Christmas as a whole, was the best we ever had, the holly and decorative greens sold out clean and the prospects for the New Year are bright.

BRAMPTON, ONT., CAN.—An increase of 10 per cent is reported in the holiday trade this year by T. W. Duggan, manager of the Estate of H. Dale. Our trade is wholesale only and while the prices were about the same, yet there were neither enough roses nor carnations to meet the demand. There was a good supply of violets enough for all requests and there was also a sufficient quantity of bulbous flowers. The stock was all of good quality, as fine as last year. The general conditions of trade are good.

LYNN, MASS.—The particular feature of the business this year was the early buying, writes F. J. Dolansky. We were practically sold out of plants as early as Friday. The increase in business was twenty-five per cent over last year. The supply of cut flowers was about equal to the demand, prices ruling about the same as last year, and the quality was somewhat better. The sale of flowering plants was large and increases every year.

CEDAR RAPIDS, IA.—There was a large increase in the Christmas trade over last year, being fully forty per cent, says Grant Newport. Our trade is wholesale, so we do not have the opportunity to know much of the retail market. The supply of cut flowers was good, fully equal to the demand and the quality was better than last year. The demand for flowering plants was mostly for cyclamen and poinsettias.

UTICA, N. Y.—Business this year was about the same as last, reports J. C. Bigelow & Son. There was a good supply of roses and carnations and plenty of bulbous stock, but violets were scarce. The quality of the flowers was not as good as usual, the warm weather having made them soft. The demand for plants was about the same with the exception of poinsettias for which there was a large sale.

PEORIA, ILL.—We cleaned up everything, says B. Juerjens, and the supply about equaled the demand. The business this year was about the same as that done in 1910. Roses were of good quality and so were carnations, but there were not enough of the latter, while prices were the same as last year. The sale of plants was not so large as the year previous. Holly was scarce and poor.

LINCOLN, NEB.—As near as we can ascertain the Christmas trade was about 40 per cent more than last year, reports C. H. Frey. The merchants in many lines of business complained that trade was not up to expectations but it was not so with the florists. The cash sales were larger than ever and there was little complaint of high prices. There was probably one or more plants or boxes of cut flowers delivered to over one-half of the homes of the city. The prices of cut flowers were about the same as last year, but there were not nearly enough flowers to supply the demand, and the quality was better, especially of roses, carnations and poinsettias. Bulbous stock was in good supply but sold slowly with the exception of Paper White narcissus and lilies, which sold well. There was a much larger call for cut poinsettias as well as of roses and carnations of the best grades. The demand for flowering plants was increased, especially poinsettias, cyclamen, Begonia Glory of Cincinnati and azaleas.

SPRINGFIELD, MO.—The business this Christmas will show a large increase over that of last year, states W. A. Chalfant, being about fifty per cent. Cut flowers were more in demand than plants and the greatest call was of course for red. Red roses and red carnations had the call, the sale of Richmond roses being especially good. The supply of good stock fell short of the request and prices were from ten to twenty-five per cent higher, but the quality of the stock was much better than last year. There was but little demand for bulbous flowers, they only sell when all other stock is sold out. Azaleas and all colored flowering plants had a good sale, but pots of narcissus and Roman hyacinths went slowly.

BATTLE CREEK, MICH.—S. W. Coggan states the holiday trade for 1911 was 10 per cent better than in the previous year. The largest increase was for plants, both blooming and decorative plants cleaned out, everything selling, and there was a large demand for fancy baskets made up of decorative plants. The prices of both roses and carnations were higher. This caused some falling off in demand which made the supply equal to the requests. Of other flowers the prices and receipts were about the same as last year, violets were, however, short of demand, but there was plenty of all bulbous flowers. The quality of the roses was poor, but the carnations were better than in some years. All the other flowers were very good.

POUGHKEEPSIE, N. Y.—The business was the best ever is the word from the Saltford Flower shop. We had perfect weather for delivery and the plants did not require heavy wrapping. The stock was fine and there was plenty of it. Basket arrangements of plants are taking the place of boxes of flowers more and more every year. Cyclamens in the large sizes sold extremely well. We did not have enough to go around. The demand for poinsettias both as a vase flower and for corsages, made up with lily of the valley or hyacinths worked in between the bracts, make a swell effect and is increasing. The sales were larger than ever, both in number and amounts.

LAWRENCE, KANS.—There was an increased demand for plants this year, writes A. Whitcomb & Son. The trade was about the same as at the last holiday season, but the prices of flowers were higher, and we never have enough to supply the demand. Flowering plants of all kinds sold very well.

START the new year right by sending in your subscription promptly.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

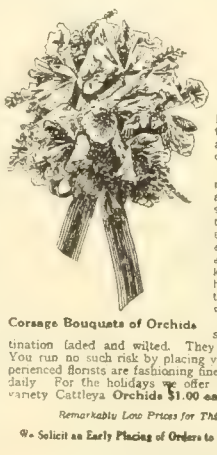
Church Wedding Decoration.

The wedding decoration arranged by the Smith & Fetters Co. of Cleveland, O., which we illustrate, was very beautiful and elaborate and was for the Sanders-Clarke wedding, the ceremony taking place in the Second Presbyterian Church November 22. Frank M. Smith, who had charge of all the arrangements, came especially from Los Angeles, where he now resides, to plan and execute the elaborate decorations.

At the altar were tall standards bearing cathedral candles arranged in pyramidal form reaching very high, each standard having large bunches of white chrysanthemums. Behind these on the altar, which was of white enamel, were draped strings of asparagus, through which were fastened bunches of white chrysanthemums. The gold pillars at each side of the altar were caught with fish-net illusion which came down to the candle standards on the floor; in this netting 600 American Beauty roses were fastened which gave a touch of color that enhanced the beauty of the altar setting. In front of the altar two immense bunches of chrysanthemums on standards marked the position of the bridal party during the ceremony. At each corner in the front of the church pyramids of standards with candles were arranged in a similar manner as the altar. Two pillars in the balcony were arranged with American Beauties in tree form. The large chandelier in the center was draped with southern smilax and white chrysanthemums. At the entrance for the bridal party a twelve foot arch of white chrysanthemums was raised and large bunches of the same flowers were fastened on every other pew. One thousand American Beauty roses and thousands of white chrysanthemums were used in the decoration.

The bride carried a large arm bunch of lily of the valley on one side of which, tied with lace, were sprays of white lilac. The maid of honor carried a similar bunch of Mrs. Taft roses, a cluster of white lilac being tied on the side with white satin ribbon. The bridesmaids' bunches were similar in form and were of American Beauty with white lilac at the side and tied with green satin ribbons The ushers wore gardenias.

The house was decorated with masses of American Beauties and white chrysanthemums and the bridal table had three large gold urns filled with Mrs. Taft roses, on the side of which was fastened white lilac and American Beauties tied with Nile green satin ribbon. Sprays of roses extended from the urns to the plates. The flat service on the table was of solid gold with gold candlesticks.



A Formal Expression

It is not generally known that in a quiet way we serve a splendid Orchid and Gardenia trade.

We receive daily these rare and beautiful flowers and fashion them into Corsage Bouquets that are distinctive for their freshness and beauty, because they are made up by florists who are bouquet makers, who know their work and enjoy having the flowers leave their fingers as fresh as when taken from the vines

Corsage Bouquets of Orchids

Christmas at the Chicago Stores.

The Christmas business for 1911 has passed into history as one of the best the trade ever had. The weather was all that could be desired and of the finest that could be had at this season. While Friday was cloudy and looked like rain yet by noon it cleared off and was pleasant. Saturday was clear and warm and Sunday and Christmas were the same. The result was that the stores were crowded and the fine showing of plants melted before the warmth of the customers. Sunday and Monday were especially fine for delivery, which is always such a great boon to the busy proprietors, saving much time in wrapping and also guaranteeing safe delivery. Many of the stores declare the trade as the best they have ever had and one busy proprietor had just time to say "We are doing too much business." The use of holly throughout the city and suburbs was very large, the windows in the residential part of the city being freely decorated with wreaths, in fact the window which contained no decoration was particularly noticeable, the hanging of wreaths being so general. Christmas trees were sold in large numbers and it was a beautiful sight on Christmas night to walk through the streets and see the trees beautifully decorated and with candles and colored lights in nearly every window. The holly of the best grades was all sold two days before Christmas and the manufacturers of wreaths were pushed to the limit to supply the demand.

The stores presented a beautiful display, the plants and flowers being arranged in the best possible manner to induce the customers to purchase their Christmas gifts. The walls and ceilings were festooned and Christmas bells were hung both singly and in groups. Blooming plants were a prominent feature both single as specimens and in large and small combinations in baskets and in decorated boxes. Poinsettias were lavishly shown and some choice stock was seen with all the dealers. Azaleas were the popular plants everywhere and were quickly sold, these being entirely sold out at some places as early as Saturday morning. Begonia Gloire de Lorraine and Glory of Cincinnati were to be seen in splendid shape. Some very fine Erica melanthera were offered and well grown ardisias were also displayed. Cyclamen sold well and some of the plants were exceptionally well grown, being well clothed with foliage and with a profusion of bloom. Lily of the valley in

CHURCH WEDDING DECORATION.

Arranged by Smith & Fetters Co., Cleveland, O., November 22, 1911.

pots were nicely grown and both Primula sinensis and obconica were to be had in finely grown stock. Otaheite oranges well fruited and of good color were offered at the stores carrying the higher priced grades of stock. A feature at many of the stores were araucarias with small bows of red ribbon tied on the branches.

In flowers all were well supplied with the finest stock, large vases of American Beauty and Richmond roses were prominent as well as fine Killarney and other roses. Violets, lily of the valley, and orchids were used largely for corsages, and there was a fine stock to be had at all the stores. Red carnations were in great demand and the other colors sold well. Cut poinsettias were to be seen everywhere but they did not seem to meet with the demand that they have in some years heretofore, still it may be that the supply was far more than it has been in other years. The dealers all rivaled each other in displaying the stock to the best advantage and the stores were all a glorious sight on Friday and Saturday, each one having some prominent feature or manner of showing the plants.

A few of the most attractive offerings are enumerated below. In the down-town stores Fleischman had an elegant display of beautiful plants. A staging was erected on one side of the store and on this was arranged magnificent specimens of poinsettias, azaleas, begonias, cyclamen and other plants. One of windows contained finely grown ardisias and in the other were plants of cattleyas in bloom and nicely arranged plant combinations in gilt boxes. Some very fine and expensive baskets were also shown. At the Bohannon Floral Co. were some beautiful specimen plants, the cyclamen especially being extra large and beautifully flowered. Plant baskets were a very attractive feature, they being of different styles and sizes to meet the requirements of the different customers.

A. Lange had a grand display of plants and flowers and the store was filled with an immense quantity of splendid stock. Azaleas and begonias were exceptionally fine and a very large business was done all the week before Christmas. H. C. Rowe's enlarged store presented a beautiful appearance with a magnificent lot of azaleas and poinsettias and a splendid assortment of combination baskets. John Mangel's windows were very attractively arranged with fine specimen plants and a display of flowers that caught the eyes of the many shoppers passing this busy corner on Wabash avenue. Beautifully arranged baskets of roses and orchids and a grand display of violets were also a feature. Canger & Gormley presented a fine lot of plants and flowers for their customers' inspection in the pretty store on N. State street. The Alpha Floral Co. had a magnificent stock of both plants and flowers and the sales came so rapidly on Friday and Saturday that frequent trips had to be made to the greenhouses to replenish the stock.

The stores on the south side presented a gorgeous display. W. J. Smyth's two windows on Michigan avenue and Thirty-first street were very attractive; one was filled with poinsettias backed by colored beech boughs, and the other was filled with finely grown Erica melanthera. The store contained a beautiful assortment of azaleas and very fine plant baskets in variety. Baskets for ruscus statice and other dried flowers were artistically arranged ornamented with nicely tied bows. At Muir's on Michigan avenue were seen a splendid asortment of plant baskets and boxes, the latter being made of birch bark and they were of all sizes. Poinsettias and ericas were fine, especially the latter, the plants being large and exceptionally well bloomed. The specimen plants were attractively furnished with raffia coverings. C. A. Samuelson had the greenhouse in the rear filled with a beautiful line of stock. Expensive combinations of plants in large baskets were a magnificent sight and splendid specimens of poinsettias, begonias, cyclamen and Othaheite oranges were shown. Camellias in bloom were seen here in fine condition for early winter.

Schiller on the west side on Madison street presented a beautifully arranged store with elegant stock. Finely grown azaleas, begonias, poinsettias, and other stock with a great assortment of plant baskets both expensive and of smaller sizes were attractive. The E. Wienhoeber Floral Co. filled the office and show house on the north side with a splendid assortment of nicely grown azaleas, poinsettias and other blooming plants artistically displayed. The Adams-Robertson Co. in their new store had a choice collection of flowering plants and the windows were very attractively arranged with the finest of flowers and plants. The business at this store far exceeded the most sanguine expectations of the proprietors. The George Wittbold Co., both at Buckingham place and on North Clark street, were well supplied with the best of stock and an immense business was transacted. All the stores were nearly depleted on Sunday, but they all were open most all day and the customers kept coming until night fall selecting their purchases, which kept everyone busy all day Christmas making and preparing deliveries. A trip around the stores on Monday morning found everybody extremely tired but all wearing expansive smiles.

Haury & Sons, Nashville, Tenn.

The opening of the store of Haury & Sons in this city, recently, gives Nashville another first-class floral store which is on a plane equal to the others already established. The day of the opening the store, which we illustrate, was visited by hundreds of citizens. John G. Haury and his brother Lou Haury, Jr., have charge of the store and conduct the business. An Italian orchestra played a fine programme of music the day of the opening. One of the souvenirs of that day was a beautiful little fern dish of china in which the words, "Compliments of Haury & Sons," were blown. The floor is tiled and the store is a very pretty one. M. C. D.

Scale on Palms.

ED. AMERICAN FLORIST :—

Can you inform me of the best methods of keeping palms clean of scale and thrips. SUBSCRIBER.

Fumigating with nicotine paper will keep down thrips. The young scale can be killed by spraying with nicotine solution, but be sure the spray touches the insect. For the hard-shelled scale the treatment most often used is to dip the plant in a solution of sulpho-tobacco soap. After the plant has been taken out of the solution it should remain lying on its side until thoroughly drained off, so as not to have the soapy matter run into the soil. To prevent damage to the plant, it is better to place the plant where it will not be in the direct rays of the sun for some hours after being dipped in the solution. W.

ALTOONA, PA.—Myers Bros. have moved their store from Eleventh avenue to 1016 Green avenue. The store has been beautifully fitted up and a splendid assortment of plants and flowers is displayed.

HAURY & SON'S NEW STORE, NASHVILLE, TENN.

CHRISTMAS DISPLAY AT W. J. SMYTH'S STORE, CHICAGO.

International Horticultural Exhibition,

LONDON, ENGLAND, 1912.

It can now be stated that His Majesty, King George V, has just communicated to the directors of the International Horticultural Exhibition, to be held at London, England, his intention formally to open the exhibition at 12 o'clock on May 22, 1912. This great show will take place in the Royal Hospital grounds, Chelsea, and that it will be open for eight days.

The directors have agreed to give to all Fellows of the Royal Horticultural Society certain special privileges over the general public in regard to the purchase of tickets for the exhibition, and to allow all such tickets purchased by Fellows of the society to be transferable.

The directors have decided on the following prices of admission:

	Before 5 p.m.			5 to 10 p.m.		
	£	s.	d.	£	s.	d.
May 22	2	2	0	1	1	0
May 23	1	1	0		10	0
May 24		10	0		5	0
May 25		5	0		2	6

The prices for all day on May 27 are two pence six shillings and one shilling on the following days of the exhibition.

It is gratifying to be able to announce that in the floricultural section British growers have made a very ready response to the invitations addressed to them. Foreign floriculturists from most parts of the world are also applying for exhibition space so that the international character of the show will be well maintained. Horticultural sundries will be shown in a state of completeness never before known at an English horticultural show. In every case the awards will be made by a specially qualified jury.

The following extracts are from a paper read before the Royal Horticultural Society by Edward White, the managing director:

"The great event of next year, one perhaps may go so far as to call it the greatest horticultural event of this generation. The grand exhibition held in 1866 was an important affair and there have been international displays at Paris, Ghent, Berlin, Haarlem, Florence, Lyons, Turin and other cities. The chief characteristic of our exhibition at the end of May, 1912, will probably be the all-around quality of the exhibits, rather than the supremacy of any one class, except, perhaps, orchids, which has marked other exhibitions, such as the azaleas, camellias and orchids at Ghent and the show of tulips at Haarlem. The difficulty in securing a suitable site was overcome by an arrangement to occupy 21 acres of the grounds of the Royal Hospital at Chelsea, which include the Ranelagh Gardens. The position is ideal, there being two entrances within a few minutes' walk of Sloane Square station. There is open space for tents covering nearly five acres and there are in addition several broad, shaded avenues, and sheltered and mature gardens, samples of middle Victorian gardening, which will make a perfect background for out-doors exhibits, and rock and water gardens. The largest tent will cover nearly three and a half acres, being 220 yards in length and 45 feet in height, giving a show space of nearly 75,000 square feet. It is proposed to illuminate the grounds and engage the best military bands.

"In comparing the schedule of this great exhibition with that held in 1866 there are 428 classes in 1912 against 220 at the earlier exhibition. Exhibitions of groups were practically unknown then, while the applications for spaces for groups for this show already number 100. The orchid classes have grown from nine, the largest class being 50 plants, to 29, with two groups of 500 square feet. The largest class for roses 1866 was for 20 plants in 8-inch pots. In 1912 there are prizes for groups not exceeding 500 square feet and nine classes for cut roses against one in 1866. Applications for space for collective exhibits have come in from several foreign countries, and the total number of entries already exceed 400, irrespective of the exhibition of horticultural sundries, which promises to be the most complete and interesting ever seen. No less than 38 very fine cups and awards have been promised for special premiums. The total prize list will probably exceed £4,000.

"A special building has been allotted to scientific exhibits and will contain interesting specimens of the sections of vegetable physiology, genetics, economic entomology and economic mycology. Leading investigators on the continent and in America have promised assistance. Many prominent educators from European countries and America will read papers and assist in the discussions at the conference, and in the discussion in regard to legislation in connection with plant diseases.

THE ROSE.

Early Winter Culture.

There will be no let up in the rose growers' work as the days grow shorter for there will be many little details to look after each and every one of which is of vital importance.

First of all the plants should be gone over and tied very carefully. By this we mean to tie the wood so it will not be overcrowded, and the ties should be placed just below where the flowers are to be cut if the work is done properly. There need be no occasion to cut a string or tie at any time to release a bud during cutting. Do not be too anxious to cut down too low on the young stock in order to get a little extra length of stem, especially the Killarneys, as very often if this is done they will fail to break properly. It is far better to leave at least two good eyes on top growth and three to five on the canes coming from the soil than to check the plants or induce weak growth; encourage length of stem by maintaining vigor in the plants when they should be assisted in every way to stand the strain they will be subjected to for the next three months.

After tying one has a better chance to clean off the beds, and all decaying or yellow foliage should be removed from plants and beds. Keep the surroundings clean by all means, and to avoid a bad dose of "Black spot" let up on the syringing somewhat—on the Richmond and American Beauty twice a week being sufficient during the winter months, but let it be understood that the syringing should be thoroughly done, using all the pressure possible and spraying the underside of the foliage, otherwise with the increased artificial heat the plants will soon be overrun with red spider.

It is not advisable to wait until the plants have become spotted here and there with mildew before applying sulphur. Keep a little on the pipes all the time. The same rule applies to fumigating, which should be done once every week. Very little fumigating paper is used and the flowers are never injured by an overdose of smoke in order to kill off green fly or aphis. We have found that by having the night man fumigate just before daylight on a clear morning followed up by a good syringing that there are seldom any signs of fly seen in the houses.

There should be at least three thermometers distributed through each house, one at each end and one in the center. In this way one can detect any variation of temperature in the house and put on a few extra pipes to even things up. If there is a difference of three to five degrees this should be done. Self-registering thermometers incased in a wire case that cannot be tampered with should be placed in the center of each house. These are the least expensive safeguard one can install in the way of a thermometer; at the same time there are several practical electrically operated thermostats that are far superior to the self-registering thermometers, for they can be wired so as to sound an alarm at any part of the plant or dwelling and we strongly advocate the best, although the first cost may be a little more. Do not think for a moment that any old thermometer will do, but get a reliable kind and test them by placing them all together side by side and carefully note the difference. If there should be a difference of several degrees mark the ones that vary from the thermometers that you know are correct and have the adjustment made so they will all register alike. If this should not be practical owing to some peculiar construction, be sure when placing them in position in the houses to have a card plainly labeled two degrees low or high as the case may be. There is nothing more important than the maintenance of an even temperature in the rose houses day or night.

Do not be afraid to leave on a crack of air at least on any mild night. Of course it is not good policy to carry air in the houses and run several coils extra to bring the house up to normal. Yet there are many nights that with very little firing a little air can be allowed the plants. E.

Rose Lady Hillingdon.

ED. AMERICAN FLORIST:

I have been advised to plant the new Rose Lady Hillingdon quite extensively the coming season and would like to have your views with regard to this variety. GROWER.

This rose has been well spoken of by those who have seen it and "Grower's" query will be best answered by reproducing here the comments of an expert rose grower who has had ample opportunity to see this variety in its various stages of growth, as follows:

A rose that is receiving much favorable comment by the retailers who have handled it, and also the growers who have tried its cultivation, is Lady Hillingdon. It is yellow in color and of a most pleasing shade and has a most delicious tea perfume. The color increases after being cut and placed in the refrigerator, growing deeper, and this remarkable shade is retained after the flower is wide open. It is a tea rose and resembles the Bride in habit, but the Bride in its best days never made the growth of this beautiful variety.

Unlike most yellow roses it grows well grafted on the Manetti stock. Alexander Montgomery of the Waban Rose Conservatories, Natick, Mass., who has succeeded in growing this rose to the highest perfection, has tried it on the

ROSE LADY HILLINGDON AT WABAN ROSE CONSERVATORIES, NATICK, MASS.

QUINCY, MASS.—William Patterson had a fine display of Christmas flowering plants. An invitation to the public to visit the houses was duly appreciated.

NASHUA, N. H.—Mrs. Ella Churchill, 30 McKean street, and her son, Bernard I. Churchill, are having a greenhouse 20x100 feet erected in which to raise flowers for the Boston market.

Banksia stock and many others, one special stock being imported from Europe, but the Manetti has proved to be the best. It also does splendidly grown on its own roots, though not so strong as when on grafted stock. In the culture of this rose no pinching is required, for the growth is exceedingly strong and blooming canes 30 inches in length are freely produced. This variety is, in our opinion, certainly a gem and is far ahead of any yellow rose ever disseminated. It has often been remarked by rose growers that one of their great desires was the raising or acquiring of a yellow Bride for which they would be willing to give all they possessed, but we firmly believe that the Bride even in its palmiest days could never touch Lady Hillingdon.

Our illustrations show this rose as it is grown at the Waban Rose Conservatories, Natick, Mass., where it has proved to be a wonderful producer of flowers of the highest quality, which have found ready sale in the Boston stores. The growth of the plants has been remarkable, and at the time that the photographs were taken, which was in August, the appearance of the plants was what would be looked for more in April than at that time of the year. The great difference in the growth of this variety compared to Mrs. Aaron Ward is plainly shown in the illustration of the house, the two being planted beside each other. We advise all rose growers that it will be to their interest to go and see this rose growing, and can assure them that they will be amply repaid for any expense incurred and all the time required in making the journey. They will tarry longer in their inspection of it than of any rose they ever saw, and we believe will leave fully satisfied that the acme of perfection has been reached in this new yellow variety. MAC.

ROSE LADY HILLINGDON.

National Association of Gardeners.

President Thomas W. Logan has made the following appointments on the Board of Directors of the National Association of Gardeners to take effect on January 1st, 1912: To serve for three years: John Shore, Harrison, N. Y.; Peter Duff, Orange, N. J.; Thomas Proctor, Lenox, Mass.; Alexander McKenzie, Glen Cove, L. I.; William Kleinheinz, Ogontz, Pa.; W. N. Craig, North Easton, Mass.; James Stuart, Mamaroneck, N. Y. To serve for two years: John Dodds, Wyncote, Pa.; T. J. Kempton, Baychester, N. Y.; Robert Angus, Tarrytown, N. Y.; Earl Schaffer, Tuxedo Park, N. Y.; E. Wetterlow, West Manchester, Mass.; Robert Bottomley, New Canaan, Conn.; E. Trethewey, New York City. To serve for one year: A. Bauer, Deal Beach, N. J.; J. F. Huss, Hartford, Conn.; H. F. Witney, Fishkill, N. Y.; Alexander Fraser, Newport, R. I.; James Bell, New York City; F. Kirk, Bar Harbor, Me.; Wm. Pirie, Buffalo, N. Y. Xavier Schmitt, of Philadelphia, Pa., has been appointed assistant secretary and W. E. Maynard, of New York City organizer for the coming year.

The officers elected for 1912 are: Thomas W. Logan, Jenkintown, Pa., president; Martin B. Tillotson, Great Neck, N. Y., vice-president; Martin C. Ebel, Madison, N. J., secretary; Roy H. Caverly, Lowell, Mass., treasurer.

Considerable outside interest is being manifested towards the association since its last convention in Madison, N. J., in October. The organization has become much interested in the contemplated international show to be held in New York City in April, 1913, and some of its members are preparing to have large exhibits. A prominent gardener, superintendent of one of the largest private estates in the east, has already declared himself to Chairman Charles H. Totty, of the National Flower Show committee, as expecting to bring more than a car load of plants from the estate over which he presides, which is located in one of the adjoining states to New York. Some keen competition may also be looked for from the National Association members at the next annual show of the American Sweet Pea Society, to be held in Boston, in July, 1912, this society having promised to provide liberally for special gardeners' classes.

A great growth is looked for in the National Association of Gardeners during the year 1912. President Logan will call a meeting of the new board of directors early in January to meet in New York City and some important matters will be brought up looking to the future development of this organization, which promises soon to become an important factor in the field of horticulture in this country.

M. C. EBEL, Sec'y.

Heating Greenhouse and Dwelling.

ED. AMERICAN FLORIST:

Can greenhouses and a dwelling which is attached be successfully heated from one hot water plant? If this can be done, would it be more economical than two separate plants? What size of pipe would be required in the greenhouse? Where would it be preferable to locate the heating plant, in the cellar of the dwelling or the greenhouses? Would there be any advantages or disadvantages in adopting such a system? E. B. P.

New Jersey.

The answers to nearly all of the above questions will depend very largely upon the size and location of the houses. If not more than one hundred feet apart there will ordinarily be no difficulty in heating them from one plant and hot water can be carried economically much farther than this if there is a difference of two feet or more in the ground level.

In case the greenhouse is a small one it can be readily heated from a plant in the cellar of the residence, but with a large plant it will be better to have it located in a separate structure near the greenhouse.

If not too far apart it will cost less to install one plant, and the expense for fuel and labor will be less. When a large heating plant is located in the house cellar the dust and smoke will be objectionable, but if located in connection with the greenhouse there will be less trouble from it than with a plant in each building. L. R. T.

Western Association of Nurserymen.

The twenty-second annual meeting of the Western Association of Nurserymen was held at the Coates House, Kansas City, Mo., December 13-14, and the attendance was the largest that had ever assembled at any meeting of the association. The meeting was opened by a masterly address by President Geo. A. Marshall, followed by interesting papers by Prof. S. J. Hunter on "Interstate Co-operation"; Prof. L. J. Headles, "The Relation of the Agricultural College to Nurserymen;" W. P. Stark (an abstract of which appeared in the AMERICAN FLORIST, issue of December 23, page 1244), "The Federal Inspection Bill as Proposed by the Department of Agriculture"; E. S. Welsh, "National Uniformity of Grades"; L. R. Mayhew, "Replacement"; A. J. Brown, "Nurserymen Attending Horticultural Meetings"; "F. H. Weber, "Trade in Ornamentals." J. H. Skinner spoke on the different growths of grafts and advocated the appointment of a permanent committee on experimentation. The papers were listened to with great interest and vigorously discussed. At the morning session of the first day Capt. Watrous introduced in a comprehensive way present conditions and the struggle of nurserymen for proper recognition by beneficial law from the government. The matter was referred to a committee consisting of J. W. Hill, E. S. Welch and Herbert Chase who reported the following resolutions which were adopted:

Resolved, That this association heartily favors the passage of a federal law governing the importation of nursery stock and standardizing interstate regulations pertaining to the transportation of nursery stock and recommend vesting the administration of such a law in a commission appointed by the President of the U. S. to be composed of the Secretary of Agriculture, the Chief of Bureau of Entomology, two active nurserymen, two active fruit-growers who are members of the American Pomological Society, and two official horticultural inspectors; the members of this commission to be selected with a view to equal geographic representation.

We further recommend that the Western Association of Nurserymen appoint two of its members, preferably W. P. Stark of Louisiana, Mo., and Prof. S. J. Hunter of the University of Kansas, to attend the meeting of horticultural inspectors at Washington, D. C., on December 28 and 29, to co-operate with the legislative committee of the American Association of Nurserymen in the formation and passage of such a federal inspection bill.

That we endorse and commend the action of our national legislative committee of the American Association of Nurserymen in their efforts to secure the passage of such a law.

The committee on nominations report the following list of officers who were unanimously elected:

E. S. Welch, Shenandoah, Ia., president.

F. H. Weber, Nursery, Mo., vice-president.

E. J. Holman, Leavenworth, Kans., secretary and treasurer.

F. H. Stannard, Ottawa, Kans.; W. P. Stark, Louisiana, Mo.; J. W. Hill, Des Moines, Ia.; W. C. Reed, Vincennes, Ind.; Herbert Chase, Delta, Colo.; executive committee.

The following resolution proposed by E. P. Bernardine was adopted:

Resolved: That it is the sense of this association that the time is now at hand that we should abolish the replacing of nursery stock in our retail sales and pledge ourselves to work to the end that we may all eliminate this objectionable feature of our retail contracts at an early date.

Resolutions on the deaths of Maj. W. F. Heinkes of Huntsville, Ala., and Gov. Norman J. Coleman were passed.

Business was continued until the noon hour of the second day when final adjournment was had and the best meeting the Western Association of Nurserymen has ever held was formally ended. E. J. HOLMAN, Sec'y.

E. S. Welch
Pres.-Elect Western Association of Nurserymen.

Cincinnati.

INCLEMENT WEATHER.

The inclement, rainy weather which has prevailed for the past fortnight let up the few days of the final Christmas rush for the florists, but once that holiday was over the downpour waited only for a few hours, when it again rained with a dogged persistency all day Tuesday. This naturally is causing the growers, especially the carnationists, considerable vexation. The Christmas market was good from the growers' and wholesalers' points of view. Everything but bulbous stock and violets cleaned up. Poinsettias moved very nicely. The growers of this line promise a good cut for New Years. In roses American Beauties and Richmonds were not equal to the demand. The supply of the latter was fair and the stock very good. More Killarney, too, might have been used easily without forcing down the price. The offerings in carnations were good, considering the pessimistic reports some gave out a week in advance as to the probable cut. The growers of these state they all have buds, lots of them, in fact, but some bright weather is necessary to bring them out. In other lines the supply of lilies right now is not over large, and the good ones sell well. Violets did not clean up entirely. The same is equally true of lily of the valley. Paper White narcissus have been dragging more or less for a fortnight. The green goods market is ample.

NOTES.

Peter Weiland had a good cut of Killarney, White Killarney and Richmond for Christmas business.

Visitor: William Gardner, manager of the P. J. Olinger greenhouses at New Castle.

Tom Windram has gone to Florida for a brief stay. H.

Boston.

AN EXCELLENT CHRISTMAS.

The trade at Christmas was excellent. We predicted two weeks ago that there would be no shortage, and our views coincided with the state of the market Up till Saturday business in the markets was normal. The wholesale shipping trade began Thursday, and kept right up until Sunday night. The wholesalers were the backbone of the market during the last days on carnations and roses. With facilities which they had at hand an enormous amount of stock was moved. H. M. Robinson & Co., N. F. McCarthy & Co., and Welch Bros. all did an excellent business. Carnations, high grade stock, sold at top prices especially red, but with the quantity which came in Saturday the market began to weaken. The improved weather conditions of Saturday helped materially. It rained heavily all night Friday and many growers had the shakes, but with the change upon Saturday conditions changed. Orchids went from $6 to $9 per dozen. High class lily of the valley sold well, but ordinary sock went at about usual prices. Violets on Saturday were druggy. Greens of all kinds were good and plentiful and had a great call. In roses the average quality was good, but the weather was against the color on Killarney. Never have we seen the latter so much off color, it seemed to be a ghost of its former self Richmond sold well. American Beauty was good and top prices were $12 to $15. Big and little all had their quota of roses, and in few instances did we notice any stock which would not pass muster, and only in one case did we notice some that the stem and leaves were black from stagnant water, and they fairly did smell. W. R. Nicholson, Peter Fisher, and John Barr all had high grade carnations. Easter lilies did not sell well and stevia sold poorly. We hear that the death knell of the American Beauty has been sounded. Something to take its place has been produced which can give length of stem and equal perfume. We hate to see the gem of former days go, but in the march of progress it will share the same fate as those that have gone before. There always will be a certain few who will inquire for it, as it has graced many occasions where associations and past memories will always stand at its back, but if the present acquisition holds good, as good as we have seen it for some months, American Beauty will eventually have to accept the fate to which we are all consigned. We are talking of the growing requirements of New England climate, where American Beauty has sometimes been a hard rose to handle, and sometimes we have seen it worse grown where weather conditions in other states were better and more ideal for its production.

NOTES.

The year 1912 is here. We have all us made many mistakes, as humans, in the past year. Sometimes we got

what we didn't want and didn't get what we wanted. We are always looking forward to brighter things and better successes. It is that which keeps us moving and gives inspiration. Personally we have made many new friends since becoming a representative of THE AMERICAN FLORIST. We have handed out jolts where we thought they were required, but always in good grace and good feeling. In our writing we will always aim to be fair to every one, look after the interest of our advertisers and give credit where credit is due. We have received many courtesies from those in the trade and extend our courtesies and good wishes for the coming year, and hope we may all be a help to each other and wish each other a Happy and a bright New Year.

The regular monthly meeting of the Gardeners' and Florists' Club was held in Horticultural Hall, December 19. The election of officers resulted as follows:

Thomas Peglar, president.
W. J. Kennedy, vice-president.
W. N. Craig, secretary.
Peter Fisher, treasurer.

Herman H. Bartsch, Peter M. Miller, William J. Patterson and William Sim, executive committee.

Johnson Knight, the genial manager of the Co-Operative Market, received as a Christmas present a handsome gold watch and chain from the members of that market. Mr. Knight is one of those who does his best and makes every effort that he can as manager to make the market a success. We are glad to see that his efforts are appreciated.

Welch Bros. report the best trade of any Christmas they ever had. The American Express Co. placed at their disposal one of their regular express teams for three days. "Give the devil his due," and we are giving that to the express company.

John Beaton, for many years with R. & J. Farquhar Co., is in the hospital. We hope soon to see him again at his accustomed place in the store.

We are glad to hear that W. N. Craig, the dean of the trade paper writers, is improving from his attack of lumbago.

John McFarland had a great quantity of high grade lily of the valley which he disposed of at top prices.

The Waban Rose Conservatories cut a fine crop of American Beauty and Killarney roses for the holidays.

John Barr drove in his team from South Natick and delivered his goods in the city.

W. H. Elliott sent in fine Killarney and Mrs. Aaron Ward roses. MAC.

Cleveland.

A BANNER CHRISTMAS.

Almost every florist will admit that this has been a banner Christmas, both in cut flowers and plants, as was proven by the advance orders for stock and a call for more at the eleventh hour. Stock of all kinds was in good supply with the exception of red roses and red carnations. Of these two there were not enough to fill orders in full. American Beauties, the favorite Christmas flower, was in the greatest demand. This stock was of exceptionally good quality. Pink Killarney were a little pale as to color, but flowers were large and on good stiff stems, and Christmas noon found little if anything on the wholesalers' counters. Paper White narcissus and stevia were in big supply, also Roman hyacinths, but this stock did not sell as well as the higher priced flowers. Lily of the valley, orchids and bouvardia sold well. Moss wreaths, boxwood wreaths and immortelles sold exceptionally well. All report a good business and all are very tired, so we wish you one and all a very happy and prosperous New Year.

C. F. B.

OBITUARY.

Victor Lemoine.

It is granted to but few men to leave behind them such a monument in the world as that which is in every garden where flowers or plants are cultivated left by the late Victor Lemoine who died at Nancy, France, on December 12 in his eighty-ninth year, for where ever plants are cultivated there will surely be found representatives of Lemoine's hybrids or introductions. He was without question one of the greatest hybridizers of his age, and an introducer of meritorious novelties that have greatly influenced the appearance of all gardens and resulted in adding much to horticulture.

The Late Sir Joseph Hooker.

Who Died at Sunningdale, Eng., December 10. Age 95 Years. Was for Many Years Director of the Royal Botanic Gardens at Kew.

The Late Victor Lemoine.
Died December 12, 1911.

Victor Lemoine was born at Delme (Lorraine), France, October 21, 1823, and came directly from a family of gardeners, his ancestors for generations having adopted that profession. He attended college at Vic-sur-Seille, and after completing his studies spent several years in traveling. He then began his work in the profession of his forefathers and was successively employed by Bauman, Bollweiler (Lorraine; Louis Van Houtte, Ghent, Belgium), and Miellez, Lille (France). In 1850 he started in business for himself as a florist and landscape gardener with limited capital at Nancy (Lorraine). He immediately began his work of hybridizing in which he became a master in many and diversified lines, for in 1852 the Revue Horticole mentions his double flowered portulaca. In the succeeding years meritorious novelties were produced in many species, including the potentilla, streptocarpus and fuchsia, producing the first double flowered variety of this plant. In the early sixties the extent of his work became manifest for he introduced novelties in the monochætums, clematis, mimulus delphiniums, pyrethrum, spireas and the first double-flowered zonal pelargonium was sent out, Gloire de Nancy, from which all the double-flowered varieties now in cultivation have been produced. He also introduced many valuable plants including clethras, weigelas and Hydrangea paniculata grandiflora. In the years following valuable contributions were continually disseminated and they embraced a great variety of species, abutilons, begonia hybrids, saxifrage, weigela and clematis, and in 1874 gladdened the hearts of gardeners with the first double tuberous begonia which was followed by others in several colors. In the later seventies he began to produce the hybrid gladioli which have been the progenitors of so many beautiful varieties. Every year now found valuable additions to floriculture emanating from the work of this great man. In 1893 Begonia Gloire de Lorraine was introduced and this was followed by new and valuable introductions every year in many species. The last years of his life were principally devoted to improving deutzias, peonies, hydrangeas, weigelas and gladioli. Most all of the delphiniums, potentillas, pyrethrums, heucheras, penstemons, gladioli and montbretias in cultivation today were originated by or descended from the labors of this man.

Mr. Lemoine has been honored by societies in all parts of the world. He was presented this year with the George Robert White medal by the Massachusetts Horticultural Society which is awarded to the one who has done the most in recent years to advance the interest of horticulture, and he was the first foreigner to be awarded the Veitch medal by the Royal Horticultural Society of England. He was honorable vice-president of the Central Horticultural Society of Nancy, and member of the National Horticultural Society of France, Royal Society of Agriculture and Botany of Ghent, Royal Horticultural Society of Munich and corresponding member of the Massachusetts Horticultural Society of Boston. In 1885 he was made a knight and on April 3, 1894, an officer of the Legion of Honor of France. He was honored by his own townspeople by being a member of the town council from 1871 to 1888.

Henry F. Reck.

Henry F. Reck, son of Julius Reck of Bridgeport, Conn., died at the home of his parents, Saturday, December 16, aged 20 years. He was a very promising young man of a lovable disposition and a great favorite among his friends and acquaintances, and at the funeral which was held at St. Augustine's church December 19, there was a great wealth of floral tributes. The interment was in the family lot at St. Michael's cemetery.

START the new year right by sending in your subscription promptly.

THE eighth annual meeting of the American Breeders' Association is in progress this week, December 28-30, at the new Masonic temple, Washington, D. C.

DEATH has claimed two great European men of science this month—Sir Joseph Dalton Hooker, the English botanist, and Victor Lemoine, the French horticulturist.

MRS. FRANCIS KING, after whom the popular gladiolus was named by Vaughan's Seed Store, will deliver a lecture on "Color Arrangement in Flower Gardening," before the Massachusetts Horticultural Society, March 30 next.

THERE will be a meeting of the schedule committee of the National Sweet Pea Society in Boston at an early date, when the final touches will be given to the premium list. Particulars of additional special prizes should be addressed to Secretary Harry A. Bunyard, 342 West Fourteenth street, New York, without delay to insure insertion in the schedule.

BABY RAMBLERS Jessie and Phyllis are said to be very desirable additions to this section of roses.

THE annual bulletin of the American Rose Society for 1911, just issued, contains an account of the exhibition of roses held at the National Flower Show at Boston, March 25-April 1, the proceedings of the meetings held in Boston and Baltimore and concludes with the preliminary prize-list for the exhibition of the society to be held at Detroit, January 10-12, 1912.

Important to Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Society of American Florists.

DEPARTMENT OF REGISTRATION.

As no objections have been filed, notice is hereby given that the registration of the following become complete:

Geraniums General Wayne, Aviator Rogers, Aviator Atwood by F. H. De Witt, Wooster, O.

Cannas Conowingo, Splendour, Wabash, Beacon, and Kate F. Deemer by The Conrad & Jones Co., West Grove, Pa.

Althea Wm. R. Smith by Henry A. Dreer, Inc., Philadelphia, Pa.

Objections having been received to the registration of the Geranium Daybreak, one by that name already being on the market, the name has been changed to Dr. Wylie and the registration hereby becomes complete.

Objections having been withdrawn, public notice is hereby given that the registration of the rose Double Improved White Killarney by S. J. Reuter & Son, Inc., of Westerly, R. I., becomes complete. H. B. DORNER, Sec'y.

Massachusetts Agricultural College.

The short course in floriculture at the Massachusetts Agricultural College will be given as usual, beginning January 2 and closing March 8. The lecture course given in the morning will cover general subjects of interest and value to the commercial florist. The afternoon will be spent in practical work in the greenhouse range. In addition to the lectures given on distinctly floricultural subjects, lectures in soil fertility, botany and entomology will be required and other lectures on field crops, fruit growing, market gardening or landscape gardening may be taken. On Saturdays an observation trip will be taken to some of the commercial greenhouses. It is expected that the lecture course will include talks by W. R. Cobb, Lord & Burnham Co., "Greenhouse Construction," January 5; R. O. King, King Construction Co., "Greenhouse Construction," January 12; C. F. Boyle of T. F. Galvin, Inc., "The Retail Trade," January 15; F. J. Elder, Lord & Burnham Co., "Greenhouse Heating," January 19; Wm. Sim, Cliftondale, "Violets and Sweet Peas," January 22; C. H. Totty, Madison, N. J., "Chrysanthemums," January 26; W. H. Elliott, Brighton, "Rose Culture," February 5; Eber Holmes, Montrose, "Rose Culture," February 9; M. A. Patten, Tewksbury, "Carnation Culture," February 16.

Information regarding the course may be obtained from Dr. William D. Hurd, Director of Extension Work, Amherst, Mass., or from Professor E. A. White of the Department of Floriculture.

Coal for Greenhouse Purposes.

ED. AMERICAN FLORIST:

Can you inform me whether there is any literature as to the best coal to burn for greenhouse purposes, whereby the greatest efficiency can be obtained?

Illinois. J. W. E.

While there is no treatise upon coal adapted to greenhouse heating, the same rules apply as when coal is used for other purposes. If the word "efficiency" is used in a broad sense, as would be necessary if the subject is to be considered from a practical standpoint, such other matters as the cost of the coal and the labor of firing must be taken into account. It would also vary with the size of the plant, as while slack coal might be most economical in large plants where forced draft and mechanical stokers can be used, the better grades of anthracite or Pocahontas would be preferred for small heaters.

The questions of freight and hauling might also determine the choice as, when near the mines and with little or no hauling, some of the cheaper "run of mine" coals might give more return for the expense than "steam lump" coal from distant mines. Of course the better grades of Pocahontas and steam lump coals contain more thermal units than the low grade coals and one can afford to pay 25, 50 or even 100 per cent. more for them, according to the quality of each.

No definite statement regarding the coal from any section or even from any mine can be given as it may vary even in consecutive shipments from the same mine.

Perfume and the Color of Flowers.

It is stated on the authority of a German botanist who has been investigating the subject that out of forty-three hundred species of plants cultivated in Europe only four hundred and twenty have an agreeable perfume. As has long been understood, flowers with white or cream-colored petals were found to be most frequently fragrant, after which come those with yellow, red, blue and violet petals in the order named. Only thirteen violet colored flowers had perfume, but this is partly due to the fact that such flowers are not abundant in any flora. Of the total number of flowers examined, twenty-three hundred had no perceptible odor of any kind. This does not mean that they have no odor, but simply that they have no odors that man can detect; many of them may be fragrant to insects and probably are. More than three thousand of the flowers examined had disagreeable odors of various kinds, but these, again, did not seem to be disagreeable to the insects, but on the other hand were often attractive.—The American Botanist.

The New Year Cometh.

This is the time of sadness and farewell,
The time of welcome and of new delight;
The old year drifts upon the wind tonight
Into that limbo where the dead years dwell.
From some strange, distant bourne no tongue can tell,
O'er moonlit ways and paved with shining white,
The new, swift-footed year—a vision bright—
Comes at the clamor of the old year's knell!

Time turns his glass! The sands full slowly run,
Freighted, in each dropped grain, with memory—
The failures wrought, the few successes won!
I cry, "O Time, what brings the new for me?"
The brave-tongued bells peal answer back to me
"A chance to fail, a chance to try again!"
—Charles C. Jones, in Lippincott's Magazine.

Meetings Next Week.

Albany, N. Y., January 4, 8 p. m.—Albany Florists' Club, 71 State street.

Buffalo, N. Y., January 2, 8 p. m.—Buffalo Florists' Club, 385 Ellicott street.

Chicago, January 4, 8 p. m.—Chicago Florists' Club, Union Restaurant, 72 W. Randolph street.

Dayton, O., January 1, 8 p. m.—Dayton Florists' Club, 37 E. Fifth street.

Denver, Colo., January 1.—Colorado Florists' Club, T. M. A. Hall, 1739 Champa street.

Detroit, Mich., January 1, 8 p. m.—Detroit Florists' Club, 112 Farmer street.

Fall River, Mass., January 2, 8 p. m.—Fall River Florists' and Gardeners' Association.

Grand Rapids, Mich., January 1.—Grand Rapids Florists' and Gardeners' Club, office of member.

Indianapolis, Ind., January 2, 7:30 p. m.—State Florists' Association of Indiana, State House.

Lake Geneva, Wis., January 6, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Lenox, Mass., January 6.—Lenox Horticultural Society.

Los Angeles, Calif., January 2.—Los Angeles County Horticultural Society.

Louisville, Ky., January 2, 8 p. m.—Kentucky Society of Florists' Third and Broadway.

Milwaukee, Wis., January 4, 8 p. m.—Milwaukee Florists' Club, St. Charles Hotel, City hall square.

Minneapolis, Minn., January 2. Minneapolis Florists' Club, 115 North Sixth street.

Montreal, Que., January 1, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guardians building, 211 Sherbrook street, west.

New Orleans, La., January 3, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., January 3.—Newport Horticultural Society.

Pasadena, Calif., January 5, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Philadelphia, Pa., January 2, 8 p. m.—Florists' Club of Philadelphia, Horticultural hall, Broad street, above Spruce.

Pittsburg, Pa., January 2, 8 p. m.—Florists' and Gardeners' Club of Pittsburg, Fort Pitt hotel, Tenth street and Penn avenue.

Salt Lake City, Utah, January 2.—Salt Lake Florists' Club, Huddert Floral Co., 64 Main street.

San Francisco, Calif., January 6.—Pacific Coast Horticultural Society.

Seattle, Wash., January 2.—Seattle Florists' Association, Chamber of Commerce, Second avenue and Columbia street.

St. Paul, Minn., January 2, 8 p. m.—Minnesota State Florists' Association, 510 Suelling avenue, north.

Tacoma, Wash., January 4.—Tacoma Florists' Association, Hotel Tacoma.

Utica, N. Y., January 4, 8 p. m.—Utica Florists' Club, Genesee hall, Oneida square.

Washington, D. C., January 2, 8 p. m.—Florists' Club of Washington, 1214 F street, N. W.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office enclose 10 cents extra to cover postage, etc.

Situation Wanted—By a bachelor of 29, as an all-around florist; carnations a specialty.
F. BIALECKI.
341 Weaver St., Rochester, N. Y.

Situation Wanted—Position as designer, decorator or manager for store; good references.
H. G. E., care Schulz,
550 Fourth Ave., Louisville, Ky.

Situation Wanted—By traveling salesman; 15 years' experience; well acquainted with plants, seeds and florists' supplies; a hustler; can speak German. Key 540, care American Florist.

Situation Wanted—Experienced seedsman wishes to make a change; all branches; planting, breeding, growing, cataloguing, packing and selling, farm, vegetable and flower seeds.
Key 520, care American Florist.

Situation Wanted—By an American; married; strictly sober and reliable; four years' experience in general greenhouse work. Please state wages and particulars in first letter. Address
Key 539, care American Florist.

Situation Wanted—As working foreman or grower by all around florist, propagator and grower of high class cut flowers, potted and bulbous stock of all kinds; first-class designer; capable of taking full charge of an up-to daie place and accomplishing the necessary results; American, single, age 30; absolutely honest and reliable, total abstainer, highly recommended; open for immediate engagement; please state wages and particulars. Address R. KLAG,
Frsderic Hotel Minneapolis, Minn.

Help Wanted—A good all-'round florist wanted; wages, $70.00 per month.
SIMANTON & PENCE, Falls City, Nebr.

Help Wanted—A good rose grower who knows something about Beauties. State wages wanted. Address Key 544, care American Florist.

Help Wanted—A good all around man, one who thoroughly understands growing and watering; married man preferred; references.
Key 543, care American Florist.

Help Wanted—A young lady florist; first-class sales lady; good designer; capable of taking charge; reference.
Key 530 care American Florist.

Help Wanted—Landscape architect, thoroughly practical in all branches; must be good correspondent; apply with references.
L. L. MAY & CO., St. Paul, Minn.

Help Wanted—Three or four men who are good quick grafters and budders and understand general nursery work; state experience and wages desired give reference.
W. T. HOOD & CO., Richmond, Va.

Help Wanted—Experienced gardener for private place in country. Must have experience in garden fruit, vegetable and greenhouse work; married man preferred. Residence with hot water and all conveniences furnished. Apply
JNO. T. MILLIKEN,
121 Merchants of Commerce, St. Louis Mo.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

LARGE SALES AT GOOD PRICES.

All the stock sold readily during the holidays at good prices, for the orders were very heavy for Christmas. Carnations brought exceptionally good prices for there were hardly enough to go around. Roses were of a very fine quality and all were cleaned up with a demand for more. There were enough violets to fill all orders, plenty of Paper White narcissus and Roman hyacinths, which naturally sold cheaper than any other flower, and there were plenty of greens.

NOTES.

The conservatory of Edlefsen-Leidiger Co. looked Monday night as though a cyclone had struck it. They were completely sold out of the large quantity of blooming plants which had decorated it before Christmas and were very well pleased with their business during the holidays.

J. M. Fox & Son say "that it is wonderful how our business has increased since we've moved in our new store." They say the business has almost been doubled since they've been in their new quarters.

G. Rusch & Co. report a very fine business. They had a fine shipping business for the holidays and were more than pleased with both local and shipping trade.

Holton & Hunkel Co. cut some very fine roses, being right on crop with pink Killarney for Christmas and they sold readily.

C. C. Pollworth Co. had an elegant Christmas business and cleaned up a large stock of blooming plants and cut flowers.

M. A. McKenney Co. had a large variety of blooming plants and reports business better than in previous years.

Currie Bros. Co. report business as very good. G. R.

Detroit.

CHRISTMAS A RECORD BREAKER.

Christmas trade was a record breaker and reached a point that will be hard to equal in later years, especially by the older established firms. The week previous, some apprehension was felt as to weather conditions; the available stock, and the probable demand for the great annual event, but very early in the week the spirited call for plants easily dispelled any doubts entertained as to the ultimate results. This demand kept up with increasing proportions as the days passed, till Saturday brought the unprecedented call for both plants and cut flowers. The following day showed some diminution, but was still a good day with all and Christmas day itself brought a surprising demand by the belated buyers anxious to convey joy tidings to friends with a flower of some kind. The growers, awake to the probable demand, had prepared an enormous stock of attractive plants, embracing poinsettias, azaleas, begonias, cyclamen, primroses, Jerusalem cherries, ardisia, etc. These with a correspondingly good stock of Boston ferns, araucarias, pandanus, dracænas and palms, found a ready market and the late buyers, many of them, had their orders only partly filled. Poinsettias, especially the good-sized ones, seemed to lead in popularity, closely followed by azaleas. Begonia Gloire de Lorraine retained only a small part of its former favor and only those very well-grown and properly seasoned by cooler temperature found a satisfactory sale. Cyclamen went disappointingly slow though compared with the stock on hand many were sold, and they were also freely used in the made-up basket effects offered. Never before did immortelles and other artificial flowers sell as well. These were made up in wreaths, balls, etc., and in connection with boxwood and ruscus the effects were very attractive and their popularity firmly established. Holly, loose and in wreaths, was more than usual in the hands of the florists and considerable quantities were disposed of. The street venders with this material were not as much in evidence as formerly. In cut flowers, no particular item on the list could be said to have the lead. Poinsettias were as usual very popular and where gorgeous effects were desired, they filled the bill as no other flower could. Roses were high priced and the pink varieties, pale in color and not conforming with the high prices asked and yet more were called for than the limited supply could satisfy. American Beauties sold much better than last year and about the same prices were realized. Violets held their usual popularity and thousands were sold, but the supply pretty well equaled the demand. Paper White narcissus and Roman hyacinths were unimportant factors and but little of either was used, and lily of the valley, too, barely escaped being in the same class. The weather was mild throughout the week and though it sometimes rained, the avoidance of extreme cold endangering stock was most advantageous to florists making deliveries and eliminated a serious and worrysome feature of the usual Christmas trade. J. F. S.

RIDGEWOOD, N. J.—W. F. Barkham has opened a store in the Moore building, corner of Broad street and Ridgewood avenue, in addition to his Hudson street greenhouses.

BERLIN, CONN.—A. A. Weldon has made a specialty of chrysanthemums for a number of years and has earned an enviable reputation as a grower of these flowers. He reports this year as the most profitable since he has been in business.

A RECORD BREAKING CHRISTMAS.

The market was practically cleaned up on Christmas morning, the wholesalers dependant on the cut that was coming in to fill belated orders and the retailers rushing from store to store endeavoring to procure stock with which to replenish their refrigerator or to fill orders taken after the stock already procured had been sold. Friday, Saturday and Sunday were beautiful days and the retail stores were full of eager buyers all three days, for the stores kept open Sunday until evening, and the sales had been larger than ever before at any Christmas. The retailers did an immense business not only in cut flowers but also in plants which were offered to the buyers in most attractive shape and of the finest quality. The wholesale stores did a rushing business Thursday and Friday with no let up on Saturday and Sunday, for they also were open all day Sunday, and Monday morning they were anxious to see the stock come in, in many cases waiting for its arrival to fill orders already received. Everybody was and looked tired after the long strain, but it was pleasant faces and smiling countenances that one encountered, for it was fully realized that the business had been a record breaker. "A fine business," "Best we ever did," were the answers to inquiries on every side. While the stock all sold and there was no surplus to speak of, yet there was a grand, good supply of excellent quality and enough to fill the orders received. American Beauties were received in quantities enough to just about meet the request. Some orders had to wait until the Monday shipments came in, but everyone got a good supply and the prices held firm throughout the four days, neither advancing or falling. Quite a large shipment of American Beauties was received from the east to help out the market, but they did not arrive until after the heavy shipments had been made. There were thousands of Richmonds received and they disappeared almost as fast as they came in. The quality of almost all the stock was very high and of excellent color. Killarneys were in immense supply and they were being shipped out almost as fast as the Richmonds. This stock was of good quality, much of it being of good color, but some showed the effects of the dull weather that had prevailed during the last eight weeks and were a little light in color. The yellow roses cleaned up early and quickly and only the early orders received their quota of Melody and Mrs. Aaron Ward. Carnations were in very good supply, but they sold quickly and there was a demand for more of the reds than could be furnished. The shortage on red carnations began to be felt as early as Friday, but this is always to be expected at Christmas. The other colored varieties had a large call and even whites were sold as fast as received. The best thing that can be said of Christmas, 1911, was that the pickled stock amounted to almost nothing. Prices had ruled so good for a week before that there was no inducement to hold the stock back. If there was any one flower that was in over-supply it was violets, for there were immense shipments received from the east and an usually heavy cut by the home growers. The fresh violets found a good market and brought fair prices, but much of the eastern stock was unsalable and a great deal of this stock was sold at a low figure. One dealer said that violets sold cheaper this year than they were ever known to have sold before at any Christmas. Orchids and gardenias cleaned up well and at good prices, and there was a good demand for lily of the valley. Sweet peas were in great demand and many more could have been sold had they been obtainable. The demand for these on Friday and Saturday was very large and they were hard to obtain. Bulbous stock sold well; there were large receipts of Paper White narcissus and Roman hyacinths but the stock all found purchasers. Tulips were also shown and the desire for colored flowers quickly

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

caused them to be picked up. Stevia sold very well, there was plenty to be had, but nearly every shipment called for a few bunches and it quickly disappeared. Mignonette and marguerites were offered in limited quantities and were quickly sold. The demand for green was very large and the sale of holly and boxwood was immense, the choice stock being all sold up by Saturday. The demand for wreaths had never before been equalled and on Saturday morning it was a question of waiting until they were made up. Everybody is particularly well satisfied with the business done during the holidays this year and are now prepared for the big 1912.

NOTES.

The Chicago Flower Growers' Association filled a large number of Christmas orders and the business was very satisfactory and much better than the members expected. Otto W. Frese, the manager, received a telegram from a customer in Galveston, Texas, that he prizes very highly and in which the sender states that the carnations he ordered arrived in exceptionally fine condition which is indeed very good considering the long distance that they were shipped. The employes are very grateful to the association for the remembrance on Christmas of a five dollar gold piece, and wish to extend their thanks through these columns to the members for the same.

The George Wittbold Co. did a tremnedous business at their establishment in Edgebrook where every blooming plant was sold long before the big day arrived. Empty benches throughout the greenhouses gave a little idea of the immense quantity of stock that was sold and shipped out. Otto Wittbold and his office force have completed inventory and are starting the new year with a clean slate. Louis Wittbold and his large force of employes at the store in Buckingham place had more than they could do last week and were obliged to work many hours overtime to fill the orders that had been booked.

Wietor Bros. filled every order they received for Christmas in full and not a single one was sent out short. N. J. Wietor was well satisfied with his Christmas trade and said it was very satisfactory. This is putting it very mildly, as any one will agree who happened to visit this store last week, for even the office was used to store the boxes before they were wrapped and made ready to ship out. The outlook for plenty of stock, especially American Beauty roses, for some time is very bright and the quality is the same grade that was shipped out last week.

John Michelsen in speaking for the E. C. Amling Co. says that violets were a poor paying proposition this Christmas and that out of the large quantity they received only four shipments were real good and the remainder poor and some stock practically unsalable. Outside of this the business on the whole was very satisfactory and fully up to the firm's expectation.

John Sinner, Miss M. C. Gunterberg, Miss H. V. Tonner, Hunt Bros., H. C. Blewitt, Mrs. F. Beu, A. E. Hunt & Co., Miss Ida Evert, Batavia Greenhouse Co., and the Chicago Rose Co., all enjoyed a fine Christmas trade and say that they were well satisfied with the amount of business that they did.

A. T. Pyfer of the Chicago Carnation Co. certainly did a land office business as far as carnations were concerned, and the large number of orders that were booked and filled would probably surprise one if he could look in the order book and see the tremendous quantity that was disposed of.

Vaughan & Sperry had their share of the Christmas trade and that the business was fully up to their expectation was evidenced by the large quantity of stock that was sold. The local and shipping trade were both excellent and a credit to this progressive concern.

The A. L. Randall Co.'s employes were kept hustling last week filling the holiday orders both in the supply and cut flower department. That business was good is putting it mildly, for the tables were empty when we visited the store shortly after the rush.

E. H. Hunt's store presented a very busy appearance last week when the Christmas shoppers were seen in large numbers buying and selecting stock for the biggest and most satisfactory holiday in the year.

John Kruchten had a good call for gardenias and bouvardia Christmas week and found but little trouble in disposing of this and the other choice stock that he had on hand.

D. E. Freres generously offered Wietor Bros. the use of his icebox last week when they were short of cooling space, and needless to say it was greatly appreciated.

Adolph Benesh, better known as Adolph at Winterson's Seed Store, is rejoicing over the arrival of a bouncing baby girl. An ideal Christmas gift.

Weiland & Risch's large crop of Killarney and White Killarney roses helped considerably in making this a most satisfactory Christmas.

Fred Sperry received word that his little son, Frederick S., Jr., is quite ill at Titusville, Fla., where Mrs. Sperry is visiting relatives.

Wm. Duntemann made his heaviest cut in violets last week when he shipped 52,850 to this market.

Mrs. A. W. Meyers had a fine lot of pompom chrysanthemums for her customers for Christmas.

A. Einweck, of the E. H. Hunt force, was on the sick list this week.

HOERBER BROS.

Wholesale Growers of Cut Flowers

162 N. Wabash Ave., Long Distance Phones: Randolph 2758. Automatic 41770. **Chicago.**

Louis Winterson says that Winterson's Seed Store could have sold a much larger quantity of blooming plants had they been obtainable. The public are buying plants more heavily and one thing that was particularly noticed at this house was that the better grade of plants were sold first and that the lower grades sold when the others were disposed of. On the whole the business was very satisfactory and fully up to its usual good standard.

Bassett & Washburn report a very fine Christmas trade and were practically sold out at an early hour. A large number of the orders that were received were turned down for their regular customers were taken care of first and these used such a large quantity of stock that there was hardly any surplus left for the others.

F. C. Hoerber says that Hoerber Bros. enjoyed a fine Christmas trade and that it was far better than they had hoped for. The flowers that this firm offered their customers was of unusually good quality and it was probably due to this that Harry Manheim, the store man, had the stock sold long before it reached the market.

Chas. W. McKellar sold out at an early hour and was very well pleased with the business done for Christmas. Orchids sold well and brought about the same prices that they did a year ago. A large shipment of American Beauty roses from the east was disposed of by this house a few days preceding Christmas.

H. Van Gelder of Percy Jones says that the business this Christmas week was very satisfactory and the largest in the history of the firm. Letters from many customers complimenting their stock are being received and are valued bery highly by this enterprising concern.

Poehlmann Bros. Co. shipped out an enormous lot of good choice stock during the holidays, and the store on East Randolph street resembled the shipping room of a large manufacturing plant. John and August Poehlmann and the regular and extra employes worked like beavers to dispose of the large cuts, and are entitled to much credit for the masterful manner in which they handled the output of the large range at Morton Grove.

E. E. Pieser of Kennicott Bros. Co. says that this was the greatest Christ- was on record, both in regard to quality and quantity with one exception, that is that the extra good demand forced the prices far above their actual value. The veteran wholesaler says there was plenty of good stock to go around if the customer was willing to pay the price, and as far as poor stock was concerned there was very little and what little there was, was practically unsalable.

Tim Matchen, Peter Reinberg's efficient storeman, says that the Christmas business was very satisfactory and much better than he expected. The stock was all sold and the way the large shipments went out was enough to keep the expressman busy for some time carrying out the packages from this store alone. The stock in the greenhouses at present is doing nicely and heavy crops is the bright outlook for 1912.

The West End Floral Co. had a second big Christmas December 26 when a large number of designs was delivered to five different funerals.

"BEST EVER."

It seems like a chestnut to always repeat "best ever," but this seems to be the general opinion regarding the Christmas just passed. This is especially true of plants. Every retailer simply cleaned up every plant that had any kind of a flower on it. Begonias had a great run, and all the retailers were well stocked to meet the demand. In cut flowers, there were plenty for everyone, with the possible exception of carnations. American Beauties and violets moved surprisingly slow, all the wholesale houses having a number of these left over. The green goods men state that while they had a few trees left over, yet business was perfectly satisfactory to them.

NOTES.

Quite a number of florists were under the weather during the rush. Jack Trampton of the Zieger Company, and John Fitzsimmons of G. P. Weaklin Co., just managed to stick it out, both nursing a bad case of grip. Edw. Weaver of Randolph & McClements was kept at home during the entire rush. E. J. McCallum of the McCallum Co., could not speak above a whisper for two days, and Ross Adgate of the same firm had to go home and take to his bed.

R. J. Daschbach had a dinner table set in his display window which attracted large crowds of Christmas shoppers. The centerpiece was changed daily.

For a Christmas window, A. W. Smith Co. showed one of the best ever seen in this city, using his own importations of prepared flowers and foliage.

The Zieger Co. state they have one of the largest jobs of the season scheduled for January 3. J.

Philadelphia.

SPLENDID CHRISTMAS WEATHER.

The feature of the holiday season was the mild weather, there being scarcely any frost, and most of the time included in the ten days from December 10 to December 25 the glass scarcely dropped below forty. This made ideal shipping conditions, as it insured safe delivery to tender plants to even distant points. As to the volume of business, it appeared fully up to that of last season and with some growers there was quite a gain. The best sellers were poinsettias and everybody cleaned out, the stock for the most part was wonderfully well done, nothing quite so nice ever having been seen here before. The double variety was offered by some growers but it will be discarded as it has several disadvantages, choice cyclamen and azaleas came next, and all well flowered

stock was sold with a good sized demand for more which was unsatisfied. Begonias of the Lorraine type are getting to be a back number, beautiful though they are, they are too flimsy for the knockabout holiday trade. Ferns were good sellers; they are a big eyeful and popular. Combination plants, pans and tubs, as made up by the growers, were very attractive and sold well. The wholesale men say their business was very satisfactory. The Pennock-Meehan Co. sold almost everything there being a large out of town demand as well as a good home trade. The supply was rather under than over that of last season, and prices obtained were quite satisfactory. Roses of all kinds sold up close, as did lily of the valley and cattleyas. The demand for carnations exceeded the supply and good prices were obtained. In the stores there was the scurry and bustle and good business was done. Some claimed a large increase, others say about the same as last year, while in some spots there was not much enthusiasm. The violet problem interested the store-keepers, the flowers for the most part were picked on Friday and reached the market Saturday and were most of them for Monday morning delivery. To ask a violet that leaves home on Friday to be real sweet on the Monday following is expecting a good deal, and very few were found equal to the task. The twenty-fourth being Sunday helped the store-keepers and relieved the great strain that is inevitable when the business of December 24 and 25 are continuous. Holly and all kinds of Christmas greens sold very well, mistletoe being in great demand was all cleaned up on Saturday afternoon, not a clump being obtainable on Monday.

NOTES.

Leo Niessen Co. never had a more satisfactory holiday business. They were very strong on American Beauties and Killarney roses. Their shipments to out of town points being very large.

Edward Reid said trade was very satisfactory, over seventy thousand double violets were handled and the other staples in quantity.

New York.

SATISFACTORY CHRISTMAS TRADE.

Business during Christmas week in the wholesale cut flower market was quiet up to Saturday morning, when great quantities of all kinds began to arrive and it took on a much livelier tone. The real hustling, however, did not begin until Sunday morning, but business continued good all day Sunday and during Sunday night. All the dealers as a whole seemed quite satisfied with the volume of business done. Roses were of extremely good quality and sold well. American Beauties especially reaching somewhat higher figures and clearing out much better than it was expected they would. Top grades of Richmond, the best quality of Killarneys and My Maryland roses were disposed of quickly. There was not enough Lady Hillingdon, Prince de Bulgarie or yellow roses to satisfy the demand. The supply of carnations was tremendous and with the possible exception of white and those that arrived in a sleepy condition they sold remarkably well. There seemed to be no change in the quotations on Lilium longiflorum, callas, Paper White narcissus, hyacinths, lily of the valley and green stock, such as smilax and asparagus. As usual there were great quantities of the above left. Cut poinsettias did not clean up well, although the dealers could have disposed of many more of those grown in pans. Violets were in great abundance of very fine quality and did as well as could be expected when it is considered the great number that were sent in. Sweet peas did well. All orchids, with the exception of cypripediums, sold out nicely—the cattleyas were plentiful and no fault could be found with their quality. Gardenias were of several grades and conditions, the very best, which were magnificent, sold for as much as the best cattleyas. The wholesale dealers in flowering plants had nothing left but some Begonia Gloire de Lorraine in pots. All the wholesale men who make a specialty of Christmas greens did finely. At times. The Kervan Co., N. Lecakes Co., and Geo. Cotsonas & Co. were too busy to take more orders. Good, well berried holly seemed to be scarce and any that was left over was of very inferior quality. The weather was all that could be desired and it was not necessary to wrap up the plants when delivering. Tulips and Trumpet Major narcissus are now in market in limited supply.

Christmas Day 2 p. m.—Most of the dealers closed at this hour well pleased with the final business done, and the only thing apparently left unsold being lilies, poinsettias, white roses and white carnations. While the outlook on Saturday morning was not very promising, everything turned out well and the stock cleared out much better than was expected. The weather still remained very mild which helped the sale of violets and gardenias very much.

NOTES

The bowling tournament and reunion of the New York Gardeners' Society on Thursday, December 20, at Thums was a great success in every way and W. E. Marshall, Jos. A. Manda and J. I. Donlon deserve great credit for the way they managed the affair. The party of seventy bowled until 7:30 p. m., when dinner was served. Charles B. Weathered was toastmaster and was at his best. There was a long list of speakers. Chairman Chas. H. Totty responded for the National Flower Show of 1913. President-elect Jos. A. Manda spoke for the New York Florist Club, and Messrs. Bartholomae, Shore and Kleinheinz made short addresses.

Much interest at this early date is being taken regarding the trip to Detroit and as the reservation on the "Wolverine" is limited, intending visitors should lose no time in making proper arrangements. All orders for berths will be filled in rotation.

The next meeting of the Florists' Club will be held January 8. In addition to the interesting ceremony of installing the officers for 1912, there will be short talks on interesting subjects and exhibits of novelties in winter flowering plants.

Mat Matheron, Hempstead, N. Y., sent in during Christmas week 10,000 bloom of carnations of the very best grade. It will be remembered that Mr. Matheron was the grower at The Cottage Gardens Co., Queens, L. I., for so many years.

The automobile of Henshaw & Fenrich was badly wrecked in a collision while making deliveries, which caused them considerable inconvenience for a while. Luckily they are covered by insurance.

John Ross, who for so many years had charge of all the floral work done at Sherrys, is now with the Hotel Knickerbocker, where he holds a similar position.

The cattleyas and gardenias from the Bound Brook Greenhouse sold by Paul Meconi were of the very best quality and the shipments were very large.

A. J. Vreeland, who died recently in Jersey City, for years was a well known grower of carnations and bulbs for the wholesale market.

It is figured that between 350 and 400 boxes of violets were received from Rhinebeck on the three days, Saturday, Sunday and Monday.

John Marsden so well known at Far Rockaway and Arverne, leaves for an extended European trip on Jannary 10.

The retailers interviewed say without question it was the best Christmas business they have had in years.

Visitors: Wallace R. Pierson, Cromwell, Conn. Y.

Washington.

A GOOD CHRISTMAS TRADE.

Christmas business was excellent. The weather throughout most of the preceding week was dark and gloomy, December 22 being particularly disagreeable. Saturday, December 23, was a little better, inasmuch as no rain fell. Shopping of all kinds could not be longer delayed, so the people turned out in force and literally stormed the busy marts of trade, the flower stores included. There was a great trade in plants. Poinsettias, azaleas, begonias, cyclamens, ericas, aucubas, imported hollys and other plants, all went well. The cut flower trade was also good and good prices were realized. Although weather conditions had for the past two weeks been somewhat unfavorable, it was not cold and the local cut of flowers was very fine. Large shipments also came in from Philadelphia and other points. The nearest to a scarcity was in red carnations, more of which could probably have been sold if they had been available at the proper time. As it was, they readily wholesaled at $15.00 per 100. Other carnations ran from $8.00 to $12.00. It may be added, that there was a greater demand for single violets than could be readily filled, though there were plenty of double ones. There was an abundance of cut poinsettias, but it is probable that more nice small plants, properly grown in pans, would have sold if they had been on the market. Lilac was the one thing for which there seemed to be little demand, in fact white stock is not, as a rule, much called for at Christmas, the one exception being the white erica. Separately or in combination baskets and hampers, the ericas sold well. Azaleas, poinsettias, spireas, ardisias and Begonia Glory of Cincinnati were also extensively used in combinations. Very pretty effects were noted of single pots of pink begonia in tall handle baskets, decorated with pink ribbon. While quite a number of large combination baskets and hampers were sold, the retailers were more cautious about stocking up with them than they have sometimes been in the past. Viewed as a whole, it was a good Christmas for all branches of the florist trade and the dealers generally appreciate the generous patronage of the people.

NOTES.

Wm. F. Gude presided at a great meeting held in New Masonic Temple on Sunday, December 17. The meeting was under the auspices of the combinded Jewish organizations of the District of Columbia and was held for the purpose of commending the Sulzer resolution recently passed, by a practically unanimous vote for the abrogation of the treaty with Russia. Two thousand persons were present at the meeting, and among the speakers were Representative Sulzer, New York; Senator Poindexter, State of Washington; Representatives Kendall and Dyer of Missouri; and Murray of Massachusetts: Judge De Lacy and Rev. Abraham Simon of this city. A resolution commending the Sulzer resolution was passed with a deafening roar of applause and all the speakers were lustily cheered.

J. H. Small & Sons carried on business at both their new and old stores. Their new store at Fifteenth and H streets, N. W., is very large and finely equipped for business. A high official in the government service, who has been an extensive traveller, says it is the finest flower store in the United States.

H. Pritchard, who for a number of years has held a responsible position in the Gude Bros. Co. store, was married on December 19 to Miss Mary Madigan. Among the wedding presents, was a useful and substantial one from his associates in the store, among whom he is deservedly popular.

Chicago Notes

Frank Oechslin reports a most satisfactory Christmas trade, with a large demand for blooming stock. Every plant of this kind found a purchaser early and even the Boston ferns and other greenhouse stock moved exceptionally well and better than in former years.

James Dempsey, an employe of Andrew McAdams, died last week, following an operation, and was buried Friday, December 22. He was 19 years of age and was a general favorite with the trade, having been in the employ of the above firm for the past five years.

All places under the West Park, Lincoln Park and South Park Commissions have just been placed under civil service. Examinations are beheld daily to fill them. Do you want one of these positions? It is for you to say.

The J. B. Deamud Co. enjoyed a big Christmas trade and was practically sold out of stock on the afternoon of the twenty-fifth. The home grown violets this firm is handling is extra choice stock and is eagerly sought for by the best trade.

John Zech says Zech & Mann's business was very satisfactory for Christmas and much better than he expected. The shipping as well as the local trade was very good and kept the crew on the jump filling the orders.

At a meeting of the Lincoln park board, held December 18, the present officers were re-elected and the position of superintendent of planting was created at a salary not to exceed $1,500 a year.

County Commissioner, J. A. Mendel, and Ernest Farley are both limping around the market. Mr. Mendel fell from a step-ladder and Ernest slipped and fell down stairs.

Carl Cropp advises us he will not be a candidate for the vice-presidency of the Florists' Club and retires in favor of Duncan A. Robertson, who now has the field to himself.

Robert Northam says that George Reinberg enjoyed a good Christmas trade and that he could have disposed of a much larger quantity of stock had it been obtainable.

A. Henderson, in speaking of the Christmas business, says that his firm, A. Henderson & Co., had a splendid trade which was fully up to his expectations.

Chas. Balliff says Fisher Bros. had a very good Christmas trade and that the help were kept busy early and late to fill the many orders that kept coming in.

George Perdikas succeeded in disposing of the large stock of plants that he purchased for his Christmas trade as well as a large quantity of cut flowers.

J. A. Budlong's employes were taxed to their utmost to fill the holiday orders, the local and shipping trade both being exceptionally good.

D. F. Hawkes, the well known violet grower of Wheaton, is cutting and shipping a splendid grade of violets to Percy Jones.

Kyle & Foerster report a banner Christmas and were more than pleased with the business done last week.

Wendland & Keimel, the Killarney Kings, cut 35,000 Killarney and White Killarney roses Christmas week.

John E. Lapes of Cedar Rapids, Ia., paid the market his regular Christmas visit this week.

H. A. Fisher of Kalamazoo was in the city as usual buying stock for his holiday trade.

A. T. Peterson of Wheaton says that business is fine with the outlook very encouraging.

Murphy & Co. have opened a store on the corner of Forty-third and Madison streets.

FANCY FERNS, $1.50 per 1000.

New Crop Galax, Bronze or Green.....$1.25 per 1000
Sphagnum Moss, large bales.....$1.50

Diamonds—Richmond roses two days before Christmas.

23—'11. Welcome '12.

St. Louis.

THE BEST CHRISTMAS IN YEARS.

Christmas 1911 will be long remembered as one of the best in years. The wholesalers did a rushing business and cleaned up everything in sight. The retailers had three consecutive days to do business and beautiful weather of which they took advantage. There was a good supply of all kinds of flowers. Roses and carnations kept up in price. Violets arrived in large quantities but were not held as in former years at exorbitant prices. Monday morning everything was cleaned up.

NOTES.

The shipping department of Grimm & Gorly under the management of John Barnard was a sight Saturday, Sunday and Monday. Load after load of plants went out and the cut flower orders were piled up in endless variety. Henry Duernberg introduced his famous Memphis Beauty boxes which measured four to eight feet in length filled with American Beauty roses, violets, orchids and accessories inside and outside decorations. The help sadly missed the services of George Wagner who was stricken with appendicitis and unable to work through the holidays. This firm presented their employes very costly and beautiful gifts.

The down town store of C. Young & Sons Co. was a beautiful sight. The branch west end store was well patronized and the stock at both stores was completely sold out.

Wm. C. Smith Wholesale Floral Co. had a splendid supply of carnations and roses. Thousands of violets from the local growers were disposed of by this firm.

All the west end stores report an increased holiday business. Many attribute this to the good weather and also to the three days in which to sell the stock.

Alex. Siegel went to Chicago to find bargains and apparently got a few. He never can feel happy without attending and having a bargain sale.

Otto Sander cleaned out of everything. He had a splendid supply of American Beauties, violets and orchids which found ready sale.

Mullanphy Florist had an immense supply of stock which was disposed of and they were looking for more.

George H. Angermueller had an immense supply of flowers, Christmas novelties and supplies.

Alex. Waldbart & Sons did an immense business and were well satisfied.

C. A. Kuehn's new store was visited by every one Christmas.

H. G. Berning had a large quantity of American Beauty roses.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H Duryea, New York First Vice-President: Edgar Gregory, Marblehead, Mass., Second Vice President: C. E. Kendel, Cleveland, O., Secretary and Treasurer, Next annual convention, June, 1912.

JESSE E. NORTHRUP and daughters are at San Diego, Calif.

WARM and continued rainy weather is reported as delaying the proper drying and curing of the tuberose bulb crop.

BIDS for the government seed contracts of 1912-13 will be opened at the Department of Agriculture, Washington, D. C., January 9.

CHICAGO.—Prices on the Board of Trade, December 27, for grass seed were noted as follows: Timothy, $13.50 to $15.25 per 100 pounds.

THERE is considerable complaint among the growers that bulbs of Narcissus Golden Spur, Dutch grown, have rotted in the flats, in some cases as high as 75 per cent going back.

W. ATLEE BURPEE & CO. are advertising their "Seeds that Grow" by sending customers a pencil with point protector and case of leads, with the firm name and address on the holder.

French Bulb Prospects for 1912.

The season closed with a surplus in the hands of the growers of white Roman hyacinths of approximately 500,000 bulbs mostly under the medium size. Europe uses larger bulbs than America and generally of the grades above 13 ctm. The portion of the crop, therefore, which goes into the smaller grades is usually marketed in America and from that country this year reduced orders were received compared with former seasons. One French jobber having a surplus consigned the same to America marketing that part of his stock at from 15 to 20 francs below the earlier regular market price. His action in so doing is criticized by some of the other French jobbers who look upon this cut of rates at the end of the season as unfair to the wholesale buyers in America who have paid regular prices. It is believed because of the above situation that the coming season will see Roman hyacinths probably 10 francs per 1,000 cheaper, although the growers may not look upon it that way, and growing conditions between now and harvest time may affect the crop.

The outlook so far as can be seen is for the usual crop of Narcissus Paper White Grandiflora and at former prices, this season's harvest having been closed out in good time.

Freesias were on the whole rather short crop and prices are hardly likely to go lower next summer.

Individual Culture of Stock Seed.

Improving seed strains is a very scientific and tedious undertaking. There is hardly any other country where such great work is being done to improve the different stocks as in Denmark. The principal reason for this is that the Danish government for many years has recognized that it is a great advantage to agriculturists to make use of absolutely the best stocks. In consequence of this, the government has awarded first class certificates for the best stocks of mangels, swedes and turnips, which are the leading crops, and these are well known and prized, not only in Scandinavia, but in the neighboring countries.

I have been thinking that it might interest the American seed growers, to be informed how this individual culture is conducted, and I will therefore give some details regarding the methods. The culture of separately chosen specimens of plants is performed with extraordinary care, and at great expense and is conducted in the following manner: Having planted or sown an area of many acres with plants or roots from an acknowledged first class stock, 150 of those most perfect in every respect are carefully selected in the fall. These selections must be stored during the winter with great care, and are planted the following spring a good distance apart, each one marked with a number. In the course of the summer seeds are produced, and as soon as matured must be harvested separately from each plant, and provided with a respective number. Each of the selected 150 specimens is now a parent, and next year it must be tested to see if the descendants have inherited the good qualities. In the breeding of domestic animals, an excellent specimen is often found whose progeny is bad, and it is accordingly evident that the capability of inheritance is of the greatest importance in the cultivation of plants as well as in the breeding of domestic animals.

The seeds of each of the 150 families must be sown the next spring beside each other, one or two rows of each under the same conditions. The soil must be entirely uniform, and the distance between the rows and plants the same all over the trial grounds so that none of the trials shall have any advantage over the others. The growth of all must be watched very closely during the summer, and a book in which is recorded the entire culture, not only in which are described the individualities of every specimen of the parents, but also those of the descendants. In the fall the cabbage, roots or other plants cultivated for this purpose, are lifted and placed in rows in the field and each number is now described in the register, and points are given for the different qualities. For example: form, size, top, root, firmness, color, height, health, etc., etc., and at last all the specimens of each number are counted, gathered in heaps and weighed, each number always being kept separately.

The different varieties of roots are further subjected to a closer examination in a special laboratory in order to ascertain which number contains the highest percentage of value in nutriment. This value is multiplied by the number's yield in weight, and the value of the roots is finally determined in cwt. of dry matter per acre. In the cabbage the heads must be divided by cutting to decide firmness and color. In celeries, the whiteness of the flesh is of the greatest importance, and so in each and every crop many details must be considered. It is a great achievement to have all good qualities united in one specimen. When the points are recorded in the register for all the qualities (good or poor), it is easy to reach a conclusion which of the 150 families is in every respect preferable for further cultivation. It is possible that poor qualities will lie dormant in the first generation and not become evident until the second generation, so to obviate this chance a single family is not chosen at once for further cultivation but 10 per cent of the chosen numbers of 15 families. The other 135 families are destroyed and the best numbers of those reserved are chosen for the next year, which with the genealogical tables carry the race further along. It will thus be seen that the entire individual culture of pedigreed stocks is very circumstantial, but at the same time it is clear that the above described way for improvement will eventually terminate in most ideal results

GLADIOLUS GLORY.

Gladiolus

We control the originator's stock of
THE NEW TYPE
KUNDERDI "GLORY"
WITH "RUFFLED" PETALS

The broadly expanded, wide open flowers paired by twos, all face in the same direction and are carried on straight stout stalks, fully 3½ feet. From three to eight of these handsome flowers are open at one time. Each petal is exquisitely ruffled and fluted.

The color is a delicate cream pink, with a most attractive crimson stripe in the center of each lower petal the shade of which is unique in Gladioli. The ruffling o the petals in this new strain has attracted much attention the country over.

Prices of Indoor Fruits and Vegetables.

Chicago, December 23.—Mushrooms, 10 cents to 25 cents per pound; asparagus, $2.50 to $3 per dozen bunches; cucumbers, 75 cents to $1 per dozen; tomatoes, 10 cents to 25 cents per pound; radishes, 15 cents to 35 cents per dozen bunches; lettuce, 25 cents per pound.

New York, December 23.—Mushrooms, 50 cents to $1.80 per 4-pound basket; cucumbers, $1 to $1.25 per dozen; tomatoes, 15 cents to 35 cents per pound; radishes, $1.50 to $2.50 per 100 bunches; lettuce, $1 to $1.50 per strap; mint, 50 cents to 60 cents per dozen bunches.

Fertilizing Asparagus.

Almost any well-drained soil with plenty of humus in it will grow asparagus, but a rich sandy loam is best, which should be deeply plowed and have large quantities of rotted manure worked into it, states the Maryland Experiment Station, and suggests the following regarding fertilizers. Perhaps 1,000 to 2,000 pounds of kainit per acre in midseason is as good as anything, however, if a complete fertilizer is preferred the following may be used, 400 pounds dissolved rock, 400 pounds kainit and 200 pounds nitrate of soda in the spring.

The ground should be laid off in furrows six to eight inches deep and from four to six feet apart, the plants should be strong one-year-olds, and set two feet apart in the furrows, the earth filled in two or three inches over the crowns. Thorough cultivation should be continued during the entire season and in late fall the tops cut off, removed from the field and burned to destroy disease germs and insects. The second year a good coating of stable manure or 1,000 pounds of kainit per acre should be applied in early spring and the entire surface plowed four inches deep. Thorough cultivation during the year and the tops again removed in the fall. No cutting of stalks should be done the second year. The third and succeeding years a light covering of rotted manure about five tons per acre, should be given in winter or early spring, and in connection some commercial fertilizer should be used and the ground plowed and harrowed.

If green stalks are wanted the ground may be left level, but if white stalks are desired furrows from each side must be thrown over the row to form a ridge eight or more inches high. The ground must be kept cultivated to keep down weeds. As soon as the cutting is over the entire piece is plowed and harrowed about four inches deep and the shoots allowed to grow. Good cultivation must be given so that large amounts of plant food may be stored up in the roots and crowns to produce strong shoots the following year. After the tops die they should be removed and burned as before. This treatment is given year after year as long as the yield is profitable. The use of salt is not considered necessary as this system of fertilizing, especially the use of kainit, furnishes a large amount of the same constituents supplied by salt, rendering the latter unnecessary.

Forcing Rhubarb.

Generally with the turn of the year we commence forcing rhubarb. If we knew what the other growers are doing we of course could time our crops to suit conditions; as it is, we can only guess at market conditions. Last season was a very poor one for rhubarb forcing in our vicinity, as the thing was seriously overdone in midwinter. Thus the very first crop in January sold well, and also the very last, just before the coming of the outdoor crop, brought good money. However, the bulk sold slowly and often as low as 35 cents per dozen bunches of extra fine size and quality. If we were to advise anyone in regard to marketing—we would say bring in the heaviest cut just before the outdoor crop comes on as the demand is most active, and if the spring is a little late good sales are sure.

If there is no frost in the ground we plow along one side of the rows in the field and loosen the clumps with the spade. They are then hauled to cold frames and stored so we can get them when wanted. Here we expose them to hard freezing for a few days, then cover with sash or shutters or boards. For forcing we use outside manure heated frames similar to deep hotbeds. These beds should not be too warm as high temperature produces thin stalks. The roots are packed closely and all cracks filled with earth. Absolute darkness is desirable as all light induces leaves to form instead of stalks. About this time we have a lot of 12-inch boards to spare from the celery fields which we use to make these beds and to cover them. Rhubarb can be done well under greenhouse benches, but we do not like the labor of carting them in and out, rather prefer the frames outdoors. After forcing the roots are useless and altogether we are not very anxious to operate heavily in this line, but in the routine of truck farming rhubarb forcing has a place. MARKETMAN.

ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th Street NEW YORK CITY.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y.

Thirty-seventh annual convention to be held at Boston, Mass., 1912.

THE orange crop of the Pacific coast gained 145.4 per cent in 10 years; the lemon, 210.7 per cent.

THE report of the annual meeting of the Western Association of Nurserymen will be found on page 1268 of this issue.

OCEAN SPRINGS, MISS.—The Bay View Pecan Nursery, C. Forkert proprietor, is making a specialty of pecans and is producing fine trees that bear nuts of superb quality.

Notes From Southern California.

AT HOLLYWOOD

We have before mentioned some of the interesting things grown by E. D. Sturtevant at his charming home at Hollywood, but every time we call there is something new and a visit near the end of November was no exception. One usually thinks of a warm greenhouse or store in connection with allamandas but here A. Williamsi is flowering outside. This species has not the large flowers of A. Schotti but more nearly approaches the old A. nerifolia with its more tubular but finely colored flowers. Ipomoea Briggsi, or I. Lady Briggs, is a fine plant here; the vine runs quite to the eaves of the house and is covered with the large cymes of glossy claret colored flowers. It is probably a variety or form of I. Harsfalliæ. Another beautiful vine is Tecoma jasminoides alba. The typical T. jasminoides is more or less common here outside, running over balconies, verandas and roofs, but the form Mr. Stutevant has is a pure white with more of the red markings in the throat. There is a faint tinge of yellow right in the center that serves to enhance the purity of the white and it is as lovely as Dipladenia Boliviensis, which we have already noted as flowering outside here.

Growers who have tried to grow and flower solandras in the greenhouse can hardly imagine plants of S. guttata with great shoots as thick as one's arm scrambling all over a house and covered with flowers, but this is how it thrives here. This is the "cup of gold" of the Mexicans (copse d 'or). It was late in the season for bulbus plants to be growing but several choice things were in bloom. Crinum Powelli album is beautiful—a pure white form, identical in all other respects with the type. C. Moorei is a fine pink and there are several hybrid forms of Mr. Sturtevant's raising. The seeds are interesting—they are as large as a walnut and if laid on the surface of the soil they push out a large, succulent root that eventually enters the ground and forms a plant like some palms. Sprekelia formosissima, the Jacobæan lily, are still in flower, the form grown here being almost scarlet. Ruellia macrantha, with its pretty rose-purple flowers, was effective, and so was the bright yellow Linum trigynum close by. This is a great subject for winter blooming in California and should be more planted. This is also known, perhaps more correctly, as Reinwardtia trigynum and is a native of the East Indias.

Alpina nutans grows outside in this section finely and if given plenty of water makes growths as strong as the old ginger plant (Hedychium Gardnerianum). The racemes are produced from the tops of the stems and have a shell pink and white with each flower which is almost like an orchid with its exposed brightly colored lips. It is known here as the shell flower. A very distinct palm here is Livistona Mariæ. It is almost a desert palm, thriving with very little water, and has foliage of a light port wine color. The leaves are green when they appear but take on the red color as they develop. Another beautiful foliage thing is Bambusa vulgaris variegata. This has golden yellow stems, sharply and distinctly marked with the deepist green, a striking variegation not often equalled. It appears to grow as strongly as the type and is a fine thing. No mention of Mr. Sturtevant's place would be complete without a reference to his lilies, and although in November they are naturally not as strong as in August, there were great blooms on the day of our visit. Peter Bissett, now of the Department of Agriculture, Washington, D. C., was due, in the course of his California tour, also F. P. Dorsett, also of the department. We would like to tell of a new hybrid water lily but as this is as yet neither named or in commerce we must not anticipate. H. R. R.

MARLBORO, MASS.—The Warren Howe place on East Main street has been sold to Joseph Barry of Hildreth street, who will carry on the greenhouse business on quite an extensive scale.

RAINBOW

A

Glorified Prosperity

The Carnation Growers' Opportunity.

QUALITY **MERIT**

For free blooming, upright ideal habit and real commercial value **Rainbow** cannot be beaten. It is easily propogated; it is a cool grower; the calyx is strong and non-splitting; the flower is large and of perfect form.

Rainbow is a money maker and sells on sight. It is a grand commercial sort—more flowers—higher prices. It beautiful co or combination makes it an att active, superior display bloom.

Rainbow is suitable for every purpose. Read our advs in this paper—they are full of facts—a trial of **Rainbow** will convince.

Our cuttings are strong and robust, they are clean and well rooted, they are guaranteed. We can deliver half a million; order today and take them when you are ready for them

Circulation in Buyers' Brains

IS the kind enjoyed by the American Florist. Its actual paid circulation we believe, is the largest in its class. The contents are of real present value and are preserved for future reference. Advertisers who realize this establish permanent business with the best trade in the United States and Canada.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, $1.25

AMERICAN FLORIST CO.
440 So. Dearborn St.
CHICAGO.

HOLIDAY BOOKS.

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

Investigation Pays

Look into our line of Ventilating Apparatus. You will see, just as many other florists have seen, that the **Advance Machine** is absolutely the best on the market.

It is hard to improve a perfect article, but we are constantly striving to make our machine better.

All orders and inquiries receive our prompt and careful attention

Write for catalog.

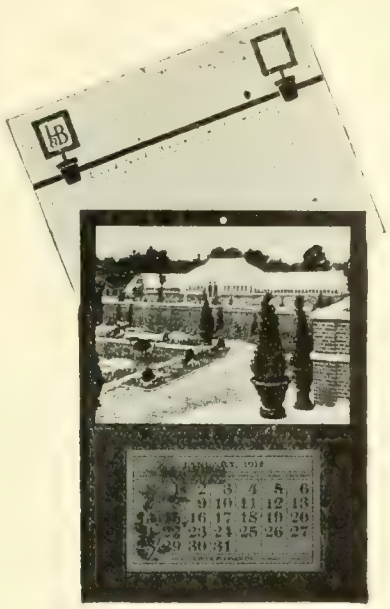
ADVANCE CO., Richmond, Ind.

Nashville, Tenn.

The approaching holiday season is very evident in the floral store windows, and the dealers are bringing in their best wares for that most beautiful of all gifts at the holiday time—a blooming plant. The window decorations this season seem to be following out the Christmas idea more than ever and are being confined to green and red, though there are many other beautiful blossoms displayed in the stores. The supply will be abundant and the quality excellent as already foreshadowed by the window displays. In roses, all the growers have hit the season exactly, and all the best is ready for this especial occasion. The class of flowers is about the same with all the growers, some making a specialty along some lines and some another. Roses will be plentiful. American Beauty seems to be especially fine, judging from specimens seen at some of the social functions, as well as the display in the floral stores. Richmond, Killarney, White Killarney, Golden Gate, Ivory and others are fine. Carnations were never better and by some are esteemed more highly than the rose. There will be all kinds of bulbous stock—Roman hyacinths, lily of the valley, narcissi and Harrisii lilies. There has never been a break in the lily supply; in fact, they seem to be perennial in the supply. Violets will not be so abundant, though Geny Bros. say they will have an ample supply for all demands. In potted plants there is a wonderful lot, and every kind of flower capable of being forced will be in to select from. Azaleas, Begonia Gloire de Lorraine, the finest ever seen; poinsettias grown in pans, cyclamens, narcissi and ferns in endless variety. The baskets decorated with potted plants form a class all by themselves and are very popular, and the artists in the stores try themselves to see what variety of artistic combinations they can originate, with gauzes and ribbons to help out the effect. The result really is a wonderful sale, a pleased donor, and a very happy recipient. Trade has been very good and will be on a boom now for some time. M. C. D.

ROCHESTER, N. Y.—The creditors of E. C. Campbell and Campbell the Florist have appointed a committee to investigate the assets and liabilities and to report at a later meeting. G. B. Hart and W. F. Kasting were appointed a committee to take charge of the store during the holidays.

MADISON, N. J.—The annual meeting of the Morris County Gardeners' and Florists' Society was held December 13 and the following officers were elected: Robert Tyson, president; John Dunn, vice-president; Edward Reagan, secretary; Robert M. Schultz, assistant secretary; William H. Duckham, treasurer; Charles H. Totty and G. H. Neippe, trustees.



The back is a mottled green paper especially imported from Germany. The illustration is wonderfully life like in five colors. The pad sheets have an under printing of flowers and different greenhouse subjects.

One of These Calendars is Laid Aside For You.

LAST year, after we had sent out that rather unusual three-fold calendar of ours, with its beautiful brown photographic reproduction of a greenhouse at the top, and a five-colored rendering of a show house filled for Easter, at the bottom—we received a flood of complaining letters.

Not from those who received the calendars—but those who didn't.

When you walk into a friend's house and see one of our calendars hanging on the wall, and you haven't received one, naturally enough, as a good customer, you wonder why you have been left out. Some take it as a mistake and let it go at that. But others write in and act as if they thot we did it on purpose. The truth is, we wanted all of our friends and most of our enemies to have one last year. So this year we have taken extra pains to see that your name, along with the rest, is on the list to be sent our 1912 calendar.

But to make doubly sure, won't you kindly drop us a postal saying you want one and I will see to it myself that it is mailed to you. This will obviate all chances of your not getting one.

P.S. Its even better than last years and that's saying a good deal

Louisville, Ky.

The annual meeting of the Kentucky Society of Florists was held at the store of August Baumer, in the Masonic building, December 11, and the following officers were elected:

Anders Rasmussen, president.
H. Kleinstarink, vice-president.
August Baumer, corresponding secretary.
John Kleinsteuber, financial secretary.
Gus. Kleinsteuber, treasurer.
Joseph Lawson, trustee.

The night of holding the meetings of the organization was changed from the first Tuesday in the month to the first Wednesday. Plans for the holding of a flower show next fall were discussed but the matter was not fully decided.

NOTES.

Koehlein & Hoffman have opened a store at 2005 West Market street. They have a greenhouse at La Grange and are very successful in the cultivation of roses, carnations and chrysanthemums.

Holly was quite scarce for Christmas and the quality of a large proportion of it was very poor. H. G. W.

Sound Greenhouse Building Methods.

When Your Order for a Greenhouse Reaches Our Factory, We Make Accurate Detailed Drawings for the Various Parts Going into Your house.

ONE man is an expert on the wood parts—he does that; another does the iron, another with engineering experience knows about stress and strains and directs the size and kinds of supports and fittings, and so on.

Then the lay-out man indicates the length to which the pieces are to be cut and directs where all holes shall be drilled so that the house will go together like clockwork.

We tell you these things just to show you that we have completely out-grown that state of having so-called "all-around men" who do a little of everything in every line (and not much of anything that's really dependable.)

You know that the only way a man can be an expert is to direct all his time and attention, heart and soul, to some one thing.

That's the kind of men our organization is made up of.

The kind of men whose service you get from us at no more expenditure in the end than for the "Jack-of-all- trades" kind who are full of guesses. Write us.

WHAT THE USERS SAY ABOUT KROESCHELL BOILERS

Saved Two Carloads of Coal; Does Not Need to Fire Boiler From 11 p. m. to 6 a. m.

Your No. 9 Boiler is heating my entire range of two houses, 18x132, one house 6x108, two houses 16x88, one house 20x86, and one house 21x50, and will easily take care of 5,000 sq. ft. more. With the thermometer 18 degrees outdoors, **fire at 11 p.m. and not again until 6 a.m.** The boiler surely is giving me perfect satisfaction. I have used one steam and five hot water boilers. I like your boiler and cannot keep still when I meet a brother florist, but must tell him about your boiler and how much it has saved me in coal bills. With my last boilers I required four to five carloads of coal to heat the same space which is now heated by your boiler with about three carloads of coal. You for another boiler when I have to buy again.

New Orleans.

A LARGE CHRISTMAS TRADE.

The Christmas trade has begun in earnest and the florists have their hands full filling orders. Never before has the demand been so great and the dealers are wondering whether they will have enough flowers to fill the calls. In the plant line the business is just as active and the supply is equal to the demand. The weather for the past week has been very unfavorable for out-door work—continuous rain and warm and sultry.

NOTES.

The New Orleans Horticultural Society held its monthly meeting December 18, but it was poorly attended, as the members are too busy with their Christmas trade. Richard Eichling made a fine display of Christmas flowers, which were greatly admired for their perfection of growth. The subject of moving to the Progressive Union hall was put off until after the holidays.

The New Orleans Horticultural Society at its regular meeting, December 31, will take up the subject of moving its meeting hall to the Progressive Union building, where they will have a much larger hall and be able to make monthly exhibits of flowers and plants, open to the public.

Herman Dorscher has purchased a square of ground on Gentilly avenue, which he intends to put one-half of it under glass and the balance in nursery stock.

Henry Despommier, Jr., gardener for J. P. Blair, has just recovered from a severe case of lagrippe.

J. A. Newsham has a fine collection of orchids in bloom, and there is a good demand for them.

Abele Bros. have their greenhouses well stocked with potted plants for the winter and spring trade.

The Metairie Ridge Nursery Co. is doing a good business in cut flowers and decorative work.

C. W. Eichling is busy filling country orders, both in the flower and plant line.

U. J. Virgin's stock of maiden hair ferns are about the best in the city.

Herman Rinck has entered the garden business on his own account.

Chas. Eble's store is beautifully stocked with flowers and plants.

Mrs. J. H. Menard is quite busy, both in flowers and decorative work.

SUGGESTIONS FOR PLANT GROWERS.

Cleaning Up After Christmas.

The Christmas sales will give the plantsman an opportunity to give the houses a thorough overhauling and begin preparations for the Easter stock, and also more room for the plants that are to produce flowers during the winter. The probabilities are that the best plants have been disposed of, and the demand for the balance will slacken up considerably for the next two or three weeks. Any plants that will not be salable in the middle of the next month especially if they are not of the best quality, had better be thrown away, and not allowed to remain taking up valuable space for a month or more, only to be discarded later. The stock plants should all be selected and preparations for next season's propagation begun. That old favorite Begonia incarnata is still grown by many. The old plants never make good stock for another year, so select enough to produce all the stock wanted, and discard the balance. It will be busy times where many plants are grown, but the quicker and earlier the work is done the better will be the resultant crops. The bulb stock is now ready to be brought in and all the room should be immediately filled up with stock that can be grown into plants that will find ready sale. It sometimes takes courage to throw away plants that look as if they would bring in something, but it is far better to do this, even if a plant is thrown out that might be sold, than to carry along a lot of stock that never turns in a cent to the money drawer.

Poinsettias.

This is a Christmas plant pure and simple. It is to the midwinter holidays what the lily is for Easter and the sale of plants or flowers after the new year is very small and hardly remunerative. The plants that are left should at once be treated for stock plants. It is the custom of some growers to immediately place the pots under a bench and water them no longer. It is much better, however, to block them up closely in a warm house and gradually dry them off until the wood ripens and then store them away where they will be kept dry. When the plants are treated by the former method the green wood often dies down more than half the length, but by a slower ripening off many more and much better cuttings can be obtained. They can be laid down on their sides under a carnation bench where they will not receive any water or if the pots are needed they can be heeled-in in such a location, and here they can remain until April when they should be started for propagation, using either the old growth or starting the plants into growth and making the cuttings from the young shoots as they break from the old wood. With these it is better to make the cuttings with a heel and in a warm location they root quite easily.

Tulips and Narcissi.

The Dutch bulbs are now in condition to bring into the houses, for they should be well rooted, and will force readily, and from the first of the year on the grower should regulate the culture of these so that there will be a continuous supply. The best way to accomplish this is to have one day in the week which is bulb day, that is, on this day the succeeding lots will be brought from where they are stored and placed in the greenhouses. The demand will, of course, fluctuate to some extent, but by looking back two or three years it will be found that the calls for this stock is about in the same proportion every year, and a basis on which to figure about how many pots or boxes should be brought up can be obtained. If it is found that the stock is accumulating at any time those that are not quite in bloom can be removed to a cooler house and retarded, and those that are almost in bloom, if moved into a shed where it is dark and quite cool, will last in splendid condition for a week or ten days longer. For the present it will be necessary to put the pans and pots in a shaded position in order to get the proper length of stem. Those forced early if allowed to stand in a warm house in full sunlight, will

open their flowers before they have attained good height, so it is well to place them under a bench or provide a place where they can be kept rather dark for a week. In cutting the flowers endeavor to cut them from the pans or boxes that have been in the houses the longest. A thoughtless man will cut into a box that is just opening and which would be good for a week or more, when there are plenty that could be cut that will not last nearly so long. There is always a great waste in growing bulbs and everything that is possible should be done to prevent it. On bulb day when the fresh lot is put on the bench those that were brought up three or four weeks before and are in full flower will be ready to be thrown out. Any flowers that may be on these boxes, if they are well in bloom, should be cut and placed in water. They will last much longer if cut and kept cool than they will if left on the bulbs in the greenhouses.

Fuchsias.

It is a good time now to start the old stock plants of fuchsias, for there is plenty of room in the propagating bench and it is the early struck cuttings that make the fine plants for vases and boxes, and if cuttings are taken in spring they immediately produce a flower and it is difficult to get a good growth, the plant often remaining short with a stunted appearance yet bearing flowers. If the old plants have been thoroughly ripened, shake the soil off and pot in a good new loam, cut back the wood and place them in a warm house and syringe plentifully. The young growths will shortly appear and should be made into cuttings as soon as they have attained a length of an inch and a half or two inches. As soon as rooted pot in 2-inch pots and give the young stock a warm temperature. When growth commences the top can be taken off and another cutting made, and the plants shifted to 3-inch pots. Another stopping will be necessary in late winter to make nice, bushy plants that will be full of bloom in early spring. Keep them clean from mealy bug by constant spraying.

Vinca Rosea.

A plant that is often lost sight of by many for summer bedding is Vinca rosea, and it makes a most beautiful plant, being covered with flowers all through the summer until frost. The great cause of there not being much stock of these is that the seed is not sown early enough. December or early January is the time to plant the seeds of this plant to have them in fine shape for bedding out in June. Plants started early and grown in a warm house will be in flower at the time of planting and continue a mass of bloom throughout the season. The seed should be sown in flats which should be placed in a house having a temperature 65° to 70°. When the second leaf forms they should be pricked out into other flats about an inch apart and when they have five or six leaves potted in 2-inch pots, later being shifted into the 3-inch size. The soil should be of a sandy nature both in the potting and in the bed, if possible, but they will grow well outside in a heavy loam. They can be had in white, rose pink and pink with white eye, and come very true to color from seed.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

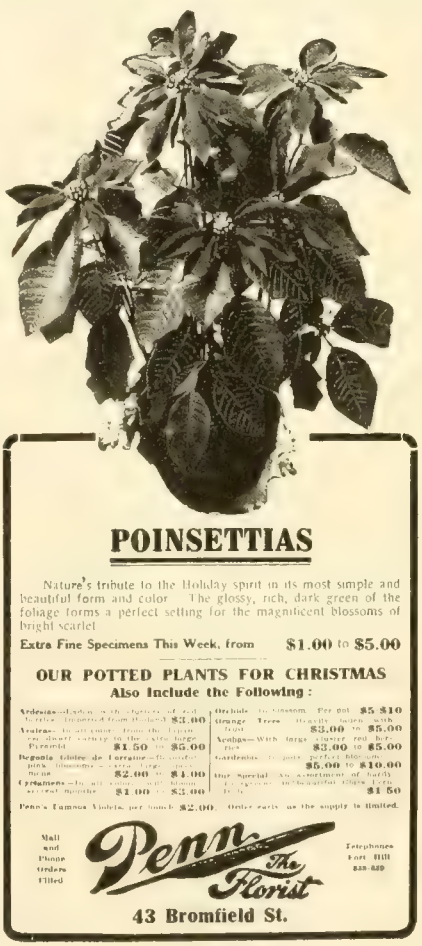
Vase of Lilies and Stocks.

There is no arrangement of flowers that is more effective in certain locations than a vase that is well arranged. The principal thing, however, is that the arrangement is good, too often all that is done is to just pick the flowers up and drop them in the vase, no particular attention being paid as to how the flowers settle, and a vase put up in this manner is seldom any ornament to its surroundings. The most successful designers of this class of work hold the bunch in the hand, each flower being carefully placed and the green mixed through as the bunch is made. It is then placed in the vase and by a few artistic touches the flowers are pulled and twisted into their proper locations. The vase which we illustrate was arranged by George M. Geraghty of Dunlop's, Toronto, Ont., and was used on the altar at a church wedding.

The selection of the vase and the flowers adapted to the location should first attract the designer. Some locations will require a low arrangement, while with others a tall vase with long-stemmed flowers will be the most fitting. Plain glass vases are always to be preferred; too much ornamentation on the vase detracts from the flowers, and these vases can be procured in all shapes and sizes and are a necessary accessory to the up-to-date florist, both for use in decorations and to show off the flowers to advantage in the store and office. A good assortment should always be in the hands of the present-day dealer.

The choice of flowers should be carefully attended to, particularly as regards the background. Especially is this so in halls and churches, where the backgrounds are plain and often of a shade that "kills," as some florists would say, the flowers. The same care should be taken in residences, for what would make a most stunning effect in one room would not be at all fitting in another. The artistic worker will carefully see the location in which the flowers are to be placed, and will know at once what flowers can be used, and quickly see the most pleasing color and effective arrangement. This will require not only judgment but experience and careful study.

The flowers should be arranged loosely and naturally and a good quantity of nice greens are a necessary addition. A bow of ribbon tied on the vase but not with too long bows or ends will often add a finish. A study of the vase illustrated will readily show what can be done with this class of work and how beautiful it can be made, and also how fitting it would be in many locations. Any or all of the larger flowers can be used in this manner, but quality is always a great factor, and with loose arrangements of this character, if placed where they will be closely inspected should always be made of first-class quality stock.



One of Penn's Recent Advertisements in the Boston Post, Reduced About One-half.

BENNINGTON, VT.—The demand for plants was good, cyclamens and primroses sold very well, but there was little call for azaleas, writes S. C. Holton of the holiday trade, decorative stock was also in good demand, we sold every fern we had in stock, both Boston and Whitmanii. The supply of roses and carnations was short and violets cleaned up well, there was no demand for bulbous flowers, there being a surplus left on hand. All the flowers were of as good quality as usual with prices as they were last year. The amount of business was about the same as during the holiday season last year.

BLOOMINGTON, ILL.—The weather was fine almost all the week preceding Christmas, with the thermometer not much below the freezing point at any time, writes A. Washburn & Sons, making as favorable conditions for both trading and delivering as we have seen at this time in the last fifteen years, and the business certainly increased 10 per cent. The quality of the stock was a little better than usual, with an adequate supply at about the same prices as last year. Roman hyacinths and Paper White narcissus sold well; we do not advance prices on these, as we always have a large quantity and we use them as an argument to meet the complaints upon the high prices of roses and carnations, then when the customers finally decide to take roses or carnations they feel better for having had the opportunity of purchasing something at the old price. Buying flowers on the market has proved so unsatisfactory (and this year was no exception) that we have almost entirely given up buying for the big days. The out-of-town buyer does not have an even chance with those located in the city, for he does not see the stock and has no opportunity to choose or to refuse the stock offered.

VASE OF LILIUM LONGIFLORUM AND STOCKS WITH ASPARAGUS PLUMOSUS

WITH THE GROWERS

Nic Zweifel, North Milwaukee, Wis.

One of the most interesting things to notice in visiting greenhouses, especially those that are given over to the culture of carnations, is the varied success or failure of certain varieties with different growers, and we have often wondered whether it was a question of soil or culture or of a selected strain that the growers had when we have seen a certain variety producing wonderfully and an exceptionally fine grade of blooms. This most forcibly came to our mind when we visited the greenhouses of Nic Zweifel at North Milwaukee on New Year's day and looked at benches of White Perfection that were before us. All of the varieties were in splendid condition, but we could not help but compare these plants with some that we have seen in years past. Our own experience with this variety was that it was almost impossible to get a large plant, it simply refusing to grow as the others did during the summer, being more or less scraggly and with few blooming shoots when planted in. It would then produce the flowers on the shoots and it was a long wait before another crop of flowers would show. But here the plants are of extra large size, full of the finest blooms and with buds and shoots growing luxuriantly. It really seemed as we gazed on these benches that we at least had never seen them excelled, if we had ever seen them equalled.

Some ten miles north of the business center of Milwaukee, but a short way beyond the city limits are located the houses of this most successful grower, and they were all in the pink of condition, with an elegant crop of carnations for this season of the year. In eight houses, each 27x200 feet, of up-to-date construction, being of Moninger material with Garland iron gutters, are housed 50,000 carnation plants, and to verify our opinion of the condition of them and the crop which they are producing, it can but be said that there were 35,000 blooms of the highest quality cut from these houses during the Christmas trade. All the leading varieties are grown extensively and the newer ones are being given a good trial. There are 12,000 Enchantress and they were of the finest quality, the plants being very large and strong, full of bloom and bud, and the flowers were extra large and of magnificent color. Of White Perfection there were 10,000 and the benches looked like a bed in the garden in summer, so thick were buds and blossoms. Beacon and Victory were both grown for scarlet, but the former has won out and will be grown much more largely next year in place of the latter. Beacon certainly was a glorious sight, the plants being very floriferous and the blooms of good size and color. Scarlet Glow and Bonfire were both doing well and the latter will be given a much larger trial another year. Winsor is grown for pink, some 6,000 plants, and the flowers were of splendid color and good size.

CARNATIONS AT NIC. ZWEIFEL'S, NORTH MILWAUKEE, WIS.

Of the newer varieties, Gloriosa was exceptionally good and had won a place and will be grown in much larger quantities. Mayday was also fine and the flowers were of fine quality and the plants producing well. White Wonder was very good, but with White Perfection growing as it does here, it is doubtful if the newer one can force the older out. Dorothy Gordon and Sangamo do not seem able to maintain the pace set by the others and will be passed up another year. Bright Spot looked extremely happy here in its home and had produced an immense crop of blooms and was full of buds and blooming shoots.

After looking over the older varieties and the season's novelties and having expressed ourselves that with White Perfection in the shape we had seen it, no better white was desired, then we were shown a bench that opened our eyes, for here was a seedling white that seemed to have something on the White Perfection. This was No. 274, still being grown under number and unnamed, and the plants show exceptional vigor, with long, strong blooming shoots bearing exquisitely formed flowers of the purest white. The petals are deeply serrated, adding much to the appearance of the flowers, and added to this is the most delicious fragrance. It certainly looks as if this variety has a great future.

As we passed around the houses and inspected the plants we no longer wondered why Mr. Zweifel carried away so many first prizes at the Milwaukee Flower Show last November, when the blooms were staged in competition with the best growers of the west, and we could not but help notice the pride which A. Reinhardt, the courteous foreman, exhibited as he escorted us around, for both proprietor and foreman have reason to be proud of the output of these houses.

PRESIDENT VINCENT OF THE SOCIETY OF AMERICAN FLORISTS AND SOME OF HIS APPOINTEES.

Society of American Florists.

THE PRESIDENT'S MESSAGE.

During the year now opening before us, it is my earnest desire to see our membership increased to its fullest extent, both as to life and annual members. This cannot be accomplished by myself, alone, therefore I seek your kindly assistance. There are hundreds, yes, probably thousands of men in the trade and allied industries, who, if they were personally approached, and the advantages of membership in the S. A. F. demonstrated to them, would willingly join our ranks, and this is why I appeal to you to help along our great work. There must certainly be several men amongst your own personal acquaintances who would make good S. A. F. members; therefore, I say to you, each individual member, secure new members by your direct personal appeal. (Application blanks will be sent upon request.)

The opportunities presenting themselves at the coming convention to be held in Chicago, August next, in all probability will be the largest in the history of our society, and the results which we hope to see accomplished at that time will, we trust, make history.

With a large membership present, all striving for the common good, and with the many advantages of our business organization, such a meeting and such an attendance cannot fail to produce a general good feeling, and do much towards bringing a closer affiliation of the different interests and allied societies which have been drifting away rather than toward the parent society.

Much excellent work has been done in the past years by the faithful workers in our various legislative committees; we have already secured many concessions through their work, and we are in the position through our strength and numerical numbers, to exert a further strong influence for good or opposition to measures deemed prejudicial to the best interests of the trade.

May I ask the officers, vice-presidents and members to commence a little missionary work at once among your fellow florists? I would be glad to see you bring in as many new members as possible, even one new member secured by you will be to your honor and credit. All new members should be reported to John Young, secretary, 54 West 28th street, New York City, who will see that you are credited for members secured.

Thanking you in advance, hoping to meet you in Chicago and wishing you all a prosperous and happy New Year, believe me, Respectfully yours,

RICHARD VINCENT, JR.

PRESIDENT VINCENT S APPOINTMENTS.

Following is the list of appointments made by President Vincent, of the Society of American Florists, for the year 1912:

Directors for three years—Charles H. Totty, Madison, N. J.; John A. Evans, Richmond, Ind.

Botanist—Prof. A. C. Beal, Ithaca, N. Y.

Pathologist—Prof. H. H. Whetzel, Ithaca, N. Y.

Entomologist—Prof. Thomas B. Symons, College Park, Md.

Tariff and Legislative Committee—Frank R. Pierson, Tarrytown, N. Y. (chairman); John G. Esler, Saddle River, N. J.; J. C. Vaughan, Chicago; Patrick Welch, Boston, Mass.; J. Otto Thilow, Philadelphia, Pa.; E. G. Hill, Richmond, Ind.

Committee on School Gardens—Benjamin Hammond, Fishkill-on-Hudson, N. Y. (chairman); C. B. Whitnall, Milwaukee, Wis.; Michael Barker, Chicago; Wm. R. Smith, Washington, D. C.; C. L. Seybold, Baltimore, Md.

STATE VICE-PRESIDENTS.

Alabama—W. B. Paterson, Jr., Montgomery.
California (N.)—D. MacRorie, San Francisco.
California (S.)—Edwin Lonsdale, Lompoc.
Colorado—J. A. Valentine, Denver.
Connecticut—J. F. Huss, Hartford.
Florida—C. D. Mills, Jacksonville.
Georgia—A. C. Oelschig, Savannah.
Idaho—J. W. C. Deake, Twin Falls.
Illinois (N.)—Fred Lautenschlager, Chicago.
Illinois (S.)—J. F. Ammann, Edwardsville.
Indiana—Irwin C. Bertermann, Indianapolis.
Iowa—J. T. D. Fulmer, Des Moines.
Kansas—J. Y. D. Mueller, Wichita.
Kentucky—August R. Baumer, Louisville, Ky.
Louisiana—Harry Papworth, New Orleans.
Maine—Joseph Kirk, Bar Harbor.
Maryland—Robert L. Graham, Baltimore.
Mass. (E.)—Robert Cameron, Cambridge.
Mass. (W.)—Geo. H. Sinclair, Holyoke.
Michigan (E.)—E. A. Scribner, Detroit.
Michigan (W.)—Elmer D. Smith, Adrian.
Minnesota—S. D. Dyringer, St. Paul.
Mississippi—S. W. Crowell, Rich.
Missouri—F. H. Weber, St. Louis.
Nebraska—Geo. H. Swoboda, Omaha.
N. Hampshire—R. E. Hannaford, Portsmouth.
New Jersey—W. H. Duckham, Madison.
New York (E.)—A. L. Miller, Brooklyn.
New York (W.)—C. J. Hewson, Buffalo.
N. Carolina—William Rehder, Wilmington.
Ohio (N.)—Charles Graham, Cleveland.
Ohio (S.)—C. E. Critchell, Cincinnati.
Oklahoma—George Stiles, Oklahoma City.
Oregon—James Forbes, Portland.
Pa. (E.)—E. J. Fancourt, Philadelphia.
Pa. (W.)—E. C. Reineman, Pittsburg.
Rhode Island—L. J. Reuter, Westerly.
South Carolina—C. A. Moss, Spartanburg.
South Dakota—E. C. Newbury, Mitchell.
Tennessee—A. L. Baum, Knoxville.
Texas—Eugene Corley, Dallas.
Virginia—J. Guille, Portsmouth.
Washington—Amy L. Lambley, Spokane.
West Virginia—C. P. Dudley, Parkersburg.
Wis. (N.)—J. E. Matthewson, Sheboygan.
Wis. (S.)—Nic Zweifel, No. Milwaukee.
District of Columbia—O. A. C. Oehmler.
Panama, Canal Zone—William Claus, Paraiso.

CANADA.

Alberta—A. M. Terrill, Calgary.
Manitoba—H. E. Philpott, Winnipeg.
Ontario—T. H. Miller, Toronto.
Quebec—Geo. A. Robinson, Montreal.

A Little Dutch Garden.

I passed by a garden, a little Dutch garden,
Where useful and pretty things grew,
Heart's ease and tomatoes, and pinks and potatoes,
And lilies and onions and rue.

I saw in that garden, that little Dutch garden,
A chubby Dutch man with a spade,
And a rosy Dutch frau with a shoe like a scow,
And a flaxen-haired little Dutch maid.

There grew in that garden, that little Dutch garden,
Blue flag flowers, lovely and tall,
And early blush roses, and little pink posies,
But Gretchen was fairer than all.

My heart's in that garden, that little Dutch garden,
It tumbled right in as I passed,
Mid wildering mazes of spinach and daisies,
And Gretchen is holding it fast.
—Hattie Whitney.

This is the gospel of labor,
Ring ye bells of the kirk;
The Lord of Love came down from above
To live with the man who works.

This is the rose that he planted,
Here is the thorn-cursed soil;
Heaven is blest with perfect rest
But the blessing of earth is toil.

American Rose Society.

The annual meeting of the American Rose Society will be held in the Wayne Gardens, Detroit, Mich., Thursday, January 11, and will open at 2:30 o'clock, a meeting of the society being held in conjunction with the American Carnation Society and the Detroit Florists' Club the evening previous, January 10, at 7:30 p. m. After an address by President Adolph Farenwald the routine business of the society will be transacted and a paper read by Otto Koenig of St. Louis, Mo., on "Roses in the Mississippi Valley." On Thursday evening, January 12, at 7:45 o'clock the second session will be opened and Irwin Bertermann of Indianapolis, Ind., will read a paper entitled, "Roses in the Middle West"; an address by Robert Pyle of West Grove, Pa., on "The Rose as Noticed in Europe." William Dilger will be manager of the exhibition and the judges will be Emil Buett-

Wm. Dilger.

Manager Detroit Rose Show.

ner, Park Ridge, Ill.; Eber Holmes, Montrose, Mass., and Leo Niessen, Philadelphia, Pa.

American Carnation Society.

The annual convention of the American Carnation Society will convene at Detroit, Mich., on Wednesday evening, January 10, at 8 o'clock p. m., the meeting opening in charge of the Detroit Florists' Club when the address of welcome and the responses of the American Carnation Society and the American Rose Society will be given. On Thursday, January 11, at 10 a. m., the society will reconvene and the president's address and reports of officers and committees and routine business will be transacted. At the meeting of January 11 Prof. H. B. Dorner will read a paper on "The Work and Methods in Hybridizing of the Late Fred Dorner," and at the meeting of January 12, which convenes at 10 o'clock a. m., Hugh Schroeter will read a paper entitled, "Everybody's Flower." Following the session of Friday the board of directors will hold a meeting.

START the new year right by sending in your subscription promptly.

HOLIDAY TRADE.

A Satisfactory Increase.

Further reports from different sections of the country of the Christmas trade confirm the deductions drawn from those that were received early and that there was a very satisfactory increase almost everywhere. With but few exceptions the reports are a much larger business; in some cases the claim is 100 per cent, and where no increase is noted it is probably owing to local conditions. One very pleasant feature in the examination of the reports is the statement generally made that stock was of better quality, and there are but few complaints of pickled stock. It would be a great boon to the business if this detestable practice could be entirely repressed. From all points the increased sale of flowering plants is noted and while this is to be encouraged, it should also show to the cut flower grower that many customers have lost confidence in his product at the holiday season. A noticeable fact is that there was no great shortage of any stock except that which was red in color, and it would be impossible to have red flowers enough for Christmas and find a market for what would be produced the balance of the year.

KANSAS CITY, MO.—One of the great advantages in this year's holiday business was mild weather, the temperature being above freezing all the time, is the statement made by the Alpha Floral Co. The amount of business shows an increase and the purchases seemed to be larger than last year. The quality of the stock was excellent and we had such a good supply that we were able to sell at lower prices than a year ago. The supply and demand for bulbous flowers was about equal and there was but little difference in that of the preceding year. There was an increased demand for red roses and red carnations of good quality and also for flowering plants. The buying was much earlier this year, and Christmas coming on Monday made it a long siege, and, while all the days were good, Saturday was the big day. Our perfected system of checking up and delivering made things easy and eliminated many needless telephone calls inquiring whether flowers had been delivered.

BANGOR, ME.—Christmas was like a day in Spring. The weather preceding was fine, the thermometer ranging from 50° to 55°, and the holiday trade was 20 per cent greater than last year, says Adam Sekinger. We had the largest sale of plants we ever had, an increase of fully 50 per cent. Gloire de Lorraine begonias, azaleas and poinsettias were all good sellers. The quality of the cut flowers was much better, the prices were from 10 to 15 per cent higher and we had plenty to fill all orders this year. In bulbous flowers we only had Paper White narcissus and Roman hyacinths, and there was no call for them. There was a much greater demand for carnations even at the high prices; all sold for $1.00 and $1.50 per dozen. There was not much call for holly, but the trade in wreaths and festooning was large; we did not have enough of the large sizes. The plant trade for me, and will build two houses in which to grow plants next spring.

KOKOMO, IND.—We had a good Christmas business, writes W. W. Coles, it being about 10 per cent better than last year. There was a marked increase in the call for American Beauty and red roses. The stock this year was good, roses being of better quality and in good supply and sold at higher prices. Carnations were about the same in quality as last year, and there was no change in the price of these or violets, selling at the same figures as a year ago; but there were not violets enough to supply the demand. There were plenty of bulbous flowers, with fair sale. The sale of plants was about the same as a year ago, and the call for azaleas and poinsettias was very good. We are growing Killarney and White Killarney this year instead of Bridesmaid and Bride, and we were able to dispose of them at 25 per cent better prices than we formerly got for the older varieties.

SIOUX CITY, IA.—Almost everybody waited until the last day and then all came in a rush wanting the very best, is the comment of Rocklin & Lehman on the Christmas business of 1911, but we have experienced this before and so were prepared up to the last minute. We had a fine trade, doing double the business of last year. The stock this year was better than that of last, and prices were a little higher on American Beauty and Richmond roses and there was an increase in the demand for these and also for violets, red stock of all kinds being the most in request. There was an increased call for plants, especially azaleas and poinsettias. The weather was almost down to zero and everything had to be wrapped up very warm, but as no complaints have been received we congratulate ourselves that the customers both in and out of the city received their stock in satisfactory condition.

DES MOINES, IA.—We closed the greenhouse at 3 o'clock on Christmas day and threw the key away, for we finished the best business we ever did, writes the James S. Wilson Co. It was way beyond anything we looked for or expected and will show an increase of 100 per cent. We sold three times as many plants this year with poinsettias and azaleas as leaders, but begonias are losing ground, selling slowly. There was a heavy demand for Boston and Whitmanii ferns, the plants in 6-inch, 7-inch, 8-inch and 10-inch sizes being purchased for Christmas gifts. The cut flowers were in most cases of equally as good quality as heretofore and we had plenty of everything except red and pink roses and red carnations but there was a large demand for these and for cut poinsettias. Paper White narcissus were the leading bulbous flowers, Roman hyacinths sold slowly.

FREDERICTON, N. B.—We are about discouraged buying cut flowers for the big days, for so many of them are pickled and only last a few hours in the living rooms, write John Bebbington & Son. The demand far exceeded our own production, for the trade increased nearly 25 per cent over last year, and we had to buy in other markets and the flowers perished quickly. The prices this year were about the same as last. There was a much greater demand for blooming plants, azaleas, begonias, Christmas cherries, cyclamens, which we make a specialty, and primroses all sold well. There were very few palms called for, but Boston ferns and other nephrolepis sold well. There was but little demand for bulbous flowers, although there was call for them in pans. Holly sold very well. There was a continual demand for funeral work preceding the holidays.

SPRINGFIELD, MASS.—The great feature in the holiday trade this year, which was about 15 per cent greater than that of a year ago, was the increased demand for flowering plants, writes William Schlatter & Son, and there was a large sale of plants in fancy baskets, and plants in basket pot covers and in other ornamental accessories. The quality of the cut flowers was very much better and they were in good supply with the exception of carnations and violets, which were short of the request, but there were plenty of Paper White narcissus and Roman hyacinths. Prices were about the same as last year but they held firmer throughout the holiday trade. There did not seem to be any marked increase in the call for any special flower over previous years.

PORTLAND, ME.—Chrismas greens and wreaths sold much better and an increased demand for flowering plants was noticed by L. C. Goddard in the holiday trade this year, cyclamens and azaleas selling quickly and at good prices. There was a small increase in the amount of business done and

The Hitchings Cup.

Sweepstake Premium Offered at Exhibition of the American Carnation Society at Detroit, Mich., January 10-12, 1912.

prices were a little better than last year on almost all kinds of stock. There were plenty of roses and violets, but the quality was not as good as in other years; but there were not enough carnations, the demand for these was much larger; everybody wanted "pinks." The supply of bulbous flowers was plentiful, with a light demand.

DANBURY, CONN.—The Christmas business this year was about 20 per cent larger than that of 1910, writes Theodor H. Judd. The quality of the flowers was better than last year, but prices on most everything were lower, there being a good supply of all stock except carnations, which were short. The demand for bulbous stock was small. Flowering plants sold well and there was a larger demand for poinsettias, but azaleas did not seem to be so popular as usual, they being in less request. The sale of holly and wreaths was much larger, we having a much greater demand for these goods.

RALEIGH, N. C.—The weather for ten days before Christmas was warm and rainy, is the report of J. L. McQuinn & Co., and caused some stock to be damaged, especially the late chrysanthemums, which damped badly, but we had some that were good. The business was better than last year and prices ruled equally as high. There was a better supply of carnations and other stock was equal to meet the demand, there being plenty of bulbous stock which sold well, especially those in pans, which sold very rapidly. Other plants sold about the same as last year. The quality of the carnations and lilies was much above the average at this season. We noted a little falling off in the demand for immortelle wreaths.

WILMINGTON, DEL.—The total sales this year were about 50 per cent larger than they were during the holidays of 1910, states H. P. Potter. There was a much larger call for flowering plants and especially poinsettias in pans, which were the best sellers. Combination plant boxes covered with birch bark and filled with dracænas, primulas, crotons, ferns and pandanus, sold well. The quality of the cut flowers was better than last year, and the prices were about the same, but the supply was not equal to the demand by any means. There were plenty of bulbous flowers and they sold well. The calls for poinsettia exceeded that of any previous year.

OBITUARY.

Henry A. Sauer.

Henry A. Sauer, a well known florist in the northeast section of Minneapolis, died at his home, 1416 Adams street, December 12, aged 64 years. He was born in Winkeldorf, Hanover, coming to America in 1869. He moved to Minneapolis in 1898 where he conducted a flower store until last July when ill health compelled him to retire. He was active in Masonic circles, belonging to several bodies, and was also a member of the Odd Fellows. He is survived by a wife, two daughters and two sons. The funeral took place December 14 and interment was at Hillsdale.

Charles Rompen.

Charles Rompen, a retired florist of Louisville, Ky., died at his residence at Lyndon, December 19, of senility aged 83 years. Mr. Rompen was born in Germany. He built and operated greenhouses opposite the entrance to Cave Hill cemetery, and later sold his interest to his partner, J. E. Marrett, and retired. He married Miss Emily Schulz, a sister of Jacob and George Schulz, the well-known florists, who survives him. The funeral was held December 21 and the interment was in Cave Hill cemetery. H. G. W.

Fred H. Johnson.

Fred H. Johnson, who for more than 25 years conducted a floral establishment in Olean, N. Y., was found dead in one of the greenhouses of E. A. Llewellyn in that city, by whom he was employed, December 18, the cause of death being heart disease. He was 82 years of age and last year sold his greenhouse plant and moved to Texas, but later returned. He is survived by a wife, who was for many years his assistant in his business.

Lucius S. Fife.

Lucius S. Fife, a florist of Shelburne Falls, Mass., died at the home of his daughter, Mrs. C. E. Buell, December 15, aged 70 years. He was born in Cleveland, O., and for the last 25 years had conducted a florist establishment. He is survived by a wife, two daughters and a sister.

REMOVE all the thorns from roses that are to be carried in the hand, especially from those arranged for presentation.

MUCH valuable matter can be found in the interesting reports of the holiday trade in the different cities. Every reader should read them carefully for business pointers and small details of value are frequently mentioned.

Important to Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

Disastrous Fire.

The Mosbaek Greenhouse Co. of Onarga, Ill., lost all their books and records by a fire which destroyed the office, storage rooms and sheds, December 31, and would request all persons and firms owing them to remit as soon as possible.

MOSBAEK GREENHOUSE CO.

American Breeders' Association.

The eighth annual meeting of the American Breeders' Association was held at Washington, D. C., December 28-30. Valuable papers were read and discussed treating of breeding plants and animals. Among those bearing on plants are noted "Apple Breeding in Canada," by W. T. McCoun, Central Experiment Station, Ottawa, Can.; "Domesticating Grape," U. P. Hedrick, Geneva, N. Y.; "How Collection of Forest Tree Seed Should Be Regulated to Gain the Benefits of Environment," George L. Clothier, Pullman, Wash.; "Result in Breeding Hardy Fruits," N. E. Hansen, Brookings, S. D.; "Some Hereditary Characters of the Shirley Poppies," George H. Shull, Cold Spring Harbor, N. Y.; "Asparagus Breeding," J. B. Norton, Washington, D. C.; "Comparisons of Pure Lines of Browallia and Their F2 Hybrids," A. W. Dunkard, Jr., Ithaca, N. Y., and "Influence of Soil Type on the Plant Variety," J. L. Burgess, Raleigh, N. C.

Chicago to Detroit.

Chairman Foley of the Chicago Florists' Club transportation committee advises that the Wabash railroad has been selected for the trip to Detroit on the occasion of the joint convention and exhibition of the American Rose Society and the American Carnation Society, to be held January 10-12. The Chicago party will leave Tuesday, January 9 at 11 p. m., due at Detroit 7:30 a. m. Wednesday, January 10. The fare is $5.50 each way. Pullman rates are: Double lower berth, $2.00; upper berth, $1.60; drawing room, $7.00.

Other trains leaving Chicago are: 12:06 noon, due Detroit 7:55 p. m.; 3:00 p. m., due Detroit 10:50 p. m. Trains returning leave Detroit 9:00 a. m., due Chicago 4:55 p. m.; 2:55 p. m., due Chicago 9:45 p. m.; 2:15 a. m., due Chicago 9:50 a. m.; 11:00 p. m., due Chicago 7:15 a. m.

For further information and reservations address F. H. Tristram, A. G. P. A., Wabash Railroad Ticket Office, 68 West Adams street, telephone Harrison 4500. Reserve berths without delay.

National Sweet Pea Society.

At a meeting of the National Sweet Pea Society of America held in Boston December 9, the preliminary schedule of prizes for the annual exhibition and convention to be held in Boston July 13-14, 1912, was adopted and ordered printed. The total amount offered in the schedule is $2,215.25 and includes prizes for private gardeners, amateurs, commercial growers, retailers and school children. Many valuable special premiums have been donated by commercial firms and members and friends of the society. Much enthusiasm was shown at the meeting, the prospects being that it would be the largest exhibition of sweet peas held anywhere, providing the weather conditions were favorable. Further contributions toward the general prize fund and special prizes are still respectfully solicited.

Special premiums are offered by Jos. Breck & Son, R. & J. Farquhar & Co., Thos. J. Grey Co., W. Atlee Burpee, Henry A. Dreer, Henry F. Michell Co., Peter Henderson & Co., Jerome B. Rice Seed Co., Lord & Burnham Co., Sutton & Sons., John Lewis Childs, Stumpp & Walter Co., T. F. Galvin, A. T. Stearns Lumber Co., Watkins & Simpson, Arthur T. Boddington, Penn, the Florist, Boston Cut Flower Co., M. J. Touhy, Henry Comley, Boston Flower Exchange, Boston Co-operative Flower Market, F. R. Pierson, S. J. Goddard, James Wheeler, F. E. Palmer, The Saugus Home and School Association, William Sim, Lunt Moss Co., C. C. Morse & Co., Boston Gardeners' and Florists' Club, Fottler, Fiske, Rawson Co., Vaughan's Seed Store, J. Horace McFarland Co., Thomas Roland. The following firms have generously contributed toward the general prize fund: William Sim, W. Atlee Burpee, A. T. Boddington, P. Welch, W. H. Elliott, Benjamin Hammond, M. C. Ebel, Boston Plate & Window Glass Co., Braman, Dow & Co., L. B. Coddington, R. & J. Farquhar & Co., Thomas Roland and W. J. Stewart.

HARRY A. BUNYARD, Sec'y.

New York to Detroit.

The committee on transportation, etc., appointed by the New York Florists' club, have made the following arrangements: The party will leave the Grand Central station on the N. Y. Central & H. R. Railroad Tuesday, January 9, on the "Wolverine," leaving at 5 o'clock p. m., arriving at Detroit at 7:15 the next morning. The fare one way, $16; for a party of ten or more a fare of $13.25 each way can be obtained. Tickets for transportation may be had on the train, but reservation for berths should be made by January 8 at least. Lower berth, $3.50; upper, $2.80; compartment, $10; drawing room, $13. Any further information may be had of Frank H. Traendly, 133 West Twenty-eighth St., N. Y.

FRANK H. TRAENDLY,
WALTER F. SHERIDAN,
JOHN YOUNG, Committee.

Manufacture of Fertilizers.

ED. AMERICAN FLORIST:

Will you kindly inform me as to what is the treatment given blood to make it suitable for use as a fertilizer? Would it be safe to use it in a raw state? Is ground bone made from green bone or can cooked bone be ground and made as good a fertilizer? If green bone is used, can anything be added to soften before grinding. J. O.

Utah.

Blood is prepared for fertilizer purposes by simply drying and grinding. We do not quite understand what you mean by "Would it be safe to use it in the raw state?" If you mean by this the fresh liquid blood, we would say that it is not advisable to use it in this state, as it cannot be satisfactorily distributed in the soil and would undoubtedly decay too rapidly, resulting in considerable loss of its fertilizing value.

Ground bone or bone meal can be made either from green, dried or cooked bones. As a rule, however, it is made either from dried bones or chiefly from cooked bones. Bone meal made from steamed bones contains somewhat less nitrogen and more phosphoric acid than meal made from green or raw bones. There is no object in softening green bone before grinding. Green bone is rather difficult to grind, but simply because it is wet rather than because it is hard. The best method of softening is by steaming. W.

Meetings Next Week.

Baltimore, Md., January 8, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange Hall, St. Paul and Franklin streets.

Butte, Mont., January 12.—Montana Florists' Club, Columbia Garden.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

STOCK QUITE SCARCE.

Carnations during the past week have been rather scarce and are bringing good prices. Richmonds and American Beauties were short in supply and Christmas prices prevailed. There was a large demand for Killarney, with hardly enough to fill orders, the demand being mostly for short stems. The sale for violets and lily of the valley was exceptionally heavy for New Year's, with not enough of the former to fill the orders, there being an unusually large call for them on that day. Paper White narcissus have been a glut on the market for some time, but they are commencing to sell better, for the cut has been smaller for the past few days. Most growers have cut all of their stevia.

NOTES.

Manke Bros., William and Fred, are cutting some fine carnation blooms in all the leading varieties with Washington doing exceptionally well. A visit to the greenhouses in North Milwaukee found the stock looking very good with heavy cuts the outlook for the coming season. The Manke boys are hustlers and have a habit of keeping their place clean and in tip top condition.

H. V. Hunkel, speaking for Holton & Hunkel Co., says the past year has been a most satisfactory one and the best in the history of the firm. Stock cleaned up well both at Christmas and New Year's and much more could have been sold if it had been obtainable. The firm feel very proud of their Wisconsin-grown violets and claim that they are the best in the northwest.

C. C. Pollworth says that his firm has had a good call for chrysanthemum plants of improved Chadwick, both white and yellow, and that a great many orders were turned down. The C. C. Pollworth Co. has just closed a most successful year and the opening week of 1912 was very satisfactory and fully up to the firm's expectations.

G. Rusch & Co. were very much disappointed by delayed shipments of violets, which failed to reach them on time, causing the loss of many fine sales which had been booked. This concern was well pleased with the holiday trade, stock selling readily and bringing good prices.

C. C. Pollworth, H. V. Hunkel, Nic Zweifel and probably Gustav Mueller will attend the joint convention and exhibition of the American Rose Society and the American Carnation Society at Detroit, Mich., January 10-12.

Currie Bros. Co. report that their stock was very fine for Christmas both in the plants and cut blooms, and that they completely sold out everything and the greenhouses were empty when the holidays were over.

In nearly every greenhouse that one visits he finds the Garland Iron Gutter and it certainly looks as if the Geo. M. Garland Co. of Des Plaines, Ill., as far as gutters are concerned, has an option on this city.

The E. Welke Co. says that the Christmas business was exceptionally fine. Their long suit was blooming plants, which sold very readily.

W. A. Kennedy has returned from a holiday visit to outside points.

G. R.

WHITE MARSH, MD.—A fire destroyed one of the dwellings on the estate of Richard Vincent, Jr., Sons & Co. on the night of December 27, with all the furniture, causing a total loss. Mr. Vincent caught a severe cold watching the fire and has been indisposed.

Washington.

CHRISTMAS TRADE.

The Christmas day trade in cut flowers was very fine. On no previous Christmas has it ever been better. Orchids, valley and violets were in great demand for corsage bouquets and in addition there were heavy sales of roses and carnations as gifts and for dinner table decorations.

NOTES.

The Christmas heather noted in our issue of December 23 at the store of G. H. Cooke, and which it was stated were grown by H. D. Darlington of Flushing, L. I., were from the establishment of the Knight & Struck Co., which firm acquired the property of Mr. Darlington last May, and are conducting the business.

W. Marche put on a brand new delivery automobile for the Christmas trade, and it helped out wonderfully in delivery and is likewise a good advertisement, for a florist that can afford an automobile must be getting on Easy street.

W. F. Gude says they were never so busy. In addition to their immense counter trade they had a large number of decorations for social functions.

Notwithstanding the heavy cutting of the past week Alex. B. Garden had over 1,000 carnations for Christmas morning and they went off fast.

At Geo. H. Cooke's a notable feature was the snapdragons and wall flowers, this being the only store in which the wallflowers were seen.

While it has been impossible to see all the retailers it is a safe conclusion that all of them sold out well and are satisfied.

J. H. Small & Sons report an improved business at both their stores.

David Bisset sent in a very fine quality of single violets. A. F. F.

Chicago.

REAL WINTRY WEATHER.

The weather man kindly waited until the Christmas trade was well taken care of, giving the florists of this city the finest weather possible for that strenuous period, but immediately followed with a good touch of real old winter. The thermometer has been falling almost to the zero point and with this low temperature the city has had a wind which at times reached a velocity of 75 miles an hour. This extremely cold weather has of course had a tendency to greatly shorten up the cut of flowers of all kinds and with the severely close cutting that the plants have had during the holidays, the receipts this week have been comparatively light. This has really been of great advantage to the market, for ordinarily after one of the great holidays business slackens up and if the weather is warm and pleasant the market becomes quickly overstocked, with the resultant slaughtering of prices, but the prices have remained very firm all the week and there has been no real shortage of anything, nor has there been any surplus. Even Paper White narcissus, which accumulate as rapidly as anything, find good sale at remunerative prices, and are cleaning up very well. The market can really be said to be in a very satisfactory condition for every one. American Beauties are in very good crop with some of the growers, and there is enough to meet all the calls, and Richmond is exceptionally fine, so the strain on American Beauties can be relieved by the best quality of these. Killarney is, of course, in great supply, and while some of the stock is a little light in color, yet most of the flowers coming in are of a beautiful shade and there is no such complaints as are heard in some of the large centers in regard to the color of this rose. The White Killarney is cleaning up well, the demand for white seeming to be on the increase and fully up to the supply. Yellow roses on New Year's day had a great call and were sold out quickly. Carnations are selling well, and though the receipts are fairly heavy yet the demand is enough to move them quickly, and white in these as in the roses is selling up clean daily. Violets are quite plentiful, but New Year's caused a great demand for these and all the fresh stock sold quickly. Orchids and lily of the valley are just about equal to the request. Lilies are none too plentiful, there being good demand for all that are coming in. Sweet peas have had a good sale all the week and the good stock finds a purchaser as soon as shown. Migonette of good quality is to be had and some nice lupins are seen. Tulips are being received in larger quantities and jonquils are a daily offering. The greens are plentiful enough to supply all that are needed.

Election Meeting of the Chicago Florists' Club will be held at the Bismarck Hotel Randolph Street and Fifth Avenue, Jan. 4, at 8 p. m. NOT at the Union Restaurant as before stated in these pages.

THE DETROIT TRIP.

Chairman Foley of the Florists' Club transportation committee advises that the Wabash Railroad has been selected for the trip to Detroit on the occasion of the joint convention and exhibition of the American Rose Society and the American Carnation Society to be held January 10-12. The Chicago party will leave Tuesday, January 9, at 11 p. m., due at Detroit 7:30 a. m. Wednesday, January 10. The fare is $5.50 each way. Pullman rates are: Double lower berth, $2.00; upper berth, $1.60; drawing room, $7.00. Other trains leaving Chicago are: 12:06 noon, due Detroit 7:55 p. m.; 3:00 p. m., due Detroit 10:50 p. m. Trains returning leave Detroit 9:00 a. m., due Chicago 4:55 p. m.; 2:55 p. m., due Chicago 9:45 p. m.; 2:15 a. m., due Chicago 9:50 a. m.; 11:00 p. m., due Chicago 7:15 a. m. For further information and reservations address F. H. Tristram, A. G. P. A., Wabash Railroad Ticket Office, 68 West Adams street, telephone Harrison 4500. Reserve berths without delay.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

NOTES.

Tim Matchen, of Peter Reinberg's, is receiving some very complimentary letters from his out-of-town customers, and up to the first of the week he had received about 20 from various parts of the country. A customer in Calgary, Alberta, Canada, wrote that his stock arrived in fine condition for his holiday trade and says that it is remarkable how well the stock carried for being on the road two days and three nights. It is these little tokens of appreciation that make one feel his work has borne fruit and that his efforts have not been in vain.

The Geo. Wittbold Co. is coming in crop with a large quantity of Giganteum and Formosum lilies and will soon be able to supply some of the local dealers with extra choice stock. Otto Wittbold, superintendent at the Edgebrook establishment, realized a neat profit from the sale of poinsettias and was more than pleased with the return from this stock. His firm is now busy disposing of a large stock of dahlia, gladioli and other miscellaneous bulbs.

C. L. Washburn and son, E. B. Washburn, and Andrew Benson, are going to attend the joint convention and exhibition of the American Rose Society and the American Carnation Society at Detroit next week, and will exhibit a vase of American Beauty roses. This firm, Bassett & Washburn, is cutting from a new crop of lilies and some fine blooms are obtainable at the store this week.

Manager Pyfer and Supterintendent Olsem of the Chicago Carnation Co. are planning on attending the joint convention and exhibition of the American Rose Society and the American Carnation Society which will be held at Detroit January 10-12. Their firm will be on deck as usual with an exhibit and will show their famous Washington, Herald and many other carnations.

Poehlmann Bros. Co. is cutting a choice grade of stock in all lines and is showing some fancy orchids which are meeting with very ready sale. Adolph Poehlmann, who has charge of Plant B, says he is just coming in crop with white roses and will cut a good supply of these from now on.

Wietor Bros. are still cutting a fancy grade of roses and carnations and are showing some exceptionally fine American Beauty roses. This firm is enjoying a splendid shipping trade and hardly a day goes by but what a new name is added to their already long list of satisfied customers.

L. B. Brague & Son of Hinsdale, Mass., the well known dealers in fancy and dagger ferns, remembered their many customers in this city with their handsome new calendar. It is a beauty and is attracting much attention in the local market.

Canger & Gormley, the North State street florists, are having a very busy season and are filling a large number of telegraph orders. A neatly arranged window is always an object of interest —an added feature at this popular store.

E. E. Pieser is making a number of changes and improvements to the Kennicott Bros. Co.'s store. An exceptionally fine grade of Pink Delight carnations was one of the chief offerings at this house this week.

John Mangel says he will open the Palmer House flower store on Monroe street about March 1, making it an up-to-date establishment in every respect.

C. C. Pollworth of Milwaukee is expected to be present at the meeting of the Florists' Club tonight when the election of officers is to take place.

H. L. Keun, the Wentworth avenue florist, speaks in glowing terms of his holiday trade and says it was the most satisfactory that he ever had.

Anna Grace Sawyer, J. B. Opitz and Franzen are some of the local retail florists who are mailing a pretty calendar to their customers.

Hitchings & Company, manufacturers of greenhouse materials, have their handsome 1912 calendar well distributed in this section of the country.

The J. B. Deamud Co. is offering a fine grade of sweet peas, violets, pansies, lupins and an exceptionally high grade of lily of the valley.

Harry C. Rowe has leased a new store directly opposite his present location on Monroe street and will occupy it at an early date.

Hoerber Bros. are cutting a fine grade of roses and carnations with Killarney and White Killarney showing up exceptionally well.

H. V. Hunkel, C. C. Pollworth and Nic. Zweifel of Milwaukee will accompany the local delegation to Detroit next week.

Wm. W. Fuller says his Christmas trade was double twice over that of the preceding year.

The Bohannon Floral Co. is doing a fine business at the handsome store on East Monroe street.

Louis Visas is shipping a large quantity of choice stock to his two stores in Duluth, Minn.

A. Henderson & Co. booked an order for 10,000 Rhea Reid rose plants this week.

James Chacona, of Milwaukee, Wis., was seen in the local market this week.

Edw. Amerpohl, of Janesville, Wis., was with us again this week.

C. Clemenson reports a fine Christmas and New Year's trade.

N. J. Wietor is suffering from a severe cold.

Here's Where You Can Get

THE BEST KILLARNEYS

Both White and Pink

Large, magnificent blooms on all lengths of stems, with luxuriant foliage. **Positively the Best.** None as good in the market. Unusually large crops enable us to supply you all.

BEAUTIES

Richmond, Mrs. Jardine and Uncle John

Are also in good crop and of the same quality as the Killarneys. The stems are good, the substance is fine, and the blooms of the finest possible colors and of unsurpassed quality

and Other Seasonable Stock.

ZECH & MANN, *WHOLESALE FLORISTS, L. D. Phone, Central 3284, 162 N. Wabash Ave* **Chicago**

John Zech received a letter this week from Chas. Abele of New Orleans which contained the sad news that Mrs. Abele had died last Wednesday, December 27, from an attack of acute Bright's disease. The deceased was well known in this city and her frequent visits here, which were always anxiously looked for, will now be greatly missed. Mr. Abele and family have the sympathy of the trade in the loss of a dutiful wife and a loving mother.

The directors of the Chicago Flower Growers' Association are having a most enjoyable time visiting the various ranges of greenhouses in this city and vicinity. The Riverbank Greenhouses and the Wellworth Farm Greenhouses were visited recently and F. Stielow's range at Niles Center will be visited on January 5.

Zech & Mann are rapidly building up a splendid shipping trade and the large number of boxes that are constantly shipped out gives one a little idea of the splendid out-of-town trade that they enjoy. The stock seen at the store is of fine quality and quickly finds a purchaser.

Vaughan & Sperry started the New Year right by selling every flower in the store and supplying their many customers with extra fancy stock. This enterprising concern enjoys both a splendid local and shipping trade which is continually increasing.

Vaughan's Seed Store is moving liberal orders of gladiolus and lily bulbs this week in heated refrigerator cars as well as by express. This firm reports an exceptionally strong demand for florists' flower seeds for early use.

Stollery Bros. sold so many blooming plants for Christmas that they had none left to offer for the New Year's day trade. The holiday trade was very satisfactory and the best in the history of the firm.

The Adams-Robertson Co. enjoyed a fine holiday trade and expressed themselves as perfectly satisfied with the season that they have just passed through.

Winterson's seed store is filling orders for late stock plants of "Seeger's White" chrysanthemum, a sport from Garza and a grand seller as a cut flower.

The friends of E. A. Kanst in the offices of the South Parks made him a parting gift of a handsome diamond and coral pin on New Year's day.

Weiland & Risch sure do know how to grow Killarney roses and the stock seen at the store this week is certainly a credit to this well known firm.

The gardenias that John Kruchten is receiving are of the finest quality and some of the best that we have seen for some time.

Warren Garland, of Des Plaines, is shipping a fine grade of carnations to H. Van Gelder of Percy Jones.

W. A. Kennedy, of the C. C. Pollworth Co., Milwaukee, Wis., spent New Year's day in this city.

Visitors: Walter Bermingham, Kansas City, Mo.; Israel Rosnosky, representing Henry F. Michell Co., and J. A. Kairns, representing Henry A. Dreer, Philadelphia; Falkenberg of Anderson & Falkenberg, Yankton, S. D.; W. F. Kasting, Buffalo, N. Y.

St. Louis.

STOCK SCARCE.

During the early part of the week between Christmas and New Year's stock was very scarce and high, but roses later appeared to be more plentiful. Violets have held up well and cleaned out at New Year's. Jonquils have made their appearance. Roman hyacinths, narcissus and stevia are selling well. Good lily of the valley is in demand. Considerable funeral work caused a heavy demand for smilax, galax, asparagus and all greens. Ferns are now quoted at two dollars per 1,000.

NOTES

Ostertag Bros. did a very large business at Christmas and have several New Year decorations. The supply of decorative plants is endless and that of cut flowers is of the very best. A special New Year's decoration at Auteurieth hotel, Clayton, for 68 tables, was all long stem pink roses.

M. M. Ayers Floral Co. had the appearance of having been swept by a cyclone, for Mrs. Ayers did a splendid trade. The artistic work sent out by this establishment is well known and the store is patronized by the very best people of society.

Wm. Smith Wholesale Floral Co. did an immense business all through the holidays. They expect to handle large quantities of sweet peas and violets, making a specialty of home grown stock.

C. A. Kuehn's new store is rapidly nearing completion. Visitors express nothing but praise for the beautiful decorations and the arrangements in general.

Werner Bros. have as good white and pink Killarneys as arrive in this market. Weber's Nursery is also supplying some good stock.

F. H. Weber's Christmas business was the largest in years and his prospects for New Year are very good.

H. G. Berning's place was well stocked Saturday and Sunday with New Year's stock.

Geo. Walbart's new automobile was strongly in evidence during the Christmas rush.

Geo. H. Angermueller received a shipment of jonquils for New Year's.

Mrs. Pelletier had a very large trade Christmas and sold out everything.

Diemer Floral Co. on South Broadway had all they could do Christmas.

A SATISFACTORY SEASON.

Holiday rush has come and gone. It has been to all a very satisfactory season and to some larger than ever before. Not only was the call for Christmas flowers and green goods large but the unusual number of debutantes, dinners, luncheons and teas preceding the scheduled affairs, together with the Junior Charity and Children's Charity ball, has been a season that the florists will have every reason to remember. The supply was equal to demands with the exception of red carnations, which are usually scarce, and there was no difference this year. American Beauties, Richmonds, Killarneys, My Marylands and Mrs. Wards were of good quality as was also the Bon Silene. Violets, lily of the valley, orchids, gardenias and marguerites were plentiful and sold well. Original corsages and bouquets, the latter not so much in demand, were the talk of the town. Roses and carnations in separate colors had their usual sale. Poinsettias were never better than this year and were in great demand owing to their color. Azaleas and ardisias were fine and begonias were handled in large quantities by S. A. Anderson and these, though not red, yet the sizes of the plants, their beauty and the prices made all forget the color and demonstrated that a pink begonia, properly displayed, will sell with an azalea or any other plant at Christmas. Artistic baskets in odd shapes specially made were good sellers. At no time was there any necessity of very much wrapping of plants or flowers. A white Christmas is always considered the best, but a non-freezing one is a time-saver to the florists. Holly was of good quality and as usual sold out. Never was there as great an amount of boxwood used as this year. Large wreaths of the boxwood with poinsettias, holly, swamp berries or red ribbons were used in the stores and larger private residences where a large window would allow the wreath. Ruscus, boxwood and swamp berries in novel arrangements were good sellers and were an acceptable change from other years for a small present. The larger dry goods stores had very fine decorations where laurel, boxwood and holly were used to good advantage, entirely doing away with the old fashioned stringing of pine. The wholesale houses and the growers had a busy time, the latter being better supplied this year than in the past, consequently there were not so many flowers from the east. BISON.

"The Busiest House in Chicago"

We are receiving a very fine grade of **Violets, Lupins, Carnations, Roses, Valley, Greens,** and other **choice seasonable stock** and would like to have an opportunity to show you just what we can do. Write today.

J. B. DEAMUD CO.

160 N. Wabash Ave., CHICAGO.

Boston.

PRICES ARE ADVANCING.

There is a change in the market conditions and the grower feels that this is his innings. Prices on Christmas day were better than on any day for the week previous and Richmond roses were at a premium. White carnations and white roses now have the call. They have been held in the background lately, but now have come to the front like some new star. Violets are plentiful and as a general rule of good quality. Prices on almost all goods have advanced. Thursday, December 28, a windstorm of unusual severity blew in on us and kept up until Friday night. So far as we have learned there has been no great greenhouse damage other than lights of glass blown out. Considering the severity of the wind (60 miles an hour) and the wreckage it left in its path all over New England, the greenhouse owners were lucky to escape. Dwelling houses were moved and blown down, chimneys wrecked, but it gave many some anxious moments.

NOTES.

Detroit is the talk here just now, and those favored will be well repaid for the journey. It is doubtful if the rose will be in as good form as it would be later, but we are glad that the societies have tried the experiment of both meeting at the one time. We advocated this some years ago and hope it may be kept up if possible. There are many who would like to go, to accept the generous hospitality of the warm-hearted Detroit boys and view the new things that will be staged. It is an education in itself, besides the fraternal end of it, and there is no other trade that can show a better bunch of men.

The widow of Charles Marland is in the hospital in a serious condition. Her husband was shot last summer and there are three small children left to the mercy of the world. Donald Carmichael of Wellesley started a subscription list, and at present has received about $100. W. H. Elliott's two places, J. A. Budlong & Son Co., of Auburn, R. I., and Waban Rose Conservatories, at each of which Mr. Marland had worked, all subscribed, and besides these were other subscriptions. This is rather a needy case, and anyone wishing to donate any sum, large or small, can do so by sending it to Mr. Carmichael.

Boston can lay claim to being one of the winter resorts—no snow, mild weather, buds on Ramblers peeping out, dandelion flowers outside at Christmas and in a sheltered spot we had some Clematis paniculata as green as any time during the summer. All that was required to make us think of spring was the robin.

The railroad commission has granted the Boston elevated the privilege to carry freight and baggage. This will give the suburban surface lines the opportunity to deliver freight in Boston, which will be a great convenience to many florists who are situated where trolley lines are near.

This is the time for resolutions. We all make them and often break them, but then, it's better to do that than not to make any. It proves that we strive each year to do better, even if we haven't moral strength enough to carry them through the year.

We noticed at Welch Bros. some extra fine gardenias which came from New Jersey.

H. M. Robinson & Co. are showing some very good Killarney roses.

MAC.

Cincinnati.

STOCK CLEANING UP NICELY.

The market is cleaning up nicely on almost all colored stock. Roses and carnations have been selling on sight. On New Year's day a new municipal administration was installed in the offices at the City Hall and all rooms and chambers were gaily decked with tributes from well-wishing friends. Poinsettias and choice American Beauties and Killarney were the most popular flowers. The supply of roses is fine and the demand every bit as good, for all have been cleaning up satisfactorily, but American Beauties are scarce. Carnations, with the exception of white, are short on the market. The white takes its time about cleaning up and sometimes some are left over. The local growers are not cutting as much as they should owing to the long stretch of dark weather we have had. It is only the large shipments from outside that have given the market enough to go around. Both Easter lilies and callas are selling almost before they are ready to cut. Poinsettias are about all cut for this season, the small stock only remaining. Paper White narcissus and Roman hyacinths are not selling very well. Single violets are coming in stronger and as a consequence the demand for doubles has fallen to some extent. The offerings of lily of the valley are excellent. The green goods market is ample and the demand good.

NOTES.

C. E. Critchell, Richard Witterstaetter and Mr. and Mrs. J. A. Peterson will attend the carnation and rose society meetings in Detroit next week.

The Cincinnati Florists' Society's regular monthly meeting will be held at the club rooms Monday evening, January 8, at 8 o'clock. H.

Philadelphia Notes.

CLUB MEETING.

The January meeting of the Florists' Club was well attended, the feature being an address by Charles H. Grakelow on his European trip of last summer. He was particularly pleased with the landscape art as seen in Berlin, where the trees and plants of the various avenues of the city were given the greatest care so that in spite of the extreme weather conditions they were kept thriving and healthy. He described the effect produced by the lavish display of flowering plants seen on every side in the windows of the dwellings that lined the avenues as beautiful in the extreme. He also pictured the garden spots of Italy and Switzerland, France and England, but none impressed him so much as that of the city of Berlin. Richard Vincent, Jr., president of the Society of American Florists, will address the club at its next meeting and there will also be reports of the rose and carnation meeting at Detroit. The Philadelphia delegates to this meeting will leave Broad Street Station on Tuesday, January 9, at 2 p. m., and desire all who are going from points south to join them. The flowers they will exhibit are to be taken along and charged as excess baggage, so as to avoid any delay, as is often the case when sent by express.

The Leo Niessen Co.'s business continues to grow apace, the holiday season being much the best they have ever had and yet with their greatly increased facilities it was all handled much easier than at any previous time.

Berger Bros. are having a great run on the Princeton rose. This is certainly a fine novelty, being very distinct from other varieties of roses.

S. S. Pennock-Meehan Co. cleaned up everything on New Year's day, practically everything being sold by early afternoon.

Eugene Bernheimer was very strong in sweet peas, having a supply of fine flowers from the Florex Gardens.

Nashville, Tenn.

Christmas found the florists better prepared for the holiday trade than ever before in the history of the business. All through the week there has been a display of flowers that was unsurpassed. Azaleas, poinsettias, cyclamen, Roman hyacinths, narcissi, ferns and palms have been on sale. The sales were large and in addition to the regular store force, additional help had to be called in to wait on the trade. Within the store was an immense stock. The weather for the most part was pretty good; Saturday was a nasty day, but did not seem to have any great effect upon the sales. Sunday was much better and the ther-

mometer not going below 40 degrees, and the floral stores having the privilege of holding open, gave them an opportunity of cleaning up everything. If anything the potted plants sold better than cut flowers. Beautiful baskets filled with elegant plants sold well and brought fine prices. All the dealers were entirely satisfied with the week's trade. On the Saturday before Christmas outside the market house were numerous wagons with fine cedar Christmas trees which were very reasonable; quite a good one could be bought for fifty cents. There was also a beautiful lot of holly on the streets, green and fresh looking and well berried, which was sold in bunches and wreaths, and nearly every person on the streets carried a bunch.

NOTES.

The Joy Floral Co. had a great plenty of cut flowers and the Cardinal roses were great favorites.

Haury & Son did a good business in their new store, one side of which was filled with potted plants.

McIntyre Bros. had a good trade at their stand in the market house.

Geny Bros. had a superb display which attracted much attention.

Complete Stock of Florists' Greensand Supplies

Cleveland.

A FINE NEW YEAR'S TRADE.

The demand for stock between Christmas and New Year's day was exceptionally good. At the various clubs decorations for socials kept many of the retail stores very busy. American Beauties, long-stemmed Killarney and Richmond roses were far short of the demand. Violets, lily of the valley, orchids and adiantum sold well for corsage work. Sweet peas, calendula and mignonette cleaned up daily, but carnations were far short in supply. Paper White narcissus and Roman hyacinths move slowly, but stevia is good stock and sells well. The call for Southern smilax and holly has been good this week and cut poinsettias were in good demand. Callas and liles are short of the call. All stock coming in is good and cleans up satisfactorily all around.

NOTES.

All those who intend to attend the Detroit convention January 10 should communicate with Geo. W. Smith of the Cleveland Florists' Exchange for reservations and tickets, and it is hoped the party will be large enough to charter a special car. Come and bring the ladies. The fare is low, and a good time is assured.

Smith & Fetters made an elaborate decoration for a debutante's reception at the Colonial club, using large quantities of Southern smilax. American Beauty roses, orchids, violets, lilac and liles. For the week before Christmas they worked day and night, the key being unturned in the lock to the door.

The Jones-Russell Co. had so much decorative work that they dismantled one decoration to move the material and arrange another. "No sleep for 48 hours," says Mr. Barber, "was only one of the discomforts." The store was not locked during the holiday trade.

Westman & Getz and A. Graham & Son report the best Christmas trade they ever had, with flowers of much better quality than before.

C. B. Wilhelmy and F. C. Witthuhn did an excellent business in wreaths and cut flowers.

At Wilhelmy Bros.' new store the Christmas sales far exceeded their expectations.

C. M. Wagner had the decorations at the Union and Tavern clubs. There were 94 tables to decorate at the former.

THE SUPPLY NONE TOO LARGE.

After the holiday rush of Christmas there was the usual dull season, the transient business in the stores falling to a low ebb. There were, however, quite a few important balls, one at the Bellevue-Stratford hotel for which J. J. Habermehl's Sons had the decorations, being very elaborate. The color scheme was pink, hundreds of begonias being used to advantage, 500 strings of extra long smilax as well as quantities of the southern smilax was also used. All the electric light globes in and about the ball room were covered with silk feather shades which softened the light and produced a fine effect. The same firm had some other large decorations, winding up the week's work with a large plant display at the dedication of the Wanamaker store on Saturday. The business for New Year's day was crowded into the day itself, there being no noticeable advance orders, as for the Christmas trade. Everything available was, however, used up, the supply, which was not very large, being scarcely equal to the demand. The quality of the stock was fair, except violets, which were poor, they having been picked so closely for Christmas that in order to get a stock the bunches showed for the most part only half-opened buds. Carnations were very good and prices held well, in fact these flowers have held their own in this respect better than any other flower throughout the holiday season. Eight to 10 cents was the price for all the specials with the reds selling for 12 and 15. Some very fine Killarneys, both white and pink, have been seen. Richmond, much in demand, were scarce, those fortunate enough to have it selling out clean at high prices. Daffodils are in; not much to brag about, but they sell fairly well on account of their novelty.

NOTES.

Ed Reid says his demand keeps, if anything, ahead of the supply and there has been no accumulation since chrysanthemum time. He thinks the outlook very good.

The Joseph Heacock Co. are cutting superb Killarneys at their Roelof branch. This stock is certainly in the first rank. K.

New York.

NEW YEAR'S DISAPPOINTING.

The condition of the cut flower market since Christmas has been very unsatisfactory, and the looked-for spurt for New Year's did not materialize. In fact, the business on Saturday and Sunday was not as good as on any ordinary week. Even the high grade blooms of Lady Hillingdon, Mme. Chatenay, Radiance and Richmond are moving very slowly. American Beauties were in good supply and of good quality, but the prices were much lower. Killarneys did as well as anything in the rose line, but were not of as good color as they have been. As usual Brides and Bridesmaids accumulated and were little called for. It was even difficult to dispose of the shorter grades of these varieties. Carnations are very plentiful, with a downward tendency in prices. Lilies and lily of the valley are selling better and lilac is more plentiful. But the great disappointment was in violets. These cannot be moved at all, undoubtedly caused by the weather, which was cold and stormy, with snow and slush that prevented people getting out. Sweet peas of excellent quality are to be found everywhere. There is a good supply of orchids, with only a good market for the best blooms of cattleyas. The quotations remain stationary on oncidiums and cypripediums. There is a good market for the best blooms of gardenias. The supply of Paper White narcissus and Roman hyacinths has shortened up, but this has made no difference in prices. On Sunday, the day before New Year's, at noon time, all the dealers appeared to be stocked up with flowers of every kind and the prospects of clearing out were very poor indeed.

NOTES.

Philip F. Kessler had a very busy and successful holiday business. His specialties being smilax, asparagus, sweet peas and lilies, of which he seems to have an unlimited quantity of the very best quality. Mr. Kessler is getting up a party in conjunction with Henry Siebrecht of Astoria to make a two weeks' trip to Bermuda.

Chairman Frank Traendly, of the transportation committee, reports that a large number are going to Detroit and urges those intending to join the party to make application for berths at once.

The next meeting of the Florists' club will be held January 8. The principal business of the evening will be the installation of officers and the appointment of committees for 1912.

Gunther Bros. are receiving large shipments of magnificent lily of the valley, which meets with ready sale. At Christmas time they handled almost 20,000, all of A1 quality.

Harry A. Bunyard has been in Boston the past week completing the schedule of premiums for the National Sweet Pea Society, and it will be sent out this week.

Charles Millang, who has taken the agency for a large automobile concern as a side line, has just sold a Ford 1912 car to C. Moltz.

A. M. Henshaw and wife have just returned from a visit to Mrs. Henshaw's parents in Pittsburg, Pa.

Several friends of C. Moltz will tender him a complimentary beefsteak dinner during the week.

Mrs. John Meisem is very ill at her home in Elmhurst, L. I.

Bowling scores for Friday evening, December 29, were:

49 West 28th Street — New York City

Connecticut Horticultural Society.

The annual meeting of the Connecticut Horticultural Society was held December 8 and the election resulted in the choice of the following officials:

John F. Huss, Hartford, president.

J. A. Weber, Hartford; Alex. Cumming, Jr., Hartford; Carl Peterson, West Hartford, vice-presidents.

George W. Smith, Melrose, secretary.

W. W. Hunt, Hartford, treasurer.

William T. Hall, Hartford, librarian.

George W. Smith, botanist.

C. H. Sierman, Hartford, pomologist.

John Gerard and George B. Baker of New Britain, and G. H. Hollister, Howard A. Pinney and Alex. Cumming, Jr., of Hartford, executive committee.

The treasurer reported the society in good financial condition, with a snug balance in the treasury, and all bills paid. The secretary announced that the present membership, 212, is the largest in the history of the organization. Three deaths occurred during the past year, W. W. Myers, Mrs. Francis M. L. Barnes, and William B. May, all of Hartford; the two latter having been life members. Mr. May was for many years the able superintendent of the sumptuous grounds of James J. Goodwin, and was succeeded in that position, in his declining years, by John F. Huss, our esteemed president. Suitable resolutions were adopted concerning the decease of Mr. May, who was one of the society's founders.

In his address the president reviewed the work of the year, referring especially to the many excellent papers presented by members last winter and spring. His views were quite optimistic for the future of the society, whose influence is gradually widening, until the membership roll embraces the entire eight counties of the Nutmeg state.

Our two fall exhibitions were fully up to our high standard of artistic merit, and were fairly well patronized. John Gerard, our pansy enthusiast, strongly advocates the holding of the chrysanthemum show at New Britain next fall, instead of at Hartford, and there is considerable sentiment in the society in favor of making such a trial. The free use of a large armory, and similar attractions, are proffered; and the improved condition of the highways, largely due to the increasing motor traffic, renders feasible to some degree the easy carriage of valuable plants to and from that lively city. The question has been tabled for future determination.

J. A. Weber exhibited three pots of beautiful orchids, at the annual meeting, in full bloom, of the class Cypripedium insigne; and he was gratified by receiving an award of a diploma by the judges, Howard A. Pinney, Alfred Bebelius and Alex. Cumming, Jr.

Owing to the nearness to the holidays, our usual second December business meeting will be omitted, and the members convene again on the second Friday of the new year.

GEORGE W. SMITH, Sec'y.

Nassau County Horticultural Society.

The annual meeting of the Nassau County Horticultural Society was held in Pembroke hall Wednesday afternoon, December 13, and the following officers were elected for the ensuing year:

John F. Johnstone, president.

Geo. Barton, vice-president.

Ernest J. Brown, treasurer.

Ernest Westlake, secretary.

James McDonald, corresponding secretary.

Henry Gaut, John McQueen, H. Jones, A. McKenzie, S. J. Trepass, Jos. Robinson, James Emslie, executive committee.

Valentine Cleres, trustee one year. James Duthie, three years.

Joseph Adler, James McCarthy and Wm. Vert were elected to active membership and there was one application received. The result of the competition for the society prize was as follows: 12 carnations, pink, A. McKenzie, first; 12 carnations, white, A. McKenzie, first. There was a very keen competition for the gold medal offered by Felix Mense for the best 100 violets, which was won by A. McKenzie. Honorable mentions were awarded Herman Boettcher for six heads lettuce, James McDonald for 12 Enchantress carnations; M. Bosworth for lemon American Wonder. Cultural certificate to Jos. Robinson for poinsettias. The following officiated as judges: J. McQueen, J. Holloway and E. A. Reidenbach.

The treasurer read his annual report which showed that the society had experienced a very satisfactory year and that there was a creditable balance standing to the society's account. It was decided to hold if possible the annual dinner on January 25.

James Holloway offered a prize of $5 to be competed for at the next meeting, which it was decided should be for 25 carnations mixed.

The exhibits for the society's prize in January will be a vase of six spikes of antirrhinums, 25 sprays of sweet peas and one pot of cyclamen.

E. WESTLAKE, Sec'y.

Port Huron, Mich.

A solid mahogany rocker was presented to Matthias Ullenbruch on Christmas day by the members of the Grand Trunk Shops Horticultural Society of Battle Creek, the presentation being made by President John C. Garden of the society. Mr. Ullenbruch has always taken a great interest in the society and its members and when the shops were located in this city assisted them in the work. Since the removal of the shops to Battle Creek he has been frequently called upon and always willingly responded and is held in high esteem by the shop men.

Cleveland Notes.

W. Bramley & Son and Kirchner's had a large amount of funeral work in addition to the holiday trade. Both of these firms grow most of their own stock.

G. W. Mercer did a large business in wreaths and plants. Mr. Mercer has not been well lately and his wife and daughter have greatly assisted him.

The James Eadie Co. used a large number of orchids and other expensive flowers during the holiday trade.

A. M. Albrecht's holiday trade was very large and he states that business has increased all the year.

Mrs. Hagenburg was one of the busiest women on the east side during the holidays.

Ohio Floral Co. report an excellent trade in plants during the holidays.

C. F. B.

SANTA CRUZ, CALIF.—The business during the Christmas holidays was greater than last year, states W. E. King, and the quality and prices of all stock was the same. There was an increased demand for carnations and in pot plants ferns sold well, taking the lead.

IOWA CITY, IOWA.—The holiday trade was about 33 per cent better than that of 1910 is the report of A. G. Prince. There was very little difference in the quality of the stock or the supply, but the prices were a little higher. The demand for plants was about the same as last year.

POMONA, CALIF.—O. Roessner reports that the holiday business was about 15 per cent better than last year. The quality of the stock and the prices were the same as last year, but there were not enough to meet the demand. Bulbous flowers were poor with but little call. The best sellers in plants were ferns. The others were about the same.

LITTLE ROCK, ARK.—The demand for blooming plants and for made up combinations in baskets was very large, writes Tipton & Hurst. The increase in the holiday trade this year was at least 25 per cent. There was a good supply of flowers and the quality was fully as good as last year. The quantity of bulbous flowers was fair, but the demand was poor.

NORWALK, CONN.—There was a good demand for all first class stock and a marked increase for red roses and red carnations, writes R. G. Hanford. The quality of the stock was fully as good as last year with prices about the same and the total business was somewhat better. Plants sold well; all of good quality found good demand, but we have no sale for bulbous flowers.

ATCHISON, KANS.—The holiday trade this year will show a loss of about 20 per cent from that of last year, says Grove's Greenhouses. The flowers were of good quality and the prices same as last year, and there were plenty of roses and carnations, but no violets. The only increased demand was for blooming plants, poinsettias. Christmas peppers and primroses had a larger call.

RENO, NEV.—We procure most of our stock from San Francisco and the prices at wholesale were a little higher than last year, reports the Eddy Floral Co. The supply was good, but the roses were soft. The demand for plants was about the same as last year, but cut poinsettias are growing very popular and we had some very fine ones that came to us from San Diego, Calif. We only handled a few bulbous flowers.

OAKLAND, CALIF.—We had an ample supply of flowers of excellent quality, reports Clarke Bros., and we were able to obtain better prices, as the business was about 15 per cent more than the previous year. There were plenty of bulbous flowers with fair demand. There was an increased demand for made up devices of all kinds. Christmas day coming on Monday made a difference in the busy days, but the business totalled up favorably.

HALIFAX, N. S.—The supply was not quite equal to the demand and prices were a little higher and the increase in trade about one-third, writes F. W. Killiam. We found a great many customers much preferred blooming plants to paying the higher prices for cut flowers, and there was an increased demand for begonias and azaleas. The quality of the cut flowers was better than last year, and in white bulbous stock the supply was sufficient to meet the demand.

ABERDEEN, S. D.—The quality of the flowers this year during the holidays was better than that of last year, says Richard Strohmeier, but the prices were lower and the business will show a falling off of about 15 per cent. There was a good supply of cut flowers and the demand for bulbous flowers was not large. There was a great increase in the call for poinsettias and a much greater demand for flowering plants of the cheaper grades. By far the greater number of sales this year were for charged accounts.

GRAND RAPIDS, MICH.—Holly wreaths still continue in popular favor. Everyone seems to consider it necessary to hang a holly wreath tied with a red ribbon in the front window, is Crabb & Hunter's comment on the holiday trade. The plant and cut flower sales were about 40 per cent more than last year and there was an increased call for flowering plants, red roses, red carnations and violets. The quality of the cut flowers was about the same, but plants averaged better with the prices about as they were last year. The supply was adequate to meet the call, except in red roses, red carnations and violets. There were very few tulips and other bulbous stock was in plenty.

MERIDIAN, MISS.—The Christmas trade increased about 25 per cent this year, writes Mrs. N. G. McKinney. The retail prices were better, but the quality of the cut flowers was not as good, and carnations were short of the demand. There was a marked increase in the call for poinsettias, red roses and carnations, and also quite an advance in the demand for plants. We have no trouble to sell good plants or cut flowers at all times, but it is almost impossible to procure good stock at the holiday season and we would be glad to find some way to overcome this, for disappointed customers hurt trade. We need more wholesalers in the south, for it is difficult to get good stock south of Chicago. We have but one wholesaler in Mississippi and he is often sold out at this time, and the stock we procure from the north is often ruined by the time it reaches us.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan Chicago President; Marshall H Duryea, New York First Vice-President; Edgar Gregory Marblehead, Mass., Second Vice President; C. E Kendel, Cleveland O., Secretary and Treasurer.

Next annual convention June, 1912.

COLD storage stock of lily bulbs and valley continues in excellent demand.

THE executive committee of the American Seed Trade Association will meet at Chicago January 17.

SHORTAGES continue to develop, flower seeds proving much more scarce than first suspected.

SHARP weather renders moving of gladioli, tuberoses, lilies and like spring stock very risky even in refrigerator cars.

VISITED CHICAGO: J. S. Michael of the Sioux City Seed & Nursery Co., Sioux City, Ia.; A. B. Haven, of the Haven Seed Co., Santa Ana, Calif.

CHICAGO.—Prices on the Board of Trade, January 3, for grass seed were noted as follows: Timothy, $13.50 to $15.25 per 100 pounds.

IN the petition filed last year by Vaughan's Seed Store the railroad commissioners at Chicago, January 3, changed the rating of sphagnum in less than carloads lots from first class to second class.

EUROPEAN municipalities, especially in Germany, are buying potatoes at wholesale and retailing them to the people in 50 and 100 pound lots at cost. Some American cities, notably Indianapolis, are adopting like measures.

VAUGHAN'S 1912 "Calendar for Gardeners" is out, a very handy pocket booklet of reference. The new features this year include "Witloof Culture," "Succession Vegetables" and "Suggestions for Color Schemes in Gardens." Copies can be had through the firm's Chicago and New York stores.

CANADIAN PEAS.—This crop has experienced two very bad seasons in succession. While there were some complaints of the weevil, the chief source of injury the past season is well described by a correspondent as "the dry, hot weather which caught most of the peas in bloom."—Ontario Crop Bulletin.

California Seed Legislation.

"Progressive" California offers to admiring citizens an exhibition of legislative sagacity in the two bills, Sen. No. 1 and Assembly No. 1, filed December 23 and 24.

For example, these bills require the California consignee of a five cent mail packet of field, garden or flower seeds from another state to notify the commissioner of horticulture, or his deputy, of its arrival, and the packet must be carefully guarded, until inspected for insect pests, etc., by the quarantine guardian, or other officer. Also that packet must bear a label giving the names of seed, consignor, consignee and country where the seed was grown. Nobody ever claimed that any injury from insects, etc., could come from any or at least most of these seeds.

For violation, a pleasant penalty is six months in jail and also a fine of $500. A nice little joke is that every constituent of a California congressman receiving his packet of free seeds must perform the same duty.

If state legislatures would use more care in the consideration of these restrictive regulations of legitimate commerce, perhaps we would have fewer laws, but those would be quite enforceable, which cannot be said of a single state seed law now on the statute books. It is a sufficient comment on the haphazard American method of grinding out laws to state that I have a record of 98 state laws declared unconstitutional by the highest state courts within a period of two years (1906-1908). CURTIS NYE SMITH.

Duplex Sweet Peas.

C. C. Morse & Co., San Francisco, Calif., and W. Atlee Burpee & Co., Philadelphia, Pa., in their current catalogues, offer what they term new Duplex Spencer sweet peas, strongly recommending them for florists' use, the latter firm referring to them as follows:

"For several years we have watched with much interest the tendency of certain Spencers to produce sprays bearing flowers with twin and triple standards. Repeated selections, with an aim to fix this character, have been made both in England and America. When visiting Marks Tey, Essex, early in July, the writer was delighted with several rows of a magnificent double-standard pink that Dobbie & Co. had developed to wonderful perfection. Upon inquiry, however, we learned that probably the seed would be supplied this season exclusively to Lowe & Shawyer, the well-known florists of Uxbridge, who anticipated great success in placing this first double-standard Spencer upon the Covent Garden market. Five or six weeks later, however, when in Scotland, W. Cuthbertson (senior partner of Dobbie & Co., Edinburgh) advised us that there would be more seed than required for Lowe & Shawyer,—and that outside of what was necessary for their own trade, the variety would be placed with us for introduction. This being the only "Double-Standard" Spencer we were then sure of having in sufficient quantity to offer for 1912, we decided to give it the name "Duplex," and determined then to keep this term "Duplex" as a prefix to any other double-standard Spencers it would be our good fortune to introduce. It might be well to state emphatically that the new Duplex Spencers should not be confounded in any way with the so-called "Double Sweet Peas" of the Grandiflora type introduced a number of years ago. These never came more than 20 to 30 per cent double, and were so undesirable that, in common with most other seedsmen, we dropped them entirely.

"In color both the standard and wings are a rich cream-pink, and practically all the plants give flowers with twin or triple standards. On the sprays of four blooms each (of which there is a great number) the two lower flowers are double, while sometimes three of the flowers are double. The three-bloom sprays give the one or two lower flowers with twin or triple standards. Even the flowers which have only a single standard are magnificent, being all uniformly waved and crimped both in standard and wings. The beautiful lemon keel, in addition to the double standard, materially enhances the effectiveness of these flowers when bunched. Of strong, vigorous growth, the vines bear the grand, gigantic flowers most profusely upon long, stiff stems. We are sure that market growers will find that the new "Duplex Spencer" will be one of the most profitable sweet peas they can grow for cutting, while amateurs will be delighted with it."

THE NEW TYPE
KUNDERDI "GLORY"
WITH "RUFFLED" PETALS

The broadly expanded, wide open flowers paired by twos, all face in the same direction and are carried on straight stout stalks, fully 3½ feet. From three to eight of these handsome flowers are open at one time. Each petal is exquisitely ruffled and fluted.

The color is a delicate cream pink, with a most attractive crimson stripe in the center of each lower petals the shade of which is unique in Gladioli. The ruffling of the petals in this new strain has attracted much attention the country over.

Special prices with free cuts, for catalogue use.

Per 100, $7.50. Per 1000, $70.00

A Letter From Germany.

The seedsmen here publish in their catalogues and price lists the guaranteed purity and germinating or growth percentage, and they are remarkably good. For example, in a spring catalogue for this year that I have before me, I notice the following: Field peas 98 per cent purity, 95 per cent germination; caraway seed 95 per cent purity, 80 per cent germination; white clover 98 per cent purity, 90 per cent germination; alfalfa 98 per cent purity and 90 per cent germination.

We have many good seeds, and not a few honest seedsmen in the United States. Yet I wonder how many of our seedsmen would be willing, as things are at present, to actually guarantee anything like the above percentages for the same seeds.—William R. Lazenby in the Market Growers' Journal.

[We wonder what is meant by the word "guarantee!" Is it a guarantee to refund the value of the crop which might have been produced or is it a question of refunding the amount paid? As we understand it, American seedsmen object to any guarantee beyond the amount paid for the seed. Articles like the above which do not diagram what is meant by the word "guarantee" and what liability it carries are of little definite value to the trade. Suppose our contemporary prints a few of those salutatory German laws for the benefit of American seedsmen.—ED. A. F.]

MELROSE, MASS.—The Melrose Horticultural and Improvement Society, Melrose, Mass., elected the following officers at its annual meeting: B. B. Dunbar, president; F. H. Brown, vice-president; Mrs. B. B. Dunbar, secretary; George D. Orton, treasurer.

C. HUMFELD,

CLAY CENTER, KANSAS.

Terre Haute, Ind.

The Christmas business this year was far ahead of any other. The demand for everything was much larger than the supply on hand, especially of carnations and holly. The holly this year was black and of no use whatever. Nearly a carload for one of the commission firms was worthless. Several of the commission men who have formerly handled large quantities did not have any, and quite a number of dealers sent to Indianapolis for their supply. The sale of holly wreaths was the largest every known, the demand being far beyond the supply. The weather was simply delightful, just like spring, which made deliveries very nice. There was quite a marked advance in the deliveries of several of the firms, and but very little complaint of them not being on time.

NOTES.

John G. Heinl & Son report the best trade they ever had. The sale of cut flower was simply immense, with a shortage of carnations. This firm sold 500 lilies.

Cowan Bros. were entirely sold out and deliveries all made at noon Christmas day. Trade much better than last year.

The Terre Haute Rose & Carnation Co. could not fill all their wholesale orders, they were so many and large.

Fred Wunker & Sons had a fine bench of Chrysanthemum Merry Christmas which came in just right.

N. B. & C. E. Stover had quite an increase in the sale of plants, especially ferns and cyclamen.

Henry Graham sold out completely and reports his Christmas trade very satisfactory.

Harry J. W. Richmond reports the best business he ever had. B. S.

QUALITY

THE

Carnation of Real Merit

The Best Money Maker

MERIT

RAINBOW

WINNER OF THE BRONZE MEDAL

National Flower Show, Boston, March, 1911.

A Glorified Prosperity with all the Good Features of the Lawson Strain

With its name proclaiming its beautiful color combination, RAINBOW is one of the best, most profitable and remarkable carnations offered to the growers today. There are many reasons why you should grow RAINBOW—

It is the best
It is easily propagated
It has a remarkably long, heavy stiff stem
It has a strong, non-splitting calyx
It has large flowers of perfect form
It is a cool grower, doing best with 50°
It blooms freely, early, continuously
It is a good keeper
and best of all, it is a money maker and sells on sight.

These are strong statements but are facts which you can prove for yourself.

We realize 40% to 60% more profit on Rainbow than on any of the many standard varieties we have ever grown. It was sold last season exclusively to the largest retail dealer in New York City; who took our entire output.

The delicate shading from deep to light pink makes it both a superior display bloom and a general purpose flower, commanding the highest price everywhere. Our claims to superiority in Rainbow are supported by 15 years of paintaking experience in producing and growing carnation seedlings of extreme merit.

PEDIGREE:—Morning Glory crossed with Lawson, producing white seedling overlaid with pink. This resulting seedling crossed with Lawson, producing Rainbow—"profitable and prolific."

Our propagating facilities are strictly up-to-date. We can deliver a half million rooted cuttings and guarantee them to be perfect and satisfactory in every way. **Orders booked now for early delivery.**

Market Gardeners

Vegetable Growers' Association of America.

H. F. Hall, Boston, Mass., President; C. West, Irondequoit, N. Y., Vice-President; S. W. Severance, 508 Walker Building, Louisville, Ky., Secretary; M. L. Ruetenik Cleveland, O., Treasurer.

LANCASTER, O.—M. M. Miesse has rebuilt the houses destroyed by fire last year and added two new houses, 29½x235 feet. A new boiler room, 30x36 feet, has been erected, constructed of concrete blocks, with iron beams, and a plant house over it. They were delayed by the heavy rains and the early cold weather set in before the boilers were connected, so the gas supply was turned into the irrigation system, the hundreds of small nozzles being lit, which carried the crops through in good shape.

Prices of Indoor Fruits and Vegetables.

Chicago, December 28.—Mushrooms, 10 cents to 20 cents per pound; asparagus, $2.50 to $3 per dozen bunches; cucumbers, $1.35 to $1.60 per dozen; tomatoes, 10 cents to 25 cents per pound; radishes, 25 cents to 65 cents per dozen bunches; lettuce, 20 cents to 25 cents per pound; rhubarb, 50 cents per bunch.

New York, December 30.—Mushrooms, 40 cents to $1.25 per 4-pound basket; cucumbers, $1 to $1.25 per dozen; tomatoes, 15 cents to 30 cents per pound; radishes, $2 to $3 per 100 bunches; lettuce, 50 cents to $1 per strap; mint, 40 cents to 60 cents per dozen bunches; rhubarb, $1 per large bunch.

Greenhouse Spinach.

For the first time this fall we have had no glut of leaf lettuce in our market. Most growers have operated carefully to avoid the disastrous overproduction seen in other seasons. Some have abandoned vegetables entirely in favor of cut flowers, while others have cut down on leaf lettuce and grown something else. One of our growers has just entered a fine crop of spinach on the local market, the first greenhouse spinach we have seen. It is selling readily at the same price as lettuce, or about 12 cents per pound, at which price it should be profitable. We have never handled this crop indoors, having had plenty of it outside at all times, but this fall we, like other growers, were completely frozen out so early in the season that our crops were actually snatched from us. We protect spinach by using sash, canvas and corn-fodder; but the season was so warm and wet that this work had not yet commenced when the cold wave of November 12 struck us. To our mind this was the most severe cold wave we ever experienced — it was not so much the temperature as it was the terrific gale that did the damage. Hence to protect spinach it is more necessary to intercept the winds than to modify temperature. Under existing conditions our grower has the market to himself and should come out successfully. We believe some greenhouse spinach would sell any winter as there are always some people willing to pay an extra price. The variety used in this trial is the Norfolk Savoy, which is the earliest and the heaviest cropper. Southern spinach is never popular on our markets and it lacks tenderness in cooking.

MARKETMAN.

The Aroostook Potato Region.

This is the greatest local potato growing section of the United States. In one season 32,000 carloads have been shipped from this single county. The yields secured are the highest in the United States. The region is abundantly prosperous and is not excelled in its methods or in its equipment of tools and buildings by any farming section of the country. The past two seasons have not been good ones in the district because of potato rot and low prices. The one drawback to profits is the heavy fertilizer bill amounting to from $25 to $40 an acre. So far as we know the potato growing regions of Colorado rank next to Aroostook in quantity of output from any limited section; and these two districts lead all others for high development of potato growing methods and the large degree of prosperity secured thereby.

There is no machinery standing out doors on farms in Aroostook county, Maine. Potato houses are built so that the basement stands on a slight rise or knoll and is surmounted by a neatly framed and painted wooden building which has an inclined driveway leading to it and is used as a machine shed. During potato harvest the machinery is removed and the potato wagons drive in on the upper floors through which the potatoes are poured into the tall bins beneath. The basements have cement floors and are equipped with a good stove and chimney.

Colorado potato houses have the merit of being cheap, but they are not permanent, always leak in very heavy rains, and certainly are not handsome. We would do well to adopt as fast as we can the Aroostook potato house and get our machinery under cover.—C. L. Fitch in Colo. Exp. Stn. News Notes.

ARTHUR T. BODDINGTON, Seedsman, 342 W. 14th Street NEW YORK CITY.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y. Thirty-seventh annual convention to be held at Boston Mass., 1912.

THE protest filed by Storrs & Harrison Co., Painesville, O., that merchandise invoiced as spiræa was wrongly classified as nursery stock, and was dutiable as astilbe, was sustained by the general appraisers.

Western Association of Nurserymen.

At the annual meeting of the Western Association of Nurserymen, held at Kansas City, Mo., December 13-14, 1911, an account of which appeared in THE AMERICAN FLORIST, issue of December 30, page 1268, President George A. Marshall delivered the following address:

It is needless to mention the pleasant anticipation with which we look forward to these meetings. We have, long ago, been pronounced a success both socially and from a financial standpoint. Besides the profits derived from the programme, we are also encouraged and benefited by our pleasant visits with each other, the mingling together, giving and receiving sympathy and glory, each in turn, exchanging experiences with their results, etc., which a nurseryman is always willing to give and glad to receive; all these things are wholly beneficial as well as pleasant.

We know the nurseryman must necessarily be an optimist, one who will stand killing off three or four times a year and still come up smiling, one who can disentangle himself from troubles, clamor to the surface and start on his way rejoicing. The pessimist has fallen by the wayside long, long ago. For him to be a nurseryman would be an impossibility, and we are thankful that it has been so ordered as we need better mettle to carry on our business. The nurseryman must be a man who generally sees the bright side of things, must be enthusiastic, a good organizer and a pusher, cool and level headed, and a generally good executor, wide-awake and enterprising; must be blessed with an excess of hard common sense and a goodly amount of honest blood in his veins, and you know this would generally make a good citizen. We talk of the honest old farmer; well, he is in an honest business, is in partnership with good old nature and has never been tempted by man. I may fairly say here, that many of the so-called honest farmers have not enough honest blood in their veins to float them in the nursery business for fifteen minutes. We, as an association, have a few duties yet to perform. We have made a good start in grading and are getting pretty well down to the standard grades. About all that is left along that line is the finishing. This will be a great improvement over the old way of selling and buying trees of not many years ago. Further, we are still having undesirable legislation from year to year, in many of our states, and it should be followed up very closely, as "an ounce of prevention is worth a pound of cure" in this case surely, and the inspectors in many of our western states should be mildly given to understand that unless the decisions are given carefully and fairly correct investigation is likely to follow. Yet, while we are doing this we should be very reasonable, with the best interests of the orchardists in mind first, last and all the time.

I believe I voice the sentiment of this society when I state that all we want is a square deal and we are perfectly willing to give the orchardists as much. We, as nurserymen, should acquaint ourselves more thoroughly with the orchards and vineyards of the country. In other words, we should be in closer touch with the fruit-growers. We should be careful not to advertise and push worthless things. There are far too many varieties of fruit on the market now, therefore, we should never add another unless it is superior and decidedly so. Our country has gotten to the age where varieties of poor quality are not desired, and should be removed from the orchards entirely and dropped from the nurseryman's list. If there were no poor fruit on the market at all there would be a great deal more fruit eaten, and when more fruit is eaten there is a better demand for it; where there is a better demand, there is more planting, and where there is more planting there is is more business for the nurseryman. Therefore, when we encourage this we not only benefit the country at large, but we benefit ourselves.

S. D. BRANT, Clay Center, Kans.

Wichita, Kans.

The "Christmas rush" being past, the florists are straightening up and looking 'round to see "where they are at." The business will run very close to that of last year for the same dates. Possibly enough better to make it a safe basis upon which to plan for another season. The weather conditions were fair with the exception of a rainy day early in the week. There was a noticeable decrease in the demand for evergreen roping and similar decorative material. The gradual rise in prices during the last three or four years has brought about its own remedy, and the prices now prevailing will bar it from general use in the quantity. The sales this season were about half that of last year. Christmas trees cleaned up nicely. Holly is still a favorite and sold well and holly wreaths also found good demand. Boxwood wreaths with trimmings of red ruscus, cape flowers or artificial poinsettias were also good property. Mistletoe was in ample supply and good quality. The demand for plants was good, especially for the flowering ones; only moderate for ferns or palms. Azeleas, Lorraine begonias, cyclamen and poinsettias held about even honors in the demand. Roman hyacinths and Paper White narcissus in pans were not so much in demand as in the past, when there was not such a good supply of the better goods named above. Cut flowers were generally of good quality and sold at about the usual Christmas prices. Considerable stock was shipped in from the wholesale markets of Chicago and elsewhere to supply the extra demand. Trade during the week following Christmas was about the ordinary. Ugly weather and the rather stiff prices seemed to have little trouble in keeping the supply equal to the demand.

NOTES.

Harrie Mueller, who is home from college for midwinter vacation, found plenty to keep him busy at the Chas. P. Mueller establishment. Christmas day after the rush was over a big bunch of funeral orders was received by this firm and a good part of the force were kept busy making them up and packing for shipment.

W. H. Culp & Co. rented, for the extra rush, a large storeroom directly across the alley from the rear of their store. This was used for display of Christmas trees, storage of holly, etc., and for the winding of evergreen and holly wreaths and also as headquarters for all the delivery work.

Elwood Kline, proprietor of the Kline Floral Co., Lawrence, and his brother, Norval Kline of Hutchinson, were holiday visitors at the home of their parents.

Ferdinand Kuechenmeister has had to give up burning gas under his greenhouse boiler and is using coal.

J. E. Bidelman and Iva Blake, both lettuce growers, have installed fuel oil burners. W. I. CHITA.

SOMERSWORTH, N. H.—G. S. Ramsburg is having great success with his new silver pink antirrhinum. The young stock is being shipped to distant parts of the country.

EVERYTHING SOLD WELL.

This year's Christmas business was just about as much ahead of last year's as that was over the year previous. We are steadily and continuously advancing in trade as well as in population. All stores had a good trade, even those that opened just before the holidays. Christmas being Monday, the plant and cut flower sales were divided more than ever. Practically no cut flowers were delivered on Saturday, while the delivery of plants was at an end by Saturday night. Sunday was understood to be a closed day, but some of the delivery wagons were seen about. Monday was entirely a cut flower day. No plants were sold for the very good reason that there were none to be had, but the cut flowers were a glorious sight. The demand was large, and notwithstanding the large stock on hand the supply soon gave out, and the worn out staff of salesmen, salesladies and other help retired to their much needed rest, or to a belated Christmas dinner. The favorite plant was, as in former years, the poinsettia, of which a larger stock than ever was on hand. A new plan of tying tall plants down was tried by one firm, which will probably be imitated. Cyclamen sold at good prices and took second place, outranking azaleas. Mme. Petrick was the best of these, but on the whole azaleas were not up to standard, being very irregular in flowering. Berried plants were not seen in quantity. There is a prejudice against solanums in this city. Baskets sold very well, prices ranging all the way from five to twenty-five dollars. Those made up of one plant or one color were most in favor; those filled with all sorts and of impossible mixtures were considered as in bad taste. Cut flowers all sold well and it is impossible to name the favorites. Early formed opinions were shattered later on. Of course red carnations will always sell first as long as they last, but will there ever be enough? The Christmas window decorations had considerable to do with the increased sales. Never before was the display so intelligently shown. In several establishments daily changes were made, and here again, as with the filling of the baskets, one thing was shown at a time, which gives a more lasting impression than a mixture of all kinds in a window. Considerable money was expended in greens for decorating walls and ceilings, chiefly wild smilax. There was nothing new noticed except an idea of fastening Christmas trees of the smaller sizes in birch blocks, which took very well, and from this a good profit was derived. The weather was mild, just about freezing, and favorable for delivery, but the roads were fit neither for wheels nor sleigh.

LUCK.

STOCK ALWAYS NEEDED

Small Ferns, for dishes, Pteris Mayi, Serrulata Cristata Variegata, Wimsetti, Cretica Alba Lineata, $3.00 per 100, $25.00 per 1000.

Circulation in Buyers' Brains

IS the kind enjoyed by the American Florist. Its actual paid circulation we believe, is the largest in its class. The contents are of real present value and are preserved for future reference. Advertisers who realize this establish permanent business with the best trade in the United States and Canada.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, $1.25

AMERICAN FLORIST CO.
440 So. Dearborn St.
CHICAGO.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

The American Florist Co.
440 S. Dearborn St. Chicago,

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

Thomas Barson, of Johnston, N. Y., Gives His Opinion of Both Our Pipe Frame and Iron Frame House.

"IN the past seven years you have built for me three greenhouses, which I am now using with the greatest of satisfaction. The first house, of Pipe Frame construction, which is my chrysanthemum house, was put up in 1904 and is practically in as good condition now as then Four years ago, the rose house, also Pipe Frame, was erected and that, too, serves its purpose well.

The pride of my greenhouses, however, is the home of my carnations. This house is of Iron Frame construction 100x43 feet, and is up-to-date in every way. Although all of my houses are satisfactory, still the improvement in the last one erected over the one put up seven years ago is very marked and if I had it to do over again and knew as much about the houses as I do now, I would have all three of Iron Frame construction, on the same plan as my "Carnation House." I would advise the erection of this kind of house for the growing of all flowers. Right here I want to congratulate you on the skilled workmen sent to build my last house. They were the most gentlemanly lot of workmen I have ever seen together, tending strictly to their own business and showing by their efforts that they were well acquainted with the tasks assigned them"

Thos Barson.

Lord & Burnham Co. Factories: Irvington, N. Y., and Des Plaines, Ill. New York St. James Building. Boston Tremont Building. Philadelphia Franklin Bank Bldg. Chicago Rookery Bldg.

Salt Lake City, Utah.

The Christmas rush is over and the florists well satisfied. They all say that the business was better by far than it has ever been in Salt Lake. Some of the best stores claim that it was double that of last year. The buying was postponed until the last day and then the big rush was on. Pot plants took well, nearly every blooming plant being sold. The stock was exceptionally good for nearly everything in the way of cut flowers and plants were of local production, not so much stock being shipped in as in former years. There have been several new houses erected here in the last two years. In former years all of the roses had to be shipped in from Denver, Council Bluffs and as far as Chicago.

O. Lingreen of Bountiful is getting his new range in good shape and will have some good stock from this on. The frost came before he was ready, which made his cut short for the holidays, but his roses and carnations are in good condition and will produce some extra good flowers from now on. Mr. Lingreen is a good grower of cut flowers and success is assured.

The Lambourne Floral Co. state that their business was more than double that of last year. Prices ran about the same as 1910. There was about the same amount of holly and green used as last year. The holly was of good quality and sold readily.

The Huddart Floral Co. say that business at their new store on Main street was way beyond their expectation. They were compelled to employ a large force of extra help in order to handle their trade.

The Miller Floral Co. of Farmington shipped in several thousand of good roses. UINTA.

Dreer's Peerless Glazing Points

For Greenhouses

Drive easy and true, because both bevels are on the same side. Can't twist and break the glass in driving. Galvanized and will not rust. No rights or lefts.

The Peerless Glazing Point is patented. No others like it. Order from your dealer or direct from us.

Aphine Manufacturing Company
MADISON N. J.

Tacoma, Wash.

That Christmas and holiday business was good only partially tells the story. We may say extra good. All the cut flowers that remained unsold would make a poor show and many more could have been sold. It is a hard thing for people to realize any reason for the quick advance in prices of carnations. They buy a few dozens during the year at a cheaper price and are staggered when told that they are two dollars a dozen, and they turn away and we catch something being said about "hold up" or "graft" as they are going out, and we wonder if it is the best policy. There was a great increase in the call for a pot plant or cut flower that can be sold at a dollar or less. There was a scarcity of bulbous flowers and practically not an azalea or pot rose in bloom. As a whole, this year was the best for holiday business.

NOTES.

Watson, the public market florist, shipped 100 holly wreaths and a large amount of greens and holly to Yakima.

We noticed two stores closed all day Saturday and Sunday with signs on the doors, "Closed to get orders out."

The weather was warm and pleasant so that very little wrapping was needed for plants.

H. H. Hinze and H. W. Manike both had all the business they could take care of.

Violets arrived plentifully and in good condition from California.

F. C. Smith sold out all pot plants and practically all the cut flowers.

S. L. H.

DANBURY, CONN.—E. E. Matthewson has opened a flower store on West street.

ONARGA, ILL.—A disastrous fire occurred at the Mosback Greenhouse Co., December 31, destroying the sheds, storage rooms and office, the books and records being burned. The greenhouses were not greatly damaged, but the plants were ruined by smoke and cold weather, a few only being saved.

Mention the American Florist when writing

FRANKLINVILLE, N. Y.—Mrs. Fred Myrick has for some time sold plants and flowers, and as early as possible it is intended to erect a greenhouse and open a florist business.

MITTINEAGUE, MASS.—George Cooley has installed a new boiler at his greenhouses on Maple street. The entire plant has been remodeled and renovated the past season, and the placing of the boiler finished the work.

Davenport, Ia.

The busiest days of the year have passed and after looking over the records, we can honestly say that they have been record-breaking ones. A few say, however, that the sales did amount to as much as in 1910. But the majority claim it was the greatest in the history of the city. Miss Tierney, head saleslady for Bills Floral Co., stated this was the banner Christmas and more stock could have been sold had it been on hand. Miss Woltman did a big business and sold more plants than ever before. Replys from the other florists were most all in the same vein. The weather could not have been better for the customers or the dealer if it had been made to order—fine, bright, warm days which saved a lot of worry, for plants were delivered in open wagons. All in all, Christmas was a big day for all concerned. More plants of moderate prices were sold than ever before, which was true also of holly and greens. Had there been snow on the ground we doubt if there could have been found a pound of holly unsold. As the weather for two weeks prior to Christmas had been bright and warm, every greenhouse was overflowing with blossoms, so to speak, therebq more satisfied customers, as very little stock had to be brought in. Christmas week was also a very busy one, with the many balls, receptions, entertainments, etc., of society, and there was no surplus of any one thing. New Year's day is not looked forward to by the florists to any great extent. However, quite a number of advance orders are in the files which no doubt will clean up everything that is now on the market. The old year is going out rather rough, the glass at 10 above and the wind blowing at about 30 miles per hour. But then it will take quite a severe storm to blow the smile off of the faces of Henry G. Pauli, Bills Floral Co., John T. Temple, and the rest of the clan.

CLUB MEETING.

Notwithstanding the rush that is now on a large number laid down their holly wreaths, etc., long enough to attend the monthly meeting of the Tri-city Florists' Club, which was held at the home of John Staack, Moline, and no one regretted so doing, for a most enjoyable and interesting time was had. "Roses, Indoor Culture," and "Commercial Fertilizers" were the topics for the evening and interesting points were brought out by the different members. Methinks several of the members could make a fine living as lecturers by the way they handled the various topics. After other routine matters were gone over the club adjourned to the dining room, where a fine supper was in waiting and a social hour was enjoyed. Henry Pauli will entertain the club at his home in Davenport on January 11, at which meeting the subject of "Insects" will be the main topic. You fellows who have insects bring them along and we will teach you how to rid yourself of them. This is a poor joke, but we can't always be serious.

C. O. E. Boehm, superintendent of Davenport parks, celebrated his forty-sixth birthday last week. Theodore Ewoldt celebrated his birthday December 13 but as Ted is a member of the Bachelor's club he is not giving his age away. Still he says he's about 26. John Staack also had a celebration of the same kind on the same day. Thirteen is not unlucky for John for he has a wife, several fine children and a fine business.

Uncle John Temple was elected treasurer of a local order for the fifty-fifth time. Who says the florists are not an honest lot?

A Happy New Year to the trade.

Sound Greenhouse Building Methods.

When Your Order for a Greenhouse Reaches Our Factory, We Make Accurate Detailed Drawings for the Various Parts Going into Your house.

ONE man is an expert on the wood parts—he does that; another does the iron, another with engineering experience knows about stress and strains and directs the size and kinds of supports and fittings, and so on.

Then the lay-out man indicates the length to which the pieces are to be cut and directs where all holes shall be drilled so that the house will go together like clockwork.

We tell you these things just to show you that we have completely out-grown that state of having so-called "all-around men" who do a little of everything in every line (and not much of anything that's really dependable.)

You know that the only way a man can be an expert is to direct all his time and attention, heart and soul, to some one thing.

That's the kind of men our organization is made up of.

The kind of men whose service you get from us at no more expenditure in the end than for the "Jack-of-all- trades" kind who are full of guesses. Write us.

Denver, Colo.

We have been in the grip of a severe cold wave for several weeks. The thermometer has registered near or below zero nearly every night. The cold wave was accompanied by snow Christmas week, making it difficult to make deliveries and giving the growers and store men plenty of work wrapping plants. Considering all, it was a very good Christmas and nearly everybody disposed of the bulk of their stock. Azaleas, poinsettias and cyclamen took the lead in plants. There was a shortage of American Beauties and Richmonds, and many orders had to be refused. Killarneys and Brides were in good shape and supply, though there were few left over. Red and dark pink carnations were in demand, light pink and white lagging a little, some being left over. Violets were not so plentiful and did not sell well, due to the exceedingly cold weather. Holly was in poor condition and there was a good deal left over.

NOTES.

The regular meeting of the Colorado Florists' Club will be held January 15. A new feature at this meeting will be a display of cut flowers and plants. All the growers have been asked to bring the best they have in new or older varieties.

The following expect to attend the conventions of American Rose Society and American Carnation Society at Detroit: J. A. Valentine, N. A. Benson, Emil Glauber, Wm. Grimes and A. H. Bush.

The cyclamens sent out by the Park Floral Co. were in excellent condition and found ready buyers. They were also fortunate in getting in some good rhododendrons.

Louis Kintzele has recovered from a severe cold, contracted several weeks ago, and is able to be about again.

Elitch-Long Greenhouses had some fine blooms of the chrysanthemum Mary Elitch for the Christmas sales.

Daniels & Fisher had the decoration for the Denver Club's mid-winter ball, held December 29.

The poinsettias grown by Ben Boldt were in good shape and easily disposed of.

SUGGESTIONS FOR PLANT GROWERS.

Geraniums.

After the holiday trade there will be room enough to space out the geraniums and other bedding stock. The cuttings that were placed in flats, and the young stock in 2-inch pots, should be shifted to the 3-inch size and spaced on the benches so that a good growth is encouraged. As soon as well established in these pots the top can be cut off and another cutting obtained. All the young stock possible should be taken from the plants selected in the fall for propagating purposes, for all the cuttings from which it is expected to produce good sized plants should be in the propagating bench by February 1. Any rooted after March 1 will make small plants for bedding purposes. The best stock for late May and early June planting should be in 4-inch pots by April, that they may be well enough established by the middle of May to begin to flower, and should have at that time three or four good branches that a succession of bloom is assured.

Lilies.

The lilies for Easter should be brought into warm temperatures right after the first of the year. A house of 60° at night should bring them into perfect condition for Easter when it occurs in early April as it does this year. Those that are in 4-inch pots should be potted in 6-inch, and we have found the best way to do this was to first place a crock in the bottom of the pot and cover with about an inch of soil, then place the 4-inch plant on this, filling in around the stem above the old ball. The lily always throws out roots at the base of the stem when the buds form, and if potted in this manner these roots will be in soil and materially aid the plant in perfecting the bloom. With these roots covered with soil the plant also makes a much better appearance. The soil in which they are potted should be a rich compost of about the same composition as is used in rose culture, and the plant should be firmly potted and well watered and placed in good light location where the plants will not get drawn. A plant 18 to 24 inches high when in bloom with the foliage thickly studded along the stem is the one most desired at Easter. Keep the aphis down all the time by constant fumigation. These little insects are the worst plague to the lily grower, for if they once get established on lilies they are very difficult to dislodge, so it is much better to give the plants a fumigation every week and thus guard against them than to wait until their presence is manifest and try to kill them. This is one of the most pronounced cases where "An ounce of prevention is worth a pound of cure."

Rambler Roses.

Of all the exhibits made at the great flower show in Boston last spring the Rambler roses attracted the most attention. The varieties of these beautiful plants have increased rapidly and they can now be had in all the shades of red and pink and also white. The single varieties have also been greatly improved and many of these make most beautiful plants. Every grower should have a few of these for Easter, and even if they do not sell they can be grown on for next year when a finer and larger plant will be had and the wood grown this year can be propagated and if planted outside will make nice plants. Plants grown in the field and lifted this fall will have to be started the first of the year to have them in bloom for Easter; pot-grown plants can be started two weeks later. They should be firmly potted in good rose soil, and placed in a cool house, one not running higher than 45° at night, and syringed often to soften the wood. Before the eyes start into growth the plants should be tied out into the shape they are to be grown. These plants can by a little ingenuity and care be trained into any shape desired, many fancy as well as grotesque forms are now seen every year. To the inexperienced the round spreading plant should be the first attempted. Five or six stakes at the edge of the pot with the stems wound around and two or three arching over the center is the simplest form. Experienced growers have them in the shape of umbrellas, large balls, ships,

and any form they desire. When the growths have got well started the plants should be moved into a temperature of 55° at night, and the syringing on bright days should be kept up to prevent insects from getting a foothold. By the middle of March the flowers should begin to show color and if they do not a little warmer temperature will be required to have them well in bloom for the first week in April, a regular rose temperature of 60° at night will be necessary, but the flowers are not of as good color nor do they last as well if they are unduly forced. A fine assortment of these include Crimson Rambler, Philadelphia Rambler, Dorothy Perkins, White Dorothy Perkins, Tausendschon, Lady Gay, Hiawatha and American Pillar, and in the Baby Ramblers, Crimson Baby, Jessie, Phyllis and Orleans.

Philip J. Foley.

Philip J. Foley, president-elect of the Chicago Florists' Club, is well known to the trade throughout the country. Mr. Foley is president of the Foley Mfg. Co., which makes a specialty of greenhouse construction work and materials. He was born in Chicago May 12, 1867, and has been identified with the lumber interests all his business life. For nearly a quarter century he has been turning out more or less greenhouse material, making a close specialty of that line of work during the past 10 years.

The Foley Mfg. Co., of which Mr. Foley is the head, has made such rapid strides that he has been obliged to abandon all other lines of work and concentrate his forces, with extended workshops and foundry, on wood and iron structures for florists and market gardeners, many of the largest establishments in both lines being of his firm's workmanship, also numerous public and private greenhouses of superior style and equipment. The growth of the business has been so extensive that he has been compelled to open eastern offices with D. T. Connor in charge at Philadelphia and John A. Payne principal at New York. Isaac Cassidy, well known in the greenhouse construction world, joined the home office staff some months ago, and John Schreiber, who has a place all his own in the events of Chicago greenhousemen, is the firm's latest acquisition.

Mr. Foley has attended most of the national and home state conventions of the florists during the past decade and has been especially active in the promotion of Illinois legislation in the interests of the trade. A disposition to do the organization work imposed upon him with thoroughness and willingly has made him hosts of friends and his imposing personality and seductive speech have won many valuable concessions for the trade of his native state.

EVANSVILLE, IND.—Business was much better this year than last during the holiday trades, states The Wm. Blackman Floral Co., there being a marked increase in the sale of good plants and roses. The quality of the flowers was better than last year with prices about the same, but violets were short of the demand and the supply of roses and carnations was about equal to the call. Both the supply and demand for bulbous flowers was good.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Table Decorations.

DECORATION OF AMERICAN BEAUTIES.

To arrange a most effective table decoration, fill a tall light green glass vase with American Beauty roses of different lengths—a few good full-blown blooms give tone to the grouping. Cover the vase with asparagus arranged in this manner: Wind lengths of the vines about two yards long around a good stout wire about a yard and a quarter in length, making about a dozen of these, depending upon the size of the vase and the table. Place the fullest end of the vine in the vase around the American Beauties. Then curve the wire say about ten or fifteen inches out and bend in towards vase at the foot. This should give a sort of urn shape to the body of the vase. At the foot allow the asparagus that extends beyond the wire to lay flat on the table and at the ends of these place a full blown American Beauty rose; also make a garland of full blown American Beauty roses at the base of the vase. Under the wire covered with asparagus where it bulges place on the inside a row of cluster miniature electric lights covered with red catgut. This, if carefully studied, will make a stunning decoration for the center table of a banquet hall.

P. J. Foley.

President-Elect Chicago Florists' Club.

THE BRIDESMAID'S TABLE.

Secure a large round tin receptacle, the size depending upon the table to be decorated. Enamel the inside a clear white and fill with water in which place gold fish. Around this place a hedge of lily of the valley in the center of which use a row of large yellow daisies and arrange the green as fluffily as possible so as to have a ruche of finish where it rests on the table. For each plate make a mat of four small maiden hair leaves, wired together in the center. Then arrange a ring or circle effect of yellow daisies, which should be large enough that when a good sized dinner plate is placed on it the yellow daisies will extend sufficiently to make a pretty setting. Allow the tips of the four maiden hair fern leaves to extend beyond the ring circle to lend it tone. In the center where the fern leaves are wired place a bunch of yellow daisies to be used as a corsage. Over this table place a large shade made of lily of the valley and yellow daisies. The wire frame should be of good size and wind the entire frame with white satin ribbon. This should be made so that a mass of lily of the valley can be placed in the center of each side and the corners covered with yellow daisies. Allow a fringe of lily of the valley to extend all around the edge of the four sides and at the end of each corner place a cluster of yellow daisies. At the upper edge arrange an upright border of lily of the valley.

This shade should be suspended with white satin ribbons. Instead of yellow daisies, yellow roses or yellow jonquils could be substituted.

VIOLET DECORATION.

On the table first place a round piece of violet velvet of suitable size and over this a piece of glass of same size and shape. In the center place a low round cut glass bowl filled with green moss and arranged with violets, which should be stemmed in bunches with the foliage arranged between the flowers. Take four glass flower holders of the fancy kind now to be had at all dealers, and fill them with loosely arranged bunches of violets. Four such holders on opposite sides of the center bowl are a nice arrangement. From these, tiny showers of violet baby ribbon with here and there a violet blossom can be extended from each other, interwinding them and allowing a few to touch the glass. Around the glass to finish the edge make a ruche effect of violets and edge with maiden hair. Corsages of violets in which a cattleya is placed finished with a violet gauze ribbon gives added tone to the decoration.

YELLOW TULIPS AND FREESIA.

Fill a brownish green rustic basket with yellow tulips in groups of four bulbs each allowing enough space between to arrange loose bunches of freesia, using a little Asparagus Sprengeri or plumosus sprays as a finish. Where extra foliage is necessary the green of the freesia can be used. Make a garland of yellow tulips and freesia with their natural foliage for the table to be placed around the basket.

For dinner favors have dainty bouillon cups of yellow design filled with moss in the center of which place one full bloom yellow tulip and surround with freesia, tie each handle with a pretty bow of white gauze ribbon. These cups can be prettily arranged in the garland around the basket but in this case the table garland should be made of yellow tulips only and the cups filled with freesia, separating the two colors, giving the garland the yellow effect, thus making the cups with their white filling and gauze bows lend the contrast. The center basket could also be arranged effectively by having the tulips massed in the center and surrounded by the freesia.

A. E. KLUNDER.

MILFORD, MASS.—A blast fired by employes of a firm of contractors constructing a road broke many panes of glass in the greenhouse of W. D. Howard. The contractors will make good the loss.

WREATH OF ROSES ON EASEL ARRANGED BY YOUNG & NUGENT, NEW YORK.

Fred. Dorner, Jr.

A. F. J. Baur.
Secretary American Carnation Society.

OFFICERS OF THE AMERICAN CARNATION SOCIETY AND DETROIT FLORISTS' CLUB.

American Carnation Society.

The twenty-first annual convention of the American Carnation Society will convene at Detroit, Mich., on Wednesday evening, January 10, at 8 o'clock p. m., the meeting opening in charge of the Detroit Florists' Club when the address of welcome and the responses of the American Carnation Society and the American Rose Society will be given. On Thursday, January 11, at 10 a. m., the society will reconvene and the president's address and reports of officers and committees and routine business will be transacted. At the meeting of January 11 Prof. H. B. Dorner will read a paper on "The Work and Methods in Hybridizing of the Late Fred Dorner," and at the meeting of January 12, which convenes at 10 o'clock a. m., Hugh Schroeter will read a paper entitled "Everybody's Flower." Following the session of Friday the board of directors will hold a meeting. The annual exhibition will be held in conjunction with the convention. The judges are Eugene Dailledouze, Brooklyn N. Y.; Joseph H. Hill, Richmond, Ind.; C. W. Johnson, Morgan Park, Ill.; William Nicholson, Framingham, Mass.; E. A. Stroud, Stafford, Pa.; Richard Witterstaetter, Cincinnati, O.

Warning—Cyanide Deadly.

From the frequent inquiries received from the correspondents of the trade papers and the mention so often made by horticultural writers of the use of hydrocyanic acid gas for fumigation it must be evident to the careful reader that this method of combating insect pests is increasing rapidly with greenhouse proprietors and with growers. In all articles that have been written upon this matter it is invariably stated that great care must be taken in handling both the poison and the resultant gas, but too often this appears at the end of the article and may not impress the reader as it should.

Cyanide of potassium is one of the most virulent poisons known today to the chemist. It works so quickly that there is generally no time to administer an antidote. A very small amount placed on the tongue of a dog will cause almost instant death. It should be handled with the greatest care, the package plainly marked poison, in large letters, and placed out of the reach of any child or careless person. If it is touched with the hands they should be thoroughly washed clean at once. A small amount left under the nails might result in a fatal poisoning. When we first began the use of this chemical the dealer from whom we purchased it informed us at once of its virulent properties and advised us in purchasing it to have it weighed out in the amount we wanted to use and placed in small paper bags and then we would not be obliged to touch

it ourselves, and after it was weighed out we could not but help observe how careful he was to wash off all traces of the poison.

The resultant gas from the mixture of cyanide of potassium, sulphuric acid and water is a deadly poison to anything that breathes. It is said that the one who first discovered it never lived to tell of the discovery, for he stood over the receptacle and dropped dead. When the use of this gas was first advocated by horticultural writers and experiment stations the method of dropping the cyanide into the jars which was advised was by an arrangement of strings or wires that could be manipulated from the outside, but it was found that by quickly passing from jar to jar and out of the house that the placing of the cyanide could be done in this manner. Even with this method, and with the added precaution of having the the house. With a little practice a cyanide of potassium done up in paper, which retards the formation of the gas, it is best to fill the lungs full of air before dropping the first package and then not breathe until out of man can easily walk 500 or 600 feet without breathing.

When the house is being fumigated with hydrocyanic acid gas the door should be locked and a notice posted upon it warning every one not to enter. It is best to have some method of opening the house in the morning without entering it. In the majority of greenhouses the gas will probably all have escaped, but there is danger of enough remaining to cause a serious accident, so the doors should be first thrown open and if there is any side ventilation this should also be opened.

There is great danger of men becoming careless in the use of this gas, but this must be guarded against. We read not long ago of a man who had been accustomed to fumigate his buildings with hydrocyanic acid gas and thoroughly understood its use, but on his way home after having fumigated a house was taken suddenly sick and before aid could be administered died. He had inhaled the gas but the effect was not immediate, being stricken more than half an hour later. In using cyanide of potassium it should never be forgotten that it is the strongest of poisons (many know it better as prussic acid), and that the gas is death to any living thing that breathes it. CH.

NEW ORLEANS, LA.—The trade this year during the holidays was about 10 per cent larger than last year, states Abele Bros. There was a good supply of flowers of usual quality and the prices were about the same. Bulbous flowers were short of the demand. The sale of flowering plants showed a large increase.

ORCHID NOTES.

Cattleya Trianae Var. G. C. Roebling.

The blooms of Cattleya Trianæ, var. G. C. Roebling, which we illustrate, were exhibited by Charles Bond of Naperville, Ill., at the meeting of the Chicago Florists' Club December 4. This is an exceedingly rare variety of Cattleya Trianæ, there being but a very few known in cultivation and they are valued at very high figures. The plant from which the flowers exhibited were cut was received in a recent importation, and bore this year, ten blooms. The flowers are very large, the sepals and petals being nearly pure white. The lip instead of having the purple shade of C. Trianæ, is more bluish in color, perhaps better described as a shade of lilac, and the throat is suffused with yellow. The flowers attracted a great deal of attention at the meeting, for they were beautiful specimens of exquisite color. Mr. Bond has been very successful in the culture of orchids, shipping his flowers to the Chicago market, where they are handled by the A. L. Randall Co.

Calanthes.

These beautiful orchids rank high among winter flowering plants, and in gardens where there is a brisk demand for choice cut flowers during the dull months of the year they are worthy of extensive cultivation. The tall, arching flower spikes, when perfectly developed, are most graceful, and render well-grown plants very striking objects. Whether used for the embellishment of the conservatory, the adornment of the dwelling house, or the decoration of the dinner table, they are invariably admired. For the latter purpose probably no flower surpasses them in grace and beauty, and when used in association with a few fronds of Nephrolepsis Piersoni they are seen to excellent advantage.

March is the best time to begin their cultivation, for at that period the pseudo bulbs commence new growth, states a grower in the Gardeners' Magazine. Several bulbs may be placed in a fair-sized pan, or they can be grown separately in 32-sized pots. Either method gives good results, and it is simply a matter of the kind of specimens required when in bloom. Those in pans form striking objects for use in an uncut state. The pots, or pans, must be perfectly clean, and well crocked. Various composts are recommended for the successful cultivation of calanthes, and no doubt all give good results. I have found a mixture consisting of equal parts of good fibrous loam and dried cow manure suits them admirably. This should be carefully pulled to pieces by hand, and have a little crushed charcoal and silver sand mixed with it. In this calanthes thrive and produce strong pseudo-bulbs, and stout handsome flower spikes.

In potting make the bulbs quite firm, and leave a space of about half an inch at the top of the pots. During the early stages of growth moisture at the root must be given with care, as a saturated rooting medium will often result in the dreaded leaf spot disease. Spray them overhead twice daily when fine, also damp the vacant spaces of the house between times, shade lightly from bright sunshine, and maintain a minimum temperature of 70 degrees until September, when five degrees less will be more suitable. When the pots are full of roots liquid manure and soot water will be beneficial, and these may be mixed or given at alternate waterings. This I find is more helpful than applying a top-dressing of a prepared compost.

Should any scale or other insect pests put in an appearance they should be destroyed by the application of some approved insectide. During the autumn gradually expose the plants to more sun by removing the shading early in the afternoon. From then onward give water more sparingly, but continue to feed while the flower spikes are developing. Do not withhold water entirely, however, until about January, when it will be necessary to give the bulbs a rest.

Calanthes are the most attractive when the flower spikes are in contrast with their own foliage, and when the leaves can be kept fresh, while they are

John A. Evans.
One of the S. A. F. Directors Appointed by President Vincent.

in flower, it will be an advantage; if water is not withheld too soon it is possible to keep the leaves in a fresh state for some considerable time. Rather than retain dingy foliage, however, cut off leaves that are not in a fresh state, and fill in the base with adiantums, associate small palms as foliage with the flowers. When they are in bloom a temperature of about 60 degrees is the most suitable, and the atmosphere must be kept fairly dry, or the flowers will quickly damp. There are several meritorious varieties, but C. Veitchi, a beautiful rich pink, with an almost white throat, is probably the most charming and effective for general purposes. C. Bella, C. vestita rubro-oculata, and C. vestita lutea are all attractive, and worthy of cultivation.

PORTLAND, ORE.—Every flowering plant and most of the decorative stock that we had for the holiday sales was sold, writes Clarke Bros. In cut flowers the supply was very good, we believe fully equal to the demand, and the prices were somewhat lower in some instances. Chrysanthemums were the "money bringers" and there were many fine blooms on the market, but there was no oversupply of bulbous flowers. The amount of business was about the same as was done in the year previous.

THE CARNATION.

Preparing Benches for Propagating.

In preparing for cuttings first clean the bench thoroughly with a hose, and when dry, give it a good coat of whitewash, not merely a sprinkling but a good washing that will soak into all the corners and cracks. Then prepare for good drainage. There are a great many ways by which this can be done and we have tried several. Right here we wish to mention a method that is largely used but does not prove satisfactory, namely by nailing strips of wood over the cracks of the benches. The moisture will in time swell the strips and thus make a practically water-tight bench. The result then is that the sand becomes soggy and often a batch of damped-off cuttings. Now, in preparing a bench that will give good satisfaction, do it in this manner: After having cleaned and whitewashed the bench, take common bricks and lay them over the cracks. If the bench is made of six-inch boards the bricks when in place will leave furrows about four inches wide. Fill these furrows up with coarse sand or cinders to a level with the bricks. On top of this, put the propagating sand, which should be sharp and clean, whether you use sand from a bank or lake sand. If the bench is five inches high, level off the sand even with the top board, and when ready to insert the cuttings, give it a good soaking and pound it down as hard and smooth as possible. On a wide bench stretch a string down the center the length of the bench, and work on one side, as it is much easier than trying to reach across the entire bench. Put the cuttings one-half inch apart with the rows two inches apart.

The best cuttings are those taken from the flowering stem. They are not as large as cuttings taken from lower breaks but they are easier to root and when potted will make a much better plant. These cuttings (from the flowering stem) will need very little trimming. Smoothing the heel with a sharp knife is all that is necessary. After this is done, place the cuttings in about half an inch of water for about two hours or more so they will take up all the water they can before putting them in the cutting bench. Cuttings thus treated will not wilt and will root much quicker than cuttings taken right from the plant and put in the bench without standing in water. We differ with a great many regarding the temperature in the propagating house. Instead of having the temperature 50° in the house and 60° in the sand, as most growers do. We prefer a temperature of 40° in the house and 55° in the sand. Do not shade the cuttings at this temperature during the month of December, January and February, as it is not necessary or advisable. In warm and shaded houses, the cuttings are more liable to damp off during the winter months and the cutting is sure to be soft. In a cool house, all the sun they get at this time of year will not do any harm and it is surprising to see how small is the tendency of the cuttings to wilt, and when rooted, a plant is secured that is stocky, instead of one that is of a soft and lanky growth.

P. W. PETERSON.

CATTLEYA TRIANÆ VAR. G. C. ROEBLING.

Grown by Charles Bond, Naperville, Ill.

Novelties of 1911.

We can now form some idea of the qualities of the 1911 novelties, yet we must not be too severe in our judgment, but give them further trial if they show any inclination to respond to our soil and treatment. Many times the cuttings of a novelty are received late or are not up to our own selected stock and consequently suffer in comparison with our own standard varieties the first season. Take as an instance the variety Pink Delight, which was condemned by a majority of the western growers the first season after its introduction as not up to the present-day standard, but our eastern friends found out its requirements and mastered its peculiarities, and this season it is grown in such large numbers both east and west as to be classed among the leading standards. The same applies to the variety, Mrs. C. W. Ward, last season with us. We cannot say that we had fair success with it and many other growers' stock we saw growing were the same way, but by careful selection of the cuttings and the growing of the plants under our own method, Mrs. Ward is proving one of the very best varieties of its color that we have ever grown, in fact, it has won a place at the head of its class, of the 1911 varieties as we find them.

The first place on the list we must give to Gloriosa. Our stock of this variety was obtained from the cuttings rooted March 15 and arrived the latter part of that month, so naturally the plants are not up to some of the other varieties in size, but they have made good growth and are now producing a steady cut of fancy blooms of an even shade of true pink, which are eagerly sought after by the buyer every day. The color, form of flower, calyx and stem are all good and with us it is a much better grower than Pink Delight and is producing more flowers to the plant. The only drawback to it that we find is that it is shy on making cuttings, every growth running up to a blooming shoot.

White Wonder is another variety that is making good as regards quality of flower and freedom. It is considerably freer in bloom than White Perfection, but so far it has been a little weak in stem, which it must overcome to beat out White Enchantress as the best all-round commercial white carnation.

Washington, the deep cerise pink sport of Enchantress, is proving all that was claimed for it and should continue to gain in popularity, it being one of the Enchantress family which nearly all can grow successfully.

Bonfire is, as its name implies, a scarlet carnation full of fire. It certainly is one of the finest colors among the reds; the form of the bloom and the calyx are good, so is the stem, the weakest thing about the variety being the growth of the plant. It appears to be shy on making a good plant and takes a good deal after Victory in this respect.

White House is a very large white bloom, but with us it does not come up to White Enchantress, and it will have to hustle to hold a place.

Princess Charming is a fine flower when well done and the color is held even, but our estimation of this variety is that it must be classed as strictly fancy and it has a hard row to hoe in competition with the present list of light pink varieties.

Pocahontas is a very fine deep crimson flower as we have seen it staged, but not having grown any we cannot speak about it as to its plant growth. There are a few others sent out in 1911 that we have not had the opportunity to grow or see growing, so cannot speak of them.

The general routine of the work in the carnation houses at the present time is to follow up everything to encourage a steady growth. If the plants have been subjected to a higher temperature to increase the cut for the holidays, then they must be gradually brought back to the normal temperature conditions again, but extreme jumps from one degree of temperature to another must be avoided or a big crop of bursted calyces will be the result. This is also a very critical time as regards the watering, and the soil must be kept at an even degree of moisture, leaning a little to the wet side rather than the dry, for the plants to continue in a satisfactory condition; but extremes either way, wet or dry, must be avoided. Keep a sharp lookout for aphis. They will be found very persistent in getting down in the new growths if regular fumigations are not followed up.

C. W. JOHNSON.

NEW YORK.—The Smart Set Floral Co., 2297 Broadway, assigned for the benefit of its creditors to Edwin B. Koenig.

THE ROSE.

Grafting.

Everything should be in readiness by January 15 for grafting. If the Manetti stocks have not arrived or been procured they should be ordered at once. Stocks seem to be rather late arriving this season, and it is not always an easy matter to procure A No. 1 stock when ordering them off hand. And I should suggest here, that in order to be on the safe side it is important to place orders for stocks during the summer months. Always order about 25 per cent more than is actually required. This allows for a selection of prime stocks, providing, of course, the stocks run fairly regular and arrive in good condition. This plan will, as a rule, get the stocks to the grower at an earlier date.

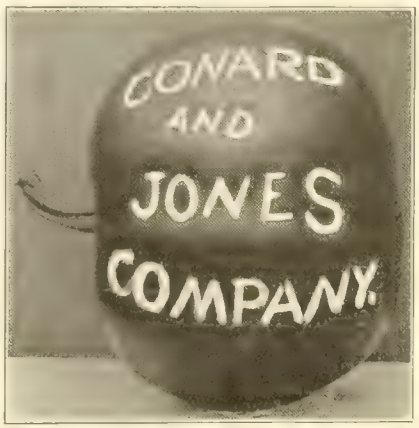
However, on the arrival of the stocks, open them up in a cool place and keep them at a temperature of about 45 degrees, and give them a good soaking. After they have laid over night they should be potted off as rapidly as possible, using 2½-inch pots and a good rose compost, one part well rotted cow manure and four parts soil. The soil should be fairly moist, but not sticky, and should be free from frost. If dry soil is used it will be a difficult matter to keep well rooted stocks from raising in the pots. New pots should be used if possible, but if old they should be carefully washed to avoid fungus in the close temperature of the grafting case. The new pots should be soaked and allowed to drain off before potting. Now and then it will be found necessary to trim off a few of the roots to get them into the pots, but otherwise very little root pruning should be done.

Place the potted stocks in a cool place, away from sunlight; very often they can be placed under a carnation table. The temperature should be about 48 degrees to 50 degrees. Sprinkle the soil under the tables with air slaked lime and cover with a good layer of ashes, or there may be some trouble experienced with earth worms. In about two weeks or a little longer, by knocking out a plant here and there and finding root action starting, showing short white feeders, the stocks have then reached the stage where they may be handled. Never let the soil in the pots become dry. They should be kept a little on the wet side and the tops sprayed frequently to prevent wilting. If a great amount of stocks are to be handled they can be heeled in cold frames free from frost and potted off as needed. Care should be taken to have the temperature cool enough to have the tops remain dormant until root action takes place, so as to get the full flow of sap as soon as they are worked and placed in the heat.

In reference to the grafting cases, we have on several occasions described the construction in these columns, so the arrangement of the case must be more or less familiar with the growers now. The main points must be a sufficient amount of bottom heat (enclosed) to bring the temperature up to 80 degrees in the coldest weather, and a valve arrangement to control the heat. The case should also be placed next to a partition where it can get plenty of overhead light but no sunshine without having to shade the sash. When constructing the case be sure to arrange it so as to be easy to get at in transferring the plants, etc., and stay it strongly at each sash joint to prevent warping.

Small lightweight sash constructed especially for the grafting case will give better results by far than a makeshift affair. At the same time as a substitute to save time a case can be made with stationary sash bars placed to take 16x24 glass, the 24-inch way butted, with a tight joint at the top, and bottom edges to keep the case tight. This style of case is not convenient, but it offers the best way to get a good strike at short notice. The roof of the case should have a good slope, 24 inches high at the back and 12 to 14 inches at the front on a case three feet six inches wide is about right.

Whitewash the case inside thoroughly with hot lime, to which should be added sulphur when slacking. When quite dry stop all the cracks with moss



A Novel Advertisement.

and place a layer of moss an inch thick over the bottom; then cover this with an inch layer of screened coal ashes, packed firmly, and saturate with hot water. Test the case for temperature for several days before placing any grafts in it. Remember the case must contain a great amount of moist heat in order to keep the scions from wilting until they are well united. So be sure to have sufficient bottom covering and to soak the ashes every day ahead of the setting up. There should be no way possible for the bottom heat to escape into the case or all other precautions will be so much wasted effort.

Now start operations by selecting the stocks that are started enough as described; have a couple of roomy jars of fresh water handy; also two good knives very sharp: one for the scions and one for the Manetti stock; two shallow vessels filled with fresh water to place the scions in after shaping them, and some strands of raffia cut in 12-inch lengths divided into handy sizes and moistened. We are now ready for the scions. They should be taken from flower stems left when cutting the buds, as we always leave an extra eye for this purpose, unless when using the whole stem, it is better in this instance to snap out the buds as they show a fair amount of color several days before they are to be used so as to firm the wood and plumb the eyes. Do not attempt to use wood covered with spider or mildew—the foliage must be absolutely clean. Do not use an eye that has started into growth. Make a slanting cut about half an inch in length carefully and a corresponding cut on the Manetti stock as close to the pot as can be handily tied. Tie the scion to the stock firmly and have the tie extend beyond the splice at top and bottom and place each flat full into the case as soon as filled. Never let the scions become the least wilted; spray each lot of plants with hand sprinkler or bulb when placing them and close the sash, quickly. The best graft is a perfect splice where the bark of scion and stock match perfectly, but this is not essential if the bark on one side matches perfectly. Very small scions can be grafted at one side of the stock. In doing this cut the scion the same, but cut the Manetti square across and remove a slice at one side to fit the scion.

The case should not require any attention for six or eight days if it has been properly prepared. Of course, if the foliage should become dry, the plants will have to be sprayed over, losing no time in doing so. In about ten to fourteen days, according to conditions, a label can be inserted, the flat way, under the sash and by this time the eyes will have started some. At the least show of wilting close immediately, spraying lightly before doing so. A good plan is to wait until the callous joint begins to ripen or turn dark before doing any airing and a good time to allow the case air is during the night, instructing the night man carefully in reference to temperature, etc. Under ordinary conditions, with proper handling, the grafts can be removed from the case by allowing or increasing the air gradually in about three and one-half to four weeks.

Some of the principal causes of failure are as follows: Case too dry, soil too dry in pots, bruised scions from careless handling, leaky case either at the top or bottom, airing case too soon, poor selection of wood for scions, stocks dry with no root action, overheated case and fungus caused from dirty pots or a carelessly prepared case. If fungus starts, which is easily noted by the foliage turning black and falling, it is best to spray the plants with lime water, after cleaning off the affected foliage. If the stocks should throw up strong suckers from the soil these should be removed with a knife before they get too much of a start. We have always found grafted plants to be far superior to own-root stocks with the exception of American Beauty or those varieties that show a remarkable tendency to break profusely from the bottom when grown on own roots; also where the soil is comparatively of a sandy nature, under the latter conditions the strong feeding Manetti seems especially well suited.

E.

ALAMEDA, CALIF.—A. Gyfelbrecht, one of the partners of the Alameda Floral Co., was seriously injured by a train of the Southern Pacific Railroad, December 24, the horse which he was driving being killed and the wagon smashed. He was removed to the Oakland hospital where it was found he was suffering from head and internal injuries.

Chrysanthemum Seger's White.

The chrysanthemum Seger's White which we illustrate is a sport of that well-known and popular anemone Garza, being larger and more beautiful than that variety. It is one of the best varieties to grow for cut flowers, being adapted to all kinds of floral work. It originated with Henry Seger, 1512 West Twenty-second street, in Washington Heights, Chicago, and was a great favorite with the retail trade last season.

CHRYSANTHEMUM SEGER'S WHITE.

A Novel Advertisement.

The accompanying illustration is of a pumpkin grown by Harvey M. Cook of Avondale, Pa., across whose brilliant fat yellow side is emblazoned the words, "Conard & Jones Co., West Grove, Pa.," in recognition of their world-wide fame as rose and flower specialists and their noted hybridizer, Antoine Wintzer, and was displayed at West Grove where it attracted much interest. This novel plan opens a valuable way for enterprising seedsmen to advertise their products at county and state fairs.

Floriculture in the Far North.

The southern border of Canada is, to the majority of people, considered about the northern limit for horticultural and floricultural pursuits, and north of that the "Land of Snow." But about six years ago a territory was opened through an almost unknown country and called New Ontario, and here are now produced some of the finest cereals and vegetables grown in the Dominion. In this new country, D. Kerrigan has built a greenhouse at Englehart, located some 400 miles north of Toronto, and an exhibition of the chrysanthemums grown in this house was recently made in Dunlop's show window at Toronto, which attracted considerable attention, and Manager Geraghty of this store is quoted in the press as saying that they were finer than anything produced in Toronto at the same time of the year, the flowers seeming to reach maturity much earlier than they do farther south.

Mr. Kerrigan has been very successful in the cultivation of flowers in the far northern land, and this year has made a specialty of chrysanthemums and has included in the varieties grown many of the latest novelties. The blooms are of exceptionally fine grade, and as the houses are built beside the track of the Temiskaming and Northern Ontario railway the beautiful flowers can be seen by patrons of the road and are greatly admired, making a bright spot of beauty in this northern land. In addition to the chrysanthemums Mr. Kerrigan also grows roses and carnations, and American Beauty roses are produced of very fine quality. A large quantity of bedding stock is grown for the beautifying of the stations of the railroad from North Bay to Cochrane, which work is under the supervision of this florist.

The Ontario Department of Agriculture has fitted up an exhibition car, which it has sent through the provinces, containing samples of the products of this new section, which has created great interest and attracted the attention of many settlers to the possibilities of New Ontario.

CHRYSANTHEMUMS GROWN BY D. KERRIGAN, ENGLEHART, ONT., CAN.

OBITUARY.

Michael Murphy.

Michael Murphy, one of the leading gardeners of Newport, R. I., died January 1, aged 73 years. He suffered a stroke of apoplexy Friday afternoon, December 29, and never recovered consciousness. He had been a resident of Newport for several years, having had charge of many noted places. He was head gardener for John Knower for 25 years, on the Daniel Parrish estate, now the residence of Col. Astor, the Theodore Phinney estate and for 14 years with Harry Payne Whitney. Some of the most beautiful table decorations for dinners and luncheons were the results of Mr. Murphy's efforts. He is survived by a wife and six children.

Edwin Allen.

Edwin Allen, head of the firm of Edwin Allen & Son, New Brunswick, N. J., and a pioneer in the nursery business, died at his home December 23 in his ninety-third year, having been ailing for two years. Mr. Allen was born in Norfolk, Conn., and entered the nursery business in New Brunswick in 1845, later purchasing a tract of 100 acres on George's Road, where he conducted an extensive business. He is survived by four children, Edwin, Jr. (who will continue the business), William, Nathan and Calista.

Frank Wedring.

Frank Wedring, a prominent florist of New Castle, Ind., died from a stroke of apoplexy December 21, aged 28 years. He is survived by his wife. The funeral services were conducted December 23 from St. Ann's church.

MAMARONECK, N. Y.—The business of the late Thornwald Jensen will be conducted by his widow and son, Mrs. Sophie Jensen and Christian Jensen.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1912

Subscription, United States and Mexico, $1.00 a year, Canada $2.00; Europe and Countries in Postal Union, $2.50 Subscriptions accepted only from those in the trade.

S. J. REUTER & SON, INC., have deferred the distribution of Double White Killarney (Reuter strain).

DID Chicago beat the florist club record of the United States in her attendance of 175 members election night?

P. FARTRAVELED HEMER is now with the Poehlmann Bros. Co. at Morton Grove, Ill., and seems to have changed but little in all the years we have known him. Perhaps the solution of it is that he tarries not with worries but as the Nomad of Noplace finds new pastures Everywhere. We always say Goodbye to Peter when parting with him, not Farewell, because past experience teaches that we shall meet again Somewhere.

Correction.

The A. Dietsch Co. of Chicago informs us that the material in all but one of the houses of Nic Zweifel, North Milwaukee, Wis., which were described in our issue of January 6, was furnished by them and not by the manufacturer named in the article.

PRESIDENT VINCENT has appointed W. F. Gude representative of the Society of American Florists in Washington, D. C.

Calendars Received.

We have received useful and attractive calendars for 1912 from the following: Yokohoma Nursery Co., New York; Benjamin Hammond, Fishkill-on-Hudson, N. Y.; Geo. E. Dickinson, New York; Maltus & Ware, New York; Green Floral Co., Dallas, Texas; Amos F. Balfoort, Albany, N. Y.; National Electrotype Co., Chicago; C. Herbert Coy Seed Co., Valley, Neb.; Arthur I. Vescelius, Paterson, N. J.; Watkins & Simpson, London, Eng.; Imperial Seed & Plant Co., Grange, Baltimore, Md.; La Grange Floral & Seed Co., La Grange, Ill.

Early School Gardening.

The earliest attempt at school gardening in America was that made by W. W. Tracy in 1880, with the co-operation of D. M. Ferry & Co., Detroit, and the Michigan State Horticultural Society. D. M. Ferry & Co. donated the seeds and literature for this work, which was continued in Michigan two years. The distribution was then discontinued because of the protests of D. M. Ferry & Co.'s box trade customers. Mr. Tracy believes, however, that this gratuitous distribution of seeds to school children had considerable value from a purely business standpoint, as the seeds, in many cases, were taken to the homes of the children and planted in the home grounds, the summer school yards in those days being quite unfit for gardening.

American Rose Society.

The thirteenth annual meeting of the American Rose Society will be held in the Wayne Gardens, Detroit, Mich., Thursday, January 11, and will open at 2:30 o'clock, a meeting of the society being held in conjunctin with the American Carnation Society and the Detroit Florists' Club the evening previous, January 10, at 7:30 p. m. After an address by President Adolph Farenwald the routine business of the society will be transacted and a paper read by Otto Koenig of St. Louis, Mo., on "Roses in the Mississippi Valley." On Thursday evening, January 12, at 7:45 o'clock the second session will be opened and Irwin Bertermann of Indianapolis, Ind., will read a paper entitled, "Roses in the Middle West"; and an address delivered by Robert Pyle of West Grove, Pa., on "The Rose as Noticed in Europe." William Dilger will be manager of the exhibition and the judges will be Emil Buettner, Park Ridge, Ill.; Eber Holmes, Montrose, Mass., and Leo Niessen, Philadelphia, Pa.

Potash in the United States.

At the last session of congress an appropriation of $12,500 was made to the Department of Agriculture for the purpose of investigating the fertilizer resources of this country. At the same time $20,000 was given to the geological survey who are drilling at Fallon, Nevada. The report of Secretary Wilson has just been transmitted to congress by the President in a special message.

Both appropriations were the outcome of a desire on the part of congress at the last session, to become, if possible, independent of foreign sources of supply. The United States possesses the largest phosphate fields in the world and not only supplies all that is required for home consumption but also exports large quantities to foreign countries. All of the potash, however, required for our fertilizers is imported from Germany, the annual importation being about $15,000,000. Germany has shown a disposition to limit the amount sent to this country, and as the use of fertilizers is increasing rapidly, the need for a home supply becomes every year more apparent.

The present report shows that the Department of Agriculture has been successful in its search and this country should shortly not only be able to supply its own needs of potash salts, but even possibly export to foreign markets. A few difficulties of an engineering character are still to be overcome, but they are not of a serious nature. A new industry will be established, and if the by-products are wisely used many millions per annum should be added to the wealth of this country.

The department experts have covered a wide range in their investigation. Some of the desert basins were examined; brines and the mother liquors from salt wells were tested and experiments have been carried on with the object of extracting potash from silicate rocks and minerals, such as alunite, which contain it. The work is still under way and potash in limited amounts undoubtedly will be derived from some of these sources. Up to the present none of them give promise of satisfying the country's need.

But in the giant kelps of the Pacific coast a satisfactory source of potash has been found. The kelp groves along less than one-fourth of the coast line have been mapped, and yet these should yield from two to three times as much potash as the present importations. These sea weeds are able to extract, by selective absorption, the potash salts from the sea water, and on drying these salts are very largely exuded on the surface. The dried plants contain from 25 to 35 per cent of their weight of potassium chloride and the latter can very readily be extracted. The kelps also contain iodine, and many other by-products can be obtained from them. It is possible that these by-products will more than pay the manufacturing expenses, leaving the potassium chloride free from cost. The Japanese have already shown considerable ingenuity in working up these by-products. Not only do they use some of the waste material for cattle food but the Japanese themselves use it as a staple article of diet. Glue, shellac, paper and other useful products can also be made.

Some of the Pacific groves are five miles long and two miles wide, and the growth in these groves is exceedingly dense. The two principal species that would be available are Nereocystis luet keana in the north and Macrocystis pyrifera in the south. Both these plants reach a length of 100 feet or more and grow in strong tideways or where they are exposed to the full force of the open sea. All of the groves are within the three mile limit and should be easily harvested. The heaviest groves are south of Point Sur, but large ones extend as far north as Seattle. If properly harvested and protected these groves will yield an annual harvest indefinitely; it is even possible that in the case of Macrocystis two such harvests may be obtained. On a conservative basis upwards of a million tons of potassium chloride, worth nearly $40,000,000, should be obtained each year. No estimate can be given at the present time of the value of the by-products.

Meetings Next Week.

Boston, Mass., January 16.—Gardeners' and Florists' Club of Boston, Horticultural Hall.

Detroit, Mich., January 15, 8 p. m.—Detroit Florists' Club, 112 Farmer street.

Grand Rapids, Mich., January 15.—Grand Rapids Florists' and Gardeners' Club, office of member.

Lake Geneva, Wis., January 20, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association, News building.

Montreal, Que., January 15, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guardians building, 211 Sherbrook street, west.

New Orleans, La., January 14, 2 p. m.—Gardeners' Mutual Protective Association, 118 Exchange alley.

New Orleans, La., January 18, 8 p. m.—New Orleans Horticultural Society, Kolb's hall, 127 St. Charles avenue.

Newport, R. I., January 17.—Newport Horticultural Society.

Pasadena, Calif., January 19, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Providence, R. I., January 15, 8 p. m.—Florists' and Gardeners' Club of Rhode Island, 96 Westminster street.

Salt Lake City, Utah, January 16.—Salt Lake Florists' Club, Huddart Floral Co., 64 Main street.

Scranton, Pa., January 19, 7:30 p. m.—Scranton Florists' Club, Guernsey building.

Seattle, Wash., January 16.—Seattle Florists' Association, Chamber of Commerce, Second avenue and Columbia street.

St. Paul, Minn., January 16, 8 p. m.—Minnesota State Florists' Association, 510 Snelling avenue, north.

Toronto, Ont., January 16, 8 p. m.—Toronto Gardeners' and Florists' Association, St. George's hall, Elm street.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office enclose 10 cents extra to cover postage, etc.

Situation Wanted—Position as designer, decorator or manager for store; good references.
H. G. E., care Schulz,
550 Fourth Ave., Louisville, Ky.

Situation Wanted—As grower in up-to-date retail establishment, practical experience, married; good references. Address
J. H., care of H. J. Krueger, Meadville, Pa.

Situation Wanted—Experienced in carnations, chrysanthemums and general greenhouse work; I will accept reasonable wages; good references; total abstainer. Address
Key 549, care American Florist.

Situation Wanted—German gardener and florist married, age 34, life experience, wishes position as foreman on first-class private or commercial place,
J. BAUER,
Chichester, N. Y., Ulster Co.

Situation Wanted—By German, single, middle age, experience in all greenhouse work, especially palms, ferns, bedding plants and forcing stock, Chicago or vincinty prefered.
Key 553, care American Florist.

Situation Wanted—As grower or propagator of cut flowers and general greenhouse plants; reasonable wages accepted if in or near Aurora, Ill.; highly recommended. Address
Key 550, care American Florist.

Situation Wanted—As working foreman or grower by all around florist, propagator and grower of high class cut flowers, potted and bulbous stock of all kinds; first-class designer; capable of taking full charge of an up-to-date place and accomplishing the necessary results; American, single, age 30; absolutely honest and reliable total abstainer, highly recommended; open for immediate engagement; please state wages and particulars. Address R. KLAG,
Frsderic Hotel, Minneapolis, Minn.

Help Wanted—April 1, A good general gardener and worker. Address
WARREN LOTHROP, Hingham, Mass.

Help Wanted—A young lady florist to help in store and office; give reference. Address
Key 546, care American Florist.

Help Wanted—A good rose grower who knows something about Beauties. State wages wanted. Address Key 544, care American Florist.

Help Wanted—A seedsmen to put up orders and wait on customers, by an eastern house; state references. WM. ELLIOTT & SONS,
42 Vesey St., New York.

Help Wanted—A first-class retail florist, experienced in decorating and selling, good address necessary, state age, experience in detail, salary expected and give references in first letter.
Key 547, care American Florist.

Help Wanted—An all-around grower in carnations, roses, sweet peas and plants; must be first-class or not wanted; will pay good wages; please state last place worked and wages wanted. Address Key 551, care American Florist.

For Sale—Five greenhouses; a bargain; easy terms; profit $6,000 per year
T. A. GETTYS, Amarillo, Texas.

For Sale—Excellent florist's place in best shopping district in Pittsburg. Address
Key 545, care American Florist.

For Sale—Great Falls Floral Co.'s greenhouses and stock. Splendid opening for a hustler with small capital. B. KAPPEL, Great Falls, Montana.

For Sale—Two good paying retail stores in the Chicago loop. For further particulars address
INFORMATION,
Key 552, care American Florist.

For Sale or Rent—Retail place in Indiana. Easy terms to buyer, dont write unless you have some cash and mean business. Address
Key 548, care American Florist.

For Sale—Will sacrifice on account of other business a greenhouse doing about $2000 a year business at the largest cemetery in Chicago; call or write
10 N. Western Ave., Chicago.

For Sale or Lease—Florist store and greenhouse with two-story dwelling house, 125x50 ft.; established 40 years by present owner; wishing to retire; near Polish Catholic also another large Catholic church.
Key 535, Care American Florist.

For Sale—An attractive florist, seed and plant business for sale in the beautiful university city of Berkeley, close to San Francisco; no opposition; fine location; large modern store; new, clean stock. Besides the florist businss, quite a nice trade is done in jardinieres, vases and fancy goods, raffia, seeds, baskets, etc. Plenty of room to reside in back. Address for price and particulars THE KENSINGTON FLORIST,
3310 Adeline St., South Berkeley, Calif.

Wanted to Rent—A small range of greenhouses in or near Chicago; for further particulars address Key 542, care American Florist.

Situation Wanted.

Good rose grower capable of taking charge. State salary when writing. Chicago preferred. For further particulars address

Key 541, care American Florist.

We invite the trade to attend a

MASQUERADE

given by the

GARDENERS' and FLORISTS' Union, No. 10615

at Club Room A, North Side Turner Hall

820 N. Clark St. Saturday eve., Jan. 13, 1912

Tickets 25c a person. Prizes announced in hall.

Sacrifice Sale.

Seven and one-half acres at Hinsdale, Ill (near Chicago). One acre under glass; three acres garden; six-room cottage, and barn; village water and gas. Possession March 1st, 1912.

Estate of James D. Beckett,
1527 W. Madison St., CHICAGO.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Cincinnati.

MARKET VERY QUIET.

A quietness is apparent in the wholesale houses that the time of the year does not warrant. The general tone of the market at the end of last week was as a whole anything but gratifying. The demand was unable to clean up the entire supply. As a result Saturday at the close showed some still on hand. Monday, the usual day for replenishing by the retailers, and also small receipts of flowers on the part of the wholesalers, did not show much if any improvement. The shipping business in flowers since the beginning of the year has been lighter than usual. The severe cold weather seems to be the cause, for it is only since the very cold spell came that the market has become quiet. The supply of all varieties of roses and carnations is easily sufficient for requests. An ordinary good market would easily clean up the receipts, but it does not seem to be forthcoming. Few roses go absolutely to waste but some must of necessity be sold at lower prices. The prices on carnations have dropped a little. The market for bulbous stock continues the same as for several weeks. Receipts in Paper White narcissus have been decreasing and the call has been getting smaller about as fast as the decrease in supply. Lilies are selling as fast as they arrive. The same is true of callas. Lily of the valley seems to be in an over-supply. Good single violets move nicely while others sell only after a fashion.

NOTES.

Albert Sunderbruch and Wm. Murphy have decided to join the party that will go to Detroit this week. The latter will show some blooms of Delhi.

Mrs. Henry Behrens of Middletown, Ohio, died Saturday morning.

Michael Fink.

Sergeant-at-Arms, Chicago Florists' Club.

Milwaukee.

A SHORTER SUPPLY.

The severe cold weather has caused the stock to shorten up considerably and the supply is just about equal to the demand. American Beauty, Killarney and White Killarney roses and carnations are arriving in exceptionally fine condition and are fully up to the high standard of the famous Cream City quality.

NOTES.

Holton & Hunkel Co. is cutting a fine grade of roses and carnations with American Beauties showing up exceptionally well. Business has been very good considering the cold weather and the proprietors have no cause to complain.

H. V. Hunkel, C. C. Pollworth, Nic Zweifel, Gustav Mueller and J. E. Matthewson, Sheboygan, are attending the convention at Detroit this week.

The C. C. Pollworth Co. is filling a large number of orders for rooted carnation cuttings, seasonable cut flowers and paper boxes.

A. A. McDonald, with J. M. Fox & Son, has returned from a most enjoyable visit with relatives at Logansport, Ind.

Gust Rusch & Co. are supplying their customers with a good grade of everything that is seasonable in cut flowers.

Washington.

STOCK BRINGING GOOD PRICES.

New Year's day business was very good and all the retail stores were busy. There was an excellent demand for American Beauty roses at good prices. The long-continued spell of dark weather has given the Killarney roses a washed-out appearance, but they sell. Everything that is passably good is moving well. Carnations are wholesaling at six and eight cents and are scarce at that. American Beauties sell fast at $50 per 100 wholesale.

NOTES.

Geo. C. Shaffer had a great run of Christmas and New Year's trade and considers it the best season since he first engaged in business.

Z. D. Blackistone said on New Year's day, "We have been very busy," and the visible evidence was at hand.

Leapley & Meyer had an excellent holiday business and are pushing to the front among the retailers.

Cleveland.

SUPPLY MUCH SHORTER.

We are having a real old-fashioned winter at last. The mercury is 2° below, which is the coldest weather for five years. The cold and dark weather is shortening up the stock very considerable, which makes it hard for wholesalers to fill orders in full. Short-stemmed roses for funeral work are far short of the demand, the better grades, for which there is not quite so great a demand, are more plentiful and in fine shape, Richmonds are perhaps the shortest in supply. Pink Killarney are of much better color and American Beauties are in fine shape, selling quickly. Carnations are in better supply and also in better form since Christmas. Sweet peas are short of the demand. Lilies and callas clean up daily. Proserpine tulips are being received; they are short stemmed but good stock. The last of the poinsettias for this season were cleaned up this week. Paper White narcissus, stevia and Roman hyacinths are of great assistance in funeral work. The demand for adiantum is good, as well as for other greens. Lily of the valley and orchids are selling well.

NOTES.

Not every florist can charter a special car for Christmas to help in delivery, etc., but V. A. Cowgill of Salem, O., has that distinction. The street railway company in Salem only runs one car once a month to hold its charter, as the people and the railway company are having trouble. The Saturday before Christmas he chartered a special car for an entire day to run between his store and greenhouses. He claims the advertising he got fully repaid him for the expense, as everybody in Salem rode on the car at his expense and incidentally, as the car ran only between his places of business, many a dollar came back to his till. The affair was the talk of Salem for a long time, and was the best and cheapest, also the most original advertisement ever heard of.

T. Smith, of the Smith & Fetters Co., claims the increase for the year was the largest they ever had and that their Christmas and New Year's business was the best in the history of the concern. This goes to prove that wherever the working force in any store or place of business have financial interest in the firm their combined efforts make for better business and success. C. F. B.

St. Louis.

WEATHER AFFECTS BUSINESS.

Wintry and zero weather prevailed all week and its effect is shown on transient trade everywhere but funeral work has kept up well. The west end stores were busy with corsage bouquets, many prominent balls taking place. The trains have been delayed and quite a few shipments have arrived frozen. Narcissi have been very plentiful and quoted at low prices.

NOTES.

The Engleman Botanical Club held its meeting Monday night at the Graduate Lecture Room of the Missouri Botanical Garden. Professor Irish showed the plans for the new range of plant houses to be erected at the Garden this year. G. N. Pring is secretary and treasurer of the club.

We regret to announce the death of Ella Meinhardt, wife of Fred H. Meinhardt. The funeral took place Saturday and was largely attended and the floral offerings were numerous. The sympathy of the trade is extended to the family.

C. Young & Sons Co. arranged the decorations for the Imperial Ball January 5 at St. Louis club, which were of wild smilax, American Beauty and Richmond roses. Over 1,500 American Beauty roses were used.

Grimm & Gorly had a special sale last Saturday, January 6, of baskets of natural flowers at $1.85 each. They also had a special sale on Boston ferns.

H. G. Berning furnished the American Beauty roses used by C. Young & Sons Co. for the Imperial Ball decoration.

The reappointment of F. H. Weber as vice-president of S. A. F. for Missouri has given general satisfaction.

The Florists' Union postponed their meeting till next Monday owing to the inclement weather.

D. P. Roy of Vaughan's Seed Store was here on a business trip.

David Geddis has left the employ of M. M. Ayres Floral Co.

W. F.

New Bedford, Mass.

The annual meeting of the New Bedford Horticultural Society was held January 2, and the following officers elected:

Frank C. Barrows, president.
John P. Rooney, vice-president.
Jeremiah M. Taber, clerk.
Walter A. Luce, treasurer.

Andrew J. Fish, George H. Reynolds, George H. Nye, Leonard J. Hathaway, Jr., James H. McVicker, executive committee.

The executive committee reported a deficit on the dahlia show held last season and the matter of holding an exhibition of dahlias at which admissions should be paid was discussed and the question was referred to the executive committee to report at the next meeting. After the session refreshments were served by the entertainment committee.

NEW CROP OF Easter Lilies

BASSETT & WASHBURN

Office and Store: 131 N. Wabash Ave., Chicago. Greenhouses: Hinsdale, Ill.

Chicago.

THE LONGEST COLD SPELL ON RECORD.

The city during the last week has endured the longest continued spell of zero weather in the last forty years, in fact since the establishment of the weather bureau, the thermometer standing below the zero point, registering as low as 12° below, for 74 continued hours. The sun has shone but little and then there was no warmth to it. Flowers have been shipped with great danger of being frost bitten, and large quantities of wrapping have had to be packed in and around all parcels, and even with the utmost care some have been opened showing that they were touched by the frost. It has been a hard time for the greenhouse proprietors and foremen, for the cold was accompanied by very high winds, and it was very difficult to keep the house at the required temperature. Reported freezing of greenhouses were current at the markets during the severe cold spell. The cold and inclement weather has shortened up the cut greatly, all kinds of flowers being received in greatly reduced quantities, and has also greatly interferred with the retail trade, there being scarcely any transient trade. The windows of the retail stores have been heavily coated with frost, it being so thick that one could hardly look into the store, but it made but little difference for there were few upon the streets and they did not tarry to look into windows at all. Although the stock of roses was considerable shorter than it has been, yet there were enough to meet the demands. American Beauty, of the long stemmed grade, have been received in good quantities, and a fine lot of Richmonds are also coming in. Killarney of excellent grade and White Killarney are also coming in in good supply. Mrs. Aaron Ward is finding a ready sale, being picked up as fast as received, and Melody and Perle des Jardin are both having a good call, the demand for yellow exceeding other years. Carnations, like roses, are in much shorter supply and all varieties find a ready market, the prices remaining very firm. Violets were cut very close for the holiday trade, and have not yet recovered so that the shipments are large. Lilies and callas are both to be had, but the call for these is large enough to clean them up well. Lily of the valley is in good supply and of excellent quality. Bulbous flowers are becoming more noticeable; there are plenty of Paper White narcissus and Roman hyacinths and Trumpet Majors and tulips are of much better quality and in larger quantity. Freesia of most excellent quality can now be had and is shown prominently by the retailers. Sweet peas are none too plentiful, the best stock selling very quickly after being shown. Orchids, especially the cattleya, are to be had in splendid quality, and some very nice gardenias are also seen, but they are not any too abundant. Some very fine mignonette, the heads being quite large, on good long stems, are also offered by the growers. With the excessive cold weather and the usual drop in business after the holidays, trade, with both the retailers and wholesalers, has been very quiet throughout the week.

CHANGES AT E. H. HUNT'S.

Paul M. Bryant has purchased a controlling interest in the firm of E. H. Hunt from C. M. Dickinson and Mrs. K. L. Hunt. Mr. Dickinson will withdraw from the firm, Mr. Bryant assuming the active management. The firm name and business will remain the same as heretofore and its general policy will be maintained. Mr. Bryant has been connected with the firm about a year, holding the office of secretary, and is confident that the extensive business of the "Old Reliable" can not only be well maintained but greatly extended in all departments.

NOTES.

The spring show of the Horticultural Society is scheduled for March 12-17 at the Art Institute. Copies of the premium list can be had on application to James H. Burdett, 1620 West One Hundred and Fourth Place, Chicago.

J. A. Valentine says he will bring a Denver delegation in automobiles to the August convention.

The Chicago party to the Detroit convention included the following: P. J. Foley, W. N. Rudd, M. Barker, A. T. Pyfer, George Asmus, H. E. Philpott, H. B. Howard, Peter Olsem, A. Henderson, A. F. Longren, C. W. Johnson, E. F. Kurowski, Fred Scheel, C. L. Washburn, E. B. Washburn, Andrew Benson, Emil Buettner, W. J. Keimel of this city, H. V. Hunkel, C. C. Pollworth, Nic Zweifel, Gustav Mueller, Milwaukee, and J. E. Matthewson, Sheboygan, Wis.; J. A. Valentine, Emil Glauber, N. A. Benson, W. Grimes, C. L. Gross, Denver, Colo.

A. Lange, the hustling East Madison street florist, is doing a fine business and the way the orders keep pouring in reminds one of the hurry Christmas week. Orders for two large casket covers on Monday followed by one on Tuesday and an order for 200 corsages, on the same day, for a banquet at the Congress hotel kept the proprietor and his 18 assistants busy long after the closing hours filling these and the other orders that he had on hand.

Chicago florists will during the coming months, according to the daily press, add several thousand feet of glass area to their greenhouses, and adds, in summing up the floral business of the city, that Chicago leads, not because of transportation facilities, though that is an important feature, but it is quality that counts first of all and quality is constantly on the increase in this city in floral products.

Frank Johnson and M. A. Levanger of the A. L. Randall Co., left January 7 with a fine line of samples for parts unknown. The red ruscus that the supply department is carrying is of superior quality and the many complimentary letters that this firm has received is a fitting testimonial to the high grade stock that is handled.

The Chicago Flower Growers' Association is offering a fine line of cut flowers with roses, carnations and bulbous stock showing up remarkably well. This firm, under the able management of Otto W. Frese, has built up a splendid business and now enjoy both a splendid local and shipping trade.

The Gardeners' and Florists' Union, No. 10615, is going to give a masquerade ball in club room A, North Side Turner Hall, 820 North Clark street, next Saturday evening, January 13. One and all, both short and tall, are cordially invited to come and shake their feet at this well-known hall.

John Risch says his firm, Weiland & Risch, is cutting enough gardenias to supply the demand and that a large crop is just coming on. A fancy grade of white and yellow daisies and a large quantity of exceptionally fine smilax are the leading features at this house this week.

Poehlmann Bros. Co. is showing a fancy grade of all kinds of seasonable stock from lily of the valley and sweet peas to their elegant American Beauty roses. This firm is cutting some fine orchids and John Poehlmann says that the supply is about equal to the demand.

The West Park board finishes up the year 1911 with over $500,000 in the treasury after spending more than that on improvements. The board contemplates spending more than a half million dollars next year for improvements and more small park sites.

Vaughan & Sperry are filling orders for a fine grade of roses, carnations, valley and other choice seasonable stock. A. L. Vaughan says the demand for boxwood is good and promises to continue for some time at least.

Miss M. C. Gunterberg has the sympathy of the trade in the loss of her uncle, A. M. Gunterberg, whose death occurred on Sunday, January 7. The funeral was held from St. Henry's Church and interment was at St. Boniface cemetery.

George J. L. Mohring, manager of the Edgewater and Rosehill branch of the Edward Hines Lumber Co., says his firm is now handling pecky cypress and other greenhouse lumber and is prepared to fill all orders for anything in this line.

Frank Weiss, a retired florist, aged 80 years, was stabbed four times in the right hand by Ernest Mangendorf, another florist about 25 years of age, with whom he had an argument over flowers.

Michael Fink wishes to thank his 101 friends for the liberal support that they gave him at the recent club election. Grimm and Goebel, particularly, are included in this.

The Adam Schillo Lumber Co. and the Superior Machine & Boiler Works have their useful calendars well distributed in the greenhouses throughout this section.

George Reinberg is cutting some fine Killarney and White Killarney roses. The latter is in full crop with Killarney soon to follow.

J. B. Deamud will touch another milestone January 12 and he looks "just as young as he used to be."

The annual meeting and exhibition of the Illinois State Florists' Association will be held at Joliet March 5.

VAUGHAN & SPERRY

Long Distance Phone Central 2751. **161 N. Wabash Ave., CHICAGO.**

The George Wittbold Co. is cutting some fine tulips and lilies at the Edgebrook establishment where the stock is doing nicely and is in fine condition. Otto Wittbold does not like the cold weather that we have been having this week for it interferes too much with the shipping trade. Join the "Plant Lovers' Club" is the display line in the street car advertisement of this local establishment this week. The Wittbolds certainly know how to advertise and the liberal use of printers' ink, together with careful management, had much to do with building up of the splendid trade that they now enjoy.

The E. C. Amling Co. celebrated its first birthday in their present quarters, one of the finest equipped wholesale houses in this country, this week. The head of the company which bears his name has had a very successful career and it was largely through his efforts that the firm occupies the splendid position in the floriculture field that it does today.

A. E. Hunt & Co. lost their entire stock of plants in their greenhouses at Evanston by freezing during the recent severe cold weather. This firm has given up their space temporarily on the second floor of the building now occupied by several florists, including J. A. Budlong and John Sinner, having rented their stand to the last named party.

Manager Pyfer says his firm will exhibit about 1,000 cut blooms of carnations at the convention in Detroit and that the showing will consist of Washington, Herald and other leading carnations. Both Mr. Pyfer and Superintendent Olsem are attending the convention, as is their custom when any important show takes place.

John Kruchten is realizing a neat profit from the sale of his Nelson Fisher carnations which are grown by his father and attracting much attention on the local market. Fred Klingel, who keeps Mr. Kruchten's books, was unfortunate enough to freeze one of his ears during the recent severe cold snap.

George M. Garland, the well known inventor and manufacturer of Des Plaines, has returned from a most enjoyable visit at Brownsville, Texas. The Garland Co. has just about completed the improvements and the addition to their factory and everything is now in readiness for a banner year.

Zech & Mann are mailing their customers one of the prettiest calendars we have yet seen issued by a wholesole florist. "Friends," in colors, a reproduction from the original painting by Zula Kenyon, with the firm name below, is a most creditable advertisement for this progressive concern.

Wietor Bros.' large shipments of stock include a fine grade of roses and carnations, with American Beauties looking particularly fine. The latter are just coming into crop and this will enable the firm to supply their many customers with extra choice stock for some time to come.

Peter Reinberg is booking a large number of orders for rooted carnation cuttings, and Tim Matchen says that the sales so far have been most satisfactory. Foreman Collins has done finely with his cuttings this year and this lot is one of the best that his firm has ever had.

J. F. Kidwell & Brother had a freeze-up at their Wentworth avenue establishment last Friday, January 5, when three houses of primroses, cyclamen and spring stock were destroyed. It is estimated that the loss will exceed $1,000.

C. L. Washburn takes great pleasure in showing his friends the handsome scarf pin, a symbol of good luck, which he received from F. H. Henry of New York who was visiting here this week.

E. E. Pieser and wife left January 8 for West Baden, Ind., where they will remain for a week, after which Mrs. Pieser will journey on to Philadelphia and Mr. Pieser will return here.

A. A. McDonald, with J. M. Fox & Son, Milwaukee, Wis., stopped off here on his way back from his vacation which he spent with his mother, Mrs. McDonald, at Logansport, Ind.

H. E. Philpott will leave for Winnipeg as soon as he comes back from Detroit, after which he will return here in February in time to attend the next meeting of the Florists' Club.

Kyle & Foerster have no trouble disposing of the splendid grade of carnations that the Northwestern Floral Co. is shipping to them.

Wendland & Keimel of Elmhurst are exhibiting vases of Killarney and White Killarney roses at the Detroit convention.

We are pleased to state that Mrs. Philip L. McKee has recovered sufficiently from her recent illness so as to be about.

A. A. Suder, son of Mrs. E. Suder, the well known florist of Toledo, O., and son were welcome visitors this week.

Chas. W. McKellar is receiving a fine grade of seasonable stock with orchids showing up exceptionally well.

Clifford Pruner and Fred Longren assisted the E. H. Hunt force in mailing their spring catalogue this week.

Chas. Bond of Naperville is shipping a fine grade of orchids to the A. L. Randall Co.

H. C. Wendland is hunting rabbits in the wildness near Wellington, Kansas.

Theodore Callos died January 4 at his home at 4040 Kimbark avenue after a brief illness. He was well known here, having been engaged in the florist business in this city for the past 20 years. He was part owner in the store on South Wabash avenue, doing business under the firm name of White House Florists, until he recently purchased an interest in the Central Drug Flower Shop at 1 West Washington street. The funeral was held last Sunday at his former home in Wisconsin.

Visitors: Miss Rennison, Sioux City, Ia.; Mrs. Stafford, Marquette, Mich., enroute to California; A. A. Suder and son, Toledo, O.; H. V. Hunkel, C. C. Pollworth, Gustav Mueller, Nic Zweifel, Milwaukee and J. E. Matthewson, Sheboygan, Wis.

Chicago Florists' Club.

The regular meeting of the Florists' Club was held at the Bismarck hotel January 4. There was a very large attendance, probably the largest in the history of the club, the principal business being the election of officers, which resulted as follows: P. J. Foley, president; D. A. Robertson, vice-president; A. T. Pyfer, secretary; E. F. Winterson, treasurer; H. N. Bruns, E. C. Amling and Walter Scott, trustees, and Michael Fink, sergeant-at-arms. There were contests for only two of the offices, viz., those of president and sergeant-at-arms. For president P. J. Foley received 101 and H. E. Phillpot 68 votes. For sergeant-at-arms Michael Fink received 101, George Goebel 36 and George Grimm 13 votes.

Forty-five new members were elected as follows: Wm. H. Wienhoeber, Wm. Allen, Walter Neil, Chas. Timm, Gustav Timm, Adolph Nielsen, Robert Hand, Wm. Spandikow, John Baile, Ed. Nylen, Sydney Denley, John Johnson, Jake Glauner, Harold Clark, Chas. Turp, Chas. Kroeschell, Fred Lemke, Chas. Balluff, Joseph Welsh, John Loeser, Albert W. Lehman, I. Rosnosky, Walter Hansen, Fred Ottenbacher, John M. Fischer, Geo. Economopolous, Arthur A. Weatherwax, Henry Bollnow, W. H. Waite, S. F. Willard, Jr., Olof Larson, Louis J. Bunt, E. A. Wood, Edw. Potjer, James Spence, R. H. Starbuck, Sam. S. Pearce, Perry Brouder, E. Stenquist, Philip H. Eichling, Fred Strail, Wilder S. Deamud, Edw. Vilter, Wm. Schaffer, Chas. Schaffer.

Pittsburg.

EXTREMELY COLD WEATHER.

With the exception of a few jobs the extremely cold weather has put a stop to business, the demand for violets, for instance, dropping about one-half. Flowers are, however, none too plentiful anyway, so it makes but little difference. Quite a number of shipments have come in badly frozen.

NOTES.

Randolph & McClements had the annual banquet of the Carnegie Steel Co. at the Duquesne Club. The idea followed out was an outside summer scene, with white lilac bushes and American Beauties so arranged as to give the appearanace of growing. It is reported that over 2,000 special American Beauties and a hundred bunches of white lilac were used.

The Florists' Club met January 2 at the Fort Pitt hotel and besides judging a fine exhibit placed in nomination for president the following members. J.

UNSATISFACTORY CONDITIONS.

The condition of the wholesale cut flower market is very unsatisfactory. Stock of all kinds has increased in supply and prices have dropped considerably. Carnations are very plentiful of first class quality but the prices obtained are gradually going lower. It seems almost impossible to move the poorer grades, now that the finer blooms are so plentiful. Shipments of roses, too, are much heavier than usual, and the quality is remarkably good. American Beauties are just about sufficient in quantity to satisfy the demand at good prices, but all other varieties are moving slowly. Orchids have taken a big tumble as far as prices go and are selling for one-half of what they did at holiday time. Gardenias, too, of the very best quality are coming in by the thousands and are being disposed of at almost unheard of prices for this time of the year, and now that the very cold weather is here and the street boys can not get about, these flowers are accumulating everywhere. The same conditions exist also as far as violets are concerned and hundreds of thousands are being carried over and if the weather does not soon grow milder many of these will have to be thrown away. Lilies, such as longiflorum and rubrum, are very plentiful but are clearing out at about previous quotations. Lily of the valley, Paper White narcissus, hyacinths and Trumpet Major narcissus are not so plentiful as they have been and prices are a little better. There is sufficient supply of lilac and freesias in the market to fill the demand. Sweet peas are everywhere of good quality and shipments of these are getting heavier each day. Asparagus in bunches is selling well but the same cannot be said of smilax, Adiantum Croweanum and other greens. Chrysanthemums in bunches are still seen in many places but there is very little call for them.

NOTES.

President Joseph A. Manda entertained the officers-elect, the retiring officers and the chairmen of the different committees at Cavanagh's restaurant on Saturday, January 6, and if President Manda receives the support that is promised him by his cabinet there is no question but this will be a banner year in the history of the New York Florists' Club.

Charles Millang is managing the beefsteak dinner to be tendered A. Moltz January 20, and is highly elated with the way tickets are being bought. This dinner is now known as the "Cauldy Wauldy" dinner and three hundred are expected to be present. A fine vaudeville programme is being arranged.

Herman Berkowitz, the popular salesman of Young & Nugent, will be married to Miss Beatrice Wagner at Henington Hall, 214 Second avenue, on January 20. The couple will then take a wedding trip to Atlantic City.

Henry Reichers, who has been in the Presbyterian Hospital suffering with typhoid fever, left there on January 5 very much improved and has gone to East View, Westchester county, for a couple of months to recuperate.

There was a meeting of the officers of the American Rose Society at Traendly & Schenck's Thursday afternoon, January 4, attended by A. Farenwald, Benjamin Hammond, H. O. May and Robert Simpson.

Miss Sadie Othile, sister of Meyer Othile of the firm of Badgley, Riedel & Meyer, will be married to Henry Orange on Tuesday, January 9, and will sail for Europe on the S. S. Lusitania January 10.

George Bradshaw is now with Wm. A. Kessler, 113 West Twenty-eighth street. Y.

The Home of the Lily. A full line of Choice Cut Flower Stock for all Purposes by the 100, 1000 or 10,000. Consignments Solicited.
Telephones, 1328, 1998 Madison Square
49 West 28th Street — New York City

Albany, N. Y.

At the January meeting of the Albany Florists' club the following officers were elected for the year:

Frederick A. Danker, president.
John A. Murnane, Jr., vice-president.
Patrick Hyde, treasurer.
Robert Davidson, secretary.

Frank M. Briare, Frederick Goldring and Fred Henkes, trustees for two years.

The name of Walter E. Cook, New York, was presented for membership by William C. Gloeckner, and on motion of Fred Goldring the by-laws were suspended and Mr. Cook was admitted to membership while present. After the election refreshments were served and informal addresses were made by Walter Mott, Newburg; R. J. Irwin, New York, and Walter E. Cook, the new member. All gave enthusiastic reports about the holiday trade in the cities which they had visited lately and said that the outlook is bright, indeed.

A canvass of the local retail trade following the rush of the holidays finds the members in what may be termed a satisfied state of mind. All are agreed that trade was as good as a year ago and some like H. G. Eyres and F. A. Danker affirm that it was even better than 12 months ago. In plants poinsettias, azaleas and Scotch heather sold well and in about the order named. Some demand was experienced for new varieties of roses but this was perhaps due to the skillful presentation of their merits to the buying public on the part of the retailer. The growers had a plentiful supply and about the only item difficult to get was carnations. Red were in good demand and there were not enough in sight to supply the call.

With the resumption of work in the legislature social functions are in order. Members of the legislature on the opening day received from admiring constituents and friends many floral pieces, some of them elaborate. William C. Gloeckner made up on order an elaborate piece in the form of a mound three feet by six feet to cover the desk of Speaker E. A. Merritt of the assembly. The mound was made up of Richmond roses, Enchantress carnations and stevia. The whole was surmounted with a miniature elephant and the initials G. O. P. R. D.

N. Y. & N. J. Association of Plant Growers

A regular meeting of the New York and New Jersey Association of Plant Growers was held at the office of William H. Siebrecht, Jr., on Tuesday, January 2. The new president, Frederick Marquardt, and the other new officers were installed in office. Arrangements were made for the reading of a paper or talk on interesting subjects at each meeting to the end that every member may gain by the special knowledge of each of the other members. The committee which has the association's annual dinner in charge reported that progress was being made and that they hoped to eclipse last year's efforts.

At the end of the meeting President Marquardt received the congratulations of the members upon the manner in which he had conducted the meeting, and in return he asked all members to attend the meetings regularly and thus assist him in his year's work. The next meeting of the association will be held in the Astor House February 6, 1912, at 3 p. m.

WM. H. SIEBRECHT, JR., Sec'y.

Tarrytown Horticultural Society.

The annual meeting of the Tarrytown Horticultural Society was held Wednesday, December 29, with a good attendance. The election of officers resulted as follows:

George Wittlinger, president.
Thomas A. Lee, vice-president.
E. W. Neubrand, secretary.
Chas. J. Weeks, treasurer.
George McIntosh, corresponding secretary.

The treasurer read the annual report which showed that the society was in a very prosperous condition. Alex. Thompson, Arthur MacDonald and Robert Grieve were elected to active membership. The prize offered by Abel Weeks was awarded to John Elliot for the best three vases of carnations. The committee appointed to make arrangements for the annual dinner reported that it will be held at the Florence hotel January 17 at 7:30 o'clock p. m. G. M.

PETERSBURG, VA.—The holiday trade was about the same as last year, states William S. Young, but the prices were higher and the quality of the stock better. There is some excuse for higher prices with us this year, for it rained the three days before Christmas. The supply of cut flowers was not equal to the demand and the call for bulbous stock was not as good as in previous years. The greatest increase for any particular flower was for poinsettias, which were in good request. The plant sales were about the same as last year.

OGDEN, UTAH.—The trade during the holidays will show an increase of 33 1-3 per cent over last year, says F. J. Hendershot & Son. The stock was of better quality this year and the prices were about the same, but the supply did not equal the demand. The sale of bulbous flowers was only moderate.

NEW YORK—A petition in bankruptcy has been filed by John Young, 54 West Twenty-eighth street, with liabilities of $17,994 and nominal assets of $3,200. Of the liabilities $17,023 are on account of notes of the John Young Company.

HOLLISTON, MASS.—Jeremiah Long won a verdict in court against a customer for whom he arranged a wedding decoration, the defendant making claim that the price charged was exorbitant.

HOLIDAY TRADE.

WINONA, MINN.—The probable increase in the holiday trade this year over that of last was 10 to 15 per cent, reports John Fuhlbruegge. The quality of the stock this year all around was much better and there were plenty of roses, but violets and carnations were short of the demand. Still, prices were about the same as a year ago. Carnations and poinsettias were the leading cut flowers, the sale of bulbous flowers being slow. Flowering plants sold very well, in fact, we were entirely cleaned out.

MERIDEN, CONN.—It was a grand rush the last two days before Christwas, says The Batchley Co., for the business was much larger than ever before. The flowers this year were of much better quality, and while there were enough roses, violets and carnations were in short supply, consequently the prices were higher than last year. There was no great increase in the sale of plants with the exception of ferns which were in greater demand, other plants selling about as usual.

KEARNEY, NEB.—There was very little difference in the trade this year and that of last, being practically the same, says the Kearney Floral Co. There are always sales for some flowering plants and azaleas and cyclamen were the most in demand, but in a town of this size the principal cut flowers called for are carnations and the great trouble that we have is that though the flowers that are shipped in look in good condition when received, yet they soon fade after being delivered to the customers.

BALTIMORE, MD.—The business during the Christmas holidays was larger than last year, says Halliday Bros. We had a good supply of splendid stock to fill all orders, with prices about the same as last year. American Beauty roses were in great demand, but there was no call for bulbous flowers. The demand for plants was about the same as the year previous. Having three days made the delivery very easy, but the majority of the orders were sent out on Monday.

SIOUX FALLS, S. D.—The retail price of flowers was about 15 per cent lower than last year at the holiday season, says J. Tossini, and the business fell off about 20 per cent. The stock was, however, of better quality. The demand for plants was about the same. Business throughout the season has shown an improvement over the previous year of about 20 per cent.

TAMPA, FLA.—The receipts this year during the Christmas trade were about one-fourth larger than in 1910, states the Tampa Floral Co. The weather has been very warm and sultry, so the quality of the stock was inferior to what we had last year and the retail prices were a little lower, but we had a plentiful supply. The demand for callas, lilies and narcissus was very good. There was a marked increase in the demand for decorative plants.

PENSACOLA, FLA.—The Christmas business was just about double what it was last year, is the way it looks to the Boysen Floral Garden. We did not have near enough flowers to supply the trade. The prices were about the same as the year previous and the quality was much better. The demand for bulbous flowers was good and there was a marked heavier call for carnations. The demand for flowering plants is also on the increase.

FARGO, N. D.—The business was a little better than last year, reports the Shotwell Floral Co. The quality of the flowers was good, everything being first class, with the exception of a few carnations shipped in which were soft. Prices were about the same as last year, but the supply was inadequate to meet the demand. azaleas sold well, there being a large call for them.

Fancy and Dagger Ferns

Green and Bronze Leucothoe

Just before Christmas we got started in our fifth year of handling **Decorative Evergreens,** but this year we have left off Galax entirely, which enables us to give more special attention to **Ferns** and **Leucothoe.**

We have secured a tremendous stock of **absolutely fresh "A1" stock** of both **Fancy** and **Dagger Ferns, extra length, extra quality; Green** and **Bronze Leucothoe,** the **best** and **largest** the country produces.

We pack all goods in neat, dry boxes made from thin poplar, which adds but little weight to the goods. If **quality** is the first thing you want, then you cannot afford to fail to give us a trial order.

Fancy Ferns	$1.00 per 1000
Dagger Ferns	1.00 per 1000
Green Leucothoe, long size	2.50 per 1000
Green Leucothoe, short, but large	1.25 per 1000
Bronze Leucothoe, assorted lengths	3.00 per 1000

We allow discounts to suit the size of your order, and always guarantee every shipment. Give us a trial; your credit is good with us (unless you have beat us in the past).

T. J. RAY & CO., Elk Park, N. C.

FANCY FERNS, $1.75 per 1000.

New Crop Galax, Bronze or Green	$1.25 per 1000
Sphagnum Moss, large bales	$1.50
Leucothoe Sprays, Green	$1.00 per 100; $7.50 per 1000
Boxwood,	per pound 20c; 50-pound case, $7.50
Magnolia Leaves, Imported Green and Bronze, Basket, $2.25; 6 baskets, $2 each	

Florists in the Middle and Western States can save money by placing their orders with us. A trial order solicited.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H Duryea, New York First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

Next annual convention, June, 1912.

J. C. VAUGHAN and wife are at Palm Beach, Fla.

THE canners' convention will be held February 5-11 in Rochester, N. Y.

THERE is a very heavy demand at present for standard stock sorts of beans, both green and wax pods.

A. B. HAVEN, of the Haven Seed Co., Santa Ana., Calif., reports unusually good tomato seed crops the past season.

CHICAGO.—Prices on the Board of Trade, January 9, for grass seed were noted as follows: Timothy, $13.50 to $15.25 per 100 pounds.

CHINESE narcissi, it is believed, will not be seriously affected by the disturbances in that country except perhaps to advance the export duty.

JUDGING by the number of firms who are going into the cucumber and melon seed business, there should be no cause for shortage in this department for a couple of seasons to come.

VISITED CHICAGO: W. W. Tracy, Washington, D. C., enroute to Minneapolis, Minn., and Madison, Wis., where he will address the state horticultural societies.—F. H. Henry and family, New York, returning from Japan.—W. O. Church, of the Enterprise Seed Co., Oklahoma City, Okla.

A VERY interesting quotation is just to hand from a firm in New Zealand, offering their new peas, for arrival in San Francisco around the first of April, at prices away under present market values. There is a difference of eight shillings a bushel between the arrivals April 1 and May 1.

A CANVASS of the south side of Chicago onion set situation would indicate that there were about 25 per cent as many sets in the hands of growers still for sale as there were at this time last year. The sale of a few cars only will stiffen the market considerably. The present car lot prices are reported as follows: Colors $1.10 to $1.20; whites $1.40.

WASHINGTON, D. C.—The Robert Gair Co. of Brooklyn is putting up the government seed packets with a new bag filling machine made under its own patents. Work in the department is reported somewhat behind.—Prof. W. W. Tracy left January 7 for Minneapolis, Minn., and Madison, Wis.—Ernest Pieper and wife, Jos. Edmondson, J. W. Fosgate and daughter, and J. C. Vaughan and wife were recent visitors.

F. H. HENRY, of New York, who has just returned from Japan, says that when he left, early in December, indications were that giganteum lilies in large sizes will be short, smaller sizes in normal supply, with a 10 per cent advance in price. There is a reduction of 30 per cent in the planting of Formosum which, Mr. Henry predicts, will advance 20 per cent. Multiflorum has materially improved in quality and the supply will be about the same as last season. Auratum and album lilies will be in normal supply while rubrum will be scarce and probably higher.

NEW YORK.—The grass seed business conducted by Henry Nungesser & Co. has been taken over by a newly organized company known as the Nungesser-Dickinson Seed Co., and the business will hereafter be continued under that name. Henry Nungesser, for so many years identified with the grass seed business in this country and Europe, is president of the new company, and will assume charge of its affairs. Marshall H. Duryea is vice-president and treasurer, and Wm. A. Proescholdt, secretary.—Ralph M. Ward & Co. advise that they will move this month to 71 Murray Street, where they will occupy the ninth floor.—F. H. Henry and family have returned from Japan.—Visitor: J. C. Vaughan, Chicago.

Low Vitality of 1911 Seed Crop.

A noted French house, Vilmorin, Andrieux & Co., under date of December, 1911, sends to its customers the following:

"It will be easily conceded that 1911, with its numerous failures and shortages, may be considered as one of the worst years on record for the seed growers. Following two very poor crops, which left most warehouses empty, it is no matter for surprise that prices should be exceedingly high. Another unfortunate consequence of the damaging drought which we experienced for six months, is that the seeds ripened prematurely. Notwithstanding the greatest pains we took (often discarding 80 per cent of imperfect seeds) to render the lots as marketable as possible, their vitality could not always be brought up to the usual standard and we must again request our patrons to recommend their customers to sow thicker than usual in order to avoid partial failure. We can assure our friends that we have done the best we could under this year's disappointing circumstances."

Morse's Alfalfa Purity Tests.

C. C. Morse & Co., in their catalogue for 1912 under alfalfa, says: "We use the greatest care in selecting the fields which are to be cut for our seed, and while we do not guarantee its purity we have such confidence that we urge our customers to procure samples and have the sacks set aside. These samples may be sent to Washington, D. C., and there tested by the government, who will report to the sender whether the seed contains dodder or not."

Potato Production.

The production of potatoes in the United States for the year 1911 according to the Crop Reporter of January 5 issued by the Department of Agriculture was reduced 56,295,000 bushels from that of 1910, and 96,457,965 bushels less than in 1909. The great falling off in production has advanced the price per bushel at December 1 from 54.1 cents in 1909 to 79.9 cents in 1911, by which the farm value of the crop shows a total increase of over $23,000,000, being $210,667,000 in 1909 and $233,778,000 in 1911. The total acreage planted in 1911 was 50,000 acres less than in 1909 and 100,000 less than in 1910. The greatest losses in production are in the states that furnish the largest amounts; New York fell from 40 million bushels in 1910 to 27 million, Maine from 29 million to 21 million, Ohio from 17 million to 12 million, Michigan from 36 million to 31 million, Pennsylvania from 24 million to 15 million. North Dakota has increased its production from one million to five million, Minnesota from 13 million to 25 million and Wisconsin from 26 million to 32 million bushels.

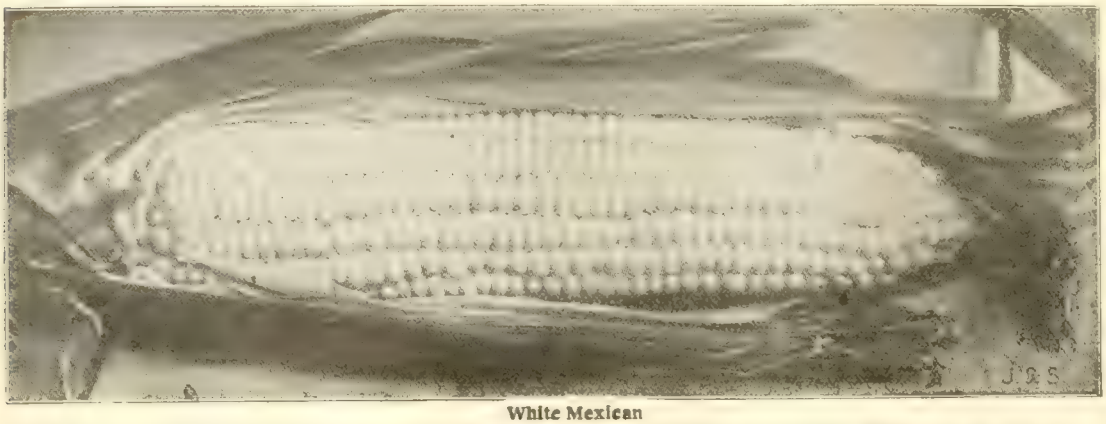
White Mexican.

Every one knows the marvellous sweetness of the old Black Mexican. The White Mexican equals the Black Mexican in sweetness, but is a pure ivory white. It is the first of the extra earlies to be ready for the table. Time from fifty-five to sixty days. It is a bud proposition of the Black Mexican.



White Mexican

We are the originators. You had better look to us for true stock of this marvelous extra early corn. Just the thing for market gardeners.

We are growers for the American Seed trade of **Peas, Beans, Sweet Corn** and **Field Corn.** Peas and Beans are grown at our Michigan stations, Alpena and Millington. Our corn at Sioux City, Ia

The region around and about Sioux City for the growing of **Sweet Corn** and **Field Corn** is unexcelled, fertile soil, topographical conditions just right, climate the best for Fall curing, in fact an ideal spot and unsurpassed in America for corn growing and as far north as all varieties of sweet corn can be safely grown to ripen well.

SIOUX CITY SEED AND NURSERY CO., Sioux City, Ia.

M. Herb's Novelties.

Among the novelties in seeds for 1912 listed by M. Herb, Naples, Italy, the following appear to be of interest and have merit:

Primula obconica fimbriata oculata, a large deeply fringed primula obconica with a bright yellow-brown eye on a lilac-pink ground.

Gloxinia regina grandiflora, of large size, the flowers four times as large and earlier than other varieties.

Zinnia pomponica nana compacta, a dwarf compact growing pompon zinnia of several colors.

Giant marguerite carnation Golden yellow, a pure yellow marguerite carnation of large size.

Bellis perennis monstrosa ranunculiflora and tubilosa Etna, the former with large ranunculus shaped flowers and the latter quilled flowers of bright red, two new large-flowered daisies.

Silene pendula compacta Maria, double light pink with white and yellow variegated foliage.

Gaillardia grandiflora Sibylla, a large flower bright red in the center, the outer edge of white and yellow.

Celosia Thompsoni magnifica nana, three new colors, golden yellow, chamois-pink and blood-red in the dwarf Celosia Thompsoni magnifica.

Dianthus laciniatus mirabilis flore plene albus, a large flowering double Japan pink, the flowers measure three to four inches across and the petals are deeply cut, often terminating in thread-like fringe.

Gladiolus

We control the originator's stock of

THE NEW TYPE

KUNDERDI "GLORY"

WITH "RUFFLED" PETALS

The broadly expanded, wide open flowers paired by twos, all face in the same direction and are carried on straight stout stalks, fully 3½ feet. From three to eight of these handsome flowers are open at one time. Each petal is exquisitely ruffled and fluted.

The color is a delicate cream pink, with a most attractive crimson stripe in the center of each lower petals the shade of which is unique in Gladioli. The ruffling of the petals in this new strain has attracted much attention the country over.

Special prices with free cuts, for catalogue use.

Per 100, $7.50. Per 1000, $70.00

We carry large stocks of

America, Mrs. Francis King, Augusta, Princeps

C. HUMFELD,

CLAY CENTER, KANSAS.

Mention the American Florist when writing

ROCHESTER, N. Y.—The holiday trade was about the same as that of the previous year, reports John B. Kellar's Sons. The flowers were all of good quality and of plentiful supply, with prices the same as the year before. The supply and demand for bulbous flowers was fair. The trade in general was about the same as last year, no increased demand or falling off or any other peculiarity being noticed.

COLORADO SPRINGS, COLO.—The business during the holidays was much larger this year than in 1910 is the report of Frank F. Crump. There were just about enough to fill the orders with the exception of American Beauties which were short in supply, and carnations were scarce. There were not many bulbous flowers in the market—a few Lilium Harrisii which sold very well. Prices were about the same as last year. The sale for flowering plants was larger than last year.

ATLANTIC CITY, N. J.—We had a good supply of all kinds of stock, says the Edwards Floral Hall Co., and the Christmas trade was about 15 per cent better than that of a year ago. The flowers were of as good quality as usual and prices were about the same, except on American Beauty roses, which were higher. There were plenty of bulbous flowers. There was no particularly marked feature of the business this year; the plant sales were good, being about the same as a year ago.

COLUMBUS, O.—Poinsettias were in much greater demand than last year, states John R. Hellenthal, and a greatly increased call for baskets of flowering plants. The increase in business during the holidays was about 30 per cent over that of last year. There was a shortage of good roses and these as well as poinsettias brought higher prices, carnations selling at about the same figures as a year ago. The quality of all the stock this year was very good and there was a good supply and demand for bulbous flowers.

ST. PAUL, MINN.—Trade conditions for Christmas this year seemed quieter and business was about 13 per cent less than last year, reports L. L. May & Co. Both city and country trade suffered a falling off in about equal proportions. The supply of stock was plentiful and the quality was superior to that of a year ago, but the prices on the average were lower. The call for bulbous flowers was not strong, but for carnations was very good, they ruling the favorite flower. The demand for plants was heavier than last year, poinsettias being much more in request.

TERRE HAUTE, IND.—The trade during the holidays this year was about one-third more than last, reports N. B. & C. E. Stover. There was an especially large call for carnations, a marked increase, and the sale of plants was one-fourth more than the year before. Boston ferns took the lead in plant sales and we have never sold so many at any previous Christmas. The cut flowers were of much better quality and the prices were about the same, but the supply was entirely inadequate to meet the demand. There was, however, plenty of bulbous flowers.

Prices of Indoor Fruits and Vegetables.

Chicago, January 4.—Asparagus, $2.50 to $3 per dozen bunches; cucumbers, $1.40 to 1.60 per dozen; radishes, 70 cents to 75 cents per dozen bunches; lettuce, 20 cents to 22½ cents per pound; rhubarb, 35 cents to 40 cents per bunch.

New York, January 6.—Mushrooms, 80 cents to $1.60 per 4-pound basket; cucumbers, $1 to $1.25 per dozen; tomatoes, 20 cents per pound; radishes, $2 to $3.50 per 100 bunches; mint, 40 cents to 50 cents per dozen bunches; rhubarb, $1 per large bunch.

Spring Tomatoes.

Growers who wish to have a spring tomato crop should lose no time to get plants underway. It is surprising how long it takes to produce tomato plants in winter; thus for planting out in March the plants must be started early in January. This is especially necessary if the young plants have to be grown in a lettuce temperature. While they do love heat, tomato plants are fairly hardy and will come along all right on a bench in a temperature of 50° if they are never overwatered. The varieties are slowly shifting position in the estimation of growers. Thus the one-time standby—Lorillard—is about forgotten now. The English Comet is losing favor as it lacks size and solidity. The newer Bonny Best is liked in some places. The Grand Rapids promises well, while some growers adhere closely to Beauty. This latter is no doubt the finest fruit if well done. The grower should bear in mind that the spring crop requires a larger fruit than the winter crop, as it comes in competition with the southern shipments. It seems to us that the new Detroit should fill the bill where a pink fruit is desired. No matter what variety is used bear in mind never to check the plants either for room, nourishment or heat. If started cool, a lettuce house will do, but if started in heat, they will surely suffer if moved to cold quarters.

MARKETMAN.

Potato Importation.

The announcement that large quantities of potatoes are being imported having been generally made by the press, the Bureau of Statistics, Department of Commerce and Labor, has issued a circular stating that in the last ten years the total imports were 22,845,634 bushels valued at $10,985,770, the rate of duty being 25 cents per bushel of 60 pounds, and the exports for the same decade were 10,900,566 bushels, valued at $8,413,675. Potatoes are imported chiefly from Canada, Mexico and Bermuda in America, and Scotland, England, Germany and France in Europe.

The world's potato crop runs between five and six billion bushels per annum. Germany is the largest producer, her total crop for 1909, the latest available figures, being 1,736 million bushels. Other countries producing: 1,173 million bushels in European Russia, 613 million in France, 480 million in Austria, 377 million in the United States, 184 million in Hungary, 137 million in Great Britain, 120 million in Ireland and 99 million in Canada. New York is the largest producing state in the Union, her product in 1910 being 44½ million bushels, followed in order by Michigan, Maine, Pennsylvania, Wisconsin, Ohio, Illinois, Iowa, to about 10 million bushels in Minnesota and New Jersey.

Potatoes in Scotland.

In consequence of a shortage of potatoes in the United States a demand has been created for Scotch potatoes, writes Consul J. M. McGunn of Glasgow, and it would appear that this demand will increase within the next few months. Inquiries have been received from importers in the United States desiring to know the prospects of the crop and the prevailing prices. The present is a good average one as regards yield, and the quality is above the average. The crop in England, especially in the south, is bad, but in the northern counties it will be about the average, and so far as I can learn, the Irish crop is above the average.

The prices at present being quoted to foreign buyers range from $15.80 to $18.25 per ton of 2,240 pounds, according to quality. There is every indication, however, that the prices will go higher. The first shipment from this district to the United States was on October 27, 1911, from which date to December shipments to the value of $32,452 have been invoiced.

ROCHELLE, ILL.—The Christmas and New Year's trade was very good, writes Augustus Caspers. Carnations were in especially good demand and brought high prices. We also sold many potted plants at good figures. Trade is picking up finely.

GARDNER, COLO.—The Christmas trade was about the same as that of last year. The quality of the stock was better, with prices the same. There were not enough cut flowers to meet the demand, except in bulbous flowers, which were in good supply and sold well. There was an increased demand for flowering plants, especially cyclamen, which sold well.

ANGOLA, N. Y.—The trade during the holiday season was just about the same as last year, says John Neubeck. The stock was up to standard quality, with prices about the same as in previous years, and there was a good supply of everything. There was a much larger demand for flowering plants and holly and wreaths were in good request.

The Nursery Trade

American Association of Nurserymen

J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y. Thirty-seventh annual convention to be held at Boston, Mass., 1912.

BOUND BROOK, N. J.—Albert W. Wadley has sold his interest in the Wadley Nurseries to E. P. Bryan who has been associated with the business.

JOHN MORLEY, formerly superintendent of parks of Los Angeles, Calif., has been recently appointed to be superintendent of the San Diego parks. The park area of the city is about 1,800 acres, 1,400 of which is in Balboa Park, where the San Diego Panama Exposition is to be held, for which 400 acres has been set aside and the administration building is now being erected.

THE Department of Agriculture has issued a bulletin for distribution among teachers entitled Forestry in Nature Study, giving detailed directions for utilizing trees and forests in nature-study exercises and courses. It outlines a course of study for each term—spring, summer, autumn and winter—in the first six years of elementary schools, with a bibliograph of books referred to in the text. It is profusely illustrated and concludes with a key to common kinds of trees. It is intended as a guide for the study of trees that children may learn to know and love trees and understand their needs.

Grape Culture.

The grape responds generously to attention, adjusts itself to many conditions and is often grown on soils too poor for other purposes, states the Bulletin issued by the U. S. Department of Agriculture entitled Grape Propagation, Pruning and Training. The grape is propagated from seed and cuttings and by layering and grafting, seed to produce new varieties, cuttings and layering to retain the varieties and grafting to have worthless vines produce those of better quality. Cuttings are prepared from dormant wood from eight to 20 inches long, tied in bundles and heeled-in or buried in trenches butt ends up covered with three to six inches of soil. In the spring they are set in rows two or three inches apart, butt ends down, the top eye just above the ground. Layering is performed by burying the pruned canes of last year's growth in a trench about two inches deep, a slight incision being made opposite each bud. The plants can be lifted in the fall, each bearing its own roots, and divided. The Rotundifolia vines are nearly always propagated in this manner. There are many methods of grafting, but those ordinarily employed in grape culture are the cleft graft and whip graft.

The growth of the grape largely depends upon the treatment given during the first years of its culture. The first year no pruning is given until the winter, when the plants are dormant. Then the strongest cane is selected, cut back to two eyes and the others removed. The second year but one shoot is allowed to grow, and this is carefully staked, and when it attains the necessary height topped, causing laterals to grow. These are pruned according to the methods in which the vines are to grow. The objects of pruning are to cure diseased plants, modify the shape, increase the size, quantity and quality of the fruit, cause it to ripen earlier or later, and procure a regular succession and facilitate the spraying, training, cultivation and gathering the fruit.

There are many systems of training adopted, and these are fully described and illustrated in the work, as well as the building of trellises. These vary in different sections of the country, according to varieties grown and the desires of those in charge. The Bulletin concludes with a list of varieties most extensively grown in the different sections.

Western New York Horticultural Society.

The fifty-seventh annual meeting of the Western New York Horticultural Society will be held in Convention Hall, Rochester, N. Y., January 24-26. The opening exercises will include an address by President William C. Barry, who has served the society in that capacity for twenty-two years, and the report of Secretary John Hall, who has filled that position for twenty-three years. Among the papers to be read are "The Season's Experiences with Injurious Insects and Spraying Mixtures," Prof. P. J. Parrott; "What a Spray Nozzle Should Do," Howard M. Riley, Ithaca, N. Y.; "The General Outlook," R. D. Ingraham, Grand Rapids, Mich.; "Plums," Prof. U. P. Hedrick; "Pointed Paragraphs on Plant Pathology," Prof. F. C. Stewart; "Cover Crops and Their Effect on the Soil," Prof. Jacob C. Lipman; "The Present Status of Nut Growing in the Northeast," Prof. John Craig. Addresses will also be made by Prof. L. L. Van Slyke, Prof. H. H. Whetzel, W. I. Smith, and Lloyd S. Tenney.

Prof. C. S. Wilson will explain the purposes of the packing school, of which a session will be held under the supervision of the department of pomology of the State College of Agriculture. Other interesting features will be a lantern slide talk by Glenn W. Herrick and a demonstration of color photography by Charles C. Zoller. A banquet will be held on Thursday evening, January 25, at the Duffy-Powers dining room, where an interesting programme of toasts will be responded to by well known speakers.

HOLIDAY TRADE.

SAVANNAH, GA.—There was a much greater demand this year during the holiday trade for more expensive combinations of flowering plants in baskets and boxes, which brought good prices, write A. C. Oelschig & Sons, and we should judge the total sales were 25 to 30 per cent greater than a year ago. We had a good supply of all stock, but we had to depend on the eastern market for cut flowers, for we did not have five minutes' sunshine for two weeks before Christmas, and our flowers were not up to standard in quantity or quality. The prices of cut flowers were about the same, but those on plants such as azaleas, poinsettias and begonias were somewhat higher. There is but little demand for bulbous flowers except for cemetery use. There was much more call for poinsettias, both cut and in pots. Decorative plants, that is, palms and ferns, were not in great demand; the call was for plants in bloom.

BRIDGEPORT, CONN.—It makes everything much easier when Christmas comes on Monday, remarks John Reck & Son, for it gave us the opportunity to clean up all our orders on Sunday evening, the night before Christmas, and the business was large this year, showing an increase of about 25 per cent. We had a good stock of flowers in our own houses of better quality than ever, but we were short of most everything in cut flowers. Prices ranged a little higher than in previous years. There is no call for bulbous flowers, but the demand for plants was very large. We sold more plant baskets than ever before.

SOUTH BERKELEY, CALIF.—"Oh! yes, we always have flowers enough in California," writes the Kensington Florist of the holiday trade, "and if anything the flowers were of better quality." The trade was certainly much better than last year—about 25 per cent; prices were about the same and there was a plentiful supply. The demand for potted plants was mostly for primulas, cyclamens and all kinds of ferns. There was a good supply of bulbous flowers with fair demand. The sales were very good, but the call was more for a cheaper article than in previous years, and money seemed much scarcer.

LONDON, ONT.—We had mild weather all the week before Christmas and it rained all day Friday, and most of the retail business was done on that day and Saturday. Still it will show an increase in the total sales of about 30 per cent, writes J. Gammage & Sons. The stock was of better quality than usual and prices were about the same as last year, but the supply was inadequate to fill the demand. There was a good call for bulbous flowers and the supply was limited. There was an increased demand for plants in baskets and made up arrangements of plants.

BOULDER, COLO.—The demand was much greater for flowering plants during the holiday trade, says C. F. Fawcett. Azaleas, poinsettias and bulbous stock were short of the call. The amount of business was about the same as last year, the quality of the stock was better and the prices about the same, but the supply was short of all stock, as well as bulbous flowers. There was a much greater call for cut poinsettias. There was less call for wreaths and roping as well as holly. This may have been caused, however, by the grocery stores carrying these goods, purchasing them from the wholesale stores.

JANESVILLE, WIS. — The Christmas trade this year will total about 10 per cent more than last, writes the Janesville Floral Co. We were well supplied with roses and carnations for we were in heavy crop of both and they were of the best quality we ever had, and they brought better prices than a year ago. There was an increased call for the better grade of roses, but the customers will not buy carnations, being afraid that they have been kept too long. There was very little demand for bulbous stock. Plants sold well but not those for which a fancy price was asked.

ANGOLA, N. Y.—J. J. Neubeck has formed a company with S. E. Lyth under the name of the Angola Floral Co. and has moved from the Lake street greenhouse and erected new greenhouses at Main and Friend streets. He reports a fine trade at Christmas and contemplates the erection of additional buildings in the spring.

SEDALIA, MO.—Our Christmas trade was the best we have ever had, says the Archias Floral Co. We cleaned up completely on all cut flowers, azaleas and flowering plants that were salable.

FROM THE FRENCH TRADE PAPERS.

A Mythical Rain Tree—There has been considerable speculation, says the "Times of Ceylon," as to the possibilities of introducing into the drouth-stricken areas of Ceylon the famous "rain tree" of Peru. A number of letters asking for seeds were received in the office (says C. Drieberg in the progress report of the Agricultural Society) from persons who are not aware that the tree credited with the property of producing rain was one of the common roadside shades, known in the vernacular as Ingasaman, and botanically as Pithecolobium saman. With a view to, if possible, ascertaining the grounds for the extraordinary reports about the tree, I placed myself in communication with a correspondent in Peru, who transmitted some interesting information. It may now be taken as proved that the tree possessing the properties claimed for it is a myth. What probably gave color to these reports is the strong excretion of water, through hydathodes, as found in fuchsia, tropæolum, alchemilla and colocasia, and most noticeable in tropical forests. According to De Candolle, Cæsalpinia pluviosa is the nearest example of a rain tree, possessing as it does the power of excretion to a very marked degree.

South Africa's Emblematic Plant—The "Cape Argus," of a recent date, refers to the selection of the acacia, or wattle, as an emblematic plant of South Africa. It states that the announcement was received with mingld amusement and regret, and, further, rightly declares that the national emblem should be a native of the country. This opinion has been confirmed by Professor H. H. W. Pearson, the professor of botany in the South African College, who has suggested the adoption of the Cape Sugarbush, or Honey flower (Protea mellifera), as thoroughly representative. Another striking plant has been suggested. This is the Cape Silver tree (Leucadendron argenteum).

New Rose, Wichmoss.—R. Barbier writes in the Revue d'Horticulture of the origin of this new climbing rose, "the result of efforts to secure a quite hardy hybrid of Wichuraiana which would also be free of bloom. This curious and attractive novelty is the result of a cross of Wichuraiana and the moss rose Salet, and is a vigorous grower, sending up shoots six to ten feet long. Its branches are covered with the multitude of little spines as in the moss roses; the foliage is a brilliant dark green, the bud a fresh pink, ovary and sepals mossy. The flower is semi-double fragrant, petals rose and shaded rosy carmine below. Flowers in corymbs of six to 15 blooms."

Tomato Seed Oil—Tomato seed, once a waste product of the canneries of Italy, are now made to produce an oil, the rapid drying quality of which is said to be excellent. The oil is used in the making of varnishes. Italy has many large tomato canneries, and in that country it is customary to carefully remove the seeds before canning the fruit. The canneries in the province of Parma alone can 54,000 tons of tomatoes annually, and now have an output of 600 tons of the seed oil.

STOCK ALWAYS NEEDED

Small Ferns, for dishes, Pteris Mayi, Serrulata Cristata Variegata, Wimsetti, Cretica Alba Lineata, $3.00 per 100, $25.00 per 1000.

Godfrey Aschmann
WHOLESALE FLORIST,
1012 W. Ontario St., Philadelphia, Pa.

To Destroy Ants.—Dissolve two pounds hyposulphite of soda in 10 quarts of water and spray in infested places. Sure, but to be used with caution, as the liquid is apt to leave red spots on certain colors or tissues.

Diseased Forsythia.

ED. AMERICAN FLORIST:

Our forsythia blooms beautifully in the spring but later leaves and wood become diseased and decay. Can you tell us of any remedy to prevent this?

W. M. M.

Maine.

Many shrubs are liable to disease peculiar to themselves, quite recently we saw kerrias attacked by a trouble resembling a rust quite new to us. The best or safest way to treat plants thus affected is to destroy them, for if the trouble recurs year after year, the plants often become weakened and die. It would be well, however, to submit specimens of the leaves and branches to the nearest Experiment Station, possibly at Orono, Maine, that a proper diagnosis may be made, it is impossible to suggest a remedy at long distance range, especially without specimens.

E. O. O.

Worms Destroying Ferns.

ED. AMERICAN FLORIST:—

We are troubled with green worms which eat the young fronds of Boston ferns. Can you tell us how we can kill them.

M. B.

Illinois.

No description of the worms or their methods is given, but the green worm that eats foliage in greenhouses is in most cases one of the cutworms which work at night. These can be poisoned on plants like ferns by spraying with paris green or arsenate of lead, the latter preferred. They can be trapped by laying bunches of chick weed on the ground under which they will crawl, and constant seeking them at night when they are eating will overcome them.

W.

TEWKSBURY, MASS.—The heavy wind which passed over this section December 27 caused considerable damage to the greenhouse property of the Pleasant View Gardens of which Frank P. Putnam is proprietor.

Circulation in Buyers' Brains

IS the kind enjoyed by the American Florist. Its actual paid circulation we believe, is the largest in its class. The contents are of real present value and are preserved for future reference. Advertisers who realize this establish permanent business with the best trade in the United States and Canada.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

PRICE, POSTPAID, $1.25

AMERICAN FLORIST CO.
440 So. Dearborn St.
CHICAGO.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. $1.50.

THE AMERICAN CARNATION (C. W. Ward).—A complete treatment of all the most modern methods of cultivating this most important flower. Illustrated. $3.50.

FUMIGATION METHODS (Johnson).—A practical treatise on cheap and effective means of destroying insect pests. Handsomely bound and profusely illustrated. 250 pages. $1.00.

MANUAL OF THE TREES OF NORTH AMERICA (Sargent).—The most complete and authentic work on the subject. The pages number 826, with over 600 illustrations. $6.00.

THE ROSE.—Its cultivation, varieties, etc. (H. B. Ellwanger).—A complete guide of the cultivation of the rose, together with the classification of all the leading varieties. $1.25.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. $2.50.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. $4.00.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

GREENHOUSE CONSTRUCTION (Taft).—It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 118 illustrations. $1.50.

DAFFODILS, NARCISSUS AND HOW TO GROW THEM (A. M. Kirby).—Contains all that is really worth knowing about these most popular of spring bulbs, written from the standpoint of American conditions. Illustrated, 233 pages; postpaid, $1.21.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

THE VEGETABLE GARDEN (Vilmorin-Andrieux).—The best and most complete book on vegetables ever published. There are 782 pages and hundreds of illustrations in this English edition, edited by Wm. Robinson, the noted English horticultural writer. $6.00.

The American Florist Co.
440 S. Dearborn St. Chicago,

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

Thomas Barson, of Johnston, N. Y., Gives His Opinion of Both Our Pipe Frame and Iron Frame House.

"IN the past seven years you have built for me three greenhouses, which I am now using with the greatest of satisfaction. The first house, of Pipe Frame construction, which is my chrysanthemum house, was put up in 1904 and is practically in as good condition now as then. Four years ago, the rose house, also Pipe Frame, was erected and that, too, serves its purpose well.

The pride of my greenhouses, however, is the home of my carnations. This house is of Iron Frame construction 100x43 feet, and is up-to-date in every way. Although all of my houses are satisfactory, still the improvement in the last one erected over the one put up seven years ago is very marked and if I had it to do over again and knew as much about the houses as I do now, I would have all three of Iron Frame construction, on the same plan as my "Carnation House." I would advise the erection of this kind of house for the growing of all flowers. Right here I want to congratulate you on the skilled workmen sent to build my last house. They were the most gentlemanly lot of workmen I have ever seen together, tending strictly to their own business and showing by their efforts that they were well acquainted with the tasks assigned them."

Thos Barson.

WHAT THE USERS SAY ABOUT KROESCHELL BOILERS

Test at 8° Below Zero---No. 8 Kroeschell Boiler Carries 20,500 sq. ft. of Glass.

Our heating system works to perfection. To our surprise the new **No. 8 Kroeschell Boiler** mastered the whole plant, consisting of five houses, 20 x 150. We only deemed it necessary to start our second boiler when the temperature went down to 8° below zero.

We had expected to use both boilers in cold weather, but the one boiler did such excellent work that we did not run the two boilers until the very cold weather set in. It was a very easy matter to keep the temperature up in the very coldest weather and stormiest nights. The five houses have 20,500 sq. ft. of glass; No. 8 Boiler is rated at 16,500 sq. ft. of glass.

Have Tomatoes on the market weeks ahead

Never mind the weather!

Your plants in hot-beds or cold-frames under Sunlight Double Glass Sash will not mind it

Between the two layers of glass in the Sunlight Double Glass Sash is an air space of 5/8 of an inch in thickness

Above the glass is winter weather—zero perhaps. Below the glass is warm earth and plants growing like May

The secret of it all, is that the air space between the two layers of glass being a non-conductor will not let the cold in or the heat out. It makes the Sunlight Double Glass Sash complete in itself. It needs no mats or boards. The only cover is the air sealed between the layers of glass.

You can have hot-beds and cold-frames with Sunlight Double Glass Sash far cheaper in the long run than your single layer sash with heavy, dark covers of mats or boards. You can save more than half the labor and worry and you can control your beds better and get earlier, stronger and far more profitable plants.

The Sunlight Double Glass Sash method comes right home to every gardener and florist in the country. *It is good business to learn all about it.*

Write us today. We will send our complete catalog, free. If you enclose 4c in stamps we will also send Prof. Massey's booklet on hot-beds and cold-frames. Be sure to write your name and post office plainly.

"Send It"

That's All You Need to Write

WE will mail you this green box. Inside of it you will find a piece of the U-Bar—an actual life sized piece. Fast to it will be a tag, on one side of which reads "This is the U-Bar, the bar that makes U-Bar Greenhouses the famous greenhouses they are;" on the other side are the boiled down, straight from the shoulder reasons, **why this U-Bar** makes U-Bar greenhouses the famous greenhouses they are.

The reason we are offering to send you this, is because last spring when we were at the Boston Show exhibiting one of our houses, it surprised us every day to find the number of gardeners and superintendents who came to look at that house who hadn't the vaguest kind of an idea how the U-Bar is made. We determined right then and there, that we would cut up a thousand feet of U-Bars in short lengths and mail them out all over this country and Canada.

All you need to do to get one, is to mail us a postal with the words "Send It"—then sign your name and address and give the name of your employer.

We will know what you mean and straight way the green box, containing the U-Bar will be mailed to you.

Sound Greenhouse Building Methods.

When Your Order for a Greenhouse Reaches Our Factory, We Make Accurate Detailed Drawings for the Various Parts Going into Your house.

ONE man is an expert on the wood parts—he does that; another does the iron, another with engineering experience knows about stress and strains and directs the size and kinds of supports and fittings, and so on.

Then the lay-out man indicates the length to which the pieces are to be cut and directs where all holes shall be drilled so that the house will go together like clockwork.

We tell you these things just to show you that we have completely out-grown that state of having so-called "all-around men" who do a little of everything in every line (and not much of anything that's really dependable.)

You know that the only way a man can be an expert is to direct all his time and attention, heart and soul, to some one thing.

That's the kind of men our organization is made up of.

The kind of men whose service you get from us at no more expenditure in the end than for the "Jack-of-all- trades" kind who are full of guesses. Write us.

H. O. May, Summit, N. J., Treasurer.

Next Meeting at New York, April, 1913.

The Test of Union.

The twenty-first annual meeting of the American Carnation Society and the thirteenth annual meeting of the American Rose Society, held this year jointly, in the Wayne Hotel Gardens, Detroit, Mich., Wednesday, Thursday and Friday, January 10-12, was in all respects successful. The hall itself was admirably situated and arranged to receive and present the exhibition in the most advantageous way. A maximum of light was available and the spacious floor was ample to display each separate exhibit without crowding and still leave plenty of room for wide aisles to accommodate the visitors. The general effect of the exhibit was greatly enhanced by the erection of a pergola made of Michigan white birch, covered with southern smilax, almost the entire length of the hall, which is 200 feet long. At the farther end from the entrance, a pretty and seasonable scene was effected by the free use of Christmas trees and wild smilax. The large arched ceiling was cleverly treated with a series of banners, concealing the iron and woodwork.

The rose exhibits required no apologies from the exhibitors or the Rose Society itself, for both made good all that was promised and more, too. The quality was better, generally speaking, than of those shown previously in mid-winter or spring and the quantity suffered little if any in comparison with former exhibitions. The novelties were not great in number but all were meritorious and elicited the admiration and keen appreciation of their commercial value from most of the growers as well as the retailers who saw them. The staging of all was accomplished with a view to displaying all the merits they possessed and the public were thus able to intelligently make comparisons. The display of roses in the class calling for not less than 200 square feet in area, in which the first prize was won by A. N. Pierson, Inc., Cromwell, Conn., was itself alone a grand exhibition that embraced quality, variety and taste in arrangement. The display of Killarney staged by A. Farenwald, Roslyn, Pa., and taking second premium in the same class, was an excellent exhibit and elicited much praise from the public as well as florists. The Fred Breitmeyer Floral Co.'s exhibit in this class was a good one, too, but the buds were too tight to compare favorably with the other two entries.

The carnation exhibit was an excellent one but some contend it did not come up to former exhibitions of the society in extent, and if this is true it is certainly due to the blizzard that raged throughout the carnation belt the whole week and discouraged shippers. This is borne out by the secretary's disclosure of entries, fully up to, if not exceeding, last year's. The quality of blooms shown bears out the contention of those who persistently claim January as the best month for the annual display, but there are many who hold that a larger and more comprehensive display is possible a month or six weeks later in the season. These, with the retailers, insist that many points of advantage lie with this later date for the exhibition, the better shipping facilities assured and a greater attendance by both florists and the public, the latter being no inconsiderable feature,

as it is certainly true that the exhibition would have had a greater attendance had the weather been anything but prohibitive in its nature. The gold medal for the best undisseminated new variety went to Peter Fisher, of Ellis, Mass., for Gorgeous, a magnificent red; the silver medal to Richard Witterstaetter, Cincinnati, O., for President J. A. Valentine, a fine light pink, and the bronze medal to Chas. H. Totty, Madison, N. J., for Wodenethe.

The miscellaneous exhibits were as follows: J. A. Peterson, Cincinnati, O., excellent lot of Begonia Glory of Cincinnati; The Fred Breitmeyer Floral Co., Mount Clemens, Mich., and Fred Pautke, Grosse Pointe, Mich., white pompon chrysanthemum Helen Newberry; John Lewis Childs, Flowerfield, N. Y., Calla Elliottiana; Robt. G. Wilson, Brooklyn, N. Y., and Chas. H. Totty, Madison, N. J., plants of Carnation Brooklyn in 2-inch pots; Mrs. W. Munt, St. Clair, Mich., example of English table decoration for wedding; John Breitmeyer's Sons, Gus. H. Taepke, Carey & Fell, Bemb Floral Co., and J. F. Sullivan, table decorations; Cleveland Cut Flower Co., Cleveland, O., Bate evaporator; Hubert V. Pearce, Detroit, Mich., Pearce return steam trap, boiler trap and boiler feeder; C. C. Pollworth Co., Milwaukee, Wis., new carnation support; American Blower Co., Detroit, Mich., Detroit steam trap; Mead & Roberts, Detroit, Mich., new atomizer.

The general public paid for admission to the show to the extent of some $400 or thereabouts, admission being 25 cents each, but it is certain that, with more favorable weather, the tendance would have been much larger. Members of the Detroit Florists' Club certainly deserved better patronage, for they left no stone unturned to make the affair a pleasant one for the public and trade visitors. J. F. Sullivan, press representative, was especially successful in securing liberal space in all the papers during the two weeks preceding the event.

The smoker at the Cadillac hotel Thursday evening was very enjoyable. J. F. Sullivan officiated as toastmaster with his usual ability. The Detroit quartette and other highly talented artists, including W. J. Lawrence, of Eglington, Ont., Can., rendered choice selections and the speakers included R. Vincent, Jr., president of the Society of American Florists; J. A. Valentine, president of the American Carnation Society; Adolph Farenwald, president of the American Rose Society; P. J. Foley, president-elect of the Chicago Florists' Club; W. R. Pierson and Philip Breitmeyer.

Secretary Mrs. Chas. H. Maynard, of the Ladies' Society of American Florists, took charge of the ladies of the trade visitors, who were entertained at the Temple Theatre Thursday evening, and given a reception at the home of Mrs. E. A. Fetters Friday evening.

Many of the trade visitors made trips to commercial establishments in and near the city, including the Breitmeyer place at Mount Clemens, and A. J. Stahlein's movable greenhouses at Redford.

The Joint Meeting.

The business of the conventions was preceded Wednesday evening by a joint meeting of the Detroit Florists' Club, American Carnation Society and American Rose Society in the Sun Parlor of the Wayne hotel. President Browne of the Detroit Florists' Club in the chair. Addresses of welcome were given by Mayor Thompson, ex-Mayor Philip Breitmeyer, F. H. Conant, of the Board of Commerce, and Prof. A. H. Griffith, of the Detroit Museum of Art, responses being made by President Valentine and President Farenwald, of the carnation and rose societies respectively, and others. Mrs. Wm. A. McGraw addressed the meeting on behalf of the Detroit branch of the National Plant, Flower and Fruit Guild.

American Carnation Society.

President Valentine called the annual meeting to order Thursday forenoon. The president then delivered his address and reports of the secretary and treasurer followed. Referring to the Dorner memorial fund it was stated that only about half the necessary amount had been submitted by members of the society and that the subscription list would be opened to others in the trade, $1,000 being needed for this purpose. Prof. Dorner then read his very interesting paper, "The Work and Methods in Hybridizing of the Late Fred Dorner." Peter Fisher, Ellis, Mass., Richard Witterstaetter, Cincinnati, O., and Eugene Dailledouze, Brooklyn, N. Y., were appointed a committee on the president's address. At Friday's session Hugo Schroeter, Detroit, presented his paper on "Everybody's Flower" and, representatives of the National Flower Show committee reporting that $1,000 had been set aside for carnation premiums, New York was selected as the place of meeting in 1913 in conjunction with the national event. The election of officers resulted as follows: Philip Breitmeyer, Detroit, Mich.; president; R. T. Brown, Queens, N. Y., vice-president; Fred Dorner, LaFayette, Ind., treasurer; A. F. J. Baur, Indianapolis, Ind., secretary; Peter Fisher, Ellis, Mass., director; Richard Witterstaetter, Cincinnati, O., and Peter Olsem, Joliet, Ill., judges.

PRESIDENT VALENTINE'S ADDRESS.

After a good many years of discussion, we are at last trying the experiment of holding an exhibition jointly with the American Rose Society, in connection with the annual meetings of both societies. Whether this is a desirable change which ought to be continued and become an established custom will remain for this exhibition to demonstrate. There are sound arguments to be advanced on both sides of the question. To the man who comes a long distance and wishes to

CARNATIONS EXHIBITED AT DETROIT FOR THE AMERICAN CARNATION SOCIETY'S MEDALS.

Showing Gorgeous, Winner of Gold Medal; President J. A. Valentine, Silver Medal; and Wodenethe, Bronze Medal

GENERAL VIEW OF CARNATIONS AT CARNATION SOCIETY'S SHOW, DETROIT, MICH., JANUARY 10-12, 1912.

see the exhibition of both societies, the saving of time and money would be quite considerable. This feature of it appealed to me so strongly that at our meeting in this same city of Detroit eight years ago I introduced a resolution seeking to bring it about.

The object of these exhibitions is probably threefold, but if I am not mistaken they could not be successfully carried on were it not for the new varieties of roses and of carnations. Joint exhibitions ought to induce a larger attendance of florists who are in the market for novelties than where the exhibitions are held separately. The interest of the general public ought to be more largely aroused by joint exhibitions with a considerably larger attendance and larger gate receipts, if an admission fee is charged. The expense incurred for one exhibition ought to be less than for two. All of these arguments, however, would be outweighed if roses and carnations could not both be shown of good quality and in sufficient quantity at a joint exhibition. This is a difficulty which many growers have seemed to think insurmountable and the showing made at this present exhibition should go a long way toward determining that point. At the same time, undue weight should not be given to the showing made by standard commercial varieties, because the novelties are the things which most florists come to these exhibitions to see.

I think I am well within the truth when I say that the tendency is to place orders for novelties earlier and earlier each succeeding year. Early exhibitions are, in this particular, an advantage to the disseminators of new varieties of either roses or carnations. This question is a weighty one and is entitled to careful consideration. I hope that each member will take an active interest in its final settlement and that he will, as far as possible, put aside all personal prejudice and help settle it for the ultimate good of both societies.

During the years covered by the lifetime of this society, very much has been accomplished by the exchanging of ideas concerning methods of cultivation, the best manner of fighting diseases and insect pests and the discussion of other matters of mutual interest to carnation growers. The improvement made in the carnation itself, both as to size and quality, has been very marked. The American Carnation Society has been an exceptionally vigorous and virile organization and its membership has averaged to be as widely awake and keenly alive to matters that affected it as the membership of any other similar organization in this country. We have been fortunate in our membership and a number of our members have become known to carnation growers throughout the world, by reason of the excellent varieties which were originated and disseminated by them. We should, however, bear in mind that whenever a society becomes contented with its past achievements and relaxes its efforts the situation becomes perilous.

If this society is to keep abreast of other bodies of like character its members must not fail to note that the world's knowledge of the laws of heredity has been greatly increased within recent years and that other bodies of men are setting us a lively pace. Until recent years there was no knowledge which could enable an experimenter to make his crossings in an intelligent, orderly manner. Crosses were made almost at random between promising varieties, a good deal as a man might shake dice in the hope that he would make a lucky throw. In fact, many crosses are still made in that way today. The commercial carnations of today are the offsprings of numerous generations of cross-bred and inter-bred sorts, to such an extent that they are a very unstable lot, as evidenced by their almost universal tendency to produce sports. We would think a chemist was wasting labor if he tried to produce a useful compound, when he knew only the colors but not the chemical analysis of his ingredients. I believe it is safe to say that there is not a pure-bred carnation in commerce today; and in order not to be misunderstood, I will say that by pure-bred, I mean one that will uniformly reproduce itself from seed when self-fertilized.

With our present knowledge, it is entirely possible to get such pure-bred sorts within a few generations. These once produced and used as ancestors, the production of new varieties could be carried on with as notable results as have been attained by the men who have been working on similar lines with agricultural crops. Nearly all of us have tried at some time to raise new carnations and I think it will be pretty generally conceded that more is expended annually upon the production of seedling carnations than is received from the sale of cuttings.

I feel safe in predicting that within a few years we will have carnations producing flowers of such quality and in such quantity as to prove profitable in a commercial way, when grown from seed. It ought to be possible to produce strains that will be resistant to stem rot and rust; to produce summer blooming strains and strains that are suited to heavy soil or to light soil. I consider this matter of pure-bred an-

cestors of such consequence that I would urge upon those who are commercially interested in the production of new varieties, that they get together on this matter and divide the work among themselves, so that each will undertake to produce one or more such pure-bred sorts. By comparing results and by exchanging seed, rapid progress could then be made. It is entirely possible, that by such work, further knowledge of the laws of heredity could be obtained, that would be a valuable contribution, not only to this society, but to the world at large.

While we are about it, it might be well to see whether we are entirely up to date on methods of propagation. It used to take years before the raiser of rose seedlings could hazard a guess as to their value. The seedling inarch and nurse plant method of propagation have reduced this period to months instead of years. The grafting of seedlings upon established stocks by the ordinary method is also practiced but with some danger of losing the seedling, if the graft fails.

Most of you are doubtless familiar with the latest works on heredity but to those who are not, and especially to the ambitious among the younger element, let me recommend that you procure and read that delightfully entertaining and instructive booklet, entitled "Mendelism," written by R. C. Punnett and published by Bowes & Bowes, of Cambridge, England. It is simple and elementary and can be ordered through your book seller at a probable cost of less than one dollar. I shall be surprised if those reading it for the first time do not find it as interesting and as fascinating as a love story and as full of thrills as one of Conan Doyle's detective tales. If some of you have sons growing up that you wish to keep in the business and can interest them in some such a line of reading, you will have made more likely the attainment of your desire.

I am fully aware that I am open to criticism as a theorist and not a practical grower, when I presume to present suggestions of this sort to a body of men, many of whom have made a financial success of raising and disseminating seedlings, while I have nothing to show in support of my position. I shall not regret your criticism if I provoke your discussion, for even antagonism is better than indifference. While I was in Portland last summer, a friend and I were talking about the early settlers of Oregon and he told me a story which may be apropos: "A tourist asked an old settler where he had come from and he said: 'From east of the mountains.' Being again asked from what part of the plains country he came, he replied that his old home had been west of the Mississippi. The tourist was still not satisfied and asked from what state, to which the old settler replied: 'Well, I cum from Missouri; now durn you, laugh.'" Some of you may laugh at my enthusiam regarding this matter of inheritance and the Mendelian theory but I do not fail to give it serious thought, even if it does provoke your mirth.

SECRETARY BAUR'S REPORT.

Your secretary would respectfully submit the following report on the past year's work. The last convention having been held late in March, this report in some respects covers only not quite ten months.

The routine work connected with the office was gotten out in its regular order. Getting out the annual report and the collection of dues was done as is customary. We have made a special effort to collect the annual dues, but in spite of our efforts there are many who have not paid their dues for the current year. Out of a membership of 347, 66 have failed to pay their dues for 1911. Besides these, there are 44 who are delinquent for 1909 and will be dropped from the roll. Six additional ones sent in their resignations. So that our membership, instead of increasing, has decreased during the past year. Forty-four new names were added during the year.

One of our members was called from our very midst during the year. John Birnie, of West Hoboken, N. J., who died of heart failure while attending the S. A. F. convention at Baltimore in August.

The society button is meeting with fair success. Over 100 members have supplied themselves with them. To make it a complete success, every member should have one and wear it wherever he goes.

An invitation was received from the National Conservation Association for this society to send five delegates to the congress which was held on August 25-28. The president appointed as delegates W. L. Rock and Samuel Murray of Kansas City, J. F. Wilcox of Council Bluffs and Fred H. Meinhardt of St. Louis, Mo. A report will be made by these gentlemen at this meeting.

In compliance with instructions given at the Boston meeting, the secretary addressed a letter to the members of this society asking for contributions to the Frederick Dorner Memorial Fund. This letter was followed up with two additional ones, urging a general response. The funds which were thus collected were turned over to our treasurer, who put them on interest as they were turned over to him. A detailed report will be made at this meeting.

The joint meeting and exhibition between our society and the American Rose Society, which is now in progress, was arranged for as an experiment. Whether you wish to continue these joint exhibitions in the future will be for you to decide. An admission fee is being charged at the door of the exhibition. This society shares in these receipts to the extent of 25 per cent of the total receipts.

The premium schedule was issued at the usual period preceding the exhibi-

tion. Our friends have favored us with a generous lot of advertising, some 23 pages being taken. This will pay for the printing and leave a considerable balance for the treasury.

No meeting was held by the board of directors at Baltimore last August, but as there were not enough present for a quorum, an informal meeting was held with some of the rose society members in which the plans for the joint meeting were discussed, but no action could be taken on any of the questions discussed.

To the trade press is due our thanks for publishing gratuitously our registrations and other matters.

To the men of Detroit is also due credit for the manner in which the exhibition is staged. To them we recommend a vote of thanks.

TREASURER DORNER'S REPORT.

The following is Treasurer Dorner's report:

EXPENDITURES.

Paid orders by vouchers	$1,268.84
Cash on hand January 10, 1912	416.62
	$1,685.46

Received from secretary	$ 437.00
Interest	7.04
	$444.04

REPORT ON PRESIDENT'S ADDRESS.

Regarding joint meetings of the American Carnation Society and the American Rose Society it would seem desirable to have both societies contine to hold their meetings together, providing we find the interests of either do not suffer by this procedure.

In carnation breeding, we consider our president's remarks regarding the laws of heredity as applied to carnations, mostly of the deepest consideration by all our members.

As regards the reproduction of the pure or fixed strain of carnations and colors from seed, experience thus far shows that in breeding has not proven entirely satisfactory, although quite profitable as examples of Buttercups, McGowan and Enchantress have shown so far weakness of constitution, has been very marked under this procedure.

We believe much can be done by selection of existing varieties, with the view both to their improvement and longevity, the latter a very important point as real acquisitions amongst new seedlings are few and far between.

We also consider the work on prevention of carnation diseases a deep one and well worthy of the careful study of every member of our society, professors included.

The suggestion on improved means of propagation also comes within this scope and we would gladly welcome any practical suggestions along these lines as so much depends upon starting right.

We do not consider varieties obtained from sports any detriment to our list of desirable sorts as many of our best existing varieties of both roses and carnations have been obtained in this way and usually exhibit improvement in vigor.

PETER FISHER,
RICHARD WITTERSTAETTER,
EUGENE DAILLEDOUZE,
Committee.

CARNATION BENORA.

Peter Fisher's New Carnation.

REPORT ON FREDERICK DORNER MEMORIAL.

At the meeting in Boston a resolution was offered and passed expressing a desire on the part of the American Carnation Society to commemorate the great work done by the late Fred Dorner in the improvement of the carnation.

Instructions were given the secretary to canvass the membership of this society for funds to carry out this desire. Contributions were to be limited to $2.00 from each person, and it was hoped that every member would deem it a privilege to contribute. On May 15 a letter was sent setting forth the desires of the society and stating what is proposed to be done with the money raised. On July 1 this was followed with another letter urging every member to contribute his share. This was followed by a third and final letter on August 1. These requests brought responses aggregating some $433.00 paid in and $8.00 promised but not yet paid in. We also have a number of letters offering additional funds if needed to make up the amount wanted.

Having done about all that could be done along the lines suggested in the instructions given, we now ask the meeting to decide on what further steps shall be taken. The $433.00 were turned over to the treasurer (Mr. Dorner) in batches as they were received, which were in turn put on deposit to draw interest.

REPORT OF NOMENCLATURE COMMITTEE.

Your nomenclature committee begs leave to report having received registrations of five American varieties since the publishing of the last annual report.

There were also sent over by the Perpetual Flowering Carnation Society of England registrations of six varieties. One of these was a duplication of an old variety and we have requested that it be changed.

We have also entered an arrangement whereby the date on which a registration is received shall establish priority in the right to use a name which might be offered for registration by more than one grower.

CARNATION GORGEOUS.

Peter Fisher's Prize Gold Medal Winner.

AWARDS.

One hundred blooms, white—Chas. H. Totty, Madison, N. J., first; Chicago Carnation Co., Chicago, second.

One hundred blooms flesh pink—Nic Zweifel, North Milwaukee, Wis., first; F. Dorner & Sons Co., LaFayette, Ind., second.

One hundred blooms light pink—Mt. Greenwood Cemetery Association, Morgan Park, Ill., first; C. C. Pollworth Co., Milwaukee, Wis., second.

One hundred blooms dark pink—F. Dorner & Sons Co., first; Chicago Carnation Co., second.

One hundred blooms red or scarlet—Elmsford Nurseries, Elmsford, N. Y., first; C. C. Pollworth Co., second.

One hundred blooms crimson—Wanoka Greenhouses, Barneveld, N. Y., second.

One hundred blooms mottled or overlaid—Wanoka Greenhouses, first; Mt. Greenwood Cemetery Association, second.

Sweepstakes, best vase in the above classes—C. H. Totty.

Fifty blooms White Perfection—C. C. Pollworth Co., second.

Fifty blooms White Enchantress—The E. G. Hill Co., Richmond, Ind., first; W. J. & M. S. Vesey, Fort Wayne, Ind., second.

Fifty blooms any other white—C. C. Pollworth Co., first; F. Dorner & Sons Co., second.

Fifty blooms Enchantress—A. C. Brown, Springfield, Ill., first; Chicago Carnation Co., second.

Fifty blooms Pink Delight—S. J. Goddard, Framingham, Mass., first; F. Dorner & Sons Co., second.

Fifty blooms any other flesh pink—F. Dorner & Sons Co., first.

Fifty blooms, Winsor—Albert J. Stahlein, Redford, Mich., second.

Fifty blooms any other light pink—Albert J. Stahelin, first.

Fifty blooms Mrs. C. W. Ward—C. C. Pollworth Co., first; A. C. Brown, second.

Fifty blooms any other dark pink—Chicago Carnation Co., first.

Fifty blooms Beacon—C. C. Pollworth Co., first; The E. G. Hill Co., second.

Fifty blooms Victory—Chicago Carnation Co., first; W. J. & M. S. Vesey, second.

Fifty blooms any yellow or yellow variegated—A. C. Brown, second.

Fifty blooms Bonfire—Chicago Carnation Co., first.

Fifty blooms Gloriosa—S. J. Goddard, first; Chicago Carnation Co., second.

Fifty blooms White Wonder—S. J. Goddard, first; W. J. & M. S. Vesey, second.

Fifty blooms Princess Charming—Chicago Carnation Co., first.

Fifty blooms Bright Spot—A. C. Brown, first.

One hundred blooms, any variety, A. C. S. medals—Peter Fisher, Ellis, Mass., gold medal with Gorgeous; R. Witterstaetter, Cincinnati, O., silver medal with President J. A. Valentine; Chas. H. Totty, bronze medal with Wodenethe.

Fifty blooms, S. A. F. medals—F. Dorner & Sons Co., silver medal with Rosette; The E. G. Hill Co., bronze medal with No. 311.

Fifty blooms, certificate of merit—Traendly & Schenck, New York, certificate for Salmon Queen; Thos. F. Browne, Greenfield, Mich., certificate for No. 23.

Twelve blooms, preliminary certificate of merit—Chicago Carnation Co., certificate for seedling No. 225.

Arrangement 100 to 200 blooms—Albert J. Stahelin, first; F. Dorner & Sons Co., second.

Display covering 80 to 100 square feet of space—Albert J. Stahelin, second.

American Rose Society.

On Thursday afternoon President Farenwald called the annual meeting to order with the address of the president, reports of the secretary and treasurer following. There was a considerable discussion of Secretary Hammond's recommendation that the society establish a quarterly publication for the benefit of its members and this finally resulted in the adoption of the recommendation, five members contributing $100 each for this purpose, as follows: W. J. MacKendrick, Toronto, Ont.; J. M. Good, Springfield, O.; Robert Pyle, West Grove, Pa.; W. R. Pierson, Cromwell, Conn.; W. H. Elliott, Brighton, Mass. Chairman Totty of the National Flower Show committee reported that $2,000 had been appropriated for the society's premiums in connection with the National Flower Show in New York in 1913 and this city was accordingly selected for the next annual meeting and exhibition. The officers elected are: Adolph Farenwald, Roslyn, Pa., president; Frank H. Traendly, New York, vice-president; Harry O. May, Summit, N. J., treasurer; Benjamin Hammond, Fishkill-on-Hudson, N. Y., secretary; F. R. Pierson, Tarrytown-on-Hudson, N. Y., and Robert Simpson, Clifton, N. J., members of the executive committee. Robert Pyle, of West Grove, Pa., delivered his fine stereopticon lecture, "The Rose as Noticed in Europe," in the Sun Parlor of the Wayne hotel, Thursday evening. Papers by Irwin Bertermann, Indianapolis, Ind., on "Roses in the Middle West," and Chas. W. Fullgraf, St. Louis, Mo., on "Roses in the Mississippi Valley," were presented and ordered printed in the society's proceedings.

PRESIDENT FARENWALD'S ADDRESS.

Fellow members of the American Rose Society, following the generous invitation of the Detroit Florists' Club to hold their annual convention at Detroit, the city which will in the near future wrestle with Chicago for the supremacy of the middle west, we meet again, after another strenuous year has rolled around, to look over the battlefield to see what has been gained or lost. I hope the most of you have gained in knowledge and prosperity. Those who have gained knowledge in our profession should be generous to share it with some of their less favored fellow members, by freely distributing information when questions are asked on subjects with which they are familiar. This sharing of knowledge is the most important plank in our society. Close that fountain, and the life of our society would be very short. So, I hope that every member will take an interest in our meetings and show that he is willing to help to uplift and uphold what is best in our society. And not alone in the meetings, but also out of them. He should be generous with his knowledge when some of our timid fellow members ask questions, for we do not all have the nerve to stand up in an open meeting to debate and question. So, fellow members, give freely where it is asked. No man is so wise but that he needs advice some time or other.

I think our profession has kept abreast of the times in every way. The increase in glass put up must have been enormous, though I have no figures to give. It was greatly

stimulated by the low price of building material. Cultural methods and economies are continuously being improved upon. The grower of cut roses has not been falling behind, I am sure. Neither has the wholesaler and retailer, or else the output of cut roses could not have been handled so profitably for all. Only wide awake men can get into it and survive. While our business has prospered all over the country, I cannot give quite such a rosy view of our society. We have gotten some new members, to be sure, some annual and some new life members. But what does that signify, when we take into consideration the thousands of men who are making a competency by growing roses, and the men who handle the product, either wholesale or retail? Every one of our members should be an apostle in this particular sphere of interest at home, to advance the cause of the American Rose Society. Our people, always so willing to uphold a good cause, seem to be singularly lacking in interest, and that where it affects the most vital parts of their business, namely, the upholding and advancement of the rose, either as cut flowers or plants. The English rose society last year increased its membership by several thousand. Are men and women in our profession here less keen in their appreciation of a strong rose society? It seems so. But why? Possibly because they think their places as growers or storekeepers are so small that they do not count. Surely they are badly mistaken. We need every one, large and small. Their successes and their failures will fit in where most needed to either inspire the already successful ones to still a further go, or to put new life and energy into those men whom the gods have favored less.

After many fruitless attempts to hold a joint convention with the American Carnation Society and our society, they have at last joined hands to hold their convention and exhibition together here in Detroit, in the same hall. Both societies had to somewhat change their plans. Whether this joint meeting will prove successful, I am at the present time not able to say. But I do hope for the best, as there were many points in favor of doing so. The officers of the rose society and its executive board were unanimous in this move. I know many members are dissatisfied with such an early date, but let us wait with criticism until after the meeting. Without giving it a trial we are not able to state positively either for or against the Detroit meeting. I hope that this exhibition is all it should be—an educator to us and the public.

Also, we must do our best to advance the growing of out of door roses, in whichever way we can do it best; for that is where our amateur members will come from later. We must, before all, interest the nurseryman to grow out of door roses best suited to his locality and to make exhibits in the June shows. There are no better object lessons for the public than these.

New roses are coming in abundance from everywhere. This is a splendid showing, which I am sure is largely due to the influence of the American Rose Society's efforts and its exhibitions. We must continuously advance. Of course, that makes it so much harder for any new rose to qualify, but when a winner it will simply repay all their losses to the hybridizer or to the distributor. We should encourage the hybridizer in his efforts. I would suggest here that the distributor test his new roses a little more carefully before sending them out by giving some plants to other firms in different localities to grow them. This test may be a little more costly, but will pay a great deal better to both parties, the distributor and the grower who buys them. I also strongly advise florists' clubs everywhere to use their influence with their respective state legislatures to establish experiment stations in their state colleges to test plants and fertilizers, so that in both respects we would not be groping too much in the dark, as we mostly do now.

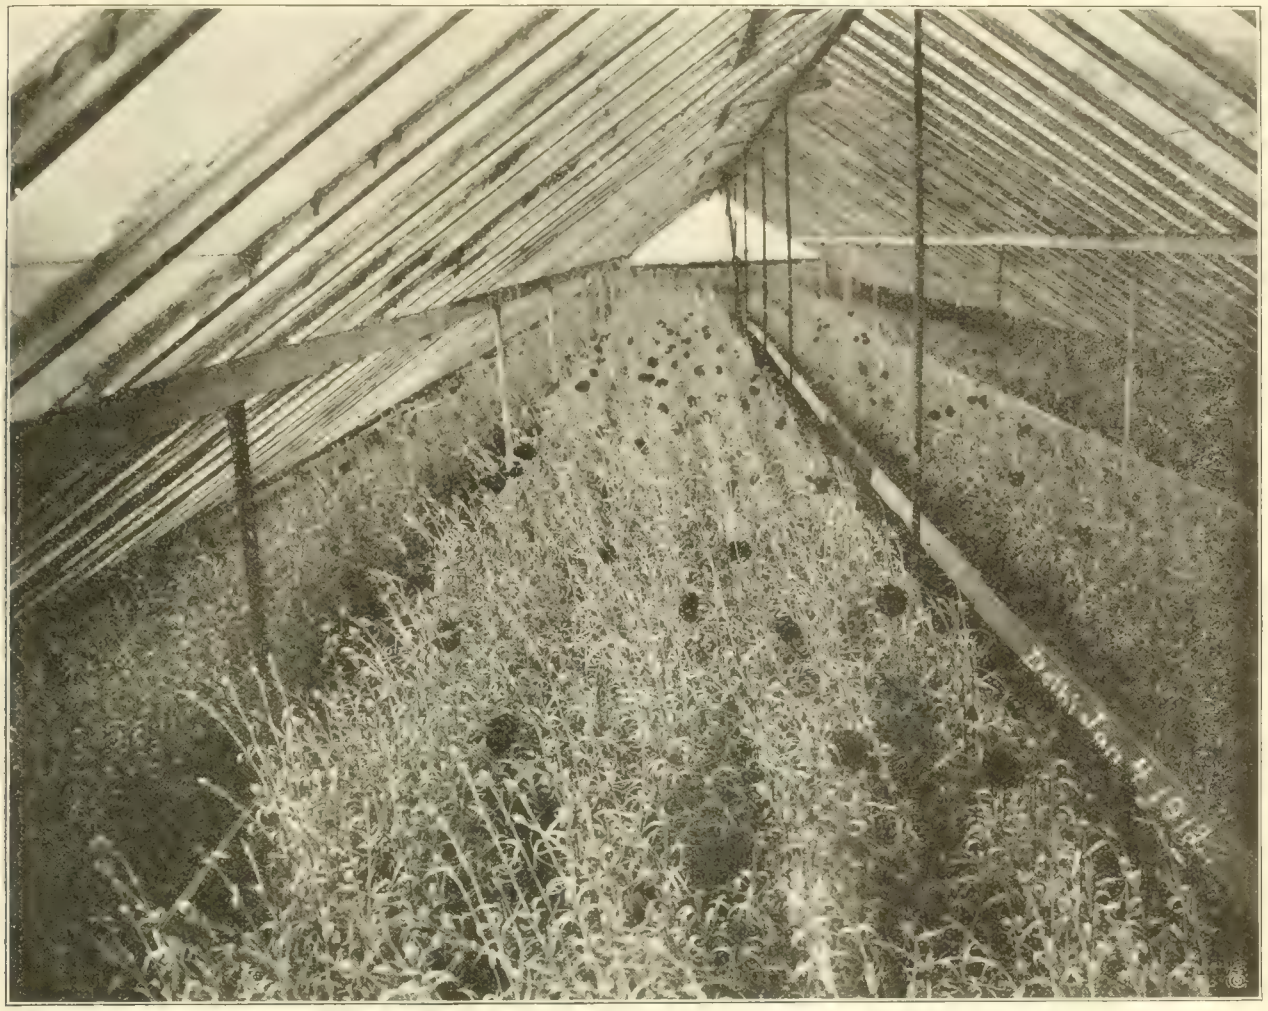
In conclusion I should say the strengthening and upbuilding of our society needs some sacrifice in time and money on the part of every loyal member. Every good cause has only advanced in such a way, and who will not say that our aims are less deserving. So, fellow members, if any of you who are facing me came with a grouch on, forget it. Look around, reflect, there are others. Bear your sacrifices with a cheerful smile; it will make it easier to you and more pleasant to the rest. The cheerful giver is the most beloved. When you return home, go to your neighbor in our profession, smack your chest, and tell him you went to Detroit in zero weather, running chances of trouble at home, but thought it would be good for you and your business. Tell him you saw and heard a lot and gave something in return. Make them feel that they have missed something, and that they will not be behind another year. Then you have fulfilled your mission to the American Rose Society. You are a loyal and a royal good fellow!

SECRETARY HAMMOND'S REPORT.

The American Rose Society presents to the eyes of the people of Detroit some of the choicest productions of the rose which can be grown under glass—this early date precluding the exhibition of pot plants. Nevertheless, the spirit of the brightest of flowers is here to stimulate the spirit of mankind which admires beauty wherever it may be seen; and in this city of homes and enterprise, by the side of our greatest highway of the inland seas, as the national society of America we pay our respects, in the hope of encouraging extended interest in things choice, chaste, and beautiful.

The American Rose Society has prospered during the past year. Addition has been made to its permanent fund and the members have paid their dues. This means stability. But to the mind of your secretary there are

FIRST PRIZE DISPLAY OF ROSES BY A. N. PIERSON, INC., AT THE DETROIT SHOW.



NEW CARNATION DELHI, GROWN BY C. C. MURPHY, CINCINNATI, OHIO.
Disseminated by Wm. Murphy and S. S. Skidelsky & Co.

two classes which should be represented by greater numbers in our membership, the growers of rose plants and the amateurs. The first should see the advantage and the second needs a little encouragement to be fully in touch.

After five years' experience as secretary I emphasize again the recommendation made by several members at the meeting held in Washington, for the issuing of a special quarterly bulletin to amateur members, thus keeping in touch with people who would feel that they were being looked after. This cannot be done without some expense. The suggestion was, in a measure, worked out, but when reported at the Chicago meeting it was thought better to do it in another way, but this other way did not materialize. So we have only one way to reach the people, and that is with the Annual Bulletin, which seems to be appreciated. The able papers presented year by year are thus made matters of permanent record, and so far these papers have been of real interest to growers and admirers of the rose, and the commercial value of rose growing depends upon the admiration of the flower by the people.

At the Boston meeting a suggestion was made concerning a rule of measurement of stems as a means to understandingly regulate the value of various grades of roses in the market. During the year the second gold medal was issued, and awarded to M. H. Walsh of Woods Hole in recognition of the eminent service rendered by him in hybridizing the Wichuraiana roses. Silver medals were sent to A. B. Scott & Sons of Sharon Hill, Pa., also to S. J. Reuter & Son, Inc., Westerly, R. I., and to Waban Rose Conservatories, Natick, Mass. One silver and one bronze medal was sent to the Toronto Horticultural Society, one bronze medal to the Minnesota State Rose Society, one silver medal to the Annandale Rose Meeting, Annandale, N. Y., and two bronze medals for rose gardens made and tended by a school girl and boy at Fishkill-on-Hudson, N. Y.

There is another matter which seems to me to be of prime importance for the American Rose Society to take up and act upon, as part of its permanent work. Is there anywhere a full list of the names and varieties of roses originated in America? Such a record should be made, and when a new rose is disseminated, if it was recognized by competent judgment on behalf of the American Rose Society and then recorded, this would be a safeguard against duplication and of much value to an originator.

Our society holds a permanent invested fund made by the late Mrs. Gertrude M. Hubbell of Washington, D. C., to award every five years a valuable gold medal for the best rose of American origin. Mrs. Frances Roche of Newport, R. I., has placed at the disposal of the society a prize of $50.00 for the best yellow rose to resemble the color in Marechal Niel, but with stronger stem, to be competed for at any show selected by this society after June, 1912.

All members of the American Rose Society can feel that the idea a "Rose for every home, a bush for every garden," meets response in the hearts of the people.

TREASURER MAY'S REPORT.

Receipts		$1,485.66
Disbursements	$743.40	
Cash in bank	742.26	
		$1,485.66
Investment account		3,000.00
Permanent and Hubbard medal fund		350.00

AWARDS.

Division A.

Best display of cut roses covering not less than 200 square feet of space, and not to contain less than 200 blooms, quality of blooms and effect to be considered, and decorative green of any kind, including plants, permitted—A. N. Pierson, Cromwell, Conn., first; Adolph Farenwald, Roslyn, Pa., second; Fred Breitmeyer Floral Co., Mount Clemens, Mich., third.

Division B.

Fifty American Beauty—Bassett & Washburn, Chicago, first; Poehlmann Bros. Co., Chicago, second; Myers & Samtman, Chestnut Hill, Pa., third.

Fifty Killarney—Joseph Heacock Co., Wyncote, Pa., first; Wm. H. Elliott, Brighton, Mass., second.

Fifty Dark Pink Killarney—Montrose Greenhouses, Montrose, Mass., first; A. N. Pierson, second.

Fifty Double Pink Killarney—Myers & Samtman, first; Poehlmann Bros. Co., second.

Fifty White Killarney—Poehlmann Bros. Co., first; A. N. Pierson, second.

Fifty Double White Killarney—A. N. Pierson, first.

Fifty Richmond—Poehlmann Bros. Co., first.

Fifty My Maryland—A. N. Pierson, first; Myers & Samtman, second.

Fifty Mrs. Aaron Ward—Poehlmann Bros. Co., first; W. H. Elliott, second.

Fifty Lady Hillingdon—A. N. Pierson, first.

Fifty Melody—Poehlmann Bros. Co., first; Fred Breitmeyer Floral Co., second.

Fifty Radiance—A. N. Pierson, first.

Fifty Prince de Bulgarie or Antoine Rivoire—Poehlmann Bros. Co., first; A. N. Pierson, second.

Fifty any other disseminated variety—Myers & Samtman, first; Fred Breitmeyer Floral Co., second.

Division C.

Twenty-five American Beauty—Poehlmann Bros. Co., first; Myers & Samtman, second; Gude Bros. Co., Washington, D. C., third.

Twenty-five Killarney—W. H. Elliott, first; Joseph Heacock Co., second.

Twenty-five Dark Pink Killarney—A. N. Pierson, first; Poehlmann Bros. Co., second.

Twenty-five Double Pink Killarney—Myers & Samtman, first; Poehlmann Bros. Co., second.

Twenty-five White Killarney—John R. Andre, Doylestown, Pa., first; Poehlmann Bros. Co., second.

Twenty-five Double White Killarney—A. N. Pierson, first.

Twenty-five Richmond—Poehlmann Bros. Co., first; W. H. Elliott, second.

Twenty-five My Maryland—A. N. Pierson, first; Poehlmann Bros. Co., second.

Twenty-five Bridesmaid—Bassett & Washburn, first.

Twenty-five Rhea Reid—Bassett & Washburn, second.

Twenty-five any other disseminated variety—W. H. Elliott, first; A. N. Pierson, second.

Division D.

Best 50 blooms new rose not in commerce—E. G. Hill Co., Richmond, Ind., first, with Sunburst; Stockton & Howe, Princeton, N. J., second, with Princeton.

Division E.

Best and most artistic display of cut roses, and with such accessories as the exhibitor may desire—E. A. Fetters, Detroit, Mich., second.

Special.

Dorrance challenge prize for the largest and best display of cut roses, silver medal—Gude Bros. Co.

The Alexander Montgomery silver cup was won by Stockton & Howe, with new rose Princeton.

Sweepstake prize for the choicest exhibit of perfect roses, the Ellwanger & Barry silver cup, was awarded to A. N. Pierson.

Work and Methods of Fred Dorner.

Paper read by Prof. H. B. Dorner before the American Carnation Society at Detroit, Mich., January 11, 1912.

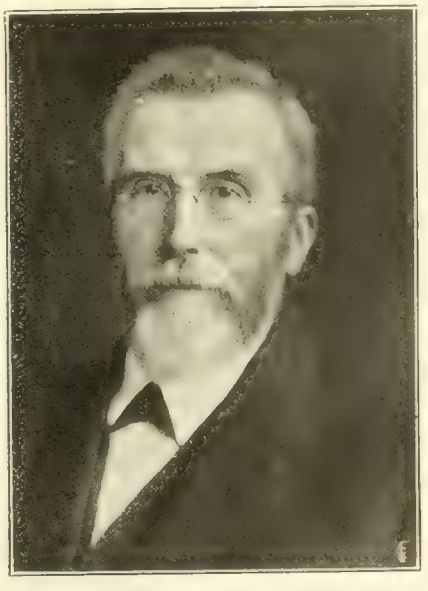
At the earnest solicitation of your president, I am presenting to you today a paper on "The Work and Methods of the Late Fred Dorner in the Hybridization of Carnations." It is a pleasure to do this, as I was directly associated with him for a number of years in this his most beloved work.

Fred Dorner was born in the little town of Schilltach, Baden, Germany, and it was there that he spent the first seventeen years of his life. He inherited from his mother his great love of flowers and in his early years devoted a great deal of time to the care of her garden. At the age of seventeen he emigrated to this country and joined his brother at LaFayette, Ind. There he was employed for a number of years at various occupations. In about 1870 he rented a place then known as Gaasch's Garden, and became a market gardener. In the little greenhouse on the place he raised a few potted plants which were sold mostly from the wagon at the market place. Five years later he moved to Indiana avenue where he had better greenhouse facilities. There his time at first was divided between the growing of flowers, fruits and vegetables, but as the demand for flowers became greater the growing of fruits and vegetables was omitted. At this time his trade was purely retail and the houses were devoted to such miscellaneous stock as was required at that time. This then was the scene of his first achievements in carnation breeding.

In about 1888 Fred Dorner became interested in some experiments in the breeding of carnations being carried on by Mr. Van Landeghem who had charge of the small greenhouses at Purdue University. He quickly saw the possibilities of the work and became so deeply interested that he took up this line of work himself. For this purpose he used the varieties which he was then growing and which his records tells us were Silver Spray, Grace Wilder, E. G. Hill, Century, Buttercup, Hintze's White, Mangold, Mrs. Cleveland, Wm. Swayne, Sunrise, Robt. Craig and a variety called Purdue which was raised by Mr. Van Landeghem but never disseminated. In the following three years he added the varieties Starlight, Portia, Garfield, Tidal Wave, Andalusia, Golden Gate and Daybreak which were all used in his work and show today in many of the seedlings grown.

As a result of this first year's work in crossing he secured about 500 seedlings. These were planted in the field and carefully observed and those which he desired to test out were brought into the house. Well can I remember seeing him day after day carefully examining these wonderful flowers as they were opening. His records show us that of the 500 seedlings grown about 25 per cent were splits, 50 per cent were singles and 25 per cent commercials. From this first year's work were secured the varieties Christina Dorner, Tecumseh, Hoosier, Mrs. Harrison, Indiana and Ben Hur. This then marks the end of his first year's work in the breeding of carnations.

The growing of these seedlings necessitated further accommodations and so a leanto house about 50 feet long and 10 to 12 feet wide was built and



The Late Fred Dorner, Sr.

was heated by means of two stoves. The carnations were planted directly in the bench the same as today and were carefully observed and varieties selected for further testing. This little house was the home of the seedling carnations for two years until he moved into his new range on the opposite side of the street. With this beginning he continued and from year to year grew many seedlings and offered to the public at least one new variety each year. His work continued uninterruptedly for twenty-one years and during this time he grew over 150,000 seedling carnations. Of this 150,000 not more than 75 ever reached the market. The larger number of them went to the dump-heap, but we cannot say that their existence was in vain, for many of them were the ancestors of some of his best varieties of today.

Fred Dorner always believed that many of the failures of new varieties were due to the fact that the owners treated them and thought of them as they would pets. They could only see their good qualities and not their shortcomings. After the first few years, with this idea in mind, he insisted upon a thorough test of each variety and would not disseminate it until he was thoroughly convinced that it was better than something already on the market or that it might fill a gap somewhere. It can be truthfully said that no variety was put on the market from his greenhouses unless, as near as he could tell, it possessed qualities that would make it a good market variety.

It may be of interest to have a list of the varieties resulting from his careful and painstaking work. This list does not include all of his varieties that were disseminated but merely those which he put upon the market himself and those disseminated by E. G. Hill early in the nineties. The list is as follows:

Christina Dorner	Ceres
Tecumseh	White Cloud
Hoosier	Mary Wood
Mrs. Harrison	G. H. Crane
Indiana	Lorna
Ben Hur	Morning Glory
Richmond	Dorothy Whitney
Purdue	Stella
Spartan	Sibyl
Mrs. Elizabeth Reynolds	Apollo
	Alba
Mad. Diaz Albertini	Senorita
Dr. Smart	Mauvina
Blanche	Bizarre
Wabash	The Belle
Wm. Scott	Neptune
Western Pride	Lady Bountiful
The Stuart	Eclipse
Storm King	Aureola
E. A. Wood	Fiancee
Uncle John	White Perfection
Michigan	Red Chief
Goldfinch	Bonnie Maid
Dazzle	Winona
Mrs. C. H. Duhme	Pink Delight
Meteor	Scarlet Glow
Bridesmaid	White Wonder
Mrs. G. M. Bradt	Gloriosa
Gold Nugget	Rosette

Many of you are familiar with this part of his work and perhaps would be more interested in the methods used in securing his results. One rule which he insisted upon following was the selection of the best and the use of none but the best varieties in his breeding work. He selected as the time for crossing the months of January and February. This selection was made for two reasons; first, because the flowers at this season were at their best and so he had a fair idea as to form, color and growth; the second, and perhaps most important reason, is that at this time of the year there were no insects to interfere with the work. When insects are present they carry the pollen from flower to flower as they seek the honey and make it impossible to have pure crosses unless each flower is carefully protected by means of a paper bag. This last operation would mean a great expense where from 700 to 1,000 crosses are made each year. This expense is not so much the cost of material as the time necessary to put the bags on and to remove and replace them.

In preparing his flowers for seed the first operation was emasculation, or in other words the removal of all stamens. The flowers were selected before the anthers were open and the stamens and inner petals were cut off at about the top of the calyx. The outer petals were left intact as they always fold up when the ovules are fertilized and so make good indicators. The flower was then staked and left until the pistil was receptive as was

shown by its hairy condition. The pollen was then transferred from the flower selected by means of a camel's hair brush to the pistil of the emasculated flower. In a few days the petals would curl and close toward the center and after they had become dry they were entirely removed. Later when the seed pod had almost reached full size the calyx was cut away so as to prevent moisture lodging at the base of the pod and causing it to decay. The seed, which was ripe by March and early April, was gathered and sown within two or three weeks. The young seedlings were transferred to pots and planted in the field as soon as they were large enough. In the field the plants from each pod had their label giving the number of the cross and the parentage. These plants were allowed to grow without topping and as soon as they began to flower selection was made of the plants to be taken into the house. During some years more than 2,000 seed plants were benched.

The best varieties are those which flower earliest in the field and so none of these were neglected. As the plants flowered, all those with double flowers and perfect calyx were marked and then topped so as to make them branch as much as possible. This selection was continued up to the time that the plants were removed to the house. The seedlings were always some of the last to be brought under shelter and so all the good varieties had a chance to flower out of doors. All varieties not producing blooms by the time of the early frosts were left in the field with the singles and splits, as they were entirely worthless because of their cropping habit. In this manner all the croppers were eliminated.

In the house each plant was given a label which was the number of the seed pod and as the plants began to flower all promising varieties were selected for a second year's trial and given a new number with the year. The cuttings were made from those plants selected and given a second year's trial. If they showed up well the second year they were carried on for a third year, but it was not until after a fourth year's trial that they were placed upon the market. During the time of growing seed, during January and February, no flowers were removed from the second and third year plants as it was desirable to test their keeping qualities on the plants as well as to have the flowers for crossing purposes. In this way one was also able to test the color, whether or not it would fade out in the sunshine.

Fred Dorner possessed the happy faculty of seeing future possibilities in the various varieties. In his work he would use for the growing of seeds varieties that to an outsider seemed very poor. However, an intimate knowledge of the variety itself as well as its parentage, suggested to him that it might be the basis of a large flower, a good calyx, a long stiff stem or a good constitution. Unless the breeder possesses this faculty to a greater or less degree his work will be entirely haphazard.

He also realized that system and the keeping of records were absolutely necessary for success in his chosen work. He not only thought that the records were necessary, but he kept them with him at all times during the flowering season so that when in walking through the house his attention was attracted to some variety he was able to look up its parentage and find where it derived its peculiar qualities. These records consist of the number of the plant, the year, the number of the seed pod, the parentage, the color and notes on the habit. He made further study of his various seedlings and would spend much time passing from plant to plant noting its good and bad qualities and studying its ancestry. He was so familiar with them that he could call hundreds by their numbers and give their parentage.

After the first few years no foreign varieties were used in his work due to the fact that these varieties might have had ancestors with objectionable characters that might show up at any time in the progeny. His work, then, was confined to his own varieties and especially to those in their second and third year's trial. Only such plants as had good constitutions were employed. Such varieties as were subject to stem-rot, rust and other diseases were discarded, as he always had in mind the development of disease resistant varieties and worked with that end in view.

Before discussing his rules concerning color, foliage, stem and calyx, it might be well to get some conception of his ideal carnation towards which he was ever striving. He realized that without a good foundation a plant could not produce good flowers nor many of them. His first requisite then was a plant that should have branches in all stages of development and when planted in the bench should show the same number of flowers and buds during the entire year. The leaves of the plant were to be broader and shorter than those varieties that belong to the class known as croppers. The leaves were to have a very strong bluish green color, as this is the natural color of those carnations that have strong constitutions. The stems were to be long and stiff enough to carry the flowers. This did not necessarily mean that they were to hold the flower perfectly erect, as he preferred that the heads should bend just slightly toward the side and so prevent them from looking stiff. The flowers themselves were to have purity of color, were not to be over filled with petals, were to have size, symmetrical form and fragrance and were to have a non-splitting calyx.

With this ideal in view he applied certain rules in order to approach his goal. The early seedlings showed a great variety of color due to the fact that in an effort to build up a strong constitution it was necessary to use varieties that should have been in classes by themselves. After building up the constitutions it was necessary to secure pure colors. This he accomplished by the careful selection of the colors used. In order to develop a white strain he used white with white, never adding any other color. To secure pinks he used pink with pink, paying little attention as to whether they were light, medium or dark, but to get the clear pinks as represented by Fiancee and Gloriosa if was necessary to eliminate the use of any pink with a blue or red undertone. To secure reds he used red with red or used yellow with his red in an attempt to intensify the color. In speaking of reds in this case we of course include all the scarlets. For yellow he used yellow with yellow, or in some cases used white or red with the yellow, the red being used to deepen the yellows. Scarlet maroons were used with scarlet maroons or scarlets. Purple maroons were relegated to the purple class. All shades of purple and lavender were used together. In the case of the variegated varieties the course was determined by both the ground color and the variegation so that with a red and white variegated flower, a red and white variegated might be used or a clear red or white. By following these rules he developed what might be called color strains which when used together today give colors of the same value.

In regard to foliage he always made it a rule never to use together two plants with heavy coarse foliage and heavy stems. He preferred using a variety with fine foliage with these coarse foliage ones. While it is true that the coarse growing varieties give the largest flowers, they do not produce enough of them to make them good commercial varieties. The plant with the intermediate foliage is usually the best, giving more flowers of a good average size. He always made it a rule not to use, if possible, two short stemmed varieties but to use a long and a short stem together or two long stemmed varieties. The union of two long stemmed varieties in many cases gave short stemmed ones in the first generation, but they also gave long stemmed ones again in the second or third generation. Where varieties having large flowers or an over abundance of petals were used the pollen was secured from flowers inclined to be semi-double. This was, in a way, to prevent the bursting of the calyx. However, it is not always the number of petals but the way in which they emerge from the calyx that causes the calyx to split. Where the petals push out from the calyx and continue to develop afterwards there is little trouble in splitting. But where they start to expand before issuing from the calyx the calyx is sure to split. This he always kept in mind.

Before closing I should like to call attention to a race of carnations, if I may call it such, which are direct descendants of the Daybreak which has played such an important role in carnation breeding. Among the seedlings raised from Daybreak was White Cloud. Lorna, the next of the series, is a seedling of White Cloud. From Lorna came The Belle and from The Belle came White Perfection. White Wonder, the latest of the series, is a seedling of White Perfection. This series is the only one that has ever occurred among the new varieties sent out.

In closing I should say that Fred Dorner's greatest pleasure was to have his florist friends visit him and spend a few hours among his favorite flowers. The work to him was ever fascinating and never lost its charm.

McKEESPORT, PA. — The Christmas business was not as good as in other years, writes J. H. Orth. All the stores handled holiday greens, so the florist had to sell at low prices with the result that nobody made any profit on these goods. One paint and glass house sold Christmas trees and other greens, so it is up to the florist to buy no paint or glass of them. The business is overdone here, there being six stores with a population of 40,000.

Rose Novelties at Detroit.

In new varieties of roses at the Detroit show there was little that has not been seen and discussed at some of the previous shows and meetings, but some will stand discussion again.

One variety that perhaps attracted the most attention, and that everybody is most longing for, was Red Killarney exhibited by A. N. Pierson, Inc., of Cromwell, Conn. This variety in bud is of a very fine red and after expanding changes to dark pink. If this rose can be grown as well as its parent, the pink Killarney, it should be one of the best additions to the list of forcing roses in recent years.

Sunburst shown by E. G. Hill Co. of Richmond, Ind., and disseminated this year, showed up well. This rose has been exhibited at all the fall shows and is pretty well known to most rose growers by this time and considered one, if not the best, yellow, of recent introductions. Those who have seen it grow at Richmond are well satisfied with its habit.

A variety of which little has been heard so far, was Princeton, exhibited by Stockton & Howe of Princeton, N. J., said to be a seedling from Safrano crossed with Ulrich Brunner. The color is a deep cerise pink, a shade similar to Rose Queen sent out last year. The foliage was large and carried well up to the bud and the stems were stiff.

Madison, a white rose by Brant & Hentz of Madison, N. J., was shown under a disadvantage, as it arrived frozen, but from all appearances it would hardly hold its own against White Killarney and its double sports.

Killarney Queen and Double White Killarney, exhibited by A. N. Pierson, Inc., were both much admired and commented upon, showing great improvement over existing varieties and no doubt both will be in good demand and largely grown in the near future.

One variety, while not new, has not been shown before and is little known in the west, Mrs. Waddell, exhibited by W. H. Elliott of Madbury, N. H. This is a large copper-colored flower carried on long, stiff stems, with fine heavy foliage, and should find ready sale as a novelty in limited quantity.

W. J. KEIMEL.

Carnation Novelties at Detroit.

Gorgeous, the winner of the gold medal offered for the best 100 carnation blooms any variety, can be best described as a very bold flower of the deep cerise color, yet this will hardly do the flower justice, the coloring being so intense and illuminating that under artificial light it comes very close to being a vermilion. We do not have any variety now in commerce that we can compare with it along the lines of color. The form of the flower is of the best, and the size is from 3½ to four inches in diameter and the flowers are carried on long, stiff stems with just a little bend in them to make them graceful. It was exhibited by Peter Fisher, Ellis, Mass., and is another achievement of that famous raiser.

President J. A. Valentine, the variety which won the silver medal, is one, if not the most, beautiful of colors to be found among the pink carnations. It belongs to the flesh pink class but has enough of the true deep pink coloring to give the flower an even intensity of color that is exquisite. It is of the largest size, lacking only one point of coming up to Gorgeous in this respect. The form of the flower is ideal, and the stem is strong and stiff, carrying the flower erect. It was exhibited by R. Witterstaetter, Cincinnati, O.

Wodenethe, the large, pure white from C. H. Totty, Madison, N. J., was the winner of the bronze medal, also the sweepstake for the best vase among the winners in classes calling for 100 blooms. This is a very large white flower, full and built high in form with long, stiff stems, and as shown stood out as one of the best in the exhibition.

No. 14, exhibited by Traendly & Schenk, New York, is a sport of Enchantress, the coloring leaning more to the salmon shade rather than to the flesh pink of the parent variety. The size, form and stem are of the Enchantress type.

Rosette, the novelty being introduced by the Fred Dorner & Sons Co., La Fayette, Ind., is, as its name implies, a beautiful shade of deep rose or cerise pink. This variety won the S. A. F. silver medal and as shown was worthy of it, every flower in the vase being even in color and perfect in form, and it proved itself one of the best of keepers. The stem and calyx are both good, and this variety promises to be another addition to our list of standards from this well known firm.

No. 311, exhibited by the E. G. Hill Co., Richmond, Ind., is a very fine formed scarlet of deep, rich color after the type of Victory but better in form and with good stout stems. It won the S. A. F. bronze medal.

The Herald is another very bright scarlet of good even coloring. The form of the flower is good and the stem and calyx are both of the best. It was exhibited by the Chicago Carnation Co., Joliet, Ill.

Wm. Eccles, exhibited by the Elmsford Nurseries, Elmsford, N. Y., the winner of first prize in the class of 100 red or scarlet, is another very promising variety of this color. The form of flower, substance and color are good and the stems are stiff and strong. This variety made many friends among the growers and appears to be a very promising aspirant in the red family.

St. Nicholas, exhibited by Baur & Steinkamp, Indianapolis, Ind., was shown in fine shape but not in competition. The qualities of this variety are now so well known that little further can be commented on it. It really was not shown at its best as the first shipment was entirely frozen, handicapping the variety greatly, but this variety is certainly worthy of a good trial.

Delhi, exhibited by C. C. Murphy, Cincinnati, O., has the appearance of being a good commercial red as claimed by the originator.

Northport is a deep cerise pink resembling the variety Washington. It is a large flower with good calyx and strong stems. It was exhibited by James D. Cockroft, Northport, Long Island, N. Y.

Brooklyn, exhibited by Chas. Weber, Lynbrook, Long Island, N. Y., is as is claimed for it both as to color and form of flower on the order of that old-time variety, Wm. Scott.

No. 1, exhibited by Chas. A. Benson, Denver, Colo., is another of the deep pink class which looks promising, but the long distance it had to travel was against it showing up as it should at this show.

Nic Zweifel, North Milwaukee, Wis., exhibited his white seedling No. 274. It is a fine formed, pure white flower but lacks a little in size for exhibition purposes.

No. 23 is a true pink, one of best colors among the new varieties at the show. This is a color that appeals to the flower buyers and as shown it has every appearance of being an acquisition. It was exhibited by Thos. F. Browne, Greenfield, Mich.

The variegated on white ground varieties were represented by Benora from Peter Fisher, Ellis, Mass.; No. 94 from the Chicago Carnation Co., and Rainbow, of the Prosperity type, from the Wanoka Greenhouses, Barneveld, N. Y.

Fred Dorner & Sons Co. staged a very fine collection of assorted seedlings, prominent among them a very deep crimson and a fine yellow.

The introductions of 1911 most prominent were Gloriosa, White Wonder, Bonfire, Washington and Bright Spot, Gloriosa being a long way ahead in representation, some very fine vases being shown.

The most conspicuous of the standard varieties were Mrs. C. W. Ward, White Enchantress, White Perfection, Enchantress and Beacon, all being represented with fine lots of specimen blooms.

C. W. JOHNSON.

The Late John Ralph.

John Ralph, a florist and prominent business man of Saratoga, N. Y., died at his home on Woodlawn avenue January 7, aged 66 years. He had been in ill health several years, but was able to attend to his extensive florist business, but an attack of pneumonia last fall weakened his heart. Mr. Ralph was born in Alice, Ont., Can., settling in Saratoga thirty-six years ago where he engaged in floriculture and built up a splendid business, becoming one of the substantial men of the village. He belonged to the Royal Arcanum and was a member of the Albany Florists' Club. He is survived by a wife and three daughters. The funeral was held January 9 and the interment was in St. Peter's cemetery.

The Late Mrs. Elizabeth M. McCallum.

Mrs. Elizabeth M. McCallum, wife of E. J. McCallum, president of the McCallum Co., Pittsburg, Pa., died at her home in Sheridan, Pa., Saturday evening, January 13. She had been ill but a short time and was thought to be getting along nicely, twin boys being born November 21, but some two weeks ago it was reported that her condition was not so favorable as it had been thought to be. The sympathy of the trade is extended to her bereaved husband.

FRUITVALE, CALIF.—F. A. Miller, a dealer in Pacific coast tree and shrub seed, died November 18, 1911, very suddenly.

WOONSOCKET, R. I.—Matthew J. Van Leeuwen has completed the refitting of the Slade greenhouses on Central street plain and now has an up-to-date establishment.

THE AMERICAN FLORIST

1885 TWENTY SIXTH YEAR 1912

Subscription, United States and Mexico, $1.00 a year, Canada $2.00; Europe and Countries in Postal Union, $2.50 Subscriptions accepted only from those in the trade.

PANSIES sown this month make sturdy stock for May planting.

RENEW subscriptions promptly so that no copies of the papers may be missed.

CARNATION DAY is Monday, January 29, and red and pink varieties are always favorites on this occasion.

THE inability or reluctance of some coal dealers to supply contract orders, when there are large demands to replenish empty coal bins at the advanced prices, is causing some apprehension during the prolonged cold spell.

THE entries for the rose prize offered by the Panama-California Exposition are being received. A shipment of seven varieties arrived at San Diego, Calif., in December from John Cook, Baltimore, Md., and one entry from the California Rose Co., Pomona, Calif. Every precaution is taken to safeguard the new varieties, and the judges will be appointed by the San Diego Floral Association.

Massachusetts Agricultural College.

The short course now in session at the college promises to be one of the most successful ever held. The following men are taking the floricultural course: Frank J. Cartier, Mittineague; Harvey W. Cotton, Brighton; Fred Dale, Manchester; Sylvester Gopan, Tarrytown, N. Y.; Manning Imlay, Zanesville, O.; George Manton, Eglenton, Ont.; Frank J. McGregor, Newburyport; George W. Wall, Phoenixville, Pa.; Caleb H. Wheeler, Concord; Chatterton Warburton, Jr., Fall River; Stewart Worthen, Mittineague; Micheal Macken, Glendale. Many of these men have had considerable experience in greenhouse and in retail work and are taking up the work especially for the technical and scientific advantages of the course.

Thus far the lectures have dealt largely with construction problems. Aside from the lectures given on this subject by Professor White, W. R. Cobb of Lord & Burnham Co. gave a valuable illustrated lecture on January 5 and R. O. King lectured January 12 on the King Construction.

The observation trip on Saturday, January 6, was to H. W. Field's commercial range in Northampton where everything was found in the usual neat, up-to-date condition in which the manager, Mr. Graves, always keeps things, and the trip on Saturday, January 13 was to the Montgomery rose range in Hadley. E. A. WHITE.

Detroit Convention Notes.

Robert Pyle's stereopticon lecture on the "Rose in Europe" was very interesting and well presented. The general public should have had an opportunity to see and hear it.

The cut flowers were turned over to the city hospitals after the show, the cool, airy hall keeping them in good condition.

P. J. Foley, president-elect of the Chicago Florists' Club, was the recipient of many congratulations.

Mayor Thompson says once a mayor of Detroit always mayor of Detroit, and so it is still genial Mayor Breitmeyer.

J. A. Valentine and W. N. Rudd went to New York to further National Flower Show plans.

Denver had five representatives and Wm. Martin traveled all the way from Portland, Ore.

P. Welch brought in the Boston Wolverine ahead of Frank Traendly's New York Wolverine.

E. G. Hill was in the south and missed some interesting comments on his new roses.

The Detroit brand of hospitality has no superior on this or any other continent.

Wm. F. and Adolph Gude sent a telegram regretting their inability to attend.

Prof. Dorner's paper is a valuable contribution to carnation literature.

The Japan and Dutch bulb houses had many representations on the ground.

Show Manager Dilger was the right man in the right place.

Wm. Nicholson and Harry O. May were among the missing.

Harry Balsley has lost none of his amiability.

Mildew on Roses.

ED. AMERICAN FLORIST:

We are growing Killarney and White Killarney roses in a house heated by hot water and are having trouble keeping mildew down. Is there any other remedy than sulphur?

Minnesota. N. C. H.

Replying to "N. C. H.," will say that we know of no other safe remedy besides sulphur to use to keep down mildew in the rose houses. You are badly handicapped in handling Killarney with hot water heat, as it is next to impossible to keep the Killarney absolutely clean unless steam is used. We would suggest painting all of the available hot water pipe surface with sulphur and water mixed. If this should cause a rather too strong dose it can easily be washed off. Would suggest the installment of a small steam boiler for sulphuring purposes.

E.

Cleaning Greenhouse Glass of Paint.

ED. AMERICAN FLORIST:

Can you inform me of any formula or of any method by which paint can be removed from the glass on two palm houses? GARDENER

It is difficult to remove paint from glass and particularly from palm and other high houses. One of the best ways is to first brush kerosene over the glass, taking pains that it does not run through upon the plants, and then, after it has thoroughly soaked in, scrub off the paint, using a stiff brush and either caustic soda or some of the washing powders. The use of a sharp sand upon the brush will also be found helpful.

Lily Forcing.

ED. AMERICAN FLORIST:

How long does it take to get giganteum lilies into bloom after they are placed in heat, the pots being well filled with roots? INQUIRER.

With Giganteum lilies potted in the fall and with the pots well filled with roots at this time of the year, it will take about 13 weeks in a temperature of 60° to bring them into bloom. Cold storage lilies will bloom in 14 weeks from the time of planting except during the summer months, when they will bloom in 10 weeks. W.

Early Cactus Dahlias.

ED. AMERICAN FLORIST:

What are the best varieties of white and yellow cactus dahlias for early flowering P. D.

Illinois.

I consider Parsifal the best early white cactus dahlia and Prince of Yellows the best early yellow dahlia. In addition to being early they bloom freely with straight, stiff stems.

L. K. PEACOCK.

Rochester Florists' Association.

The Rochester Florists' Association held its annual meeting January 8 in their hall on Main street and elected the following officers:

John Dunbar, president.
C. B. Ogsten, vice-president.
H. B. Stringer, secretary.
W. L. Keller, treasurer.

George Boucher, Frederick Schlegel, Richard Salter, trustees.

Owing to illness in the family of J. B. Keller, he was unable to be present to deliver his paper on "Perennials" which will be heard at a later meeting. Several short addresses were given by the members present, after which a lunch was served and a social hour enjoyed.

Meetings Next Week.

Baltimore, Md., January 22, 8 p. m.—Gardeners' and Florists' Club, Florists' Exchange hall, St. Paul and Franklin streets.
Cleveland, O., January 22, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit avenue.
Hartford, Conn., January 26, 8 p. m.—Connecticut Horticultural Society, County building.
Toledo, O., January 24.—Toledo Florists' Club.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office enclose 10 cents extra to cover postage, etc.

Situation Wanted—Florist with best New York city experience. Address
Key 554, care American Florist.

Situation Wanted—Storeman and designer; California preferred. Address
Key 555, care American Florist.

Situation Wanted—In Chicago wholesale house by experienced packer. Address
Key 556, care American Florist.

Situation Wanted—Position as designer, decorator or manager for store; good references.
H. G. E., care Schulz,
550 Fourth Ave., Louisville, Ky.

Situation Wanted—As grower in up-to-date retail establishment, practical life experience, married; good references. Address
J. H., care of H. J. Krueger, Meadville, Pa.

Situation Wanted—By young lady florist, first class sales lady, good designer. Capable of taking charge. Could assist with booking or office work. Key 557, care American Florist.

Situation Wanted—Experienced in carnations, chrysanthemums and general greenhouse work; I will accept reasonable wages; good references; total abstainer. Address
Key 549, care American Florist.

Situation Wanted—By German, single, middle age, experience in all greenhouse work, especially palms, ferns, bedding plants and forcing stock, Chicago or vicinity prefered.
Key 553, care American Florist.

Situation Wanted—German gardener and florist married, age 34, life experience, wishes position as foreman on first-class private or commercial place, J. BAUER,
Chichester, N. Y., Ulster Co.

Situation Wanted—As grower or propagator of cut flowers and general greenhouse plants; reasonable wages accepted if in or near Aurora, Ill.; highly recommended. Address
Key 550, care American Florist.

Help Wanted—A young lady florist to help in store and office; give reference. Eastern city,
Key 546, care American Florist.

Help Wanted—At once, good grower of carnations and pot stock; must be able to take entire charge of greenhouses, 15,000 square feet; married; none but a first-class man wanted
JAMES HAYES, 107 W. 8th Ave. Topeka, Kan.

Help Wanted—At once, a competent greenhouse man for 5,000 feet of glass to grow carnations and a general line of bedding and vegetable plants. Good wages and a three room house furnished if a married man.
HAMILTON NURSERIES, Hamilton, Mont.

Help Wanted—Experienced grower of roses, carnations, ferns, 'mums, etc; four greenhouses; private place in Iowa; must be strictly sober and have best references; single man only. Give full particulars in first letter. Address
VAUGHAN'S SEED STORE, Chicago.

Help Wanted—Experienced man to take charge of retail florist stand in large department store; married preferred; party that has had experience in buying, selling, handling, decorating, designing, etc. Write and state wages.
MIAMI FLORAL CO., Dayton, Ohio.

For Sale—Excellent florist's place in best shopping district in Pittsburg. Address
Key 545, care American Florist.

For Sale—Great Falls Floral Co.'s greenhouses and stock. Splendid opening for a hustler with small capital. B. KAPPEL, Great Falls, Montana.

For Sale—Five greenhouses; a bargain; easy terms; profit $6,000 per year
T. A. GETTYS, Amarillo, Texas.

For Sale—Two good paying retail stores in the Chicago loop. For further particulars address
INFORMATION,
Key 552, care American Florist.

For Sale or Rent—Retail place in Indiana. Easy terms to buyer, dont write unless you have some cash and mean business. Address
Key 548, care American Florist.

For Sale—Will sacrifice on account of other business a greenhouse doing about $8000 a year business at the largest cemetery in Chicago; call or write
10 N. Western Ave., Chicago.

For Sale—Controlling interest in well established floral business, including glass houses, etc.; must be sold immediately; going at very low figure. A. W. ROSS
148 W. Adams St., Los Angeles, Calif.

For Sale or Lease—Florist store and greenhouse with two-story dwelling house, 125x50 ft.; established 40 years by present owner; wishing to retire; near Polish Catholic also another large Catholic church.
Key 535, Care American Florist.

For Sale—Well established florist business in city of 8,000, with good resort trade; 28,000 feet of glass; steam heat; well stocked for winter and in good shape; seven acres of land; modern house; barn. Write for details or call and investigate for yourself.
JAMES TAYLOR, Mt. Clemens, Mich.

For Sale—An attractive florist, seed and plant business for sale in the beautiful university city of Berkeley, close to San Francisco; no opposition; fine location; large modern store; new, clean stock. Besides the florist business quite a nice trade is done in jardinieres, vases and fancy goods, raffia, seeds baskets, etc. Plenty of room to reside in back. Address for price and particulars THE KENSINGTON FLORIST,
3310 Adeline St., South Berkeley, Calif.

Situation Wanted.

Good rose grower capable of taking charge. State salary when writing. Chicago preferred. For further particulars address

Key 541, care American Florist.

Store Wanted.

In Cleveland or Pittsburg. Answer fully. All replies treated in strict confidence.

A. R. McGILL,
P. O. Box 899, Pittsburg, Pa.

Situation Wanted.

By a competent retail florist; thoroughly understands making up and counter work; in fact has a thorough New York experience, but is anxious to locate elsewhere. Address **Ambitious,**
Care John Young, 54 W. 28th St.,
New York.

Storeman and Designer

A floral designer of ability and a storeman who has handled high class customers desires a position in an up-to-date establishment catering to the best trade; can furnish references as to character and ability. Address

Key 533, care American Florist.

Wild Smilax on hand all the time, $5.00 per case, $22.50 for 5 cases.

HOLTON & HUNKEL CO.

462 Milwaukee St., MILWAUKEE, WIS.

Milwaukee.

EXTREMELY COLD WEATHER.

For the past week the thermometer has hovered between 12° and 18° below zero which naturally caused a great many frost-bitten flowers in the market. Even with the most careful wrapping it was almost an impossibility to prevent them from freezing. The cold weather conditions naturally shortened up the cut of flowers considerably but owing to the extreme weather conditions there was but little demand. The past week seemed a very unfavorable one for both retailers and growers.

NOTES.

C. C. Pollworth Co. were also among the unfortunates the past two weeks. The first week they experienced the freezing of a lot of stock in transportation from the greenhouse to the store, and last week on account of taking precautions not to have this occur again they undertook to place some hot bricks in their shipments, one of these igniting the paper in one of the boxes, burning a considerable amount of the shipment.

C. C. Pollworth and Nick Zweifel attended the rose and carnation show. Milwaukee again showed its superiority. When looking over the prize list one will notice that we were again on top when it came to the prizes on carnations. C. C. Pollworth Co. were awarded many prizes for the splendid stock exhibited.

The Edlefsen & Leidiger Co. sustained a heavy damage from the blowing out of one of the sections of a boiler which caused a loss in two of the greenhouses which were filled with spring stock. Through strenuous efforts they managed to fix it up temporarily by Sunday evening.

H. V. Hunkel of the Holton & Hunkel Co. has returned from the rose and carnation show at Detroit. He also visited the E. G. Hill Co., Richmond, Ind., and looked the novelties over. The stock that this firm is cutting now is of fine quality, especially their American Beauties and other roses.

Gust Rusch & Co. also had their troubles with their eastern shipments of violets which arrived frozen on several occasions and were practically unsalable.

F. P. Dilger is cutting some nice bulb stock which is selling readily at the local markets.

Fred Schmeling is cutting some fine lilies and sweet peas. He also is cutting some good carnations.

The bowling scores this week were as follows:

Leidiger	169	153	146	Hare	115	165	145
Leitz	125	125	120	Hunkel	180	129	121
Currie	140	153	154	Schmitz	148	145	152
Manos	128	116	115	Halliday	117	135	129
Nohos	145	120	159	Guthrod	139	179	164
Rusch	158	141	146	Holton	158	114	...

G. R.

Cincinnati.

MARKET IS EASY.

Last week the market continued easy in all lines. At times the business was fair but it was not startling any one time. This general apathy is undoubtedly largely due to the severe cold weather we have been and are having. The only ones who are out are those forced to be so because their work requires it and a few bargain hunters at the clearance sales in the various department stores. The general supply of stock in the various wholesale houses is easily adequate for all requests. Prices have dropped slightly on nearly everything. The shipping business on cut flowers is again on the increase and is assuming gratifying proportions. The offerings in American Beauties are adequate. The medium and long ones move nicely while short stock moves slowly. Plenty of excellent Killarneys, both pink and white, Richmond and Brides are available and the quality of all is good. The carnation market, too, is easy. Practically all the best stock is taken up but some very good stock is often left over. The culls do not find much of a market. Bulbous stock is not finding much of a call, white and yellow narcissus both drag. A few choice Roman hyacinths seem to find quick sales. Both longiflorum lilies and callas are proving good property and more choice blooms of each might easily be utilized. The choice single violets clean up rapidly. The market for doubles, while nothing to brag of, is fair. The choice lily of the valley sells well, many of the seconds in this line sell at a sacrifice.

NOTES.

Martin Reukauf of H. Bayersdorfer & Co., Philadelphia, Pa., called on the trade last week. H.

Pittsburg.

BUSINESS RATHER SLOW.

Business has been slow for the past week, due to the extremely cold weather. Roses are very scarce and clean up quickly. Carnations and violets are arriving in abundance and moving slowly. Large shipments of yellow tulips and jonquils are arriving daily. The demand for them is very good.

NOTES.

Mrs. Elizabeth M. McCallum, wife of E. J. McCallum, president of the McCallum Co., died Saturday evening, January 13, at her home in Sheridan, Pa.

Ross E. Adgate, who has been seriously ill at his home in Niles, O., returned to Pittsburg Monday. J.

St. Louis.

SEVERE WEATHER INJURES BUSINESS.

We have experienced the severest weather recorded in years and the injury to transient trade has been felt everywhere. With the thermometer at 15° below special care in deliveries had to be taken, both by the wholesalers and retailers. Funeral work seemed to be the only outlet for flowers. Happily the supply in flowers is not heavy, otherwise there would be many left-overs. The violet crop is not heavy and is cleaned out. A good crop of Harrisii lilies helps materially in funeral work. Greens are moving well.

NOTES.

Rube Dalroy and Sarah Jane, two comic Rube advertisers, were presented by Grimm & Gorly with a vegetable bouquet designed by Henry Duernberg. They were spending their honeymoon in St. Louis.

The St. Louis Florists' Club met January 11 but there were only 10 members present owing to the severe weather and but little business was transacted.

The Kirkwood growers are having a hard time handling and bringing stock into the market. H. G. Berning and Wm. Smith Wholesale Floral Co. handle the bulk of these consignments.

The Florists' Union will hold their adjourned meeting Monday evening. The new officers will take their places and business of general importance will be discussed.

C. A. Kuehn is fast getting into shape in his new quarters and is now fully prepared to handle all the stock coming his way.

F. C. Weber has a fine stock of flowers received daily from the greenhouses of John Steidle.

Joseph J. Windler is now in his brother's employ, Robert J. Windler, on Grand avenue.

A fine supply of orchids and roses were seen at George H. Angermueller's.

Alex. Siegel has a very pretty window display representing Florida.

W. F.

Boston.

PLENTY OF ICE NEXT SUMMER.

New Year's business was excellent and the quality of both carnations and roses improves daily, especially the former. Like previous years the trade after a holiday is usually quiet, and while there has been a slight lull in the markets there has been nothing that could be called a depression, and with the advent of the social season we may expect trade to be normal, with an occasional spurt. Bulbous stock moves slowly and the prices on violets are falling. The quality of the violets, like other flowers, depends greatly on the grower, some are violets in name only and cannot be used except in cheap work, but for the debutantes the top grade is always desired, and, of course, quality means larger returns from the same space, and perhaps from the same money expended. We are in the grip of severe winter weather and a long hard spell of it, on Saturday, January 13, from 8° to 14° below zero, according to the locality and truthfulness of the thermometer. If business was good or only half good there would be but little complaint, but it is more like August than January and prices have tumbled. If there was any business the markets would be cleaned up quickly for there is not much stock coming in. It is too cold for the people to get out. There is one promising thing, ice is being cut 12 inches thick and we can have that next summer.

NOTES.

W. R. Nicholson is cutting his second crop of mignonette and it is even better than the first. W. R. went to Detroit and Foreman William Marshall escorted us around the plant. The seedling carnations are interesting. Mr. Marshall received some seed from Europe and he has crossed plants obtained from this with standard varieties which show increased vigor. It is intended to take down some of the older houses next summer and build a modern house 53x200 feet.

Gardenias from Bound Brook, N. J., handled by Welch Bros., continue to be the leaders in that flower, in fact, they are in a class by themselves. A disastrous fire January 9 nearly burned the firm out, a change of wind saved what might have proved a serious loss. A furniture store adjoining the rear was burned and the iron shutters on the windows saved them. All the books and records were made ready for removal.

S. J. Goddard is sending in some fine freesia to his salesman, Thos. Pegler. He won several first prizes at Detroit. Boston is proud of Sam, and the boys ought to give a dinner in honor of his having done so well. Long live Goddard!

Boston is honored by having Robert Cameron as state vice-president of the S. A. F.

MAC.

PARKERSBURG, W. VA.—The supply of gas gave out at the greenhouses of G. Obermeyer during the blizzard of January 5 and although stoves and wood fires were started they proved inefficient to save the plants and everything was practically ruined.

Prize Beauties

For the third successive year we have taken the first prize, this time at the National meeting at Detroit.

Also Choice Roses, Carnations and Lilies

Chicago.

THE COLD WEATHER AFFECTS BUSINESS.

The long continued cold spell is greatly affecting the trade not only in the growing but more so in the disposing of the stock, for the general complaint is that trade is very light both with the retailers and wholesalers. Ever since the beginning of the year the weather has been exceedingly cold, the thermometer being at the zero point or lower almost every morning and at times all day long, and society functions which at this time of the year are none too many as a rule, have been exceptionally few this year. And as the flower buyers have kept pretty close to the heated rooms, the demand for flowers has been comparatively small. There are no large receipts of any of the flowers coming in, yet the demand is not equal to the supply and prices have had a downward tendency throughout the week. American Beauties are in good supply and of excellent quality and can be obtained at quite low prices for this time of the year. The same can be said of all the roses. Killarney are in great supply as are also Richmond and White Killarney and can be bought at fairly low figures for the quality. There is also a good supply of yellow roses, the first time this year that there appeared to be enough to fill the demand. Carnations are also in plentiful supply to meet all requirements and all orders can be easily filled with stock of the best quality. Lilies and callas are finding a good sale, there being no extra supply for the receipts are not large. Lily of the valley has had a very good call and the stock is of the highest quality. There is also a very good supply of orchids. Violets are quite plentiful and the prices are considerably lower than were asked during the holidays. Sweet peas are being received in larger quantities but the best grade stock sells well. Bulbous stock is increasing rapidly. Tulips of many colors are now to be had, and Trumpet Majors and Golden Spur narcissus with a large supply of Paper White narcissus and Roman hyacinths. Greens are all in good supply and of splendid quality, boxwood especially being very fine. Many of the growers are beginning to feel anxious about their coal supply. The cold weather has been the cause of much shrinkage in the quantity on hand, not only in the greenhouses but in the residences, and in some cases the bins are nearly empty. This has caused increased buying and the dealers have advanced the prices to all not contracted for, with the result that those holding contracts are having some difficulty in getting what they require. Some of the largest users are having hard work to get the dealers to furnish what is already contracted as fast as it is desired.

NOTES.

H. S. Garland returned last Sunday, January 14, from Barberton, O., with a nice contract for a large range of Garland truss iron frame houses for O. C. Barber, the millionaire match king of that city. The contract calls for four houses 34x800 feet, one house 143/4x800 feet, four houses 34x500 feet, four houses 32 2-3x157 feet, and one 16x150 feet. Geo. M. Garland also brought back an order for two houses, 24x300 feet, for Ludwig Stapp of Rock Island and has since booked an order for two more houses, 34x300 feet, for E. Haentz of Fond du Lac, Wis.

Peter Reinberg is cutting a large quantity of American Beauty roses of exceptionally fine color, foliage and stems. Carnations are arriving in large quantities and are also of very good quality.

The carnation crops in the Des Plaines Floral Co.'s greenhouses are in fine condition and the proprietors, Messrs. Blewitt & Prickett, will soon be cutting heavily in White Enchantress, Beacon, Washington, Bonfire and Conquest. The latter are in the finest possible condition and several local retailers have standing orders for this special variety. This firm has about 30,000 carnation cuttings in the sand and the orders coming in from their old customers show that they were well pleased with the stock that they received last season.

W. H. Elliott of Boston, Mass., and Robert Simpson of Clifton, N. J., ex-presidents of the American Rose Society, paid the city a visit this week, coming from the convention of that society held at Detroit. They called on the proprietors of the wholesale stores and it was instructive to hear Mr. Elliott spread his propaganda for correct grading and proper keeping of roses. Mr. Simpson visited the Poehlmann Bros. Co.'s range at Morton Grove.

Wietor Bros.' large shipments of choice stock include an exceptionally fine grade of American Beauty, Mrs. Jardine and Uncle John roses. The receipts of the first named are very large as are also the Uncle John which are now just coming into full crop. The latter can be seen prominently displayed in the artistic window arrangements of some of the progressive down town florists' stores.

The Superior Machine and Boiler Works have booked an order for two Number 4 boilers for Mike Leider and an order for a Number 12 boiler for J. Phillips of this city. The first order was booked on January 2, which was certainly a good start for the new year. The proprietors are mailing the trade a very useful calendar and would gladly furnish one to anyone upon request.

Joseph Trinz says that his firm, Lubliner & Trinz, have a four-year lease on their present quarters and that there is no foundation to the rumor that they will vacate their store on April 1. They have, however, rented their theatres in Milwaukee, Wis., for $17,000, and it is very likely that the rumor originated from this deal.

The meeting of the stockholders of the Chicago Flower Growers' Association which was to have been held last Monday was postponed until next Monday, January 22, on account of the severe cold weather. The meeting of the directors was held Tuesday as intended, and the usual routine business was transacted.

The A. L. Randall Co. is headquarters for giganteum, auratum and rubrum lilies and the stock that is offered is of unsurpassed quality. Eric Johnson is looking for trade to pick up soon and is ready to supply his customers with anything that they may want in the line of cut flowers.

John Simpson, the Ogden avenue florist, reports business as fair with a reasonable amount of funeral work. Designer A. T. Dedlar was kept pretty busy January 12 and 13 arranging work for the funerals of the two prominent citizens who died last week.

C. E. Newbury, of the Mitchell Greenhouses and Nurseries, of Mitchell, S. D., was seen at the Percy Jones' store this week. From here he went to Detroit, Mich., to buy two automobiles for use in his rapidly increasing cut flower and nursery business.

Weiland & Risch are still cutting a fine grade of daisies and gardenias in addition to some choice Killarney roses. Peter Risch says that his firm has the coal bin nearly full with enough on hand to last until next June. Fortunate, indeed.

Vaughan & Sperry are showing a fine line of choice roses and carnations and a large quantity of exceptionally fine tulips, jonquils and sweet peas. Some choice boxwood is being offered and is finding a very ready sale.

The J. B. Deamud Co. is doing a fine business in spite of the general quietness that is prevailing at present, and is filling a large number of orders for home-grown violets, tulips, sweet peas and wild smilax.

George Perdikas is one of the florists who believes in making a large showing of stock, and the windows of his two stores are fairly crowded with all kinds of seasonable stock.

J. J. Grullemans, representing J. J. Grullemans & Sons, bulb growers, Lisse (Holland), left for New York this week after returning from a successful western trip.

The long-stemmed sweet peas that Hoerber Bros. as offering are very fine and rival any to be found in this market.

D. Papatony of Briggs Floral Co. has returned from a pleasure trip in the southern part of the state.

H. C. Blewitt is planning on building a new greenhouse of Garland construction this spring.

Mrs. Wm. La Hayn of Chesterton, Ind., was seen in the local market this week.

George Reinberg's leaders this week are fine tulips, jonquils and daffodils.

VAUGHAN & SPERRY

Long Distance Phone Central 2751.

161 N. Wabash Ave., CHICAGO.

Fred Lautenschlager had the time of his life on his trip to Detroit last week. He took passage on the steamer Pere Marquette No. 1 by way of Grand Rapids and was snowbound for 24 hours off East Saugatuck. The only thing that bothered Mr. Lautenschlager was thinking what the other boiler men were doing at Detroit, but he was on the job immediately when he did reach his destination and succeeded in informing everybody that the Kroeschell boiler man was there and that he had a good boiler to sell.

Poehlmann Bros. Co. is using from four to five carloads of coal a day during the severe cold weather to heat their mammoth greenhouse plant in Morton Grove and it is figured that one day's fuel costs the firm from $450 to $500. 28,000 to 30,000 tons of coal are used annually to heat this firm's three big plants—an ocean of glass, as it is sometimes called. This house is mailing the trade a very handsome calendar and would be pleased to include the reader in the list.

Bassett & Washburn nobly upheld the reputation of this city in taking the much-coveted first prize for 50 American Beauty roses at the exhibition of the American Rose Society at Detroit last week. They are in splendid crop with this rose now and the stock is of the highest quality, as is evidenced by the securing of this banner blue ribbon of the year. C. L. & E. B. Washburn and Andrew Benson, foreman of the plant, all went to Detroit to see their pets win the honor.

A. Lange has divided his store force into three shifts, each one working two nights a week. The evening shift starts to work at 10 a. m. and works until 9 p. m., and the day shift the same as before. The employes think well of the change and appreciate what their employer is doing for their interests.

The Chicago Carnation Co. was very successful with their exhibits at Detroit last week and succeeded in winning a large number of prizes. Herald, this firm's new carnation, is doing fine and promises to give the famous Washington a hard run before very long.

J. F. Wilcox and wife of Council Bulffs, Ia., are in the city this week consulting Dr. Billings, the well-known specialist. Mrs. Wilcox has been ailing for some time and it is feared that an operation will be necessary for her complete recovery.

John Sinner is in the market for competent help and the following advertisement is seen displayed in his store: "Girl Wanted. A good opportunity for a young lady who desires to marry. Novice preferred. Apply in own handwriting."

Zech & Mann are there with the goods as far as cut flowers are concerned, and are supplying their many customers with choice seasonable stock. Ben O'Conner is helping out in the shipping department this week.

The greenhouse manufacturers report a large number of inquiries from various parts of the country, due probably to the low price of glass, and say that it looks as if the building in 1912 will exceed that of last year.

B. J. Maynard has returned from Saginaw, Mich., where he superintended the erection of a range of Garland houses for Chas. Fruch & Son.

Arthur, "Sag," Weatherwax says that his employer, W. J. Smyth, had several large orders for the Crane funeral last week.

Miss Emma Neman, of Vaughan's greenhouses, has the sympathy of many friends in the trade in the loss of her father, January 15.

S. F. Willard, Jr., of Vaughan's greenhouses, returned last week from a vacation in Connecticut and a business trip east.

The A. Dietsch Co. will furnish the material for eight greenhouses and one lean-to for Walter Barth of Denver, Colo.

H. Van Gelder is supplying Percy Jones' customers with an exceptionally fine grade of carnations and tulips.

Joe Welsh of the Peter Reinberg force was the lucky one to win a suit in the market club this week.

John Klehm and wife of Arlington Heights celebrated their golden wedding last week.

Twenty-five of Vaughan's Seed Store employes made up a sleighing party January 16.

J. A. Valentine and W. N. Rudd returned from New York January 16.

Visitors: A. J. Taylor, Southport, Conn.; Wm. Penn and wife, Boston, Mass.; Elber Holmes, Montrose, Mass.; Joseph S. Myers, of Myers & Santman, Chestnut Hill, Pa.; W. H. Elliott, Brighton, Mass.; Robert Simpson, Clifton, N. J.; L. S. Spencer, Champaign; J. De Groot, representing M. J. Guldemond, Lisse, Holland.

Complete Stock of Florists' Greensand Supplies

Cleveland.

BUSINESS MUCH QUIETER.

The weather in Cleveland and vicinity continues below or near the zero mark. Some few growers report the freezing of some of their stock on the coldest nights, but nothing very serious. The cold has had its effect on the business also, and it is much quieter than it was previous to the first cold snap. Carnations and roses are not more plentiful but the demand is light. Prices have dropped slightly on some grades of stock. Lilies are plentiful with a fair demand. Violets are in good demand, as are also lily of the valley and orchids, and the stock is fine. Sweet peas are not very plentiful and clean up daily on the good stock but callas are scarce. Prosepine and La Reine tulips are in, stevia is about done, Paper White narcissus and Roman hyacinths are short of the demand.

The returning florists from the Detroit show were well pleased with the exhibition and the good time which they had while in Detroit. C. F. B.

Philadelphia.

TRADE QUIET.

Trade the past week has been quiet locally, with a good shipping demand. Flowers are plentiful, not that the shipments are large but with the small demand there is an accumulation, as owing to the more or less zero weather which has prevailed for a week past and still continues, the street men are out of it and the final clean-up which generally takes place the last of the week did not materialize. Really high grade stock in roses and carnations moved all right, but at a little lower prices, the carnations suffering most. The supply of American Beauty roses is not equal to the demand and prices rule high. Snapdragon is off crop; it will be February before any shipments worth while will be seen. Violets are more plentiful.

NOTES.

The Philadelphia delegates to the rose and carnation exhibition and convention at Detroit are loud in their praises of the wonderful flowers seen there. S. S. Pennock said he never saw such perfection in roses. Radiance, Melody, Mrs. Jardine were seen with stems three feet or longer. The genuine excellence of all the varieties was freely commented on by all who saw them. There was one feature that he thought remarkable, that although some of the shipments were delayed and many of them had come long distances, yet he did not hear of any that were frozen. As the thermometer registered below zero all the time of the exhibition it showed he thought that the express companies were taking better care of flower shipments than they used to.

Philadelphia held up her reputation for excellence in the producing of fine stock at Detroit. Pink Killarney is grown the country over and the Joseph Heacock Co. should be proud to have met so many of the best growers and won out with first prize for 50, and second with 25 blooms. They were grown at Roelofs by Robert Jenison, one of the best growers in the land. Myers & Santman won first with Double Pink Killarney, third for 50 American Beauties, second for 50 My Maryland and first for 50 Hilda. They were also first with 25 Double Pink

Killarney. Leo Niessen said he thought this firm's Double Pink Killarneys were the handsomest roses in the show. John Andre won out and was first with his White Killarneys. Berger Bros. were second for best new rose not in commerce with Stockton & Howe's new rose Princeton, which attracted great attention. Adolph Fahrenwald's display of Killarney roses was very fine and won second for best display. This is certainly a good record for one city and shows that the Philadelphia growers are alert and keep well up to the front in the race. Carnation Gorgeous was on everybody's lips and spoken of most highly. There were some very promising whites and also the usual lot of new reds that looked promising.

The committee on exhibits at the Florists' Club for the February meeting will endeavor to have a number of the most striking novelties brought out at Detroit displayed at that time, and growers who have anything of merit are invited to send flowers, express prepaid, to David Rust, Horticultural Hall, Philadelphia, to arrive on the second Tuesday in February. They will be well staged and passed on by the club's committee and reported in the trade papers. It will be one of the largest meetings of the year and very well attended by all the local members of the craft.

J. D. Eisele of the H. A. Dreer corporation sailed for Europe January 4. He will be gone for a month or two, will look over the European novelties and get in touch with the best that is going on greenhouse plant life of the other side. Meanwhile this great establishment goes marching on. Something new is seen here every day in plants, ideas and greenhouses, so that the market shall be supplied. New methods of delivery are being installed and soon some of the latest and most powerful auto vans will be seen with the "H. A. Dreer, Inc.," name on the sides.

The Robert Craig Co. are busy as beavers getting ready for Easter. Rambler roses are leaders with them and a splendid stock is being shipped or tied into shape. There are baskets, umbrella forms, pyramids and globes and large quantities of the natural bushes. They have a grand stock of these ramblers.

William K. Harris, wife and family, and Mrs. W. K. Harris, his mother, sail for Porto Rico and other West India ports on January 20. K.

STOCK OVER PLENTIFUL.

The wholesale cut flower market is still very unsatisfactory. The very severe cold weather has been the cause of making matters much worse. Carnations are very plentiful and have suffered much in price, even the very finest blooms are accumulating and if the weather does not get warmer to give the street boys a chance to get out many thousands of these will be thrown away. Gardenias seem to be on crop with all growers that make a specialty of them and it is a positive fact that during the past ten days they have sold in lots of five hundred and a thousand as low as the prices of good carnations. American Beauties are not so plentiful and find a good market at very fair prices. The same can be said of Richmond, Lady Hillingdon, Mrs. Aaron Ward and Prince de Bulgarie. My Maryland, Mme. Chatenay and Killarney are not doing as well and the top grades of these move very slowly, and Brides and Bridesmaids are only disposed of at ridiculously low prices. It would seem that the growing of these two varieties for this market will have to be abandoned. The condition of the orchid market is very discouraging. Cattleyas, cypripediums and dendrobiums are very plentiful and prices on all of these are having a downward tendency. Prices on lilies, lily of the valley, hyacinths and tulips remain stationary. Now that Golden Spurs are in the market, Trumpet Major narcissus are only moved with difficulty. Sweet peas and lilac are very abundant and of the very finest quality. All things considered, the market is in very bad shape and a change in the weather which will help things will be very welcome.

NEW YORK TO DETROIT AND RETURN.

Chairman Traendly of the transportation committee deserves great credit for the manner in which the arrangements for the trip were carried out, as the Wolverine was eight hours late in reaching Detroit. There would have been considerable suffering if the committee had not foreseen such a thing might happen and laid in a double supply of provisions, especially crackers and cheese. In the party were L. J. Reuter and wife, Eugene Dailledouze and wife, E. J. Taylor and wife, Robert Simpson, L. B. Coddington, Percy B. Rigby, Emil Leuly, Oscar Boehler, Peter Beuerlein, J. H. Pepper, Chas. B. Weathered, F. R. Pierson, J. Fotheringham, I. S. Hendrickson, Wm. E. Marshall, John Young, F. H. Traendly, F. E. Whitney, C. H. Totty, J. D. Cockcroft, C. W. Scott, Harry A. Bunyard, J. Ebb Weir and wife, James T. Scott, Robert G. Wilson.

Leaving Detroit at 6:40 Friday, January 12, here again the transportation committee did great work and an ample stock was laid in in case there was any great delay, but in this case the party arrived in New York only five hours late. Joining the New York party was Wm. J. Stewart, Wm. R. Nicholson, Patrick Welch, J. A. Valentine, W. N. Rudd and W. F. Kasting. The birthday of Chairman Frank H. Traendly was celebrated in proper shape and the delegates from New York presented him with a suitable affair in silver on which was engrossed "F. H. T.," "1867-1912," "January 12, 1912," Charles Weathered making the presentation speech.

Patrick Welch of Boston gave the delegates an interesting address on the grandeur and beauty of the recent exhibition and brought up several matters which he thought were debatable and before the trip was ended all of these questions were settled to Mr. Welch's complete satisfaction. Taken as a whole the trip was most enjoyable and was a success in every way.

NOTES.

W. N. Rudd and J. A. Valentine of the National Flower Show Committee are visitors in town and they looked over the new Grand Central Palace on Saturday. They have been stopping at the Prince George hotel in Twenty-eighth street.

The "Cauldy Wauldy" beefsteak dinner at Bardusch's Castle Cove butcher shop promises to be one of the successes of the winter. January 20 is the date and Charles Millang is the manager.

H. M. Robinson & Co. of Boston have taken a lease of the store and basement 46 West Twenty-sixth street and will open there shortly with a full line of florists' supplies.

Several shipments of flowers during the recent cold spell have arrived badly frozen and the dealers are compelled to sell them "as is."

Badgley, Reidel & Meyer are receiving freesias of magnificent quality, also a fine lot of gardenias from L. Wild, Bound Brook, N. J.

Joseph A. Manda, president of the New York Florists' Club, has just returned from a very successful business trip to Lenox, Mass.

Robert M. Schultz of Madison, N. J., is sending a fine lot of Richmond roses to J. K. Allen.

Abram Moltz announces that there will be changes in his firm very Wednesday on the S. S. Lusitania.

W. A. Manda sailed January 10 for St. Albans, England, where he has established a European branch.

Paul and Henry Dailledouze will leave shortly for Panama.

Visitors:—W. P. Craig, E. J. Fancourt, Philadelphia, Pa.

New York Florists' Club.

There was a large attendance at the meeting of the New York Florists' Club January 8 to witness the installation of officers for 1912, the following being the officers who took their respective stations: Joseph A. Manda, president; Philip Einsman, vice-president; John Young, secretary; W. C. Rickards, treasurer; John Donaldson, P. F. Kessler, W. H. Duckham, trustees. The following committees were appointed: Legislative, F. R. Pierson, P. O'Mara, W. F. Sheridan; Awards, A. C. Miller, John Meisem, R. M. Schultz, Chas. Schenck, Chas. Weber, Harry A. Bunyard, Robt. Simpson; Exhibition, I. S. Hendrickson, Robert Koehne, Harry Turner, Robert G. Wilson, M. C. Ebel; House, A. J. Rickards, Frank Duggan, W. G. Badgley; Essay, J. H. Pepper, J. A. Shaw, W. J. Stewart; Outing, P. F. Kessler, B. Chadwick, Louis Schmutz, Jr., Emil Schloss, P. J. Smith, W. E. Marshall, A. DeMeusy, Jr., A. Kakuda, Joseph Fenrich, F. W. Magenfohr, O. V. Zangen, John A. Rassbach, W. R. Cobb, H. Hornecker; Dinner (empowered to do things in fine shape for our twenty-fifth anniversary), C. B. Weathered, W. F. Sheridan, A. M. Henshaw, Chas. Schenck, J. A. Shaw, Alex McConnell. The treasurer read a very satisfactory report, there being over $4,200 in the treasury. The secretary's report showed 275 members in good standing after 65 had been dropped by order of the board of trustees. The trustees recommended that the junior ex-president be made a member of the board of trustees. A. P. Smith, J. G. Fleuti, J. K. M. L. Farquhar, A. L. Young, A. Macdonald were elected members and there were 13 names proposed. John Lewis Childs, Floral Park, exhibited Calla Elliottiana.

Albany, N. Y.

NOTES.

One of the largest floral pieces taken into the capitol in some years was made up by The Rosery, 76 Maiden Lane, to be presented on January 10 to Assemblyman John G. Malone of Albany. The piece was in the form of a horseshoe, 14 feet in height and surmounted by two American flags. The gift was from Albany Lodge No. 49 B. P. O. E. of which the assemblyman is an enthusiastic member. The piece was made up on a frame of gas pipe, 6 feet by 14 feet, and weighed nearly 300 pounds. In its composition were Killarney roses, Enchantress carnations, pink and white sweet peas, Easter and speciosum lilies and heather. The Rosery made up also two other pieces, gifts to Assemblyman Malone. One was a harp of 250 Killarney roses with a green satin ribbon, sent by the local society of Brian Boru. The other piece was from Charles H. Mullen, proprietor of the Hotel Alta, who sent a reproduction of the front of the hotel made up of Cardinal roses and white carnations.

John Ralph, a member of the Albany Florists' club, died at his home, Woodlawn avenue, Saratoga Springs, on January 7, aged 67 years. He was well known in this locality where he lived before going into business in Saratoga about 25 years ago. He had an attack of pneumonia last fall from which he recovered but it left him with a weak heart action which proved fatal.

Officers of the National Commercial Bank were the recipients of handsome floral pieces on January 13, the day after their election.

R. D.

NEW YORK.—A. Moltz & Co., wholesale florists at 35 West Twenty-sixth street, assigned January 12 for the benefit of creditors to Edward P. Sobel.

SPRINGFIELD, MASS.—The Springfield Amateur Horticultural Society held its annual meeting January 5. Mrs. Grace Pettis Johnson was elected secretary and Joseph Aumer treasurer. A special exhibit will be held in April when the school children who won the tulip bulb prizes will show their flowers.

The continued cold weather that has prevailed here has had a bad effect upon business. The streets have been a sheet of ice for weeks, making it difficult for customers to get out. A great many had to discard their automobiles for a time. There have been quite a number of funerals and they have helped to keep the stock down, but at the end of the week there was still a surplus. Carnations started to accumulate and lower prices had to be quoted to move them. American Beauties have been in demand and prices have kept steady. Killarneys have been fair but have not moved so readily. Snapdragon sold well and some had to be cut before it was fully developed. Sweet peas are in demand and there has been an increase in the supply. Violets for some reason or other have taken a back seat. Probably it has been too cold for them to be worn or perhaps the people have not recovered from the shock of the Christmas prices and are timid about asking the prices again. Nevertheless, they remain on the shelf and a good many are remaining on the plants. Violets from California have made their appearance again and some of the retail stores are handling them.

NOTES.

Anna W. H. Kohankie, wife of Adam Kohankie, superintendent of Washington Park, died this week, and will be buried Sunday. All Mr. Kohankie's friends wish to express their sincere sympathy in his bereavement.

Thomas McDonald and Theodore Loken have taken the store recently vacated by W. C. Walters and will carry a line of plants as soon as spring opens. In the meantime they will do a general retail business.

Frank Goeschel has closed his store at 245 Broadway. E. P. N.

The Seed Trade.

American Seed Trade Association.

Leonard H. Vaughan, Chicago, President; Marshall H. Duryea, New York, First Vice-President; Edgar Gregory, Marblehead, Mass., Second Vice-President; C. E. Kendel, Cleveland O., Secretary and Treasurer. Next annual convention at Chicago, June, 1912.

VISITED CHICAGO: W. E. Marshall, New York.

CHICAGO.—Prices on the Board of Trade, January 17, for grass seed were noted as follows: Timothy, $13.50 to $15.25 per 100 pounds.—Vaughan's Seed Store is being overhauled and the changes include a new front and some new fixtures. This firm's florists' catalogue will be ready next week.

NEW YORK.—The directors of the Nungesser-Dickinson Seed Co., which has taken over the grass seed business of Henry Nungesser & Co., announcement of which was made in our last issue, are Henry Nungesser, Marshall H. Duryea and William A. Proescholdt of the old firm, and Charles Dickinson and Charles D. Boyles of the Albert Dickinson Co. of Chicago.

THE executive committee of the American Seed Trade Association met at the LaSalle hotel, Chicago, January 17, those in attendance being President L. H. Vaughan, Chicago; Secretary C. E. Kendal, Cleveland, O.; Chas. N. Page, Des Moines, Ia.; Chas. Dickinson, Chicago; Henry Nungesser, New York; Kirby B. White, Detroit, Mich.; Geo. S. Green, Chicago; C. C. Massie, Minneapolis, Minn., and S. F. Leonard, Chicago. It was arranged to hold the annual convention at Chicago in June.

Wheat, Oats, Barley and Flax Seed Bill.

ED. AMERICAN FLORIST:

Your readers may be interested to hear about the introduction in Congress on January 8, by Congressman Hanna, of a bill, H. R. 17257, reading as follows:

"That from January 1 to March 31 of each year wheat, oats, barley or flax may be imported into the United States for seed purposes only, from any of the provinces of Canada, free of duty, under such regulations and rules as may be prescribed by the Secretary of the Treasury."

CURTIS NYE SMITH.

President Vaughan.

President Leonard H. Vaughan of the American Seed Trade Association is probably one of the youngest men who has ever occupied this important office. For several years he held the position of assistant secretary and became very popular with the trade, so much so that notwithstanding his comparative youth numerous friends insisted on his taking the presidency and accordingly he was elected at the Marblehead convention last June. The dignity sits lightly upon his shoulders but his wide knowledge of the business in its many ramifications commands the respect of even the veterans.

Leonard H. Vaughan, Chicago.
President American Seed Trade Association.

Leonard H. Vaughan is the second son of J. C. Vaughan, the well-known head of Vaughan's Seed Store, Chicago and New York. Born in Chicago in 1881, he was educated in the public schools of that city, graduating from the Marquette high school in 1895 and then entered the Armour Institute, graduating in 1899. Afterwards he spent six months at the University of Chicago and entered Cornell University in 1901, graduating in 1904. He spent a season at the nurseries of the Storrs & Harrison Co., Painesville, O., and toward the close of his graduation year entered his father's business and speedily mastered the practical details of the vegetable and field seed departments. He is now in charge of these branches of the business as well as the firm's trials and growing crops and is well informed on all lines of the business, including the nursery and greenhouse departments.

In 1905 he married Miss Anita Wilkens and accompanied by his wife made an extended tour of the European seed centers that year. While at college he distinguished himself as an athlete and he is now an enthusiastic bowler with many important victories to his credit.

A Load of Timothy Seed.

A wagonload of timothy seed from the C. H. Cooper place was the most valuable load ever brought to this market. The net weight of the load was 4,370 pounds, and at the market price of timothy seed was worth $1,092.50. It was thrashed from the hay of about ten acres.

Mr. Cooper figures that enough seed was lost in harvesting to reseed the ground from which it came. Mr. Cooper is an invalid and is unable to leave his chair, and his field work must of necessity be left to others. The seed represented only a small part of the returns from the farm.—MINNEAPOLIS JOURNAL.

IT is stated there were 128 Dutch bulb salesmen in New York last week.

ANT. C. ZVOLANEK, the sweet pea specialist, of Boundbrook, N. J., has gone to California.

We control the originator's stock of

THE NEW TYPE

KUNDERDI "GLORY"

WITH "RUFFLED" PETALS

The broadly expanded, wide open flowers, paired by twos, all face in the same direction and are carried on straight stout stalks, fully 3½ feet. From three to eight of these handsome flowers are open at one time. Each petal is exquisitely ruffled and fluted.

The color is a delicate cream pink, with a most attractive crimson stripe in the center of each lower petals the shade of which is unique in Gladioli. The ruffling o the petals in this new strain has attracted much attention the country over.

Special prices with free cuts, for catalogue use.

Per 100, $7.50. Per 1000, $70.00

Gregory's Honest Seeds.

Vickery's Forcing Cucumber. The finest strain of hot-house cucumber ever introduced. Mass. growers prefer this to all others. Nothing but typical specimens are selected for seed. Every seed grown on our own farm and you can depend upon its being absolutely pure. Wright Brothers, Toledo, Ohio, write "We know the Vickery Cucumber is fine as we have grown it for three years in our greenhouses. Price per ¼ Lb., **$1.30**; per Lb., **$5.10** postpaid.

Some of Our Choice Goods all Grown on Our Own Farms:

Gregory's Improved Prolific Marrow Squash. Gregory's Warren Turban Squash. Gregory's Victor Squash. Gregory's Warted Hubbard Squash. Gregory's Improved Original Crosby Corn, superior in quality, nothing equal to it for canning purposes. Quincy Market Corn, a second early, recommended as being the best to follow the extra earliest.

Our catalogue will be mailed free. It tells all about the above varieties.

Special Prices Given for large quantities.

Washington

Dark Pink Sport of Enchantress, Like All the Other Members of the Enchantress Family, the Best in Their Respective Colors

Washington is the only variety sent out last year that was shown extensively at the Flower shows this year, and the only second year novelty shown in the Hundred Class; wining **First Prize** over all standard varieties.

Washington like Enchantress, is easy to handle and brings satisfactory returns to the grower.

Washington is a strong, healthy grower; the foliage is much darker than the Enchantress. Strong, well rooted cuttings ready January 1, 1912. $6.00 per 100; $50.00 per 1000.

WASHINGTON, THE VARIETY THAT HAS MADE GOOD

OTHER LEADERS

White Wonder, exceptionally free, fine large flower; good stems. $6.00 per 100; $50.00 per 1000.

Gloriosa, medium pink, very fine flowers on good stems. $6.00 per 100: $50.00 per 100.

Pink Delight, flesh pink, the best keeper of any carnation grown. $6.00 per 100; $50.00 per 1000.

Bonfire, scarlet, very bright, long strong stems. $6.00 per 100; $50.00 per 1000.

Christmas Cheer, scarlet, very free. $6.00 per 100; $50.00 per 1000.

Pricess Charming, large flesh pink, long heavy stems, very fine. $6.00 per 100; $50.00 per 1000.

Diseased Lettuce.

ED. AMERICAN FLORIST:

We had a bed in the greenhouse badly infested with eelworms, so applied a dressing of slaked lime, kainit and muriate of potash in equal parts and spaded it in lightly. The lettuce plants were then set and they were watered freely. After 10 days some of the plants wilted and a few days later all of them died. In digging up the plants we found the fiber roots yellow as if they were burned. Could it have been the muriate of potash which caused it D. W.

Michigan.

There is no doubt whatever that the application of muriate of potash and kainit proved disastrous to the lettuce plants in this case. Both ingredients carry considerable salt, especially the kainit, and salt in any quantity is very injurious to most plants. In our opinion both muriate of potash and kainit are unfit for greenhouse purposes. These elements are used extensively in field practice, and then they should be applied in the fall or during winter, or at least very early in the spring—a long time before the crops are planted—thus giving the elements time to be dissolved and distributed by snows and heavy rains, besides the powerful mixing of horse tools as generally used in field practice.

There are good authorities who condemn the use of chemicals entirely for indoor cultures; however, we have used some forms extensively and with the best results. Our methods have been described from time to time in these columns, and for the benefit of "D. W." we will repeat the main part: We use fertilizers only as such and not to eradicate insect pests. For nitrogen we employ nitrate of soda; for potash, sulphate of potash; for phosphates, preferably Peruvian guano, second choice, finely ground bone meal or flour. We compound our mixture to carry as near as we can 12 per cent potash, 10 per cent phosphoric acid and from four to six per cent nitrogen. Although we know pretty well what to expect from our chemicals we make it a rule in greenhouses, hot beds or lettuce patches in the field, to never apply before planting. We use spent hotbed manure to prepare the beds for planting, and after our plants are under way and growth has commenced we top dress with the chemicals. Thus the roots have a long start and the fertilizers being at the surface, they are leached out slowly and therefore no harm is done. We know of cases where a good application of wood ashes preparatory to planting so stunted the lettuce as to cause total failures. As regards amount of application, we have never suffered any damage from heavy dressings, even as high as 2,000 pounds per acre, but would advise anyone to use much less at first.

In all our experience we do not remember a case where insects in the ground did destroy a lettuce crop or threatened to do so, hence we are not posted along that line. However, if such a case would occur to us, we would use steam or hot water to kill our enemies by scalding them rather than chemicals.

To sum up, we know from long experience that transplanted plants start with difficulty, if at all, in any caustic material, be it lime, salt or the common forms of fertilizers.

MARKETMAN.

Growing Onions From Seed.

In northern Indiana many hundreds of acres are annually devoted to the growing of onions from seed, and the methods employed are described in a circular issued by the Purdue University Agricultural Experiment Station. The land used is black muck, well drained, a topping dressing of several tons of barnyard manure is applied in the spring, the land being plowed and thoroughly harrowed and rolled, making as fine a seed bed as possible, and while the ground is being fitted to plant the seed 500 to 1,000 pounds of commercial fertilizers added per acre. The varieties grown are almost wholly the globe type and the seed is sown as soon as all danger of frost is past and the ground thoroughly warmed in the spring. This is mostly done by hand drills, the rows being 11 to 14 inches apart, the seed being planted from three-fourths of an inch to two inches deep. The amount of seed varies from three to five pounds per acre for red and yellow varieties and from five to seven pounds of white.

In growing onions a large amount of hand labor is required, and a constant and vigorous fight against weeds is necessary. The wheel hoe can be used between the rows but hand work must be resorted to to keep down the weeds in the row. Boys are usually the help employed, and it is important to keep ahead of the weeds. It costs less to keep the crop clean than to get it clean after a little neglect. There is probably as much loss resulting from not doing the hand weeding as soon and often enough as from any other single cause.

The ripening of the crop can be determined by the falling down and withering of the tops and then the onions are pulled and thrown together in a windrow, the bulbs all one way, where they are allowed to cure for a few days and then topped with sheep or lawn shears, an inch or slightly less of the neck being left on the bulb. Some growers cure in sheds which takes about two weeks longer. They are then crated or stored until wanted for market.

The Nursery Trade

American Association of Nurserymen
J. H. Dayton, Painesville, O., President; W. H. Wyman, North Abington, Mass., Vice-President; John Hall, Rochester, N.Y., Sec'y.
Thirty-seventh annual convention to be held at Boston, Mass., 1912.

NEW BRUNSWICK, N. J.—The Bound Brook Nurseries have incorporated with the following officers: E. P. Bryan, president; Henry Schnitzspahn, vice-president; E. P. Bryan, Jr., treasurer; A. W. Bryan, secretary, and have acquired the property of the Wadley Nurseries. The store in Plainfield will be known as the Plainfield Flower Shop.

American Association of Nurserymen.

The thirty-seventh annual meeting of this organization will take place in the historic city of Boston, Mass., June 12, 13 and 14 next.

We are advised by Secretary Hall that the committee of arrangements has selected the Hotel Brunswck, one of Boston's most famous hostelries, as headquarters. Reasonable rates for members, and splendid accommodations have been offered by the hotel management, and the resident members of the committee are satisfied that the arrangement is an excellent one and will please the members.

It is generally believed that this gathering of the American Association will be as largely attended as any previous one, indeed, some are sanguine enough to predict that the attendance will exceed that for several years past. Boston is an attractive city, and possesses many charms for members aside from its numerous historic buildings and associations, and members living in the extreme west will doubtless make this a holiday vacation event. It is expected that the western railroads will offer excursion rates which will be more advantageous to members than the very limited reduction offered under the certificate plan, which does not commend itself to the committee on arrangements.

The programme will be arranged by Charles J. Maloy, Rochester, N. Y., which ensures something good, and A. E. Robinson, Bedford, Mass., is chairman of committee on exhibits. Those intending to exhibit should lose no time in getting into communication with the last-named gentleman. The chairman of the committee on entertainment is J. Woodward Manning, of North Wilmington, Mass., and members need have no anxiety about this feature of the occasion.

The vice-presidents of the various states are reminded that at the last convention at St. Louis they were to be considered as a committee for procuring a substantial increase in the membership of the association, and it is hoped that each vice-president will feel his responsibility to secure from one to half-a-dozen new members from his state.

Secretary John Hall will be glad to give any possible information to those who will address him at 204 Granite Building, Rochester, N. Y. He also suggests that patrons of the Badge Book will do well to make early preparation for space in the same.

Rose Genevieve Clark.

Jackson & Perkins Co. of Newark, Wayne county, N. Y., have named the rose of which they bought the stock of Peter Lambert, Trier, Germany, the originator, Miss Genevieve Clark, in honor of the daughter of Congressman Clark, speaker of the House of Representatives. Mr. Perkins saw the variety when at Mr. Lambert's place several years ago and bought the entire stock. It is a bush rose, light pink in color, except where the petals are shaded by the petals above; underneath the color is a delicate pink almost a white, making a very pleasing novelty, state the growers. The bush is of compact and free blooming habits and will make a good bedding rose, but the firm is most impressed with its value as a forcing variety or a pot plant for early spring blooming. It is being tried by a number of florists this season to ascertain its value and popularity.

Dust Laying With Calcium Chloride.

The highways department of the city of Leeds, England, states Vice-Consul Charles E. Taylor, has recently treated portions of a macadam roadway with granular calcium chloride to combat the dust. Solutions of the same had previously been tried at greater cost and without such satisfactory results.

The road is first well swept and two applications of the chloride are made on succeeding evenings, of about one-half pound per yard, at a cost of about $0.008 per square yard. From personal observation the writer notes the following: July 19, first application; July 20, rain; second application; July 21, dry breezy day, no dust; July 24, no dust; July 25, heavy thundershowers; July 31, no dust, after a few days of very hot weather; August 9, road in good condition, chloride seems to act as binding; August 10, stiff breeze, but no dust; August 14, road still in good order. The ordinary sweeping of road was carried on.

PHILADELPHIA, PA.—C. F. Rau has been granted permission to erect a greenhouse on Wyoming avenue.

MELROSE, MASS.—At the meeting of the Melrose Horticultural Society held January 8 it was decided to hold a rose show June 22 and the fall exhibition September 14-15.

ARLINGTON, MASS.—The citizens at a special town meeting voted to accept the proposal to lay out an ornamental garden to be a memorial to Winfield Robbins which was offered by his relatives.

LYNN, MASS.—The annual meeting of the Houghton Horticultural Society was held January 3 and the following officers elected: Frank L. Whipple, president; Elmer E. Boyer, first vice-president; Lillibridge K. Blood, second vice-president; Edwin L. Newhall, secretary. A collation was served after the meeting.

PITTSFIELD, ME.—A. J. Loder has installed a new boiler in his greenhouse and is completing arrangements to erect another house in the spring. He also conducts a branch store at Bangor.

OIL CITY, PA.—The packing and storeroom, boiler house and ends of the greenhouses of P. S. Ingham were destroyed by fire January 5, and the plants in the houses practically all lost.

MIDDLETOWN, CONN.—Antoine Olson has purchased the Beebe greenhouses on Ferry street of H. J. Koehler and held an opening January 11. Mr. Koehler will continue his Durham avenue greenhouses.

ST. LOUIS, MO.—A temporary injunction restraining Richard Frow from permitting dense smoke and noxious vapors being emitted from the smokestack of his greenhouse was granted by the Circuit Court.

HOLYOKE, MASS.—Gallivan Bros. are making preparations to erect two greenhouses, each 35x200 feet, at Smith's Ferry. They intend to grow chrysanthemums extensively and one of the houses will be devoted to this flower.

NEW ROSE—The Finest Polyantha of the Season

"Angers Rose"

(Polyantha 1911, Dwarf Perpetual.)

Seedling from **Marie Pavie,** the parentage of which is unknown, conserves from the former its extreme floweriness, but with blooms much more double; petals very close; of a beautiful fresh pink, good bearing; and opening at all times without any discoloring.

The branches, clear green, are but slightly thorny, stiff, with rather dark foliage; the flowers are supported in clusters by a strong red stalk.

This splendid variety will be classed in the front rank for pot culture and border decoration on account of its abundant blossoming, which is continued until frosts.

Each, $1.00; per 10, $6.50; per 100, $6.00.

F. DELAUNAY, "The Nurseries," **Angers, France**

Washington.

COLD WEATHER A DETRIMENT TO BUSINESS.

Yes, the weather is cold. What for this latitude may be called a real blizzard came bowling along on January 5. All day there was a fierce wind with about 16 degrees of frost. The sunshine had some effect on glass during the middle of the day, but toward evening temperature began to slide down at an alarming rate. We say alarming because more than one florist began to have forebodings of a freeze-out and well they might. At some places it was an all-night battle to keep out the frost, the temperature going near zero. While some damage was done it does not appear from present reports that it is as serious as might have been expected. Up to this time we had practically no winter weather and the cold wave hit hard. Although it has been said before it is worth repeating that no grower should be lulled into a state of unpreparedness by warm weather in winter, the cold is almost sure to follow. As a matter of course the weather has had a detrimental effect on business, and aside from the inconvenience and danger of transporting stock counter trade has fallen off. As an instance of this the Centre Market florists, usually busy on Saturday nights, were practically all closed at 8 o'clock on the evening of January 6. Speaking facetiously, the only persons in Washington who are not affected by the blizzard are the members of the Democratic National Committee and other leading lights of the democracy now assembled here. They have been out in the cold so long that it does not seem to affect them, and besides, grinding axes and tomahawks for the meeting and dinner of January 8 is fine exercise.

January 15.—The intense cold has now continued for more than a week with but slight variations for the better; in other words, the mercury has gone upwards and downwards, but mostly downwards. On the night of January 14 and morning of the 15 thermometers in different parts of the city registered from 13° to 18° below zero. The weather bureau reported it 13°, while in the Anacostia section, where the Gude Bros. Co., A. B. Garden and F. H. Kramer greenhouses are located, it was 16° to 18° below zero. The remains of the last snowstorm had not altogether melted off the greenhouses, which was some slight assistance in keeping out the intense frost, but inside temperatures ran low despite the hard work of the firemen. During the past week almost daily reports have come in of plants and cut flowers being frozen in transportation from the stores to points of delivery. One dealer said: "They freeze going from the store down to the wagon," and that is correct. The intense cold has quite naturally cut a big hole in transient or counter trade. Many of the prosperous middle class who in milder weather would buy flowers are now intent on buying coal, and wondering how many more tons it will take to put them through. Notwithstanding the intense cold the supply of flowers keeps up better than might be expected. This is quite noticeable in carnations which have dropped in price. As a matter of course, the various social events continue and there is a lively business in decorating work.

W. F. Gude had planned to go to Detroit but was unavoidably detained at home by the business of a commission of which he is a member. O. A. C. Oehmler represented the firm at the show and the members are well pleased that they remain the holders of the Dorrance prize.

NEW HAVEN, CONN.—Permission has been granted H. A. Grove to erect an additional greenhouse at his place on Cannes street.

THE BOOK OF GLADIOLUS

THE first authoritative book on this bulb ever printed in America, or possibly the world, issued April 1, 1911. This 120-page book, written by Matthew Crawford and Dr. Van Fleet, contains many chapters covering all sides of growing, propagating storing, etc., and also some pages of valuable cultural notes gathered from reliable sources. A necessity for both amateur and grower. The book is bound in cloth and fully illustrated.

Omaha.

The business at Christmas and New Year's was good, better than in 1910. The sales were much larger during Christmas week than in the same week of the previous year, but potted plants did not bring the prices they did last year. Azaleas were poor. Begonia Gloire de Lorraine is on the decline, selling better in made-up baskets than in pots. Ferns sold especially well; so did palms, araucarias and pandanus. Holly was of poor quality and very disappointing. Magnolia wreaths had a good sale. Roses and carnations sold well and were plentiful. Roses sold from $2.00 to $5.00 a dozen, carnations $1.00 to $1.50. In former years carnations brought $1.50 to $2.00 per dozen. American Beauties were extremely scarce and sold from $15.00 to $18.00 per dozen. The weather was ideal and a great help for the florists. Since January first business has been very dull, caused, no doubt, by the extreme cold weather. Potted plants in bloom are a drug on the market. One satisfaction that we have in this part of the country is that coal is 10 to 20 cents per ton cheaper than many years before.

NOTES.

The State Horticultural Society will hold its winter meeting at Lincoln, Neb., January 18. Prizes will be awarded for roses, carnations, violets, etc., and essays will be delivered by C. H. Frey, Lincoln; Chas. Green, Fremont; L. Henderson, Omaha, and Irvin Frey, Lincoln.

The back is a mottled green paper especially imported from Germany. The illustration is wonderfully life like in five colors. The pad sheets have an under printing of flowers and different greenhouse subjects.

One of These Calendars is Laid Aside For You.

LAST year, after we had sent out that rather unusual three-fold calendar of ours, with its beautiful brown photographic reproduction of a greenhouse at the top, and a five-colored rendering of a show house filled for Easter, at the bottom—we received a flood of complaining letters.

Not from those who received the calendars—but those who didn't.

When you walk into a friend's house and see one of our calendars hanging on the wall, and you haven't received one, naturally enough, as a good customer, you wonder why you have been left out. Some take it as a mistake and let it go at that. But others write in and act as if they thot we did it on purpose. The truth is, we wanted all of our friends and most of our enemies to have one last year. So this year we have taken extra pains to see that your name, along with the rest, is on the list to be sent our 1912 calendar.

But to make doubly sure, won't you kindly drop us a postal saying you want one and I will see to it myself that it is mailed to you. This will obviate all chances of your not getting one.

P.S. Its even better than last years and that's saying a good deal

Approved Methods of Semi-Iron Construction.

The new ideas embodied in George M. Garland's discourse before the Chicago Florists' Club, have awakened much interest among the trade, and much discussion on his innovations has been the result. Mr. Garland's ideas, while set forth lucidly in his essay, are clearly shown pictorially in the accompanying illustration, which is from a photograph taken during the period of construction of the Adolph H. Poehlmann ... at ... last summer. This is a range of six connected houses, each twenty six feet eight inches in width and 200 feet long. The plans were prepared by Mr. Garland and embody the ideas for which he stands. The cost was approximately $18,000 for the houses, complete with piping, but without service buildings or boilers, the boiler house and heating apparatus having been installed with the view to handling more than double the amount of glass in the present range. It will be observed that the iron gutters are set six feet above the ground, on 2-inch wrought iron posts which are, in turn, set in 6-inch post holes two and one-half feet deep and filled with cement.

The houses run east and west, and the south sash bars are fourteen feet long and those on the north sixteen feet, which results in very little shade. Each house contains four 5-foot benches and four 20-inch walks, and Mr. Poehlmann figures that the saving in room by the use of this method of construction is approximately 4,500 square feet of bench service, or, in other words, it would have been necessary to put up 4,500 feet more glass to obtain the same bench surface had the old style wooden construction been employed. It will be observed that in these houses the benches appear to be very deep, and, as a matter of fact, the side boards are of 8 inch material. However, they extend but five inches above the bottom planking.

One season's experience with these houses has confirmed Mr. Poehlmann's belief in their right method of construction, and he is already contemplating the extension of the range after the same plan.

KENNETT SQUARE, PA.—Monroe Palmer is planning a modern dwelling for himself near his greenhouses, in the southeastern section of the city.

TRUTH REVEALS ITSELF

THE illustrated article on the opposite page, which appeared in THE AMERICAN FLORIST on page 955, issue February 16, 1901, shows that we were 12 years ahead of the time with this construction. After 12 years of practical demonstration, other manufacturers are advertising that the Poehlmann Bros. ranges and other prominent growers too numerous to mention have built ranges of their construction. We wish to announce however that these houses are of **Garland construction,** and that said manufacturers are merely furnishing part of the material, the houses themselves being erected on Garland Cast Iron Gutters and of Garland ideas.

It would be well for the formation of an association similar to that now in vogue in New York to require an official stamp of approval so as to prevent the misrepresentation in advertisements of ideas which rightfully belong to others.

OUR PROGRESSIVE IDEAS

Which were 12 years in advance, have continued to grow and if you wish to be up-to-date 12 years hence, you should place your order with us today.

Our construction was ridiculed by our competitors 12 years ago and today you find them stealing our thunder.

GARLAND IS SECOND TO NONE

When it comes to furnishing large ranges. **One of our last orders being for 220,000 square feet of Garland Trusted Iron Frame Construction for Mr. O. C. Barber, of Barberton, Ohio.**

It will pay you to get our descriptive literature and estimates before you place your next order. **Write to Lock Box S Today.**

WHAT THE USERS SAY ABOUT KROESCHELL BOILERS

The above range of Mr. Nic. Zweifel, North Milwaukee, Wis., heated by No. 14 and No. 15 Kroeschell Boiler and Generator System.

60,000 sq. ft. of glass carried by No. 15 Kroeschell Boiler==No Trouble to maintain temperatures in coldest weather.

I am heating 60,000 sq. ft. of glass with Kroeschell Boilers and expect to heat another house with same boiler capacity. I have not the least trouble in maintaining 50° to 54° in the coldest weather.

USE LESS COAL THAN OTHERS.

In comparing my place with others, we use less coal than anyone I know of, and it is a regular snap for the firemen to do the work with Kroeschell Boilers.

Combining the Kroeschell Piping System, Kroschell Boilers and Generator, it is really a pleasure to heat my place.

NIC. ZWIFEL, North Milwaukee, Wis.
